ESTABLISHED IN 1896

M. A. C. Cannot Live on Her Past—What Will You Do for Her Future?

Entered as second-class matter October 30, 1916,
at the post office at East Lansing, Michigan,
under the Act of March 3, 1879.

Published every Friday during the College Year
by the Michigan Agricultural College Association.

E. W. Ranney '00, Greenville • Pres.
H. C. Pratt '09, Lansing • Vice Pres.
W. K. Prudden '78, Lansing • Treas.
J. B. Hasselman, East Lansing • Acting-Editor

Members of Executive Committee.

Elected at Large:
C. S. Langdon, '11, Hubbardston.
A. C. Anderson, '06, Flint.
Mrs. Helen Esselstyn Wood, '09, Lansing.

MEMBERSHIP IN THE M. A. C. ASSOCIATION
which includes subscription to the Record, $2.50 PER YEAR.

Make Remittances payable to the M. A. C. Association.

Unless members request a discontinuance it will be assumed that a renewal of membership is desired.

THE M. A. C. RECORD
The college president's office, in the Library Building, is being remodeled for President Friday. Permanent walls in place of the old temporary partitions are being installed, and the rooms are being redecorated. President Friday is holding temporary offices in the college residence formerly occupied by Secretary A. M. Brown.

The annual Y. W. C. A. Carnival was held in the Woman's Building last week. Various side shows and concession stands provided a wealth of entertainment for the crowd of visitors, and at the same time returned a generous profit for the Y. W. girls.

Edith Allan, well known American soprano, will give a concert in the auditorium of the East Lansing People's Church on Monday evening, April 17, under the auspices of the M. A. C. Woman's Club.

Stunt and fancy riding will be part of the regular work for the cavalry squadron of the college military forces this spring. Officers in charge expect to turn out student horsemen capable of putting on real 'wild west' performances by the time of the annual military field day, late in May.

A special course of instruction for men who will compete for places on the livestock judging team which will represent M. A. C. at the International Livestock Show, in Chicago next fall, is being given by the animal husbandry department during the spring term.

Men interested in soccer football reported to Jack Heppinstall, of the athletic department, early in the week to consider the advisability of organizing work in the old English sport at M. A. C. Heppinstall played the game extensively in the old country, and feels that there is room for soccer in the athletic program at the college.

Work in potato experimentation and test, formerly handled under the college horticultural department, was transferred to the farm crops department at the last meeting of the State Board of Agriculture. The feeling that potatoes were more nearly a field crop than a horticultural product led to the change, it is understood.

A forestry experiment station in Michigan is a possibility for the near future, according to A. K. Chittenden, head of the M. A. C. forestry department. Legislation pending before congress at the present time calls for the establishment of a Federal station in the Lake States, and Michigan is considered to have an excellent chance of securing the location. The college department is aiding the project actively.

The college department is aiding the project actively.
President Friday Outlines Policies
In Luncheon Talk.

Outlining his ideals for college education and enumerating certain phases of the program he intends to push at M. A. C., President David Friday addressed the Central Michigan Alumni Association at a luncheon in Lansing last Monday. About a hundred members of the Association, including a number of men from the college staff, were in attendance.

Of chief interest to alumni was President Friday's announcement of courses in Engineering Administration, to be made effective at M. A. C. in the fall of 1922. That the present tendency of engineering graduates is to veer off from merely technical lines, taking up matters of production, distribution, and selling in a broad way, was brought out in the talk. Recognition of this fact must come to engineering colleges, and that M. A. C. will assume a distinct field of leadership was indicated by the President.

About three-fourths of the work in the new courses will be technical, leaving about twenty-five per cent for courses in economics, accounting, banking, and other "business administration" work. Dean Bissell and President Friday are working out the details of the new course, with the cooperation of the engineering faculty.

The matter of investigational work in fields of agricultural economics was the second question touched by President Friday in his talk. Pointing out the lack of definite information on agricultural conditions in the country, Friday indicated that M. A. C., within a period of three to five years, hopes to know more about the economies of agriculture than any other agency in the country.

"Shifts in the ratio of city and farm population in the state have made Michigan largely an importing state, as far as farm products are concerned," said President Friday in discussing the agricultural situation. "With the exception of potatoes, beans, sugar beets, fruit, and one or two other crops, Michigan must now be classed as an importing state.

"A readjustment of state agriculture must take place, and it will lie the business of the college to keep the farmers of the state a year or two ahead of changing national and world conditions."

"A college man, no matter how technical the particular course he is studying, must be educated in fields of literature, history, and political philosophy," said Friday. "If the American college does not turn out 'High-Brows, in the sense of broadly educated, intelligent men and women, it is a failure. We hope to set high standards and to open new fields of leadership at M. A. C.'"

Southern California Association to Meet.

The M. A. C. Association of Southern California will hold its annual meeting at Jalynke's Tavern, 524 S. Spring St., Los Angeles, on Friday evening, April 21. The meeting will be in the nature of a dinner dance, beginning at 7:30, according to E. E. Nies, secretary, who sends in the announcement. Special stunts will be provided for those who do not dance. The tax is to be $2.50 a plate. Every former M. A. C. student in the district is urged to attend.

Field Agent Plans Long Trip.

Norm Weil, '17, college field agent, is to leave East Lansing on April 18 for a seven weeks' trip which will take him to high schools scattered all over the lower peninsula of the state. More than seventy high schools are listed on the itinerary for personal visits, while many others will be reached indirectly through contact with alumni in the various districts. Weil will travel in a Ford, making quick "jumps" possible.

Feeling that alumni can do much for the interests of the college by cooperating with the field agent at the time of his visits to the different towns and cities, the Record is publishing below the complete itinerary.

April 18, a. m. Howell, p. m. Plymouth; 10, a. m. Monroe, p. m. Adrian; 20, a. m. Hillsdale, p. m. Jacksonville and Litchfield; 21, a. m. Quincy and Coldwater, p. m. Burr Oak and Sturgis; 24, Union City and Colon, p. m. Three Rivers; 25, a. m. Niles, p. m. Three Oaks; 26, a. m. Benton Harbor, p. m. St. Joseph; 27, a. m. Watervliet and Hartford, p. m. Bangor; 28, a. m. South Haven, p. m. Allegan and Plainwell; 29, a. m. Holland, p. m. Grand Rapids Union.

May 1, a. m. Grand Rapids South, p. m. Grand Rapids Central; 2, a. m. Grand Haven, p. m. Muskegon; 3, a. m. Shelby, p. m. Hart; 4, a. m. Pentwater, p. m. Ludington and Scottville; 7, a. m. Deckerville, p. m. Bad Axe; 24, a.
ATHLETICS

Olivet Cancels—Kalamazoo Comes on April 19

Olivet College canceled her engagement to open the M. A. C. baseball season at East Lansing on April 8, inclement weather making it impossible for the coaches to whip a team into shape for the early game. This cancellation leaves the Kalamazoo College game, at East Lansing April 19, as the official curtain-raising engagement for the year.

Coach John Morrissey and his charges expressed regret over the failure to play last Saturday, when the M. A. C. squad itself was far from ready for an inter-collegiate contest. A practice game with a team of Lansing independent players was substituted, the Green and White tossers taking the long end of a 10 to 6 decision after eight innings of erratic ball.

Johnson, Ross and Kuhn each took a turn in the box and showed that they have lost none of the pitching ability which made them a feared trio of college tossers last year. None of the men “cut loose” at all, but each showed nice control for so early in the season and gave promise of coming along rapidly.

The infield combination, a puzzle two weeks ago, looks better with each practice session. Daley is traveling well at short; Fullen is holding down his old job at second in good shape, while Schwartz, Mellencamp, Higbie, Sepanek, and two or three others all show promise of real infield ability.

Brady, a former infielder, and Stevens, an outfielder, have worked behind the bat in an effort to plug the hole there, and both look fairly good, with prospect of satisfactory development.

Many Colleges Building Stadiums

Unusual activity in the erection of athletic stadiums has manifested itself among American colleges and universities during the past few years. In view of the general alumni interest in the possibility of a future stadium at M. A. C, the following item from the Intercollegiate News Bureau may be of interest to Record readers:

“American universities which have completed athletic stadiums within the decade, or have provided for their construction, include California, Ohio State, Yale, Illinois, Stanford, Chicago, Washington, Princeton, Kansas, Pittsburgh, and the City College of New York. Of these, Yale’s stadium cost $400,000 and seats 70,000; Illinois is spending $900,000 to seat 60,000; California is spending $300,000 to seat 60,000; and Ohio State is spending $600,000 and seats 70,000; Washington spent $600,000 and can seat 60,000; California is spending $300,000 to seat 60,000; and Ohio State raised $1,250,000. No stadium yet completed has been large enough to meet the immediate demand for seats. These facts, together with the recent discussion by President Lowell of Harvard University, on the relationship of inter-collegiate athletics to the university, indicate two opposite trends which are likely to clash in the future.”
THE M. A. C. RECORD

Dr. Beal, M. A. C.'s Grand Old Man, Receives Many Congratulations on Eighty-ninth Birthday

Dr. William James Beal, the "Grand Old Man" of M. A. C, celebrated his eighty-ninth birthday on March 11, 1922. Connected with the Michigan Agricultural College since 1870, the year he came to the college as a lecturer in botany, Dr. Beal has come to symbolize the very spirit of the institution.

Known to more alumni and former students than probably any other man, he is held in esteem and reverence seldom accorded any living educator. The entire M. A. C. family is justly proud of Dr. Beal, and all rejoice with him as he reaches the milestones in his life of singular usefulness and inspiration.

Many alumni and former associates of Dr. Beal remembered him on his recent birthday with messages of congratulation and friendship. In fact, the letters received are remarkable in their scope, covering a range of alumni reaching from the "early days" down to the present generation.

Ray Stannard Baker, '89, gathered together a budget of the letters at Dr. Beal's Amherst, Mass., home and forwarded them to the Record. Feeling that M. A. C. people over the entire half century of Dr. Beal's connection with the college would be intensely interested in this "budget of M. A. C. news," as Mr. Baker expresses it, we are publishing the letters in this issue as a testimonial to the "Grand Old Man."

"The letters show how much real feeling and enthusiasm there is for the old times," says Mr. Baker in his letter. "Dr. Beal keeps in wonderful health and in good spirits. He is entering his ninetieth year with serenity."

My dear Dr. Beal:
If I am not mistaken your birthday will occur on the eleventh of this month, three days before mine. Is it 89 or 90? However, that is a small matter. The important thing is the fact that you are, I trust, still enjoying good health, and are able to look back upon so many years of usefulness and helpfulness to your fellow man.

I am glad that I have this opportunity of extending to you most hearty congratulations on the return of this happy event and we all hope and trust that there are many more in store for you.

From one of the many old students at M. A. C.
Most cordially yours,
J. Troop, '78.
Professor of Entomology.
Purdue University, Lafayette, Indiana.

My dear Friend and Teacher:
Somewhere about this time of year, I remember, the calendar shows another landmark, and it must be near the ninetieth. As my mind reverts to your birthday and the age which the Good Father has seen fit to bestow upon you, it also goes back to the old times at M. A. C. when I was a younger in the classes and you were giving us something of botany. I remember, too, the old days down on the flatiron. It is all a long time ago; much longer than it seems when we consult the almanac. Many things have happened since that time, and among them, we have drifted far apart with many miles between us.

This is my last year of University work, and I, too, shall become a private citizen on my farm in Woodland, Michigan. After we get to living there, I hope to have the opportunity to renew some old acquaintances; and it is not among the impossibilities that I may turn up some day as far east as Massachusetts.

Our daughter is married and lives in Geneva, New York, where her husband holds a posi-
My dear Prof. Beal:

Now much better, after five years of sickness. and he could stand as long a walk as I could.

On the next one comes.

He is hale and hearty. He came from Iowa the same good health as they go, and until same birthday, and same age as yourself, and have the very best of health, to enjoy each other. May your memories of those days be pleasant. May the knowledge that you have started so many young minds in the right direction be your reward. We all honor and respect you for the care and pains that you took to impress our minds in the way they should go.

With hopes of many happy returns of this day please accept my best wishes.

Very respectfully,

Victor E. Bailey, '81.

Corvallis, Oregon.
he will be as successful in the President's chair as he has been in other things.

I saw the Davenports at Urbana, Illinois, last winter on the occasion of the installation of President Kinley. They were insisting that they would leave the University at the end of this year. I have heard nothing to the contrary since.

My family is as well as usual. I have one son eighteen years old who is a sophomore in the University.

I hope some day to see you again in Amherst. Remember me to Mr. L. H. Butterfield, President Butterfield, and to Mr. and Mrs. Baker.

My very best wishes for your good health and happiness for many years to come.

Very sincerely yours,
E. A. Burnett, '87.

University of Nebraska,
College of Agriculture,
Lincoln.

Dear Dr. Beal:

If my memory serves me right the eleventh of March will mark another milestone for you in your century run which many of us believe you are quite likely to accomplish.

It is now something over thirty-three years since I left your department but the training and inspiration that I received under your past guidance are as fresh in my mind as they were on the day following. Whatever service we boys have been able to render in the field of scientific agriculture has been largely due to your own efforts.

I take the greatest pleasure in extending you greetings appropriate to the occasion and trust that I may have the opportunity of doing so many times more. With kindest personal regards, I am.

Very truly yours,
C. B. Waldron, '87.
North Dakota Agricultural College,
Agricultural College, North Dakota.

Congratulations and best wishes for your health and happiness on your eighty-ninth birthday.

L. A. Clinton, '80.

(Telegram) New Brunswick, N. J.

My Dear Friend:

I greet you on your eighty-ninth birthday. You ought to be a very proud young man. I am sure that if you could appreciate, as do your friends, the greatness of the services you have rendered to the world, you would be bursting with pride on this your birthday in the year 1922.

Who can measure the continuous and continuing influence and power set in motion by a good man, a wise man, and a man of knowledge?

I want you to know that on more than one occasion you had a great influence upon my life, and I hereby acknowledge my deep gratitude to you for your wise counsel.

You have of course forgotten the circumstance, but some time in the year 1893 after Burnett and Holden had been quietly asked to sever their official relations with the Department of Agriculture at M. A. C., and later Mr. P. M. Harwood, now of your state, was likewise quietly separated from his position by the all-wise Board of Agriculture, I returned from erecting the exhibit of the institution at the Chicago World's Fair. I was placed in charge of the Department by President Cluts and for many months I did all the teaching that was done, which admittedly was small in quantity and mediocre in quality, and all the investigational work and all the supervision that was given to the College Farm.

All of this I cheerfully attempted at the then munificent salary of $500 a year. I was somewhat discouraged and disheartened at the great burden and the apparent lack of appreciation on the part of the Board of Agriculture. I had about decided to resign and go back to my farm. Before actually coming to this point, however, I came to you and told you all about it, and with your usual wisdom you suggested that I go slow in such an important matter—that in your opinion a man could not continue to do what I was trying to do without having it appreciated sooner or later.

Whether my conversation with you was reported to the Board or not, I do not know, but I do know that the very next meeting the president of the Board, Mr. Henry Chamberlain, came to me and went out of his way to express the very great appreciation of the Board for the work I was doing. Not only that, but he told me the Board had agreed to double my salary and dated it back about three months. This was such an unusual circumstance that it made a very great impression on my mind.

I give you all the credit for this. I wish for your long life and continued happiness.

Very sincerely yours,
F. B. Mumford, '01.
University of Missouri,
Columbia, Mo.

My dear Dr. Beal:

Please accept my most sincere congratulations on the return of your annual anniversary on the 11th instant. While eighteen years, put down in cold type, looks rather formidable I suspect that as you look backward it does not seem long. Your many friends, including I am sure all of the old boys who passed through M. A. C. are wishing you many happy returns of the day.

With kindest regards, I am.

Very truly yours,
Wm. A. Taylor, '88.
Department of Agriculture,
Bureau of Plant Industry,
Washington, D. C.
My dear Doctor:

It is a distinct pleasure to me to take this opportunity of congratulating you upon this, your 80th birthday.

My mother and sister often speak of you and the remarkable good health you are enjoying at the present time, and I often remember the very pleasant visit I had with you two years ago, when we talked over the old times at College.

You probably have forgotten the time that I was obliged to take a special examination in Botany on account of some indiscretion on my part and you gave me a plant of alfalfa to analyze and name. I have not forgotten the time or the immense amount of pleasure you had in seeing my discomfiture in not being able to place this plant.

As a matter of fact, Doctor, I still have and treasure very highly the little postal card you sent me reminding me of this examination.

I want to take this opportunity of wishing you many more happy birthdays, and that you can enjoy your usual good health.

With kindest personal regards, I am

Very sincerely yours,

Grand Rapids, Mich.

My dear Dr. Beal:

I have heard from you indirectly from time to time in the M. A. C. Record, which I receive regularly. I was back at the College during the farmers' week this winter and found the old campus considerably changed. I noted a marked difference between the student body there and at the University of Illinois, particularly with reference to age. Perhaps I can express it best by saying that they seemed to me like boys and girls, while here they seem more like young men and young women.

I just returned to the University on March 1, after two years' leave of absence during which time I was employed by the Illinois Agricultural Association, which is really the State Farm Bureau Federation of Illinois. This Association has at present 106,000 farmer members in this state and is strongly organized and financed. The particular work which I was asked to do was to work out a system of cooperative live stock marketing. This work has been completed and the first unit of the national plan is now functioning successfully at National Stock Yards, Illinois. While I was strongly urged to remain with that work, I am convinced that so far as I am concerned I will render a larger public service by continuing in the educational field.

You will pardon me for saying so much about myself. My only excuse is that I know you always show a deep interest in what your old students are doing.

I sincerely trust that your eighty-ninth birthday on March 11, will find you well and happy. I think years ago you met my mother, who is still living at the ripe age of ninety-one. She, of course, is not as vigorous as you are, but she is still well and strong.

With happy recollections of our old associations and the very best wishes for your continued good health, I am

Cordially yours,

H. W. Mumford, '91.

University of Illinois,
College of Agriculture,
Urbana, Illinois.

My dear Dr. Beal:

Since I have a birthday or two each year I conclude that you must be enjoying the same privilege and I wish you "a happy return of the day" at the end of this week. May you live to enjoy a good many more of the happy events.

I missed you at the American Association meetings in December at Toronto. For years I have looked forward to these meetings in anticipation of a good visit with you.

Hoping that you are enjoying good health and are still quite rugged, I am, with kind personal regards,

Sincerely yours,

C. P. Close, '05.

College Park, Maryland.

My dear Friend:

Just a line from one of your "old boys" to congratulate you upon your eighty-ninth birthday.

Few men live so many years, and very few are privileged in this world, to do the great good that you have done.

And, as the years go on, you grow even dearer to your children of M. A. C. I wish you a most happy birthday and many, many more of them to come.

With great love and respect,

L. Whitney Watkins, '93.

Manchester, Michigan.

My dear Dr.:

Once more it is my pleasure to note another milestone has passed in your life. The eleventh of March tells us that 89 years ago there was a flurry in the Beal family and there has been one ever since, and here is wishing there may be many more of these happy hurries for you. With best wishes I am most sincerely yours.

A. T. Stevens, '93.

Connecticut Agricultural College,
Storrs, Conn.

My dear Doctor Beal:

When I was at the Extension Conference in Springfield, Mass, late in February, I learned from some of the Amherst boys that you were still on the active list though retired.

It seems to be about time for your birthday—the 11th of March is it not—and I want
to wish you many happy returns. Please remember me also to the Bakers.

Yours very truly,
Dick H. Crosby, ’93
New York State College of Agriculture, Cornell University, Ithaca, N. Y.

Congratulations and best wishes,
Mr. and Mrs. I. H. Butterfield, Secretary, M. A. C. ’93-99.

My dear Doctor Beal:
It seems to me that you have another anniversary along about this time when the spring things are beginning to get green.
May I again express my pleasant recollections of your contribution to my success? I never think of college days and the meetings with you since but that I feel that I am the better for these thoughts.
I hope that you may continue to enjoy the health and activity which have so long been yours. Regretting that I cannot extend these greetings in person, I am
With kindest personal regards,
World’s Dairy Congress Association, Washington, D. C.

Heartiest congratulations on your birthday. Make it a hundred!
Mr. (’99) and Mrs. (’00) E. W. Ranney, Greenville, Mich.

My dear Doctor Beal:
You are to have a birthday about the time this letter reaches you—I hope it will get to you on the 11th.
Mrs. Eustace and I hope that you are well and that you will have a fine day—that your thoughts will hark back over your many and highly profitable years at M. A. C. and you will recall a few, at least, of the many, many young people that you inspired to love nature.
Please remember us very kindly to the Bakers and the Marshall children when you see them.
Cordially yours,
Harry Eustace ’01.
Oakland, Calif., 6452 Beavoncne Ave.

Dear Dr. Beal:
If my memory serves me rightly you will be 89 years old on Saturday the 11th. I wish to congratulate you upon your birthday and hope that you will have many more of them.
Very truly yours,
P. A. McCue.
Dean and Director, Delaware College Agricultural Experiment Station, Newark, Del.

My dear Doctor Beal:
In looking over some statements which I have here, I find that March 11 will be your eighty-ninth birthday, and I write you now to congratulate you upon this event, and to let you know, too, that one of your old students has not forgotten you.
I was in college from 1898-1902, and after I graduated in that year, I went into the service of the United States Bureau of Soils, with whom I have been connected through all these years. During the last ten years, I have been assigned to Wisconsin where we are cooperating with the state in making a soil survey of the entire state.
I keep in touch with the college through the M. A. C. Record, and through its columns note your activities from time to time. I remember an occasion on which your old friend T. J. Phillips was looking through a microscope trying to find it. You told him to keep on “squirting.” If we keep hammering away at whatever we are doing, we are sure to make some headway. T. J. finally found what he was looking for.
Again congratulating you, and with kindest personal regards, I am
Yours very cordially,
W. J. Geib, ’02.
United States Department of Agriculture, Bureau of Soils, Madison, Wisconsin.

Dear Dr. Beal:
It gives me great pleasure to be able to congratulate you at this time on having reached your eighty-ninth birthday. I assure you that your former students are all pleased to know that you are still enjoying an active interest in the everyday affairs of life.
I assure you that I would appreciate very much the opportunity of sitting down and having a good old-fashioned visit with you relative to the old days at M. A. C. I trust that you will be spared to celebrate many more of these occasions.
With sincere regards, I am
Very cordially yours,
James G. Moore, ’03.
University of Wisconsin, College of Agriculture, Department of Horticulture, Madison.

My dear Doctor Beal:
It has come to my mind that you have another birthday due next Saturday, March the eleventh, your eighty-ninth, I believe.
It certainly gives me great pleasure to congratulate you again upon this event. May it find you well and happy and with renewed joy in the prospect ahead.
Last summer I spent my vacation in Michigan with my parents and had a good time in spite of taking part in an auto accident.
I have been able to work harder this winter
than for several years and hope to finish a little job started several years ago. Give our kindest regards to the Bakers. Most cordially yours, B. O. Longyear, '03.

Department of Forestry, Colorado Agricultural College, Fort Collins, Colorado.

Dear Doctor Beal:
Accept my hearty congratulations upon the occasion of your 89th birthday. May God grant you many more such happy days. I am always glad to hear of you and I will always remember my associations with you when we were both young back in 1900-1904.
Very sincerely yours,
Geo. C. Morbeck, '04.

Iowa State College, Department of Forestry, Ames, Iowa.

My dear Doctor Beal:
As one of your former students, it is a pleasure to be able to congratulate you on your eighty-ninth birthday. With kind regards and best wishes for your continued good health, I am. Very truly yours,
W. J. Wright, '04.

State Club Leader, Cooperative Extension work in Agriculture and Home Economics, Ithaca, N. Y.

Dear Dr. Beal:
It is one of the year's keenest pleasures to send birthday greetings to you and yours. Surrounded by health and happiness we bespeak the fullest measure of similar blessings for you.
Sincerely,
The Andersons, A. C. Anderson, '06.
1640 Euclid Avenue, Flint, Mich.

My dear Dr. Beal:
I am reminded of the fact that you are now a year older, or younger, whichever way you happen to feel. I wish to take this occasion to send you greetings and wish you a most pleasant new year.
You may be interested to learn that two of the other men in this department and myself have been hard at work for a couple of years on a book on Principles of Fruit Growing. We have tried to make it of University grade. We expect to receive it from the printer's hands in six or eight weeks and probably in due course of time you will see a copy. We have attempted to include a good deal of Botany, particularly Plant Physiology, as it relates to Horticulture and I hope when you look it over, if you should chance to do so, sometime, you will not be too disappointed at what we learned or failed to learn in some of your courses.
Yours very truly,
V. R. Gardner, '05.

Professor of Horticulture, University of Missouri, College of Agriculture, Columbia, Mo.

Happy returns, affectionate congratulations from one Michigan Aggy Naughtly Seven.
T. H. McHatton, '07.

Athens, Ga.

Dear Friend:
It has occurred to us that you are about to pass another milestone in your earthly pilgrimage and we desire to extend our congratulations, including with it the hope that you may have the privilege of enjoying many more years. The years we spent in your classes will ever remain the very brightest spots in our memories.
With best wishes for the day, we are
Very truly yours,
Floyd M. Barden, '08, Myrta Severance Barden, '09.
South View Fruit Farm, South Haven, Mich.

My dear Doctor Beal:
I am writing this note to offer congratulations and best wishes on your birthday and to tell you how much I appreciated your letters and the sentiments they expressed with regard to my work here in the Alumni Office. I have just a fair start in my new work with my brother in Lansing and thus far it is going very well.
No one has been secured as Alumni Secretary but I understand the Committee is seeking a man in the East who graduated in 1913 or 1914. We all hope that the changes that have been made are for the better and that the new college administration will fulfill the desires of all of us.
Again birthday greetings, and best wishes for many more pleasant and happy years.
Sincerely yours,
C. W. McKibbin, '11.
East Lansing, Mich.

From Botanical Department, University of Michigan.
To one of the Nestors of American Botany, Dr. W. J. Beal, on the occasion of his 89th birthday, congratulations by the Botanical Staff of the University of Michigan.
F. C. Newcombe
Jas. B. Pollock
C. H. Kaufman
Bradley Moore Davis
J. H. Edlers
Walter W. Tupper
Carl D. LaRue
F. G. Gustafson
H. H. Bartlett.
Congratulations from President K. L. Butterfield, '01.
Massachusetts Agricultural College,
Amherst, Mass.

Congratulations from Dr. Charles E. Marshall.
Professor Bacteriology, M. A. C., from 1886-1912.

My dear Friend:

Once more we wish to come on your birthday with most hearty greetings, and the best of good wishes for another year of comfort and joy.

"Make new friends but keep the old. Those are silver, these are gold; New-made friendships, like new wine Age will mellow and refine. Friendships that have stood the test, Time and change— are surely best; Brow may wrinkle, hair grow gray, Friendship never knows decay."

With kindest regards,
Fred C. and Eva S. Kenney.
Mount Pleasant, Amherst, Mass.

Dear Doctor Beal:

Being laid-up with influenza prevented me from writing you on your eighty-ninth birthday which, I believe, occurred on March 11. I think of you many times during the year, especially, when my mind wanders back to my good Alma Mater, the Michigan Agricultural College. I get back there but seldom—once in about ten years. I returned some years ago and I missed your presence very much. I have been told that you are enjoying good health and I hope at some of the reunions, I may have the pleasure of meeting and talking with you again.

Everything is going nicely with me down here with the exception that I have had considerable sickness in my family in the past six weeks. I am glad to state, however, that we are all "out of the woods" now.

Wishing you many more birthdays and with kindest regards and best wishes, I am:

Very sincerely yours,
E. S. Good.
Chairman, Animal Industry Group,
University of Kentucky,
Lexington, Ky.

My dear Doctor Beal:

I have just taken a squint at the calendar and have been reminded of the fact that your birthday occurred day before yesterday, March 11. If I remember correctly, you have seen this event roll around some eighty-nine times. I wish to congratulate you upon having lived a life full, not only of years but of deeds that live and will be cherished long in the minds of your old students.

We are just as busy here as ever. It keeps us everlastingly hustling to care for the constantly increasing number of students. The registration to date for this year, exclusive of summer school and winter short course students, has passed the 3800 mark. This, I believe, makes this the largest of the separate Land Grant colleges from the standpoint of student enrollment. In agriculture alone, the registration for the year will reach very nearly 900.

I feel that your interest in your old students is such that you will be pleased to know that as a result of a rather serious operation, to which I submitted two years ago, I am now in much better health than I have been for a considerable number of years. Mrs. Cordley and our daughter, Dorothea, are both in excellent health, and Dorothea will soon enter the last term of her Junior year in College. For some unaccountable reason she is proving to be an excellent student and is the possessor of a rather unusual voice which we are attempting to have developed. Both she and Mrs. Cordley unite with me in sending regards to you and yours.

Very truly yours,
A. B. Cordley, '88.
Chairman of Agriculture and Experiment Station,
Corvallis.

Honor C. W. Garfield '70
(Taken from the March 15 issue of the Michigan Tradesman)

BIRTHDAY ANNIVERSARY OF A NOTED MAN.

"Yesterday was the 74th birthday of Charles W. Garfield, and those of his friends who were aware of the anniversary took great delight in reminding him of the esteem in which he is held in this community where he is known. No man in private life has a wider circle of warm friends than Mr. Garfield, and certainly no one has ever done more to merit the friendship and admiration of his friends than Mr. Garfield has done. He is the epitome of all that is good and gracious and unselfish and his long career has been a constant benediction to all who have had the pleasure of his acquaintance and the advantage of his friendship. No one has ever done more to promote community betterment in proportion to his means, than Mr. Garfield, and his interest in the big problems of forestry, horticulture, agriculture and human betterment have been country wide in scope and world wide in influence. Grand Rapids doffs her hat to her foremost citizen and sincerely hopes to see him live to round out a century of years, good deeds, and good influence."
CLASS NOTES

82

Commencement in June will mark the 40th anniversary of our graduation. Cards are sent to all living members of our class. We wish to meet President Friday, greet Dean Kedzie, and rally around Dr. Beal once more. Come on '82. "Let's all go," 100 per cent strong. We invite '83 and '84 to be present and will put something over on them as in days of yore. Come along, you are worthy of meeting and owe it to yourself and fellows to be present. We will meet you in June on the campus.

T. F. Millsapgh
9271 Martindale Ave., Detroit.
W. T. Langley,
Centerville, Mich.

The following is quoted from the San Francisco Bulletin under date of March 21. "Peter V. Ross of San Francisco has been appointed an accredited lecturer of the Christian Science Church by the Mother Church of Boston. Ross practiced law here until seven years ago, when he engaged in Science work. He is well known as a practitioner and teacher here, and served on the Committee on Publication for the Science Churches in Northern California. His first lecture engagement was in Harrisburg, Pennsylvania, March 31.

Frank C. Morse, care Brown-Morse Company of Muskegon, sends this. "Still plaging away making filing cabinets in wood and steel construction, also supplies for same—a little bit better than they have ever been made before. Trying to get our business up to a basis of $5,000,000 a year. Haven't quite reached it yet, but well on the way. Still married—two boys—ow big enough to wear his dad's clothes. Have no particular complaint as to the way the world is using me."

Herbert A. Hagadorn is plant engineer for the General Electric Company and lives at 2944 Main Street, Stratford, Conn.

89

Under a cartoon entitled "Philip S. Ross, Associate Editor," appearing in the April issue of the Curtis Publishing Company's Home Organ, are these words, "From sunny south to Arctic snows, they read the stuff by Philip Ross." Elsewhere in the paper is this, "Still on the old home farm. We have a girl 12 years and two boys, one 14 and the other 8. Occasionally see some M. A. C. down in this part of the country."

The following is taken from the February issue of the Official Record issued by the U. S. Department of Agriculture. "R. C. Potis, of the Bureau of Markets and Crop Estimates, attended the third annual convention of the Michigan Almed Dairy Association held February 14-17 at Saginaw, Mich. He spoke on the present status of the creamery business and on the creamery man's season."

H. T. McHatton is still with the College of Agriculture at the University of Georgia, Athens.

J. L. Myers' blue slip reads, "Myers, Buck Co., Engineers and surveyors are still on the job. We have just added about 400 acres to the city of Manila and are now adding nearly as much to Cavite. Manila needs more and we hope to accommodate." Myers may be addressed at 325 Kneedler Building, Manila, P. I.

Mr. and Mrs. Leon V. Belknap announce the arrival of Janet Elizabeth on March 22, 1922. The Belknaps are living in Pontiac, Michigan, at 98 Palmer Street.

This is from J. F. Campbell, Station C. R. 9, Box 207, Milwaukee, Wisconsin. "Still teaching Manual Arts at the West Division Hotel. Frank Jr. born Christmas morning. Has a good pair of lungs but knows enough to

very much interested in our new Vocational Building. The Home Economics rooms are located on upper floor, modern in every way. We expect to be able to occupy them in September. Am planning on spending summer in Corvallis, Oregon."

Herbert J. Westcott was recently elected secretary of the Masonic Club of Passaic, New Jersey. Westcott lives at 345 Lafayette Avenue.

C. M. Marshall continues at Heber, California.

George McMullen visited friends on the campus April 6.

J. W. Decker, 661 Chatsop Avenue, Portland, Oregon, says there is nothing new or exciting.

Albert X. Robson, forester for Bronx Parkway Commission and also in charge of all maintenance work on the Parkway, lives at Pennsylvania Avenue, Crestwood, Yonkers, N. Y. A daughter, Hope Howeth, was born February 28. He also has a son, Albert N. Jr., aged three years.

The signature on the following is W. E. Stanton of Dowline, Michigan. "No change in occupation, etc. Still on the old home farm. We have a girl 12 years and two boys, one 14 and the other 8. Occasionally see some M. A. C. down in this part of the country."

The following is taken from the February issue of the Official Record issued by the U. S. Department of Agriculture. "R. C. Potis, of the Bureau of Markets and Crop Estimates, attended the third annual convention of the Michigan Almed Dairy Association held February 14-17 at Saginaw, Mich. He spoke at the address on the general session on the fundamental principles in marketing dairy products, and at the creamery men's session he spoke on 'Future's Yardstick.'"

T. H. McHatton is still with the College of Agriculture at the University of Georgia, Athens.

J. L. Myers' blue slip reads, "Myers, Buck Co., Engineers and surveyors are still on the job. We have just added about 400 acres to the city of Manila and are now adding nearly as much to Cavite. Manila needs more and we hope to accommodate." Myers may be addressed at 325 Kneedler Building, Manila, P. I.

Mr. and Mrs. Leon V. Belknap announce the arrival of Janet Elizabeth on March 22, 1922. The Belknaps are living in Pontiac, Michigan, at 98 Palmer Street.

This is from J. F. Campbell, Station C. R. 9, Box 207, Milwaukee, Wisconsin. "Still teaching Manual Arts at the West Division Hotel. Frank Jr. born Christmas morning. Has a good pair of lungs but knows enough to
sleep at night. Thank Goodness. Am now interested in a company, "The Boys' Homecraft Company" which is supplying plans, instructions and lumber for making small objects to boys in manual training classes and for home work."

H. E. Truax resigned from the U. S. Bureau of Markets and Crop Estimates the last of February and is now in business for himself as a buying broker of fruits and vegetables located at 221 Wholesale Terminal Building, Los Angeles, California.

Gerald Mains is an associate chemist in the color laboratory of the U. S. Bureau of Chemistry at Washington, D. C. He lives at 503 Y. M. C. A.

This comes from C. H. Taylor at Perryville, Maryland. "I am still managing the Station Farm for the U. S. Public Health Service at this place. Aside from the farm, I have charge of the care and upkeep of the lawns, trees, etc., in the village of approximately 1200 people and around the hospital buildings. Also, have charge of all of the new plantings on the grounds surrounding hospital buildings. As they have started a building program of twenty-seven buildings this work is increasing and becoming more interesting."

Jessie Whitney Cartwright has moved to Oak Park, Illinois, 945 N. Harvey Avenue. J. Wade Weston and Helen Philleo Weston are now living in East Lansing where Mr. Weston is an extension specialist at the college. D. D. Cushman is now in Chicago at 4822 Kenmore Street.

Merrill S. Fuller and Kittie Handy Fuller are back from their honeymoon at New­foundland and are at present located at Law­rence, Michigan.

H. L. Lewis has resigned as superintendent of schools at Napoleon, Michigan, and has entered the University of Michigan. Harold Stenson is in the truck farming business at Flat Rock, Michigan. Bessie Turner is living at 323 Suceinaw Street, Lansing, and is teaching Home Eco­nomics in the East Junior High School. John U. Layter continues at R. 3, Clarksville, Michigan.

Albert Cooney lives at 5002 Ivanhoe Avenue, Detroit, and is shop engineer for the Dodge Brothers. Ruth McKinley asks us to change her address to 1000 Collingwood Avenue, Detroit. Alice Dalby has been appointed by the President General of the National Society of Daughters of the American Revolution to serve as one of the Michigan pages at Continental Congress to be held in Washington, D. C., on April 17.

H. W. Hayes is still with the Dodge Bros. Motor Car Co. at Detroit as division engineer in charge of car design. Hayes lives at 927 W. Euclid Avenue. He says that D. C. Black and V. C. McColl, both 1917 engineers, are working as designers in his department, and that Al Cooney '17 is along as shop maint­enance engineer.

Virginia Lee was born to Captain and Mrs. H. L. Campbell on March 21, 1922, at Phila­delphia. Her daddy is located at the Frank­ford Arsenal there.

Mr. and Mrs. Willard M. Coulter (Helen Edmonds '19) announce the birth of Marie Elizabeth on April 3, 1922. Ethel Higgins may be reached at Vassar, Michigan.

H. Curtis Howard continues at 1601 S. Bonnie Brae Street, Los Angeles, Calif. Announcement has been received of the en­gagement of Edgar S. Anderson to Miss Dorothy Moore of Newton, Massachusetts. Miss Moore is a graduate of Wellesley College with the class of 1918 and is now secretary of the botany department at that college. Anderson is an assistant in genetics at the Bussey Institution of Harvard University.

Marjorie William's home address is now 304 Minnesota Avenue, Buffalo, N. Y.

Bob Gorshin is still teaching ag. in county high school at Kalispell, Montana. H. V. Hoffman is now located at 275 19th Street, Milwaukee, Wis.

Dr. Warren P. S. Hall will receive mail and M. A. C.-ites at 5034 Fernwood Avenue, Detroit.

Roland Shenefield is now located in the Rowland Bldg., Columbus, Ohio, at 526-28.

After the first of May, Nelson Carr will be with Donald B. Pocock, fruit and produce distributor and broker in Cleveland. Carr's address at present is 6310 Dibble Avenue, Cleveland.

Leon Catlin has been transferred from Lan­sing to Owosso as plant superintendent of the Comor Ice Cream Company.

The first reunion of the "baby" class this June promises to be a big one. About 40 members have been heard from and they all express a desire to get the reunion habit early. Better come back and meet with the bunch.

Maurice Rann is now located at the West­inghouse Electric and Manufacturing Company works at Newark, New Jersey, building meters and instruments. He will be at 55 James St., Newark, until about May 1.

S. P. Nelson is with the State Highway Department at 603 Murray Bldg., Grand Rapids.

A NUMBER OF M. A. C. PROFESSORS and in­structors attended the annual meeting of the Michigan Schoolmasters' Club, held at Ann Arbor recently.
offered by the John Hancock Mutual Life Insurance Company of Boston for the best answer to Mr. Edison's question, "Who Was John Hancock?" has been awarded to Leon V. Quigley, a student at the Worcester (Mass.) Polytechnic Institute. This answer, giving a correct, concise and comprehensive statement of the position occupied by John Hancock in American history, is printed below in full.

"Who Was John Hancock?"

JOHN HANCOCK was an American statesman and patriot. His signature is found on the oldest and most important documents of Massachusetts, and of the United States. He was the first signer of the Declaration of Independence and was the first Governor of Massachusetts.

John Hancock was born at Quincy, Massachusetts, in 1737. He graduated from Harvard College, and entering upon his uncle's business became a successful merchant in Boston. He gained much in social power and in wealth, being meanwhile justly popular for his integrity and ability.

He was in 1765-1770 a selectman of Boston and a member of the general court. With Samuel Adams he led the Massachusetts Whigs, and only escaped capture at Lexington and Concord by virtue of the valiant fight by the Minute Men on the "Nineteenth of April in '75."

John Hancock was subsequently known in various positions: as Governor of the Continental Congress, as Major-General of the Massachusetts military forces, as President of the Constitutional Convention. He died at Quincy, Massachusetts, October 8, 1793.

The historical position of John Hancock is unique in State and Nation. He wielded great political influence but was always liberal and public-spirited. His name is most prominent as a Whig leader during the American Revolution in such events as the Boston Massacre, the Boston Tea Party and the battles of Lexington and Concord.

John Hancock signed his name first to the Declaration of Independence. He thus risked his own "life, liberty, and pursuit of happiness" that these privileges might be obtained for others to enjoy. To this end he "pledged his life, his fortune, and his sacred honor."

That he was popular and efficient may be judged from the fact that he was for ten years Governor of Massachusetts, being elected annually to this office by popular vote.
