MRS. G. E. THOMPSON IS SOCIAL DIRECTOR

Mrs. George E. Thompson of Owosso has been appointed social director to take the place of the dean of women. Mrs. Thompson has been very prominent in women's club work in the state and comes to her new post with high ideals as to the conduct of her duties. For two years she was vice-president and treasurer of the State Federation of Women's clubs, for three years she had charge of the organization's endowment fund and for twelve years she was a member of the State Board of Missions of the Congregational church.

During this year she achieved prominence as the chairman of the Women's Liberty Loan committee for Shiawassee county. She was also the only member of her sex to be appointed to the county war board.

Mrs. Thompson believes that she can do more in an advisory capacity to the women's self government body than by acting as an executive in control of the co-eds' affairs. She will have charge of the house mothers at the various dormitories and will depend largely upon the girls themselves to insure discipline and obedience to rules.

The following matrons have been appointed: Abbot Hall, Mrs. Brown; Senior House, Mrs. Tower; College Residence, Mrs. Eastman; Vedder House, Miss Yakeley; Johnston House, Mrs. Patterson; Corcoran House, Mrs. Corcoran; Practice House, Miss Cross; Baker House, Miss Farley; Black House, Mrs. Black.

FRAZER, '09, VICTOR IN TITLE MATCHES

Major W. D. Frazer, '09, won the individual all around shooting championship of the United States at the national matches which were conducted at Camp Perry, Ohio, during the summer months. In order to attain this honor Major Frazer took part in five events, making a total point score of 880 out of a possible 1000. His closest competitor trailed him by 20 points. The contests in which he demonstrated his versatility with fire arms were the off-hand rifle competition; three rapid fire matches at long range for the Wimbledon cup, a famous trophy; the Marine Corps small bore rifle match; the National Rifle Association pistol championship; and a registered shot gun tournament.

On his way to his post as coast artillery instructor at the University of Washington, Seattle, Major Frazer stopped at the alumni office and exhibited 11 of the 13 trophies which he collected for his prowess with weapons. The emblem signifying his victory as all-around champion is a handsome gold medal while the others, representing lesser victories, are of bronze. In 1921 Major Frazer won the Leach cup match which, he says, required more concentration than did his victory this past summer.

ROGERS, '83, PLANS WIDER HIGHWAY

State Highway Commissioner F. F. Rogers, '83, is the sponsor of a new highway plan which he has presented to Governor Groesbeck and other state officials contemplating the widening to 100 feet of the Grand River trunk line from Detroit to Grand Rapids. Commissioner Rogers believes most of the property owners along the road will be glad to cooperate with the state in this project as his department plans to landscape the right of way and in other directions improve the appearance of the line. This scheme would make possible the widening of the pavement and would insure space for growth of this important artery of travel.

The route was laid out a century ago as a territory turnpike and at that time was 100 feet in width. When the state entered the Union the officials failed to take full advantage of the early survey and as a result property owners encroached upon the original right of way. Work will be undertaken next year to complete the concrete roadbed from Lansing to Williamson, adding to the good roads now afforded M. A. C. supporters on their trips to East Lansing.
WILL DIG CHANNEL TO PREVENT FLOODS

Visions of a flooded baseball diamond will be ancient history if the plans of the college administration produce the desired results. Secretary Halladay says that work will soon be started on an overflow ditch to run from the Red Cedar just east of the athletic field bridge to the bend just west of the athletic field area. In past years the early spring has found many Aggie athletic teams without training grounds and schedules have been delayed. This condition should be averted by the new channel which will be constructed to carry off enough of the excess water to insure against flooding of the field and provide better drainage.

In connection with this it is planned to make an entrance to College Field from a point near where the White Elephant stood, at the western end of the campus. This would necessitate a new bridge over the Red Cedar at that point but would allow for enough parking space for automobiles, if the athletic field is enlarged to handle larger crowds.

GRADUATES CHOSEN FOR MARKET SCHOOL

The services of a group of prominent graduates have been obtained by the American Institute of Agriculture to carry on its work in teaching marketing through the mails. Among those who are included in the faculty of the institute are: G. V. Branch, '12; S. W. Doty, '07; Don Francisco, '14; H. W. Mumford, '91; R. C. Potts, '06; O. W. Schleussner, '12, and Edwin Smith, '12.

J. W. Fisher, '14, has been assisting in the promotion and organization and is a director of the school which has been established with the professorship of spreading the gospel of proper methods of placing agricultural products upon the market. Its ideal is to serve the farmer nor the public to the exclusion of the other but to teach the producer how to best handle his products to the advantage of both sides.

The list of those who will contribute lectures to the course includes several of the most noted agriculturists and marketing experts in the United States. In an article in the Country Gentleman for June 17 the institute was described as a connecting link between the Institute of Economics recently established in Washington and the public. The writer says it has the support of the department of agriculture and is certain to fill a well-defined need. He describes it as one of the fruitions of the plan to apply practical economics to the farm.

WALLACE COMING TO COLLEGE OCT. 20

Henry B. Wallace, U. S. secretary of agriculture, will address a meeting in the college gymnasium, according to present plans, October 20. Arrangements are being made to build out a platform similar to the one used at commencement so that other distinguished guests may be seated near the speaker of the day. His original schedule called for him to speak in Lansing on that date but President Friday prevailed upon those in charge to have the secretary come to the college.

On the following day South Dakota plays M. A. C. on College Field, so those who want to come to hear the secretary will have an attraction to keep them here over Saturday and the visit will be doubly profitable and attractive.

BULLETIN DESCRIBES SHORT COURSE PLANS

An attractive illustrated bulletin telling the advantages gained by taking the short courses offered at the college has been issued and distributed to prospective students and educational centers throughout the state.

President Friday's appeal to the farmers of the state to increase the efficiency of their productive units is included as a foreword and the rest of the 41-page booklet is devoted to outlining the courses offered and the attractions possessed by the college as a center for this school.

The regular sixteen-weeks course starts October 30 and is concluded March 1. Twelve separate courses are listed, five of them concern dairying and its allied interests.

The first short course was made available to those who could not take the four years of training in 1897 and has gained steadily in popularity and results since that time. Agricultural conditions are generally reported at a low ebb in the state and the authorities believe this state of affairs will increase the enrollment by a large number who do not feel able to take the regular course.

E. B. Hill, '15, is director of the short course and will supply catalogs to those interested. Ashley Bertridge, '12, is assistant director.

Changes have been made in the Woman's building to provide more rooms for the girls by converting class rooms and laboratories on the second floor into dormitory rooms and removing the former to the first floor and basement. It is believed that there will be further living conditions afforded in the 'Coop' as soon as the new Home Economics building is completed as most of the class work will take place there.
When the leaves begin to turn, the season of learning begins in earnest; both conditions prevail on the wonderful old campus. The hard maples are taking on their coats of yellow and scarlet and the oaks and beeches are helping the conifers provide a background of plain colors for their more brilliant fellows.

L. A. Kenoyer, a graduate of the University of Chicago, is the new assistant professor of botany, taking the place of Prof. Bertha Thompson for the year. Prof. Kenoyer was for six years in educational work with a mission in India and is spending a year in the United States before returning to the foreign field which he has learned to enjoy.

May E. Foley, '18, formerly assistant alumni secretary, who received an M.A. degree at Columbia last June and spent the summer as manager of a girls' camp at Lake Moheghan, N.Y., has accepted a position as instructor in nutrition at the State College of Industrial Arts, Denton, Texas. Miss Foley visited East Lansing friends on her trip west early this month.

The Filipinnoes, Armenia and China are represented on the list of officers who will direct the affairs of the Sosmopolitan club during the fall term. The president, Felix Aguim Pinando, is a native of the first named territory. O. S. Weisner, U.S., is vice president and Sarcus Pilavian, of the stricken Near East nation, is secretary. Mingtai Yong holds the standard of the Celestial republic as treasurer of the club. Social events are planned for the members.

Gerritt Cotts, '14, comes into the association after an absence of eight years. Cotts taught school in Monticello, III., for two years then attended Rush Medical college, where he was given his M.D. in 1920. He served his internship for two years in various hospitals around Chicago and has started upon a general surgical and medical practice with offices at 5030 Broadway, Chicago. Cotts acquired a full fledged training in agriculture at M.A.C. His home was in Hudsonville.

Changes in the arrangement of the Secretary's office made it easier to handle the crowd of students who passed through the line to pay their fees before entering classes on September 27. The cashier's counter was moved to a north-south position instead of east-west and as fees were paid the students were allowed to leave through the rear door of the office, preventing the usual congestion. Another innovation was put into effect by keeping the office open until 9 o'clock in the evening on each of the two registration days. A receipt for fees was necessary this fall before students could be classified.
Homecoming day is not so far away. The walnuts are falling with startling thuds onto the roof of the alumni office presaging the gray days of November when the Aggie clan will gather to enjoy a few hours on their campus, see the football team in action and greet the men and women they knew in the classrooms and dormitories. Have you made full preparations for that day?

There are few sights more inspiring than an institution enjoying the full vigor of needed growth and development. Two new buildings will be above the ground when you come back. The campus will be trimmed and in shape for winter. The alumni office will be in its new quarters and you will have a place to chat with the bunch. The committee is arranging an attractive program for your entertainment. It will be YOUR fall day on the banks of the Red Cedar. Come and enjoy it. Come the night before and stay over Sunday. Keep in touch with Aggie spirit and the rapidly changing conditions at M. A. C. Come home for homecoming November 25.

The M. A. C. Association has set itself the task of providing a suitable building to house student activities and the alumni office and provide facilities for social intercourse which have hitherto been lacking on the campus. It has done this in good faith and for a time conducted an intensive campaign to raise the necessary funds for the purpose. This was dropped when times were inauspicious but will soon be started anew with extra vigor and carried through to a successful conclusion.

Aggie students and Aggie graduates are noted for their ability to accomplish things. They are famous for their fighting spirit and it is these qualifications which will carry this effort through to its goal. The hand which really helps is accomplishing all it can be expected to do, no matter how small its contribution. We have fixed the time as next June when work will start on this monument to M. A. C.'s contribution to the cause of the Allies in the World war. It will be something for you and your children and their friends to use and enjoy. It will be a reality as soon, as you make it one. The pep you show, the willing and you give, will count as much as your dollars. The starting gun will soon be fired. On your marks!!!!!!

Dr. G. J. Woiner writes from Bismark, N. D.:

Dear Mac:

Allow me to congratulate the college on its ideal choice for the presidential chair of a man that needs no introduction to anyone who takes any interest in the work of individuals whose services are of great benefit to the people as a whole, and of special benefit to agricultural communities: a man whose ability in his present capacity will not be questioned.

I do hope that our new president will receive the full cooperation of the faculty, alumni, and student body, to make our noble Alma Mater the greatest institution of learning in the U. S. A.

President Friday, I hope, will accept my sincere wishes for his success in all his undertakings for the betterment of the institution where I spent the happiest four years of my life.

Very respectfully,

Dr. G. J. Woiner, '18.

Dear Mac:

I am enclosing my check for $2.50 for Alumni Association dues.

I can slip you a few news notes—namely, and to-wit:

S. S. Rothrock, '20 Ag, is in Akron, Ohio, where he is one of the proprietors of the Gilt Edge Candy company. I understand that he went into that business about the first of the year.

L. E. Overholt, '20 Ag, who recently took a master's degree at the University of Michigan, is starting his second year at the University of California law school.

I am still with the Michigan State Farm Bureau as publicity director and at present I am doing the advertising in a Farm Bureau membership campaign which in time will cover the entire state.

Sincerely yours,

E. E. Ungren.

Michigan State Farm Bureau.

Dear McCarthy:

Every time I look up in the corner of your letterhead and see the picture of old College Hall and read the inscription "First in America," it brings the tears to my eyes and I am getting too old to be crying around like that. It isn't dignified enough for one in even my humble station.

My father attended classes in that hall, and went out from there just prior to his graduation to join his regiment at the front in 1862. Dr. Kedzie sent him his diploma afterwards, it reaching "Dad" in the trenches at Nashville, Tennessee.

I, too, attended classes and cut the usual college pranks in and about that hall. Dr. Kedzie, Dr. Beal, Dr. Edwards, Dr. Taft, Prof. F. S.
Kedzie, Prof. Woodworth, Prof. Noble, etc., could tell you more about it than I care to repeat. Fortunately for me many of them are gone and they were all "good sports;" so those who are left won't tell anything but the best about me.

I want to see the old campus so badly "I can taste it," but am always too busy to go. Most cordially,

Tenino, Wash.

Dear Mac:

I'm off here in a world that seldom gets a glimpse of M. A. C. news and I would like to have The Record sent to the above address.

I can't help telling you, too, what people have said about our football teams. Several times when introduced to men here as coming from Michigan Aggies the men have exclaimed "Oh, that's the school that puts out those fighting football teams, isn't it? or "Oh, that's the school noted for its winning teams." Alumni before me have told me of such occurrences but to have had the experience myself was worth far more.

Yours for a Greater M. A. C.,

L. M. Thurston.

Thurston is at the University of Minnesota.

**GARFIELD, '70, TELLS OF EUROPEAN TRIP**

C. W. Garfield, '70, spent the latter part of the summer in Europe. His letters to friends here are full of philosophy and the fruits of keen observation. His first one, dated July 10, in mid-ocean, reads in part as follows: "There is little to relieve the monotony of an ocean trip and yet to a land lubber the experience is not devoid of interest. The masculine element of our party is getting the most needed thing—an absolute elimination of responsibility aside from ordinary neighborhood. But the ladies—our sweethearts are not so fortunate. Food has no attraction for them and the restfulness, with the accompaniment of 'mal de mer' does not appeal to them as a desideratum. "The children on board—and there are lots of them—have awfully good times. "Traits of character in a crowded community like our ship load of humanity make an interesting study. A generous-hearted neighborly spirit has such a beautiful opportunity to make itself a well-spring of happiness and the grouch finds ample excuses for creating discord."

He writes next from Paris telling of his trip into western Switzerland. The editor of a state trade publication calls Mr. Garfield "Michigan's most useful citizen." Extracts from his further letters will appear in early issues of The Record.

Morton VanMeter, '12, is secretary of the Cadillac Iron Works at Cadillac.

**BIERY TAKES CHARGE OF Y. M. C. A. OFFICE**

J. G. Biery, former chief of police of East Lansing, who also has had considerable experience directing numerous flocks about the state along the straight and narrow path, for he is an ordained minister, has been engaged to handle the office work of the college Y. M. C. A. Biery will supplement "Buck" Weaver's efforts and has charge of the employment bureau which has already placed many needy students in positions where they could earn part of their expenses.

The new plan of religious education at the college embraces slightly different lines than were followed by the old Y. M. C. A. organization. It will deal with student morale and help build up a more constructive spirit among those who are taking advantage of the facilities at M. A. C. as well as conduct regular spiritual efforts in conjunction with the People's Church.

One of the new departures will be an open forum which will be held Sunday nights in the armory where problems of college life will be threshed out by those most affected. The new plan is generally approved as being more universal in benefits than did the one formerly in effect when such matters were left to the Y. M. C. A. to be handled along its own lines. "Y" work will continue but only as a part of the general plan.

**EXAMS FOR ARMY**

There are nearly 3000 vacancies in the regular army for commissions as first and second lieutenants and appointments, through examination, will be made to practically every branch of the service. Lt.-Col. Sherburne has received word from the war department that the applicant for examination must be an American citizen between the ages of 21 and 30 and have a college education or its equivalent. A list of the subjects to be covered includes general courses found on any college curriculum and technical work in engineering. The examining board is authorized to grant such exemptions as it may see fit. The preliminary tests will be given October 16 and finals come October 29. Full information will be furnished those interested by the commanding officer of the nearest post or the commanding general of the Sixth Corps area.

I. T. Pickford, '13, manager of the Oceana county farm bureau, issues a bright publication containing news of special interest to the farmers of his district. He notes a visit to the fruit section of his county by Prof. V. R. Gardner, '05, new head of the college hort department, and urges his readers to take part in the annual show of the M. A. C. Hort club.
A greased hardwood floor would have been more conducive to fast work by the heavy Aggie backs than was the gridiron on College Field last Saturday when Albion fought the Green and White warriors on even terms and by the aid of several trick plays of ancient vintage knotted the count the home eleven was able to tally. To blame this 7-7 score entirely on the slimy sod or sodden ball would not be giving the visitors their due and to say the Methodists outplayed the M. A. C. gridders would not be entirely fair for they uncovered several trick plays which they executed in smooth fashion while the men of Barron had to be content with straight football which at times could hardly be called straight. The Green and White line was weak in several points where it should be strong and the backs committed many errors of omission and commission. They failed to back up the primary defense in a proper manner and their blocking was of a high school type while the Preachers took advantage of all the breaks of the game in their favor and added some excellent playing to the chances they were given.

Fumbled punts were the order of the day. fumbled passes were even more frequent and the spectators were held breathless by an exhibition both elevens gave when Albion punted to the M. A. C. 45-yard line and both sides tried to recover the ball which sped around from man to man like a greased pig at a country fair until an Albion player captured the prize.

After a bloodless first quarter the Green and White advanced close to the Albion goal early in the second period but lost the ball. The visitors kicked out to the Aggies 45-yard line and a march down the field by the M. A. C. backs ended when Richards drove over the end marker for a touchdown and Kipke dropped the ball which he fumbled. Offside work necessitated that he attempt his second boot from his own left end but the gain was never without its compensating loss in his judgment as a field general on several occasions. The ends were not well patrolled and the center of the Green line was a favorite spot for the visitors to bombard when they wanted to gain.

Further details of this hectic struggle, which began with a rainstorm and concluded in like weather conditions, follow: Johnson received the Albion kick off on his own 20-yard line and ran it back ten yards. Several attempts to puncture the line failed and a penalty took the starch out of the offense so Johnson punted to the Albion 15-yard mark where the runner was dropped in his tracks. Allen found the going rather rough and returned the yardage to the center of the field where the ball was allowed to come to rest. The teams battled about neutral territory without much advantage either way. The Albion eleven finally reached the Aggie 40-yard line and Eckerman stopped a forward pass, the ball was sent across for the Aggies' only marker of the contest.

Harry Graves added the best bit of work in his tracks. Allen found the going rather rough and returned the yardage to the center of the field where the ball was allowed to come to rest. The teams battled about neutral territory without much advantage either way. The Albion eleven finally reached the Aggie 40-yard line and Eckerman stopped a forward pass, the ball was sent across for the Aggies' only marker of the contest.

Schmyzer went in for Neller in the second quarter and was a consistent gainer for short distances. His work was supplemented by Halman's running and Offside work necessitated that he attempt his second boot from his own 35-yard line. The ball was returned 16 yards to the Albion 15-yard line and both sides were given.

Johnson received the Albion kick off and ran it back to his own 30-yard line. The visitors' line was again adamant and the Aggie captain was forced to boot another.
Allen made seven yards through the Aggie right guard and Tamblyn pulled one of his spectacular end runs for 17 more. The Preachers' blackfield, aided by Watchpocket on end, carried the ball to the one-yard line and there Watchpocket assumed the responsibility for putting the leather across with his fast trip around the left wing, comparable to the work of Blake Miller in '13 when he carried the ball on a similar play for big gains against Wisconsin and Michigan. Eastman added the extra point. Score, M. A. C. 7, Albion 7.

Schultz went in at left end for Robinson and there ensued an anxious moment for Aggie fans as the visitors made a darkly threatening attack against the goal which was only saved by a desperate stand on the one-yard line and a long punt by Beckley to the center of the field. The ball was again in Albion territory when Graves dashed through the line and fumbled the kicker's effort to punt and Beckley recovered the ball on the 32-yard line where the quarter ended.

A try at forward passing ended when an Albion man grabbed the ball. An exchange of punts kept the elevens near the 50-yard mark for the rest of the game. M. A. C. made a complete change in the backfield and several changes in the line without materially bettering its style of play or the results obtained. Harry Graves essayed the role of hero in the last minute but his try for a drop kick from the 47-yard line failed by about 30 yards and the carnage was halted by the timer's whistle.

A large crowd braved the elements to see the game. Old Aggie cheer leaders in the persons of Skinny deYoung and Marc Small entertained between halves and the cheering section did itself proud when Albion threatened to run off with a victory.

The summary:

M. A. C. (7)

| Johnson | L. E. | H. Howell |
| Eckert  | L. T.  | Eastman   |
| Eckerman| C.    | D. Howell |
| Eckert  | L. G.  | R. G.     |
| Swanson | G.    | Olson     |
| Graves  | R.    | A. Smith  |
| Robinson| R.    | K.        |
| Richards| Q.    | Tamblyn   |
| Kipke   | I.    | Shields   |
| Neller  | R.    | Watchpocket |
| Lioret  | F.    | Allen     |

Score by quarters:

| M. A. C. | 0 0 7 0 0 7 |

An indication of the need for better accommodations for crowds on the athletic field was furnished when the record breaking attendance at the Alma game threatened to swamp the force of ticket sellers and entirely took up the available space in the stands. It seemed probable that the number attending the Albion contest would also be a new experience for early clashes on College Field and this undoubtedly would have proved true had the weather man given the sport a fair deal. Temporary bleachers were erected in the unoccupied sections of the field and replaced the old box seats which formerly adorned the front of the west bleachers. With rain all day there was an exceptionally large gate, which indicates there will be a gratifying interest in the sport all fall.

Dick Rauch, line coach, is preparing something in the way of a surprise for the team. He says that the forward will will present a different appearance when the Green faces the Wabash next Saturday. All the coaches believe the material they have will develop before the season is over. A lack of experience has been the main handicap their charges have had to overcome and they will have this in big chunks by the time they are ready to face St. Louis on Thanksgiving Day for a Big Green team has never before met such a vigorous schedule and never before has it had the abundance of unseasoned material which the squad now possesses, 1923 should be a big year for the M. A. C. football team.

The team faces a tough week in preparation for the Wabash game next Saturday. Director Barron says the men must drill out the weak points they exhibited against Albion and perfect their attack which has been developed along different lines than have been exhibited on College Field in the first two contests of the year. Barron believes the Methodists came to East Lansing with a string of strong shifty backs and ends and a line which worked every minute of play. It is no disgrace for the Aggies to tie such an opponent but the result should have been a victory.

The Methodists came to East Lansing with a string of strong shifty backs and ends and a line which worked every minute of play. It is no disgrace for the Aggies to tie such an opponent but the result should have been a victory.
STUDENTS ATTEND SEVERAL MEETINGS

Students were feted and entertained by the different organizations last week. They heard President Friday, Dean Bissell and other college leaders talk and cheered themselves hoarse at the mass meeting preceding the Alma Mater. On Wednesday night they met at the gymnasium for a festive time and "Buck" Weaver, new student pastor, aided in the entertainment. Friday night their voices singing songs like "Buck" into the Union building for a festive time and "Buck" Weaver again supplied the fire-works. Now they are hitting upon the straight trail which leads to final exams in December for school work is on in earnest and the schedules are not conducive to much amusement outside of the regulation jokes of the class room and events of dormitory and society house life.

WILL PROTECT SPLIT ROCK

Preparations have been made by the class of 1925 to hold the annual college barbecue on the evening of November 10. On the following day George Gauthier, '14, will bring his Ohio Wesleyan eleven to College Field to clash with the Aggies. The sophomores also decided to take immediate steps to clean the class numerals from the famous split rock on Michigan avenue and to see that it was defaced no more. This latter action was taken after complaints had been received from Lansing and East Lansing people that this landmark of more than a generation should not be made the object of student pranks.

A large squad of cross country runners has turned out for the fall work laid out by Director Barron. The harriers are under the immediate supervision of Ted Willoughby, who was connected with this branch of athletics for several years during his college career. Barron will take one afternoon each week from his duties with the football squad in general charge, Rauch taking care of the linemen and Walker aiding in training. Barron will also be used to instruct varsity ends.

Blake Miller, '16, noted Aggie athlete of the winning days of '13-'15, has accepted an offer to take charge of the freshman football team and has started work to develop a winning combination from the squad of yearlings which reported to him on the first day of school. Fred Walker will continue as advisory coach to the varsity, paying special attention to the backfield, where he was a star with Chicago university teams a dozen years ago. Without exception the Big Green aggregation possesses the best string of mentors ever assembled at East Lansing. With Barron in general charge, Rauch taking care of the linemen and Walker aiding in training work, the athletes are forced to keep busy all of their time and have been drilled incessantly in the fundamentals of the game. Blake Miller will also be used to instruct varsity ends.

Work has been started to prepare the M. A. C. Glee club for a spring vacation concert trip with the college band.

Penn State has under way a campaign for $2,000,000 to augment its housing and educational facilities. Money for a hospital has been contributed by the potato growers of the state.

The Holcad is appearing on the campus this fall with an attractive subscription offer which gives this newsy sheet to the students at $2 per year. An active business manager, W. F. Patenge, '23, and an equally able editor, Bill Taylor, '23, are working together to make this year the best in the history of the student publication.

Senator Henry T. Ross, '04, was victorious in the primaries on September 12 and will again be on the ticket for election from the 13th district. A. C. MacKinnon, '95, was successful in beating all opposition for a place as representative on the ticket to be chosen in Bay City this fall.

In putting money into the Union Memorial building you are not giving away a cent. It is an investment which will pay in full not in money but in such commodities as good fellowship, a home for you at the college, the feeling that you are doing something for the school you love are but a few of the forms the dividends will take.

Do you think the man who follows you in college should have a better opportunity to make good and escape some of the drawbacks you experienced? Then gather a few high school boys around you and tell them why they should go to M. A. C. and act immediately to make their lot better by putting a few bricks into the Union building.
MARRIAGES

Sidney Yarnell, '22, and Floy Wilson, sd., were married August 27 in Detroit. They are living in Dansville, Mich., where Yarnell is teaching school.

Katherine Berridge, w'21, was married to Charles W. Reid on August 17 at Greenville, Mich. They are residing at 401 W. Grove street, Greenville.

If you really want to give something to M. A. C. give her your loyal support. Let it be your best and the man with millions to offer cannot surpass your gift.

Beating Michigan at football is easy for the Michigan Aggies when they hit their stride. The Big Green team is in the process of development. Coach Barron needs an abundance of material. Have you started any this way?

Do you know all of the old and new M. A. C. songs? The association has published a choice collection of these with the music which should be on every piano.

It took the University of Michigan more than a decade to erect its Union building at a cost of nearly $1,000,000. M. A. C. must show a better record.

Ohio State will dedicate its new stadium this fall. The first football game in the new structure will find Gauthier, '14, leading his Wesleyan eleven against the State forces.

CLASS NOTES

Good snapshots of yourself at work, at play, or with your family will be used in the Record if they are suitable for making cuts. Let your friends see you as you are. In sending pictures be sure they are fully identified as to names and places and are as clear as possible.

James Satterlee, who is resting on his laurels as a retired farmer, lives at 913 W. Ottawa street, Lansing, and is a frequent visitor to the campus.

Roswell Lillie is living in Hammond, Louisiana. He says, "I am now a retired banker but still at the head of the Hammond State Bank. I have been away for the summer but will be at Hammond again after October 20."

Dr. E. D. Brooks, 310 S. Park street, Kalamazoo, reports on his blue slip: "Same place, same occupation, same loyalty to M. A. C. Hoping for great achievement under the new head. I have to be content to struggle along with my same old head and the little that's in it. Putty men can't acquire new heads when we need them. Am anticipating an active new body when I have crossed the bar." A course in Farm Management very de-
II. A. Hagadorn reports that he is still living.

H. S. Hackstaff is now living at 182 Crexenlaw Boulevard, Los Angeles. It is with H. S. Hackstaff and Company, who are jobbers in bottler's machinery and carbonic gas at 3334 Central avenue, Los Angeles.
