Michigan Agricultural College Association
Publishers = East Lansing
Vol. XXIX Feb. 18, 1924 No. 19
The M. A. C. RECORD
Established 1896
Published for the alumni and former students of the Michigan Agricultural College by
the M. A. C. Association.
Published weekly during the college year and monthly during July, August and Septem­
ber, thirty-five issues annually.
Membership in the M. A. C. association, including subscription to The Record, $2.50
per year.
Unless members request a discontinuance before the expiration of their memberships
it will be assumed a renewal is desired.
Checks, drafts and money orders should be made payable to the M. A. C. Association.
Entered as second class matter at the post office at East Lansing, Mich.

SOME FURTHER AIMS OF THE UNION

Organization Plans to Become Factor in Intellectual Development of the Student

Conceived as an organization to encourage debating the college Union has grown within the past twenty-five years to a point where it embraces all of the general activities of college and university students. Early in the nineteenth century it was started in England, it soon branched out to include social entertainment of visiting debaters and later became a social center for the entire student body with dining facilities and equipment for all sorts of diversion recognized as desirable for the members of a college community. It has developed in many institutions so that it supervises certain extra-curricular activities not generally conducted by the college authorities.

It is with the ideal of supplying certain needs that the Union Memorial building is being constructed. Some of them are more pressing than others. Some of the uses to which the building will be put have not as yet been found to be necessities in college life, just as many features now recognized as important were ignored a few years ago. It is necessary that the students be given an opportunity to mingle on a common basis in a suitably conducted place for recreation and amusement. It is necessary that provisions be made on or near the campus where guests of the college and the students may be entertained. It has also become a recognized need that activities of the student body be organized under one general head so that they may be carried on to the best advantage.

All of these things the Union cannot accomplish in full from the start but it will develop along those lines as space and equipment permits. It is designed to take under its wing such activities as musical clubs, at least part of the dramatic clubs, discussion groups fostered by the various departments, general social activities of the college and to provide, insofar as it can, certain of the physical needs of the college community on a cost basis.

To this end there will be reading and lounging rooms both for men and for women. There will be the big concourse and lobby for a general meeting place, rooms of different sizes for group meetings with lunch service when desired, office space for student publications and organizations, the assembly room for dances, smokers, plays, band concerts, talks and entertainments of various sorts. The lunchroom group idea, so popular in cities, can become a reality for the teacher who is working closely with his students. In its functions as viewed now the Union Memorial building will draw together the elements composing campus life in such a way as to solidify sentiment and make for united effort.

As it will definitely contribute to the physical equipment of the campus, it will as surely contribute to the intellectual and social welfare of the students. Mixing, on an equal basis with members of the faculty as well as with his fellow student, will arm the M. A. C. graduate with a new weapon in his battle after commencement. It is planned that the Union will foster general discussions of questions of interest as well as aiding in bringing together the expert in his line and those who are interested in that work.

The Union as an organization, operating in its new building, is designed to take the responsibility through the regular departments for providing college entertainers such as the glee club, the quartet, the orchestra and possibly other program fea-
turers with general supervision. Through the Union the necessary properties and costumes for these could be carried over year after year, obviating the present costly turn over, through it dates could be accepted for sending the entertainers out to various places and its organization would be trained and ready to take over much of the work now handled by department heads in this line of endeavor. There should be a director of music, a dramatics director, an extensive business staff to carry on this work and the Union will be equipped to provide these on a continuous basis.

It is also an object of the Union to provide for the freshmen each year the entertainment and instruction which is necessary so that they may learn more fully the traditions and history of the College as well as bringing them as soon as possible into close contact with their class mates so that each group may be well organized and work to its own best advantage as well as to the best advantage of the college.

In the final analysis the Union is an institution entirely for the benefit of the individual and through training him and giving him an outlet for his energy it will benefit the College. On the alumni side of the question it is also a matter of benefiting the individual first and then his alma mater. Through providing a place for the visitor to stay, enjoy the facilities and meet his friends the Union will draw the graduate closer to his College, keep him in touch with her progress and provide him with a contact with the refreshing ideas of the undergraduate.

The dramatic club presented "One Night Only" in the little theater in the Home Economics building on February 14. Professor King, who has been in charge of such productions for nearly a quarter-century, was again at the helm and the amateur Thespians covered themselves with glory. This was the second appearance of the play, in spite of its name. It was given for the benefit of the Farmers week crowd.

CHRISTMAN TO HANDLE UNION CONSTRUCTION

Under an arrangement which presents many favorable considerations, from the viewpoint of the Union, the H. G. Christman company of Lansing will erect the Union Memorial building or will have under its supervision the erection of such parts as it will not undertake itself. First among the points in favor of the agreement between the Union and the builder is the provision for stopping work when funds are not available without penalty to the Union. Another is that all purchases of material are first approved by the building committee before they are executed. Another is that a flat fee for overhead cost, supervision, purchasing organization and other items entering into the organization a contractor must have is being charged and the rest of the cost of the structure will be the actual cost of the work and materials. The contract provides for the payment of net costs in all cases.

The Christman company is somewhat interested in the building in that sixty per cent of its engineers are M. A. C. men although the Lansing office, through which the work will be carried out, boasts of but one former student, W. J. Dodge. Theodora Christman, a daughter of the president of the company, was for two years a student at the college.

The advantages offered by the purchasing power of the company have already resulted in substantial savings on the building cost over the current prices and the building being quasi-public in nature is also favored by some supply dealers over one purely private. Buying materials during the dull season in the building industry has also served to aid the committee in obtaining reduced prices.

Truth in advertising is a most laudable aim but the taxicab company which advertises "bang up service for the J-Hop" in the Holcad is carrying this idea a trifle to the extreme.
MANY REACHED BY RADIO STATION
Basketball Game Story Novel Enough to Draw Replies from Distant Points

A coast to coast service seems to be the outlook for the College radio station. After the Michigan basketball game a request was made that those who had heard the returns write to the station telling how the program had been received and offering such suggestions as the receivers believed would improve the operation of the equipment. As a result M. M. Cory, of the electrical engineering department, has a stack of postcards and letters from the Atlantic and Gulf coasts, from Alberta, Canada and from Nebraska and Iowa as western points. This is only an indication of the range of the station. Replies of this sort constitute only a small per cent of the number of sets which receive the programs.

Broadcasting a play by play story of a basketball game is apparently a novel occurrence for many of the senders of postcards wrote that it was their first experience and complimented the station on the work of the announcer, J. B. Hasselman, director of publications, who told in detail the story of the game. There was also general comment concerning the enthusiasm of the crowd and the playing of the band. Nearly all urged that further games be sent out in a similar manner.

Details of athletic games supply but one phase of the broadcasting programs which have been greatly enlarged from the first conception of those who have backed the proposition. Each Wednesday night there is a regular program with speakers from the faculty, College musical talent and other features. Last week the station was operating on four different nights. Tuesday night the basketball game against Western State normal took up the evening. Wednesday night a band concert and a lecture by a noted disciple of conservation, Thursday night, a program by the Veterans of Foreign Wars and Friday night the J-Hop music gave entertainment to those who have succumbed to the wiles of radio.

Dr. Bradley, noted speaker on conservation, delivered his address in the Prudden auditorium, Lansing. The speech was relayed to the College station by a private telephone line, amplified and broadcast. Someone in Lansing picked up the speech, attached a loud speaker and, calling the station on the telephone, gave the operators a chance to listen in on what they were sending out.

The marked success which has attended the efforts of those in charge of WKAR has opened a wide field for the development of the present processes of extension work and the general spreading of information about the College and its work. One of the noteworthy features which should add to the enjoyment of the alumni possessing an instrument or having a friend who owns one will be the alumni program on the evening of March 26. This is being arranged so that only alumni will take part.

In an early issue of THE RECORD a complete description of the station, its equipment, power and operation will be printed. Kansas Agricultural college has started a radio extension course with credit offered toward a college degree. M. A. C. has not yet reached that stage but the work it can do over the radio has boundless possibilities, especially with the equipment it now possesses.

Some of the time of the freshman class is being spent on applied mathematics. The members of the class of 1927 are figuring out what it will cost them to endow the Union building fund with a sum sufficient to represent their contribution to the project and purchase life memberships for themselves. The officers of the class have formulated a new plan which, if accepted by the class, will set a new mark for future classes and will insure a certain amount to the credit of the Union.
With the Home Economics building ready for duty and the Library almost complete the College will soon be in a position to accommodate a larger number of students than are at present enrolled. Part of this increase will come naturally to the home economics division without much further urging on the part of those interested in the College, part of it will be supplied by the increased number of relatives of former students who will enter with the class of 1928 but to tax the capacity of the institution there must be a concerted effort on the part of all who wish to promote its welfare. It is not so much a matter of advertising M. A. C. as it is one of educating the people to the point where they understand it is no longer merely an agricultural college, that instead it is a great university with diverse branches of study where the aspirant for learning can follow his chosen path with the same or better advantages as accrue to those attending larger or smaller colleges.

Interest of the alumni in their college and the knowledge of what it can do increase each year the ranks of the second and third generation student. Their efforts augment each year the numbers of students from their home towns or the places in which they are located but all of these efforts are reaping but small results in comparison with what can be done if the College and its former students join in a campaign of general education to explain the advantages of M. A. C. It offers ideal facilities for the preparation for any sort of profession, it prepares directly for several professions and vocations and is a specialist in those lines. It has laboratories and staff for graduate training in several branches and is equipped to conduct important research work.

For several years the policy of the administration of the College has been to conserve on its budget in a way which has hampered the dissemination of information concerning the institution. President Shaw has announced a departure from this plan and a series of booklets is being prepared through which high school students may become somewhat acquainted with the College. This will prove but a supplementary means of getting into touch with the high school pupils and needs the added force of personal talks to make it effective. This latter the alumni can supply in his own community without extraordinary effort on his or her part.

An increase of five hundred students would not hamper the work of the College nor overcrowd her laboratories and class rooms with the acquisition of the new buildings. In justice to her history and achievement the former student can not do less than add his advice as a measure of inducing more youths to turn toward M. A. C. Growth will come in time but the facilities will be here and they should be utilized to their full extent.

The student council comes forth with a recommendation to change the name of the College to Michigan State University. Surely that title would be inclusive enough to satisfy the specialist in any line.

During the past week work was completed on the forms of the columns and beams up to the first floor of the Union Memorial building. More temperate weather has allowed the carpenters to keep busy most of the time.

Now that WKAR, the College broadcasting station, has achieved note throughout the United States east of the Rocky mountains, there is not much excuse for the alumni who does not keep in touch with his alma mater, at least on the receiving end.
Corey J. Spencer, of Jackson, contributed a Holstein cow to the building fund of the People's church. During Farmers week it sold for $375 at auction.

J. F. Cox, professor of farm crops, and H. C. Moore, extension specialist in potatoes, were speakers at the annual Farmers week conducted by the agricultural division of Ohio State University.

Through the efforts of the late Professor French negotiations were completed just before his death with the central body of the Knights Templar of the state making available to needy upperclassmen certain loan funds which need not be repaid until after graduation.

Burglars seldom make their appearance in East Lansing but some of the tribe recently visited the Delta Sigma Phi house on Grand River avenue and made away with cash to the extent of $200. It is also believed that they tried their skill on the Columbian house but were frightened away before they had accomplished their purpose.

A series of ten lectures will be presented before the seniors in the electrical engineering course by the engineers and executives of the Michigan Bell Telephone company. They are designed to cover most of the field of operation of a telephone plant and to demonstrate to the men one field of endeavor which they can enter upon completing their course.

H. H. Musselman, '08, professor of agricultural engineering, has perfected a mail digger which can be purchased at a low cost. It should prove a valuable acquisition to the farmer in the southern part of the state who finds his soil needs lime. This department also exhibited during Farmers week an installation which will supply hot water for the farm bath room for an investment of not more than $75.

Ashley Berridge, '12, director, was chosen permanent secretary of the organization.

Chemistry engineering students now have a chance to use the latest type of metallographic apparatus. The new equipment was installed recently in the laboratory supervised by Henry L. Publow, '14.

The class of 1924 undertook to outdo all previous classes in its J-Hop on February 15. As a source for argument this leaves little to be desired. At least the fee of $18.50 per couple may rank among the topnotchers. The other considerations are up to the judgment of the individual.

B. R. Kuhn, '23, has signed a contract to report to the Cleveland club of the American league this spring. Kuhn was originally signed by the St. Louis National league club but was later adjudged a free agent. He was a pitcher on the varsity for three years. Last spring he achieved some notable feats in strikeouts. During the summer he played independent ball. J. O. Brady, '23, is another member of last spring's team who will have a chance in the big leagues. He will report to the St. Louis Nationals at the close of his duties as a teacher and athletic director in the schools of Buchanan, Mich. Brady was the most versatile player on the M. A. C. squad. When the necessity arose he played the infield or outfield, during his first college experience he was a catcher, in high school he was a pitcher. His speed and batting ability are his strongest assets.
Western Normal took another game from the Green and White men when its basketball team came to East Lansing for the second contest between the two organizations. This time the score was 25 to 16, a better showing from the standpoint of M. A. C. The visitors possessed some advantage in size over the home team and added to this a well-coordinated system of attack and a formidable five-man defense which Coach Walker's men found it difficult to penetrate to any decided extent. As a result Captain Eva and his men tried their skill at long shots which failed to net them much of an increase in score.

Kitto started at center with Nuttila and Richards, forwards and Captain Eva and Ralston at guards. Changes in the line-up brought Robinson, Hultman, Hackett, and Smith into the game before the contest was brought to a close. Smith was the most effective of any M. A. C. player at hitting the basket from near the center of the floor while the Normal players found certain distances to their liking and dropped them in with disconcerting regularity. Three of the Kalamazoo men, including their captain, were sent from the game because they exceeded the foul limit but their transgressions were not of the nature which mars a game.

One encouraging feature of the exhibition was the manner in which the home team tallied points on free throws, a department in which it has shown marked weakness.

The rest of the schedule includes games with the University of Detroit, Notre Dame, St. Viator's, Valparaiso and Lake Forest, all of which will be played at East Lansing and play by play stories of each will be broadcast from the College radio station. The final feature of the year will be the Alumni-Varsity game on the evening of March 15. The alumni will present fully as strong a team as the one which defeated the regular squad last year. John Hamme, Frimodig, Larry Kurtz, Jack Foster, Byron Murray, Doc Heasley, and several others will be available for duty. Most of them have been actively engaged in athletics this winter and will be in condition to withstand the strain of the encounter.

The freshman team has been making good progress on its schedule. It engaged in one rather novel contest when two games were played against the Olivet college squad on one day. Both games were lost to the visitors but the first one went by a small score. Several of the youngsters are demonstrating basketball ability of a high character and should add to the resources of the varsity another year.

Coach Young has announced the following competition for the varsity track team:

April 19—Interclass meet.
April 23—Drake Relays, Des Moines, Ia.
May 3—Detroit City college, East Lansing.
May 10—Iowa State at Ames.
May 17—Notre Dame at East Lansing.
May 24—State Invitational meet, East Lansing.
June 7—National Collegiate Athletic association meet, Chicago.

On May 30-31 the annual state interscholastic meet for classes B and C will be run off on College field and the following week class A high schools will compete for honors. These meets have been productive of interest throughout the state and it is expected that the entries this year will top those of previous years.
ALUMNI-VARSITY CLASH IS AGAIN SCHEDULED

"Fat" Taylor has donned his official uniform again and returned to the promoting business. Announcement this week confirms previous suspicions that there is to be produced again this year the feature event of a lifetime. The varsity and alumni basketball teams are scheduled to tangle to a decision on the gymnasium court on March 15. Doctor Taylor's experience last year taught him that the strenuous labors of handling such an affair cannot well be handled by one man, so, after taking inventory of his latest crop of hair, he has decided that he will not again place the full dozen in jeopardy and will assign most of the heaviest tasks to his sturdy henchmen, John Hannes and Larry Kurtz.

In the 1923 edition of this classic a near-riot almost disrupted all plans for the game. The committee has been urged to have on hand either the East Lansing police force or a detachment of R. O. T. C. guardsmen to preserve order in the preliminary argument as well as during the heat of the contest.

As far as Coach Walker is concerned he has determined to use novel tactics and will provide Nuttila and Ralston with collapsible ladders at each basket to facilitate the scoring work of the varsity. It will also be included in the special rules for the contest that John Hannes must stand facing the north or south at all times to prevent a general congestion of traffic in his territory.

Details are still under consideration. The alumni have asked a ruling on the eligibility of Jack Heppinstall, whom they claim has been at M. A. C. long enough to be a graduate. They would employ Jack in one capacity only, that of knocking the ball into the basket with his head after the manner of the soccer player. This case may be taken to the supreme court along with a request for an injunction to bar the varsity from using hands on the ball. This will probably result in a suppression of the final details of the scramble for superiority. At any rate the only way in which you can be certain you are cheated of none of the details of this event is to be present in the gymnasium on the evening of March 15.

TRACK TEAM SHOWS WELL IN FIRST MEET

In its meet with Chicago Y. M. C. A. college, the first on its schedule, the varsity track squad took the honors by a respectable number of points which was not at all unusual but the marks set in the different events indicated that the material on the team this year is of better calibre than was the case in 1923. The final score was 68 1-2 to 26 1-2. Herdell alone took fourteen points.

The summary: 440 yd dash—Hinert, Chicago, Gofton, M. A. C, time, 58.2 seconds; pole vault—Warner, M. A. C. and Holihan, M. A. C., tied for first, Miner, M. A. C. and Starkweather, Chicago, tied for third, height 10 feet 3 inches; 40 yd. dash—Luchs, Chicago, Herdell, M. A. C., Zimmerman, M. A. C., time, 4.7 seconds; 40 yd. low hurdles—Herdell, M. A. C., Van Noppen, M. A. C., Roach, Chicago, time, 5.1 seconds; 880 yd. run—Hartsuch, M. A. C., Baguley, M. A. C., Willard, M. A. C., time, 2 minutes 12.6 seconds; high jump—Kurtz, M. A. C., Starkweather, Chicago, and Preston, M. A. C., tied for second, height, 5 feet 7 inches; 40 yd. high hurdles—Van Noppen, M. A. C., Kurtz, M. A. C., Luchs, Chicago, time, 5.6 seconds; 220 yd. dash—Herdell, M. A. C., Luchs, Chicago, Zimmerman, M. A. C., time, 25.5 seconds; shot put—Rose, Chicago, Teufer, M. A. C., Rome, Chicago, distance, 37 feet and 3-4 inches; mile run—Baguley, M. A. C., Dimavan, Chicago, Willard, M. A. C., time, 4 minutes 53.5 seconds; half mile relay—M. A. C., Shannon, Pollock, Zimmerman and Herdell, first,
ITANO, '11, ACCEPTS POSITION IN JAPAN

A paragraph in Science for February 8 states that Arao Itano, '11, will return to Japan this year. Itano was a member of the varsity tennis team and for some time after being graduated was successively a member of the chemistry, bacteriology department staffs connected with the experiment station. He left the College to accept a position with Dr. C. E. Marshall at the Massachusetts Agricultural college where he received his Ph. D. degree in 1916. Following is the announcement concerning Itano:

Dr. Arao Itano, assistant professor of microbiology at the Massachusetts Agricultural college, has tendered his resignation with the request that it take effect at the close of the current college year. He plans to return to Japan, where he is to have charge of the division of microbiology and chemistry at the Ohara Institute of Agricultural Research.

The freshman basketball team lost a game to Grand Rapids Junior college by two points at the gymnasium on February 9. Most of the yearlings' contests have been lost by similar margins and most of their games have been with teams somewhat out of their class.

In “The Log,” a publication issued by the Furniture City Post of the American Legion in Grand Rapids, Dan Henry, '15, organizer of the post, is one of the members specially honored. Henry was the first commander of the unit, which is composed of former navy and marine corps men in Grand Rapids, and is credited with being largely responsible for its success.

Detroiters’ Doings

M. A. C. bowlers in the Inter-Collegiate Bowling league are beginning to show their mettle. Present standings have M. A. C. tied with the Purdue quintet for third place with a mark of .500, being headed by Wisconsin and Cornell. Boston Tech and Purdue have been the most recent victims of the Aggie onslaught. In the individual standings Mills, '15, is second at 188, followed by Manuel, with a score of 184. Of the 13 bowlers are Reed, Marx, Digby, Hubbard and Covey.

Announcements are out of the marriage of Arthur Dinsmore, '23, to Miss Bernice Cole of Jackson on Saturday, February 2.

“Bill” Nies, '13, was a recent Detroit visitor, in the role of selling electric motors for the Reynolds company of Chicago.

Ken Frazer, '21, works for the Detroit Steel Products company but calls 3247 Hogarth home.

Max E. Parr, '22, at present is a student in the Detroit Institute of Technology. His home address is 623 Milwaukee avenue.

B. L. Fralick, '14, was numbered among those seen at the Thursday noon luncheon in the Cabin Chop House recently. Fralick is a salesman for the Irving Iron Works company of New York City, and has his office at 2105 Kresge Building.

"There'll be a hot time in the old town tonight," promises the committee in charge of the next M. A. C. party to be held Thursday, February 28. Besides cards and dancing the men lead us to believe that there is something in the air by their knowing smiles whenever the affair is mentioned. The party will be at the Twentieth Century club, corner of Willerbell and Columbia. Tickets may be secured at $1.50 each from Eli Middlemess, 308 Griswold, or C. E. Johnson, 314 Police Headquarters.

Alice Hannan, w'26, is connected with the social service bureau of the Y. W. C. A. Her home address is 131 Canfield West.

A world's record for its age and breed has been established by College Bravura 4th, a Brown Swiss cow in the College herd. Ancestors of this cow were also record holders. Townfoot Actress, an Ayrshire, also leads the state in milk and butter fat production for two-year-olds.
Dear Mac:

Heard the returns of the Mich.-M. A. C. basketball game last night. It was great to hear "Jim" give the plays. He is good at it. When does the next one come? Will wait patiently for it.

My wife (Martha Perry, class '22) and I spend our evenings, etc., with B. B. Adams, '15, Bernie More, '16 and "Bill" Bowman, '20, trying to teach them how to play Mah Jong. Their wives say it can't be done.

W. J. Foster, '22.

Dear Mac:

On February 6 about 8 o'clock in the evening (central standard time) A. L. Alderman, '16, George Willoughby, '16, and myself proceeded to the basement of the Arthur Hill Trade school where, during the day, Willoughby instructs the Saginaw boys in the mysteries of electricity. We tried to tune in with station WKAR but we had considerable difficulty at first. We were able to locate them faintly just as the game was starting between M. A. C. and Michigan.

There was another station that had almost the same setting as WKAR and since we were not able to get rid of them altogether we had soft music along with the results of the game. WKAR did not come in very clear but we were able to follow the game very closely. It was very exciting and the person who was giving out the details deserves a lot of credit for the splendid way in which he described the plays. We could almost imagine we were right back with the four thousand who packed the gymnasium that night.

We could hear the band play "Hail, hail, the gang's all here" and could hear the yelling and even the referee's whistle. I think that the yelling was partly responsible for our not being able to hear the results clearly. But then it is hard to keep the Aggies from yelling even when the score is 16-3 against her.

One of my students told me the next day that he had also been able to pick them up and described conditions just about the same as we found them. I have interested several students in M. A. C. and one of my night school pupils is planning on going there for summer school.

Here's hoping station WKAR continues to broadcast basketball games for the benefit of alumni who are unable to get back to see them as they would like to.

Yours truly,

Percy J. Truscott, '23.

Saginaw, Mich.

My dear McCarthy:

During the Christmas holidays I spent a short time at the College but did not get an opportunity to visit with you. After being away from the campus for a few years one now really requires the services of a guide to go about the campus which we once knew so well. It certainly is gratifying to see the college growing so rapidly in buildings and equipment. It is to be hoped that the study body will increase in proportion.

I very much regret that the college authorities have not done more to encourage and foster the graduate school. It would seem to me that during Mr. Friday's presidency the graduate school received a most marked boost. That is as it should be. From what I have been able to observe and learn there are departments at M. A. C. which are equipped and are in charge of a faculty capable of giving and directing graduate work of the highest degree, certainly they are in a position to do what director work equal to most other institutions which are now doing this kind of advanced study and teaching. If M. A. C. can take a lead in undergraduate work certainly it is reasonable to expect much in the way of graduate work. Further, the opportunities for graduate work at M. A. C. are exceptional in some ways, especially as far as library facilities are concerned. I fear that the college library, one of the very best and most complete in the country along agricultural lines, is not fully appreciated. It is most gratifying to see the fine new library building which will soon house the library.

Yours truly,

M. T. Munn, '12.

Geneva, N. Y.

Editor THE RECORD:

I have been on the move for the past few months but now have a permanent address again as above.

I resigned from the C. F. G. E. in September to accept a position with Barron G. Collier, Inc., the national street car advertising organization, and after three months on the road, now represent the company in this territory with headquarters at Denver.

During a visit with my family in Michigan in August I spent a Saturday afternoon on the campus, visiting the stadium and other points of interest. Everything looked good to me. After such a visit it is difficult to understand why the unity and cooperation of former years has been so lacking during the past three or four.

Had a good visit with my old friend Frank Fitzpatrick while in East Lansing. Merritt Reeves and I drove to Grand Rapids that evening where a very happy Sunday was spent with
his family and Bill and Helen Coulter. I spent Thanksgiving with my old side kick Calrow and family and was with them again at Xmas time. H. D. Allen and I used to stage some heavyweight golf games in K. C. but I'm afraid he won't be able to get out this far west on account of his business in Chicago and social responsibilities in Milwaukee. Had my annual letter from Bunny Warren recently.

Will be more than glad to have any of my old friends look me up when in Denver. If I can be of any service to you or to the Memorial committee in this territory, will be very happy to have you call on me.

With regards and best wishes.

Cordially yours,

R. S. Simmons, '18.

Denver, Colo.

MARRIAGES

BOND-CLINTON

Olive Clinton, '22, and Rex Porter Bond were married December 31, 1923. They are living at 60 Oaklawn avenue, Battle Creek. Bond is a graduate of the University of Michigan with the class of 1923 and is a chemist in the laboratories of the Battle Creek Sanitarium.

SULLIVAN-DALBY

Richard Sullivan, '17, and Alice Dalby, '17, were married at the home of the bride in Mt. Clemens, Mich., February 9, 1924. They are temporarily making their home at 101 North street, Mt. Clemens.

CLASS NOTES

Since the first request was sent out for photographs or snapshots for the columns of Class Notes there have been portrayed representatives of a wide range of classes. There is room in The Record for one of these pictures each week. They add greatly to the value of the publication, according to its readers. If you have not conferred this favor upon your friends in the ranks of the M. A. C. association do so at your first opportunity.

'79

Eva D. McBain writes: "Gas-tramping in Florida with son Ralph S., '20, and daughter Jean I. Having a fine time. We will probably reach our home, 435 Crescent N. E., Grand Rapids, about May 16 and Coryell, Michigan, about June 1."

'84

H. D. Luce is manager of the truck body department of the Hugh Lyons and company of Lansing, and lives at 711 Capitol avenue south.

'95

H. W. Lawson has moved in Washington, D. C., to 1717 N street.

'96

The following bears the signature of John F. Nellist: "Still publishing road maps. Hope to reach the hundred thousand mark this year. I have sold my green house plant and am now building houses on the property and selling it off. Paul V. Howard, '22, was married to Sarah Linderman in Detroit on October 12. They are living in Detroit where Mr. Howard is meat inspector for the city. Alice Hadley, '03, (Mrs. Sidney A. Wise) is living at Artesian, South Dakota. Besides looking after her family of six children, the two eldest of whom are in high school, Mrs. Wise is teaching in the high school in Cutburt, twenty miles from her home. Mr. and Mrs. Nellist live in Grand Rapids at 1955 Jefferson avenue S. E.

'03

T. P. Chase reports on his blue slip: "You will please note change of address to 49 Iyanhoo, Dayton, Ohio. I am now located again in a home of my own after several years of knocking around and doing fairly well as a research and designing engineer with the General Motors Research corporation. I am sending a small check for the building fund and hope to be able to send more in the near future."

Edna Smith is doing extension work in household management at Ithaca, New York, where she lives at 204 Dryden road.

'11

G. P. Springer has moved from Ann Arbor to 320 Chestnut street, Philadelphia, Pennsylvania.

'13

L. C. Carey, formerly in Benton Harbor, is now in Charlevoix, Michigan, according to postal information.

Raymond F. Kroodsma writes: "Still looking after Uncle Sam's forests on the military reservation at West Point. A son, Raymond Frederick, was born January 8, 1924. From his lung power I judge he will make a loyal M. A. C. rooter some day. I met Ernie Burt, '14, who is now a captain in the law department, stationed at West Point. M. Westveld, '13, is now at Amherst, Massachusetts, in the northeastern experiment station."

George F. Pingel reports from 99 Lincoln avenue, Mt. Clemens, Michigan, "Still in the ice, coal and builders' supply business at 28 Pine street. Our city is growing fast and our business is growing with it. Am trying to induce
two good athletes to enter M. A. C. next fall. One is an all state footballman. I like to keep in touch with doings at M. A. C."

'H. F. Publow lives in East Lansing at 410 Marshall street. He remarks: "Still at M. A. C. as assistant professor of chemical engineering, and training three young hopefuls to help make the future M. A. C."

Carl Nilson is a metallurgist in the engineering department of the Hudson Motor Car company at Detroit. He lives at 978 E. Grand Boulevard.

Roy F. Irvin is now in Grand Rapids, Michigan, at Apartment E, 2 Oakwood.

Wallace Dubey is in the contracting business in Detroit, where he lives at 7153 Webb Avenue.

F. M. Keyes has moved in Upland, California, to 266 Eighth Avenue.

E. Davis is no longer to be reached in care of the American Loan and Trust company at 151 Congress street, Detroit.

E. B. Moore is now a licensed embalmer and is a partner in a furniture and undertaking business at Marshall, Michigan, where he lives at 312 North High street. He is president of the Marshall country club and challenges any M. A. Cite to a game of golf.

R. S. Linton’s Owosso address is 729 N. Shiawassee street.

R. H. McWilliams has moved in Williamsport, Pennsylvania, to 1165 High street.

Gordon Edmonds writes: "Still at the same job of raising food for the Ionia reformatory men and live stock and incidentally have three boys preparing now to be M. A. Cites." Edmonds is addressed R. 5, Ionia.

Iva Jensen is teaching home economics in the Flint high school but visits her home in East Lansing often enough to retain that as her mailing address for The Record.

Frank Fitzpatrick has left East Lansing and is now living in Detroit at 5031 Lincoln avenue.

All Together, Now!!!

Are you ready when the song leader gives the signal? When the bunch sings the old songs don’t just hum the tune. All of M. A. C.’s best songs, with the music, are included in an attractive booklet of convenient size. You boosters of the Green and White need it on your pianos. It is indispensable for branch association and club meetings. Your copy will be mailed prepaid upon receipt of 50 cents at the alumni office. Attractive prices for group orders. The proceeds will be applied to the Memorial Union Building Fund.
Announcing that she never sees anyone from M. A. C., Winnie E. Haywood writes from Davenport, Iowa, where she lives at 1309 Perry street, that there is a splendid school system in that city but "it takes a lot of fussing around to get a certificate, even after M. A. C. I am teaching clothing in one of the junior highs this year."

Frederick A. Clinton lives at 9 main street, Wethersfield, Conn. He is planning a trip to Michigan this summer.

Sherman Coryell has shifted his home from 149 Goldsboro place to 210 Henry avenue, both in Grand Rapids.

Milton C. Townsend finds life a mixture of blessings and misfortune in Hastings, Mich., where he lives and earns the wherewithal to pay the grocer. His last blue slip carries the following information: "Except for the last five weeks, am teaching agriculture to future M. A. Cites at Hastings. During that time have been busy taking care of a bum knee and a newly arrived daughter, Jane Ellen, born January 21, 1924. Expect to be back on the job soon. Raymond Clark, '22, teacher of physics, took charge of part of my work during my absence."

S. C. Vandecaveye requests his RECORD sent to the bacteriology division of the experiment station at Pullman, Wash. He has charge of that branch of the work at that place.

Kenn Weston is missing from the latest address he forwarded to this office according to the report sent in by a postman on the route in Chicago.

Carol MacGregor found Duluth rather cold during the winter months so has gone to Chicago where he is reported at 4462 Greenview avenue.

Paul Howard is now at 8600 Epworth boulevard, Detroit. He is a meat inspector for the city.

Harold Schaibly reports from 9630 Longwood drive, Chicago, "I have been employed by the Commonwealth Edison company since June, 1923. Work is fine. Weather somewhat changeable. Always glad to get THE RECORD."

Sigurd Mathison wants his RECORD sent to Box 317, Big Rapids, Mich. He writes: "I am now working for the H. J. Heinz company. Enjoy my work very much. Am certainly pleased to get THE RECORD each week."

Emily Herkimer sends a check for her year's dues from St. Louis, Mich.

Faye Foster is head of home economics in the Dansville, Mich., consolidated school.

Robert K. Edmonds lives at 920 W. Ottawa street, Lansing, and while away his spare hours helping the Reo Motor Car company convince the public concerning the merits of its product.

Clair E. Wickman is at Hanover, Mich., on the home farm and expects to stay there for at least a year. He encloses a plea for word from some of his classmates.

T. J. Roosevelt is "still farming on Route 4, Decatur, Mich. I hope the Association isn't as near broke as I am."

Carl H. Hemstreet writes from Bellaire, Mich.: "Am engaged in horticultural production at the old stand. Snow is rather deep just now. Would be glad to see any M. A. Cites who might wander this way."

Preferred Position

Old Timers in advertising well remember that the best preferred position in any small town “sheet” thirty years ago was alongside the personals. The alumni publication is the only magazine today that offers advertising space alongside personal news notes. These notes are all about personal friends of the readers.

So—every page is preferred position.

Forty-four alumni publications have a combined circulation of 160,000 college trained men. Advertising space may be bought individually or collectively—in any way desired. Two page sizes—only two plates necessary—group advertising rates.

The management of your alumni magazine suggests an inquiry to
