Michigan Agricultural College Association
Publishers in East Lansing
Vol. XXIX May 12, 1924 No. 29
Established 1896

Published for the alumni and former students of the Michigan Agricultural College by the M. A. C. Association.

Published weekly during the college year and monthly during July, August and September; thirty-five issues annually.

Membership in the M. A. C. association, including subscription to THE RECORD, $2.50 per year.

Unless members request a discontinuance before the expiration of their memberships it will be assumed a renewal is desired.

Checks, drafts and money orders should be made payable to the M. A. C. Association.

Entered as second class matter at the post office at East Lansing, Mich.

HORSE SHOW SET FOR MAY 30, 31

Many of Lansing's most prominent residents are listed as patrons of the second annual R. O. T. C. horse show to be held at the College, May 30 and 31. The affair this year has already drawn twice the entries listed in 1923 and its extension to a two-day program bids fair to be insufficient to properly handle all events according to schedule, although the committee in charge has arranged the program so that neither day will be marked by too large a number of events for the comfort of the crowd. Last spring the field south of College field was well filled with cars and bleachers erected along the side were loaded to capacity. From the proceeds of the affair last year a sum of money was given to the band uniform fund and supplies were provided for the polo association so that this sport could be played by students. It is proposed to continue this plan.

Captain Chase, cavalry, is secretary of the committee in charge of the show. He reports that horses have been entered from Detroit, Bay City, Jackson and Grand Rapids besides those from Lansing and vicinity. An attractive prize list has been prepared by the committee giving in detail the various events and the requirements. Prizes will be donated by business men of Lansing with the exception of several gifts by individuals from other places.

It is announced that there will be nineteen classes of competition including the following: Field artillery team; Troopers' mounts; Cavalry remount, R. O. T. C. cadet horsemanship class, R. O. T. C. cadet officers' jump; Officers' chargers; Ladies' saddle horses, three gaited; Children's saddle class; Gentlemen's saddle horse, three gaited; Saddle horse, five gaited; Teams of three hunters; Pen jump; Lightweight hunter; Middle and heavyweight hunter; Ladies' hunters; Hunter sweepstakes; Open jump; Pairs of jumpers; Novice jump. Professionals may compete in the pen jump, hunter sweepstakes and open jump. All other classes are reserved for amateurs and several are limited to members of the College cadet corps.

The Varsity band will assist in the program as it did last year and, with the added attraction of baseball games on both days of the show, it is anticipated that the attendance will be much larger than last year.

The importance of such a contest at M. A. C. is two-fold. It inspires interest in well-bred and trained animals and touches also on the preparedness end of the military program. As an annual feature the horse show will undoubtedly grow in popularity and in the general interest displayed by the people of the state.

JOHNSTON ANALYZES PEACH SITUATION

Stanley Johnston, '20, superintendent of the South Haven experiment station, is author of a bulletin published by the experiment station entitled "An Analysis of the Peach Variety Question in Michigan." Johnston goes deeply into the peach growing industry in the state, detailing the history and development of this phase of agriculture. He includes temperature charts and other data relative to the desirability of western Michigan as a horticultural section. He finds that in spite of a heavy reduction over a few years ago in the number of peach trees now bearing the yield is about the same because of better selection of varieties and better cultural methods. The bulletin includes advice as to the varieties to plant and a discussion of the trees at present on the market.
MINNESOTAN PRAISES WORK OF BESSEY, '69

Charles E. Bessey, '69, is eulogized by Dean Kelly of Minnesota in an article in Christian Education. The Holcad prints the following:

More big hearted, human teachers like Dr. Charles E. Bessey, father of M. A. C.'s Dr. Ernest Bessey, and famous botanist of the University of Nebraska, is the urge of Dean F. J. Kelly in an appeal made in Christian Education to American educators toward harmonizing the student's religious conceptions with his college studies.

When Dean Kelley of the University of Minnesota studied botany under Dr. Bessey some 20 years ago, he experienced, like other college students, a conflict of ideas concerning religion and science. The whole course of botany was built up around the theory of evolution, the links from family to family in the plant kingdom. At that time evolution was less commonly understood than it is now.

Unlike most science teachers of that day, and unlike many today, "dear old Bessey" as Dean Kelly calls him, instead of letting science tell its story alone, devoted one hour of his time with his class near the close of the term to explain what he regarded as the consistency between the teaching of his course, and the rational interpretation of the Christian religion.

Not only did Dr. Bessey indicate to his classes that he was a firm believer in the Christian religion, but he also pointed out how much his belief in the scientific theory of evolution had strengthened his faith, had exalted and magnified the Creator.

"It gave to him as a man," stated Dean Kelly, "an exalted place in the world to think that he was part of a plan of creation not yet perfected, and that something of the plan depended upon how well he played his part."

This taking in account of the intellectual conflict with his students detracted nothing from him as a scientist. In fact Dr. Bessey was recognized as one of the leading botanists of the country. During his 34 years of teaching and his four years of acting president at the University of Nebraska, Dr. Bessey was recognized on the campus as one of the most remarkable influences possible in the lives of the students.

Dr. Bessey was a student at M. A. C. from 1863 to 1869. Besides his professorship and acting presidency at the University of Nebraska, he was a professor of botany and part of the time of horticulture for 14 years at Iowa State college.

HIGH SCHOOL BANDS ENTER TOURNAMENT

Professor Clark, under whose direction the high school band tournament will be held on the Campus on May 24 reports ten applications already in with the probability that four more will enter the competition. This will nearly double the entries of last year. The high schools of Flint, Bay City, Nashville, Three Rivers, and Decatur and Grand Rapids Junior college are additions to last year's list. The judges will be A. H. Vandercook, Chicago band director, Professor J. S. Taylor, head of the College music department, and Carl H. Dewey, director of the Reo Motor Car company band. Each organization will be required to play one march selected by the committee, which will be sent out in advance of the tournament, and one of its own selections. Uniforms will not be required but a cup will be awarded the best uniformed band aside from the cup for excellence in playing.

Liberty H. Bailey, '82, will be one of the chief speakers at the annual meeting of the Indiana Horticultural society at Evansville, July 14 and 15. Luther Burbank is also on the program.
BUTTERFIELD ASKED TO TAKE PRESIDENCY

According to an announcement appearing in the press and confirmed by L. Whitney Watkins, '93, president of the State Board, Kenyon L. Butterfield, '91, has been offered the presidency of the College. There was no indication by either Butterfield or Watkins as to whether or not the former would accept the position or as to when the appointment would take effect were it to be carried out.

Butterfield served as editor of "The Grange Visitor" for five years, was instrumental in organizing and carrying out a system of farmers' institutes which preceded the present extension service and was president of Rhode Island state college before going to the Massachusetts Agricultural college of which he has been president since 1906. He was a member of the China Educational commission sent to make a survey of the needs of that country, has gained considerable fame as a sociologist and has published several books.

In addition to his degree from M. A. C. he was granted an M. A. by Michigan in 1902 and a Ph. D. by Amherst in 1910. He was born in Lapeer, Mich., in 1868.

ALUMNAE MAKE PLANS TO ENTER A. A. U. W.

The Alumnae Council met March 24 at the Woman's building for dinner, 30 women were present. Mrs. Chloe Goodrich Carpenter, chairman of the council, introduced Mrs. Louise Campbell, Miss Jean Krueger, and Miss Kendrick. Miss Kendrick, who is president of the local chapter of the American Association of University Women, explained the method by which M. A. C. women may become eligible for membership in that association, and urged the Alumnae Council to undertake the task.

The meeting then adjourned to the Practice House where the members were received by Miss Gross and shown about the house.

A business meeting was then held. The new Board of Directors is to be composed of a representative of each society alumnae organization and an independent member. The following organizations have reported, Alpha Phi, Eva Britten Clark; Themian, Mrs. Shoesmith; Sororian, Helen Perrin; Sesame, Fannie Rogers Stewart; Letonian, Lou Butler; Independent, Thelma Haite. The others have not been heard from.

Mrs. Lenora Van Halteren was elected chairman, and Lou Butler, secretary and treasurer.

It was decided that the Alumnae Council should undertake the task of having M. A. C. placed on the list of accredited colleges so that her alumnae will be eligible to membership in the A. A. U. W. A committee is to be appointed for this purpose.

A committee was appointed to draft two resolutions: One voicing an approval of the efficient manner in which Acting President Shaw has conducted his administration; the other expressing our desire to see the name of the college changed to one more representative of the work being done.

It was also decided to offer to Dean Krueger the assistance of the Alumnae Council in making a success the dedication of the new Home Economics building at commencement time.

Lou Butler, '17, Sec'y.

The entomology and forestry departments have just completed an extensive experimental spraying operation for the control of the white pine leaf scale in the forest nursery. This scale attacks practically all of the evergreens and has become quite thick on many of the white pines in this locality. The entomology department became interested in its control and furnished the spray and directed the work. While the scale does not seriously injure the trees it was desired to clean them up before shipping. The forestry department says that over fifty thousand trees were sprayed and hopes to have these trees for sale next year. A number of different sprays were used.
Bearing the guerdon of sportsmanship aloft many colleges are being lead by the outstanding members of their undergraduate bodies to a cleaner, more cordial treatment of visiting athletic teams. It is interesting and fitting that these standards of courtesy should also be urged and upheld by alumni publications. From editorial comments in recent issues of magazines devoted to graduate affairs the viewpoint of the alumnus is unmistakably on the side of gentlemanly conduct on the field and in the stands.

In the Michigan Alumnus for the past week the Ferry field crowd is taken severely to task for its actions toward Wenner, M. A. C. pitcher, when he purposely passed a dangerous Michigan batter. As is customary in many places the home crowd accepted this opportunity to extend to the visitor a generous amount of abuse. The Alumnus points out that such baseball strategy is generally practiced and is nowhere out of place when it appeals to the director of the team’s play that such an action is the best plan.

Treatment of a visiting team should bear all the marks of the courtesy of a gentleman to his guest. To win cleanly is to be desired, to win so that the losers will depart with the best of feelings toward the institution and its representatives is the only course worthy of intercollegiate athletics. The tactics of the home crowd are as much an indication of the quality of the school as are the actions of its men on the field. Professional contests may be marked by rowdism of various sorts but even they soon fall into disrepute under such conditions. The standards to which the competitors and adherents of intercollegiate sports hold themselves are the greatest factors in determining the usefulness of organized athletics. Self-control is the most valuable attribute in the moulding of character, it can be acquired by the individual. To always do the right thing in the heat of a stirring battle is difficult, but it gradually becomes easy as it is practiced. There is no room in the athletic records of M. A. C. for reflections on its sportsmanship, the alumnus can do as much as the student to see that the best instincts prevail.

Announcements of important work in chemistry by members of the College staff and alumni have become almost commonplace, they are so numerous. It is right that they should be plentiful for M. A. C. was the first college in the United States to install a course in chemistry as a part of the regular curriculum.

Long delayed spring sunshine is bringing out the leaves on all the trees and shrubs on the Campus. The oaks, resistant to the ordinary coaxing of early warmth, have begun to succumb to the wiles of the advancing season and their outlines are being softened by swollen buds.

At a cost of $5,000 a new electric lighting system was installed for the Campus during the winter of 1897-98. The present plant which should be in operation by next fall was made available by an appropriation of $150,000. During that year there was a total of 306 students enrolled.

Members of the staff of The Holcad dined together in tribute to the retiring members on May 2. J. B. Hasselman, director of publications was the chief speaker on the program. He urged better quality as the ideal of the student newspaper instead of attempting to increase the number of issues each year.
"Close Beside The Winding Cedar"

The Columbian basketball team won the inter-society title by defeating the Olympics in a close game in the finals of the competition.

Liberal Arts numbers scheduled for next year include: Edgar Guest, poet and humorist; Rev. S. Parkes Cadman, lecturer; Ernest Schelly, pianist; Lambert Murphy, tenor; Ruth Rodgers, contralto.

A design calling for a flat topped bridge across the Red Cedar, prepared by T. Glenn Phillips, landscape architect for the College, has been accepted by the State Board. The new plan replaces one submitted previously for the new structure to connect the Campus with the athletic field. It was originally intended to have two sidewalks and a space for vehicular traffic on the bridge but it will be built without a line of demarkation between the sidewalks and the rest of the bridge so that it may more readily be used for large crowds and several lanes of automobiles when necessary.

COMING EVENTS

May 16—Baseball, Lake Forest University, East Lansing.

May 17—Track meet, Notre Dame, East Lansing.

May 20—Chicago Symphony Orchestra, gymnasium.

May 21—Baseball, Michigan, East Lansing; Meeting of executive committee, M. A. C. Association.

May 24—Track meet, State Invitational, East Lansing.

May 26—Baseball, St. Viator's, East Lansing.

May 30—Baseball, Wisconsin, East Lansing; R. O. T. C. horse show.

May 31—Baseball, Butler college, East Lansing; R. O. T. C. horse show.

The immience of moving day for the Y. M. C. A. building because of its location directly on the route of the new entrance to the Campus is keeping the officials of that organization busy trying to find a new home.

A recent report by the College health department indicates that the men at M. A. C. are more susceptible to common ills than are the women. A larger proportion of the male students than co-eds have required treatment during the current year.

The College canoe club has recognized the growing tendency of co-eds to "paddle their own canoes" and has admitted the fair sex to membership in what has hitherto been distinctly a men's organization.

Marked by more than the usual display of formality the class of 1924 donned caps and gowns for the first time on May 6 and paraded the Campus lead by the varsity band. The seniors started their ceremony at the gymnasium where they were addressed by President Shaw and Secretary Halladay. The procession then followed around the Campus where the budding alumni stopped at the buildings which had been their headquarters and bade them farewell. The co-eds stopped at both the Woman's building and Home Economics building, the foresters at the Forestry building, engineers at Olds hall, agriculturals at agricultural building, veterinary men at their building and the entire line stopped at the library and Union Memorial building. Completing their circuit of the Campus the marchers entered Sleepy Hollow where they passed through arches erected by the different classes and decorated with their colors. The class numerals were formed and a picture taken and the group dispersed and heard a short concert by the band. Many visitors were drawn to the Campus by the affair.

CHICAGO SYMPHONY
AT COLLEGE MAY 20

Appearing again in two concerts the Chicago Symphony Orchestra is scheduled to visit the Campus on Tuesday, May 20. Its first trip to East Lansing, in the spring of 1923, was so successful that arrangements were made for a return engagement. Last year the gymnasium was crowded for both the afternoon and evening performances. Nearby cities were represented by many people who came especially for the occasion.

Alumni may reserve seats by writing to the office of Secretary Halladay. All seats are reserved and sell at $1.50 each, except to students who are admitted for one dollar. The concerts begin at 3 and 8 p.m. On the following day the annual baseball game with Michigan will be played on College field offering an opportunity for visitors to stay over and take in both events.

REUNION OF TRAINING DETACHMENT VETERANS

Companies A and B of the M. A. C. Training Detachment, the first outfit to be trained at the college, are to hold their fifth reunion and dinner at Hotel Pfister, Milwaukee, Wisconsin, May 17, at 6 p.m.

It is expected that all former officers will attend as this is really the first joint reunion of the Companies A and B, while it is the fifth reunion of Company B.

A large attendance is expected and if one is to judge by the success of past reunions the reunion of 1924 is bound to surpass anything yet attempted. Information may be secured by writing W. K. Roberts, 651 Delaware avenue, Milwaukee, Wis.

CORNELL DEAN NAMED
GRADUATION SPEAKER

Dexter S. Kimball, dean of engineering at Cornell University will deliver the commencement address on Monday, June 16, it is announced by President Shaw. Dean Kimball delivered an address at the annual meeting of the Land Grant college association on the liberalizing of technical education which drew much favorable comment. His experience in the engineering vocation and in connection with Cornell has allowed him to see both sides of the question. For a short time in 1918 he was acting president of Cornell and since 1920 has occupied his present position.

Preliminary announcements concerning the program for Commencement include the name of Rev. Frank Kingdom as baccalaureate speaker. Rev. Kingdom is pastor of the Central M. E. church in Lansing and has been much in demand on public occasions in the city. Musical features have not yet been announced.

HULTMAN PLACES FIRST IN FOOTBALL FIELD DAY

V. J. Hultman, '25, captain-elect of the football team, took first place and W. Schneider, '27, second in the football field day on April 26 which marked the conclusion of the four weeks' period of spring training. In the individual events Hultman took first in punting and blocking and tied with Kennon for top honors in drop-kicking. Parley was first in the 100-yard dash, Lyman won the forward passing contest, tied with Limpert on receiving passes, was first in open field running, running interference and tackling. Slaughter and Gerdell were accorded the honors for charging. Of the list of winners Hultman and Lyman were the only varsity players from last fall. Farley was a member of the reserve squad and the rest were on the freshman list for the fall work.
CALIFORNIA ALUMNI
PLAN ANNUAL MEETING

At the April luncheon of the M. A. C. Association of Southern California, plans for the banquet, to be held about May 20, were discussed. Twenty-two alumni attended the informal luncheon, the oldest class represented being that of 1877.

The following were in attendance: William R. Barger, '19; L. S. Esselstyn, '13; Phena Blinn Esselstyn; Don Francisco, '14; Jessie Godfrey, '18; Earl M. Harvey, '15; H. Curtis Howard, '18; Louise Kelley Pratt, '11; H. E. Truax, '12; A. H. Voigt, '13; L. B. Scott, '11; H. A. Schuyler, '13; W. O. Fritz, '77; Reeva Hinayan, '16; I. J. Woodin, '13; K. B. Stevens, '06; F. R. Germond, '13; F. E. Wood, '09; O. W. Schleussner, '12; A. J. Wilson, '13; F. R. Kenney, '14; Paul S. Armstrong, '15.

We are now making plans to have both W. K. Prudden, '78, and Mr. R. E. Olds at our banquet in May, Mr. Olds being on a round-the-world cruise, and is expecting to be in San Francisco about May 16.

Paul S. Armstrong, President.

Alumni Opinion

Editor of The Record:

I would like to add my bit to the discussion on the name question. I think the name Michigan State University the most appropriate one for the following reasons: First, the addition of new courses of study and improved educational facilities has put M. A. C. out of the college class and into the university class. Second, the word Michigan must be used, since at present the school is principally a state institution, even though it does come under the Land Grant act. Third, some distinguishing term must be used, to differentiate between the University of Michigan. I think Michigan State University satisfies this requirement to the nth degree, as Professor Plant would say.

I notice considerable discussion in The Record of late concerning how to get a larger enrollment for next fall. I can't tell you how to do it this year, but 1925 might be helped greatly if efforts were made to bring the 1924 football team up to its gone-but-not-forgotten standards of the days when Macklin was coach. What seems to be the trouble? If it's coaching that ought to be easy to remedy, and if it's players that are lacking why not build up a team like Colgate, W. & J., and some of the other schools do.

To change the subject, I had the pleasure on March 27 of hearing the announcer say "This is station WKAR, Michigan Agricultural College." I heard him introduce W. E. Reddy and his talk on barberry eradication and then I rung off because static conditions were so bad. At that, though, WKAR came in louder than WWJ (Detroit News). I'm the proud possessor of a five tube neutrodyne set and now that I know the setting can tune in any time.

Have been here since November 15th and can say this much for Wheeling, have seen more M. A. C. men here than I have since leaving Detroit last April. Frank H. Wildern, Norman Koleman, Verne Harris, and Cornelius Pond, all of classes '20 and '21, are in the Landscape Service company of this state. They have branches in Charleston, W. Va., and Huntington, with their main office here. I get to see them quite often. Pond, Koleman and I are thinking of starting a West Virginia Ward F club. We would for sure if "Fresh" Eddy and Lee Rothgery, alias "Hay Wire Bill," were anywhere around.

Hoping things are shaping up good for baseball, Commencement, and Homecoming,

Sincerely,
Neal H. Fenkell, '21E.

Work on the Union Memorial building was delayed for a few days last week when it was found that some of the steel to be used in the construction of the second floor had not been sent according to specifications. The company supplying the steel immediately made arrangements to correct its error.
CHICAGO WINS ON MUDDY FIELD
Maroons Gain Long Lead on Wenner—Wakefield Shuts Out St. Mary's

Harry Wakefield, making his first appearance as a varsity pitcher held St. Mary's to one hit and struck out seventeen of the visitors on College field, April 29, and the varsity won, 8 to 0. Wakefield also had the benefit of excellent support in the field and his team mates totalled eight hits while their opponents threw in eleven errors for good measure. St. Mary's does not come up to the standard of state college teams as a rule but usually puts up better opposition than it displayed this spring. Wakefield, Kebler and Richards accounted for six of the hits made by the victors.

Rain failed to stop the Chicago game on College field on May 3, but the diamond was so muddy that much of the playing was a burlesque on baseball. The Maroons took the game 8 to 4 when a ninth inning rally by Coach Walker's men was nipped by a change in pitchers after three runs had crossed the plate. Base running in particular was filled with examples of what not to do on the diamond but it would undoubtedly have appeared in a different light had the athletes been using their speed where it was unhumbled by mud several inches deep. Wenner started the game for M. A. C. but withdrew in the fifth inning in favor of Wakefield who appeared to be much more effective than his predecessor. Hitting was about even throughout the game. Both sides displayed a tendency to drive the ball far and often but the visitors were aided in piling up their lead by several misplays by the home infield which could not geage its throws to suit the condition of the diamond. Kebler, at third, sent in at least two runs by low throws to first which would have been picked up by Beckley had the turf been firm enough to cause the ball to bound.

M. A. C. had been threatening the Chicago pitcher throughout the game but it was not until the ninth when two pinch hitters were sent in that the Green and White attack assumed serious proportions. MacMillan and G. Kuhn entered the contest at this stage and both responded with safeties which scored runs. Three runners were sent home before Ranney struck out for the final play of the game.

VARSITY TAKES CLOSE MEET FROM DETROIT

Herdell took firsts in the 100 yard dash, the 220, and the low hurdles, establishing enough of a margin so that his team mates could take their first outside meet of the season on College field May 3 when Detroit college furnished the opposition. The final score was M. A. C., 67; Detroit, 64.

Summary:
100 yard dash—Herdell, M. A. C., first; Cooper, Detroit, second; Parks, M. A. C., third. Time—10.2 seconds.
Mile run—Baguley, M. A. C., first; Lampman, Detroit, second; Ripper, M. A. C., third. Time—5:11.2.
Half mile run—Brown, Detroit, first; Hartsuch, M. A. C., second; Killoran, M. A. C., third. Time—2:12.2.
220 yard dash—Herdell, M. A. C., first; Parks, M. A. C., second; Cohen, Detroit, third. Time—22.7.
Shot put—Vincent, Detroit, first; Doherty, Detroit, second; Surato, M. A. C., third. Distance—30 feet 8 inches.
120 yard high hurdles—Cooper, Detroit, first; VanNoppen, M. A. C., second; Kurtz, M. A. C., third. Time—16.8 seconds.
440 yard dash—Blanchard, Detroit, first; Mar, M. A. C., second; Gofton, M. A. C., third. Time—53.4 seconds.

Pole vault—Setz, Detroit, first; Hollhan, M. A. C., second; Crane, Warner, M. A. C., tied for third. Height—11 feet.
220 yard low hurdles—Herdell, M. A. C., first; Cooper, Detroit, second; VanNoppen, M. A. C., third. Time—26.3 seconds.
Discus throw—Vincent, Detroit, first; Zuber, Detroit, second; Archbold, M. A. C., third. Distance—112 feet.
High jump—Doherty, Detroit; Kurtz, M. A. C., and Preston, M. A. C., tied for first. Height—5 feet 7 inches.
Broad jump—Kurtz, M. A. C, first; Cooper, Detroit, second; Doherty, Detroit, third. Distance—20 feet 4 5/8 inches.

Detroiters' Doings

Friends of A. Gordon Adams, '15, and Fred O. Adams, '15, will be sorry to learn of the death of their mother, Mrs. Emily A. Goodson, on April 15, at her home, 879 Lawrence avenue. Mrs. Goodson had enjoyed unusually good health, but an attack of pneumonia was fatal. She was born May 15, 1868, in Kildowney county, Antrim, Ireland. A daughter, Dorothy E. Goodson, is a freshman at M. A. C.

Verne Branch has at last decided to take the fatal leap, even if it costs him his tonsils. After a year's threatening the date for meeting the physician has been set for May 10.

B. A. Doelle, w'25, now chases fires and burglaries as a member of the city staff of the Detroit News. His address is 712 West Canfield avenue.

Ray Hunter, '17, reports that Tommy Blair had to sell his wife's wash boiler to buy more radio equipment. He is getting ready for the special M. A. C. program, May 13.

Final standings in the Intercollegiate Bowling league found M. A. C, in third place with 18 games won and 12 lost. Other honors gathered by M. A. C men were high team game, high team match, high individual game, as well as the highest game average for the season. E. J. Manuel, Mills and Meyers lead the league in individual averages.
NEW COURSES OFFER LIBERAL CHOICE

Arts and Science Curricula Present Broad Choice for Future Students.

This article deals with the general courses now available to M. A. C. students. It is the second of a series on the opportunities offered by the College.

The recent establishment of the Liberal Arts course at the College, leading to A.B. and M. A. degrees, together with the exceptionally successful operation of the Applied Science course since its establishment in 1921, have resulted in enabling M. A. C. to make a powerful appeal for the class of college students who are undecided as to the choice of their life work, or who desire a comprehensive training along scientific lines.

This class is recognized by educational authorities as being probably the most numerous group of prospective college students, and providing opportunities for the training of such students has been the cause of considerable change in curriculum requirements in recent years.

Entrance requirements in the Liberal Arts division comprise graduation from an accredited high school where two years of study must have been completed in Latin or some modern foreign language. During the freshman year a considerable freedom of choice of subjects is permitted. Four courses of four hours each per term are called for, of which English is the only required subject, the others being chosen from botany, chemistry, drawing and design, French, German, history, mathematics, zoology and music. To this list is added in the sophomore year, physics, geology, bacteriology, entomology, physiology and music. To this list is added in the sophomore year, physics, geology, bacteriology, entomology, physiology and economics.

In the junior and senior years, major subjects are chosen from the following list: English, economics, drawing and design, music, history and political science, mathematics, modern language, and sociology, while minor subjects may be chosen from the courses permitted during the sophomore year, with the addition of education, physical training and military science.

Graduate work in the Liberal Arts division leading to an M.A. degree is also provided for, according to recent action by the State Board.

The purpose of the Applied Science course is stated as follows in the College catalog: "The aim of this course is to give training in one or more fundamental sciences whose applications lie at the basis of scientific agriculture, engineering, home economics and other lines of work. An attempt is made to give the student a broad view of science in general, providing at the same time an opportunity to take such other subjects as will fit him to become an efficient citizen."

Subjects available for major study in this division, in which from one-third to one-half of the college work must be taken during the junior and senior years, include bacteriology, botany, chemistry, drawing and design, economics, English, entomology, history and political science, mathematics, physics and zoology. A large list of courses available as minor or elective subjects makes this division a very attractive one for students desiring either highly technical training in particular sciences, or a general and comprehensive education of a broadly scientific character.

With the opportunity of offering courses as liberal in character as the two described, alumni have a distinct advantage now over previous years in placing the appeal of their alma mater before prospective college students.

Michigan defeated the varsity tennis team in easy fashion at Ann Arbor on May 3. Although all matches were not played the Maize and Blue had a wide margin when the meet was stopped.

Charles McKenny, '81, president of Ypsilanti Normal college, will address the convocation on May 21 and on June 4. Thomas E. Johnson, state superintendent of public instruction, will be the speaker.
For the man beyond the campus

FIFTEEN YEARS AGO Joseph French Johnson, who was, and is, Dean of the School of Commerce, Accounts and Finance of New York University, found himself faced with a problem to which there was no satisfactory answer.

He was constantly in receipt of letters from business men, many of them occupying places of executive responsibility. The letters asked such questions as these:

"What books shall I read?"

"Can you lay out for me a course in business economics?"

"How can I broaden my knowledge of salesmanship, or accounting, or factory management, advertising or corporation finance?"

Those were pioneer days in the teaching of Business. Dean Johnson, wishing to help, yet feeling keenly the lack of suitable facilities conceived the plan of a faculty including both college teachers and business men, and a Course so arranged that any man might master it in his own home.

Thus began the Alexander Hamilton Institute. Dean Johnson has continued as its President; its Advisory Council includes these men:

DEXTER S. KIMBALL, Dean of the Engineering Colleges, Cornell University; JOSEPH FRENCH JOHNSON, Dean of the New York University School of Commerce; GENERAL COLEMAN DU PONT, the well-known business executive; PERCY H. JOHNSTON, President of the Chemical National Bank of New York; JOHN HAYS Hammond, the eminent engineer; FREDERICK H. HUDMAN, Certified Public Accountant; JEREMIAH W. JENKS, the statistician and economist.

To young men of college age, the Institute says: "Matriculate at a college or university if you possibly can; there is no substitute for the teacher." To older men, the universities and colleges, in turn, are constantly recommending the Modern Business Course of the Institute.

It is a Course for the man beyond the campus; the man who is already in business and cannot leave, the man who wants to supplement his college education. If you are such a man, may we send you, without obligation, a copy of "A Definite Plan for Your Business Progress"? It tells how 250,000 men have profited by a business training founded upon university principles, and conducted in accordance with university ideals.

Alexander Hamilton Institute

THESE COLLEGES and universities, and 80 others, have used parts of the Alexander Hamilton Institute Course in their classroom work.

CLASS NOTES

The classes of '69, '74, '82, '83, '84, '85, '89, '94, '99, '01, '02, '03, '04, '09, '14, '19, '20, '21, '22, '23 are all due for reunions on June 14 and members of all other classes who take this opportunity to visit the Campus will find many of their friends and classmates. The above list is selected under the Dix plan and on the basis of special reunions every five years. A special effort is made to get the members of these groups back while general inducements are offered the other classes during the years when they do not have regular reunions. There is a good enough selection of classes to insure that everyone returning will find college friends at least, if the proportion of classmates is small.

'O3
O. B. Hall finds that being a physician and mayor of Warrenburg, Missouri, keeps a man busy. He is always glad to hear of the "old gang" through the Record.

'O5
Peter V. Ross, christian science lecturer of San Francisco, California, says that in all his travels over the country he has found no agricultural and mechanical college that excels M. A. C.

'O6
Notes of interest from W. J. McGee, San Juan, Porto Rico, are: "Chief Porto Rico station bureau of chemistry U. S. Department of Agriculture. Food and drug inspection. Just finished my sixth year in Porto Rico. I believe this is the pleasantest place to live in all of Uncle Sam's dominion. Bateson, with '95, is a minister of the gospel in Aihonita, Porto Rico, very popular and a power for good in Porto Rico, a splendid example of vigorous, muscular Christianity."

'O0
Alice Cimmer has moved in Battle Creek to 130 Champion street.

'O2
Winfred R. Wright is now in Three Oaks, Michigan.

'O5
Richard Fowler is vice president of the Campbell, Trump & Company, advertising agency, with offices at 540 Penobscot building, Detroit. Frederick L. Johnston is no longer to be reached at Edge Moore, Delaware.

'O7
C. M. Graner may now be reached in Denver, Colorado, in care of the Forest service.

'O11
Lucile Stout has for her new address 1363 E. 47th street, Station M, Chicago, Illinois.

'13
"Kindly change the address on THE RECORD from Hartford to 630 Broadway, Benton Harbor," writes Nathan D. Simpson. "I have an office in the Wells Buick building, directly across the hall from Fred Granger, '13a. Fred, as you probably know, is the biggest fruit buyer in this neck of the woods."

H. F. "Sam" Miners sends his new address as Topanga Beach, via Santa Monica, California, care of Mrs. M. Schuster.

'14
Zora Lemmon Treen writes that Edward William Jr. was born April 1, 1924. She says: "As his father is a graduate of Syracuse, the question of college for him will have to be fought out as the years go on. The dean of forestry at Syracuse has issued him an invitation for membership in the class of '47 or something. We will have to see." The Treens live in Kenmore, New York.

Samuel M. Dean is living on route 2, Redford, Michigan.

'16
E. J. Menery sends the following comment on the name question "The old school seems to be perking up but why in all fairness to the thousands of grads and future grads who pursue other courses than agriculture can we not have a representative name for our college? 'Michigan State College' answers every requirement and is in line with such other representative state institutions as Penn State, Iowa State, etc." Menery lives in Wilmington, Delaware, at 6 Ashley place, Richardson park.

Ivan Driggs has moved from Greenwich, Rhode Island, to R. R. 16, Dayton, Ohio.

'17
S. J. Culver has recently been appointed county agricultural agent for Emmet county, with headquarters at the Farm Bureau, Petoskey.

Lieut. (jg) L. K. Cleveland may be reached at U. S. S. S-38, care P. M., San Francisco, California. He leaves May 5, via the transport Argentine for San Francisco to join the submarine S-38 and will sail this full for the Asiatic with the 17th division of submarines, to be stationed at Cavite, Philippines.

R. H. McWilliams is at 1314 Wyoming avenue, Forty Fort, Pennsylvania.

'18
Helen Pierce Bice lives in Apartment W, Hargrave, Marquette, Mich.

'19
LeMoyne Snyder may be reached at the Fifth avenue hospital at New York City.

Marta Pratt is still teaching household arts in the senior high school at Lansing, and lives at 727 West Michigan avenue. She writes: "My engagement to Harry H. Comer of Santa Monica, California, may be of interest to some people who are far removed from Lansing and vicinity."
**Preferred Position**

Old Timers in advertising well remember that the best preferred position in any small town "sheet" thirty years ago was alongside the personals.

The alumni publication is the only magazine today that offers advertising space alongside personal news notes.

These notes are all about personal friends of the readers.

So—every page is preferred position.

Forty-four alumni publications have a combined circulation of 160,000 college trained men. Advertising space may be bought individually or collectively—in any way desired. Two page sizes—only two plates necessary—group advertising rates.

The management of your alumni magazine suggests an inquiry to
