The Alumni and Former Students
of the
Michigan State College
EAST LANSING

Vol. XXXI MARCH 22, 1936 Number 24
THE M. S. C. RECORD

Established 1896

Published for the alumni and former students of the Michigan State College by the M. S. C. Association.

Published weekly during the college year and monthly during July, August and September; thirty-five issues annually.

Membership in the M. S. C. Association, including subscription to THE RECORD, $2.50 per year.

Unless members request a discontinuance before expiration of their memberships it will be assumed a renewal is desired.

Checks, drafts and money orders should be made payable to the M. S. C. Association.

Entered as second class matter at the post office at East Lansing, Mich.

ROBERT J. McCARTHY, '14, Editor.

THE M. S. C. ASSOCIATION

Union Memorial Building

OFFICERS—1925-26

Frank F. Rogers, '83, Lansing, President
Arthur C. MacKinnon, '95, Bay City, Vice-President
Luther H. Baker, '93, East Lansing, Treasurer
Robert J. McCarthy, '14, Secretary

EXECUTIVE COMMITTEE

Members elected at large

Henry T. Ross, '04, Milford, Mich., Term expires 1928
Clifford W. McKibbin, '11, East Lansing, Term expires 1926
G. V. Branch, '12, Detroit, Term expires 1927
W. K. Prudden, '78, Coronado, Calif., ex-officio
Harris E. Thomas, '85, Lansing, ex-officio
E. W. Ranney, '00, Greenville, ex-officio

Pioneer stages of the agricultural movement as compared with its present day development formed the subject of discussion at the twenty-sixth annual meeting and banquet of the Washington, D. C., M. S. C. Association, held at the Grace Dodge Hotel, February 26.

Dr. Y. C. Vaughan, honor guest, told how he came to be connected with the University of Michigan. At the time of the Civil War Dr. Vaughan was a teacher in the state of Missouri. Schools were closed and a law passed requiring teachers and preachers to take oath that they had no sympathy with the south. This oath Dr. Vaughan was not able to take. Having become interested in reports of the work of Eugene Hilgard, the scientist, he decided to enter the Michigan university, where he later became dean of medicine and surgery, in which capacity he served for thirty years. "My heart and soul are interested in the rural population," said Dr. Vaughan. He gave a review of public health work in Michigan, mentioning Doctors Baker and Kedzie, first members of the State Board of Health. Dr. Kedzie is remembered for his experimental work to prevent explosion of the kerosene lamp. The Kedzie-Baker method of resuscitation has erroneously become known as the "Shafer" method. Dr. Vaughan thinks no institution in the United States had three such able men as Beal, Kedzie and Cook. In closing he said he hoped to see a well-established hospital in every county in the state, and education within the reach of every boy and girl.

Dean John Phelan, representing the Michigan State College, paid tribute to Professor French, his predecessor, as "a great teacher, a teacher of men", and a pioneer in agricultural education. He sees in alumni gatherings proof that the College is a school of long traditions. He believes that the time for the College to help the student is when he goes out; that courses should be built up on the life outside; and that the alma mater should follow the student for three or four years after he leaves school. He has the greatest respect for the young people of today and looks upon every boy and every girl as a real project. The first need in the humanizing of education is an understanding of emotional life. Freshman advisers are needed to help bridge the gap between home and college. He believes in cultural education, but it must not kill or dam the intellectual interests. The name Michigan Agricultural College is written in the lives of many of the older men, but the change of name meant no change in the work of the College or in President Butterfield's attitude.

The dean reported the erection of many new buildings, building improvements for the past five years equaling that of the previous 65 years. The Union building, especially, is finding a place in the social life of the students.

The Honorable James C. McLaughlan, speaking for "state's rights" in the management of agricultural as well as educational matters, stated that Michigan has never received back funds in proportion to the amount of taxes paid. He is disturbed at the trend toward centralization of government and ideas at Washington. In the time of Washington and Jefferson he would have been called a "strict constructionist".
Mr. McLaughlan, himself might be called a pioneer in the agricultural movement. Twenty years ago, when he first came to Washington, he asked Uncle Joe Cannon for a place on the agricultural committee of the house and was one of the six members appointed. In his opinion the country may well be proud of its department of agriculture.

"Looking Over the Back Fence" was the theme of the Honorable Grant Hudson, whose interest in Michigan State College arose from the proximity of the campus and the fact that he had three sons to educate. Mr. Hudson considers President Little and President Butterfield as Michigan’s two great educators.

Miss Yakely, registrar of Michigan State College, reported an attendance of 2,300 students, an increase of 400 over 1924-1925.

Dr. Blanche M. Haines, formerly of Michigan, but now connected with the children’s bureau in Washington, expressed her appreciation of the College and of the home demonstration workers.

Miss Ruth Hudson sang a group of songs. She was accompanied by Mrs. Grace A. Jackson.

The business meeting was conducted by President C. A. Reed, ’05, and the speakers of the evening were introduced by Dr. William A. Taylor, ’88, acting as toastmaster.

Officers elected for the coming year are as follows: President, R. A. Turner, ’09; vice-president, G. H. Collingwood, ’11; secretary-treasurer, Cora L. Feldkamp, ’05.

Members and guests present were:

Arthur Adelman, ’04, and Mrs. Adelman; Evelyn Barnes, ’11; E. W. Brandes, ’13; Grace Newbold Brandes; former Secretary and Mrs. A. M. Brown; Blanche B. Clark; G. H. Collingwood, ’11; C. P. Close, ’05, and Mrs. Close; Dr. G. H. Coons; Matt A. Crosby, ’02; Cora L. Feldkamp, ’05; W. S. Fields, ’13, Mrs. Fields and daughter; Welland Gay, w’18; Dayton A. Gurney, ’04; Dr. Blanche M. Haines; Hon. Grant Hudson; Ruth M. Hudson; Mrs. Grace A. Jackson; Dr. and Mrs. S. L. Jodidi; A. E. Kocher, ’02, and Mrs. Kocher; P. W. Mason, ’12, and Mrs. Mason; Hon. James C. McLaughlin; Edna B. McNaughton, ’11; Ruth F. Musselman, ’19; Mary M. Nicoll, Dean John Phelan; Mrs. L. Pickett; Ruth Picket, ’14; C. A. Reed, ’05, and Mrs. Reed, ’05; Alice A. Skeels, ’25; H. C. Skeels, ’88; D. A. Spencer, ’12, and Mrs. Spencer; W. C. Stebbins, ’95; F. D. Stevens, ’03; Wm. A. Taylor, ’88, and Mrs. Taylor; Henry Thurtell, ’88; P. John Truscott, ’23; R. A. Turner, ’09, and Mrs. Turner; Dr. and Mrs. Victor C. Vaughan; Mary Baker White, ’98; C. G. Woodbury, ’04, and Mrs. Woodbury; Elida Yakeley.

ASSOCIATION OFFICERS ARE RE-NOMINATED

Officers of the Association have been renominated to serve another year by the committee headed by J. D. Towar, ’85, and Elizabeth Palm, ’11. It is the wish of these committees that the affairs of the organization be conducted by the men who have served through the most difficult period in the financing of the Union Memorial building. C. W. McKibbin, ’11, former secretary of the Association, who has completed one term as a member of the executive committee was urged to serve another but asked to be relieved because of the importance of other duties. Both committees requested that he serve again but acceded to his wish that he be allowed to withdraw his name. In his place the committees have nominated Frances Kirk Patch, ’14, and Ruth Russel, ’13, both of whom are actively interested in alumni affairs and live within a distance of the College which insures that they will be able to attend meetings of the committee. The regular elective officers of the Association have signified their willingness to continue in office for another year.

The list of offices as presented by the committees appears as follows:
INSPIRATION FOR NEW COVER DESIGN

A drawing of one view of the old split rock serves as the background for the new cover design prepared by G. N. Swanson, '25, business manager of The Record. The photograph shows a reunion group gathered around the portion of the rock now standing near the southwest corner of the Union Memorial building. The bronze tablet marking the rock bears the following verse:

When half the toilsome way was passed, we rested by the stone
Within whose cleft a cherry pit had taken root and grown;
The cleft was not so very wide, just half an inch or so;
The little tree scarce touched its side some forty years ago.

Forty years ago; Forty years ago;
The cleft has spread; the tree has grown since forty years ago.

—FRANK HODGMAN, '62.

President, Frank F. Rogers, '83.
Vice-President, A. G. MacKinnon, '95.
Treasurer, Luther H. Baker, '93.
Member of executive committee for three-year term, Mrs. Frances Kirk Patch, '14, Ruth Russel, '13.

Ballots will be mailed to all members of the Association whose dues are paid up to July 1 immediately after May 1. During the interim it will be possible for any twenty members of the Association in good standing to present names for inclusion on the ballot. Ballots must be returned in properly endorsed envelopes so that they will arrive at East Lansing not later than June 17, according to the by-laws governing elections.

L. H. Baker, '93, has been nominated to succeed himself as mayor of East Lansing. His opponent is Dr. F. W. Chamberlain who has been connected with the veterinary division of the College for fifteen years.
At the close of the fiscal year, June 30, the Union will issue a complete financial statement together with a brief summary of its activities for the past year, particularly in relation to the Union Memorial building. The funds of the Union have not been so plentiful as to allow for serious discrepancies to creep in, but to insure proper accounting an audit of the books is made quarterly by a well-known firm of accountants and these reports are on file in the office of the Union. All responsible employees of the Union are under sufficient bond to guarantee the safe handling of the funds and every precaution has been taken to keep the business of the organization on a solid basis. These facts are evident to the person enough interested in the organization to make an inspection of its books and all information bearing upon them is available at any time to the active or life member of the Union.

As a commercial project the Union Memorial building has reached the point where its success another year seems assured. Its main departments are operating upon a profitable enough margin to give out standing reassurance. In general, the use of the structure by students, alumni and faculty has greatly increased since September. The first month or so was disappointing. That was the period during which the enterprise was struggling to justify itself as a Campus institution. Since that time the growth has been so marked that the anxiety of the few weeks has been replaced by confidence fostered by experience. As a business, the Union must go through the same stages as those experienced by a commercial enterprise. It must through service, make a place for itself in competition with other businesses and, to do this, it must change the habits of a large number of people.

It is disturbing to think that so-called believers in the Union Memorial project will not bring their complaints and suggestions to the responsible officers of the Union, it is disturbing to think that there is not full support at all times for the institution which has been erected after an effort over a period of six years, participated in by the great majority of alumni.

But out of the ruck of this disappointment comes the all compensating vision of an organization which has completed most of its first active year in a creditable manner, when considered from the financial standpoint, from which such enterprises are judged, as well as when considered from the point of view of service rendered. The remaining three months may reveal deficiencies not now apparent but, in most respects, this possibility is remote because of the experience gained during the first nine months. The Union Memorial building has been started on the path to success through the consistently hard, conscientious work of a group seeing in it possibilities for great service and willing to further that service in the interests of the College and the profound conviction which has brought into being the Union Memorial building.

The days are passing rapidly as June 19 comes into view. There is probably no period in College life which goes as quickly as does the spring term. One reason is because the final term of the year is the shortest in number of days but another, and perhaps more potent, is the fact that it is a period more generally enjoyed, usually accompanied by the best weather of the year and bringing as it does a most delightful season to the Campus. For those who plan to attend the reunions on June 19 the time is just as short. If there are special plans to be made, if it is required that a program be laid out in advance then the time is very short in which these arrangements can be made.
"Close Beside The Winding Cedar"

The Union Memorial building fund needs the amount due on your pledge.

E. H. Ryder, dean of liberal arts, will again act as director of the summer school. Classes will begin June 22 and last until July 30. Farmers' Day will be July 30.

No clues have been uncovered as to the present location and custodianship of the famous black box from the old barber ship. It is assured a permanent home and the best of care in the Union Memorial building.

No further issues of The Record will be published until April 12. This suspension is in accordance with the publication schedule calling for but thirty-five issues years with monthly numbers in July and August.

Eight teams entered the College invitational swimming meet which was held last week. Detroit, Northwestern, last year's winners, Ann Arbor, Pontiac, Redford, Belding, Jackson, Detroit Northern and Lansing competed.

"Francesca da Rimini" by George H. Boker will be presented as the senior play this year during the week preceding commencement, according to a recent announcement which stresses the departure from the Shakespearean programs of former years.

An announcement from the botany department states that the use of glacine paper cones over vegetables during the early part of their growth will not only be a protection from frost but will assure earlier maturity. Experiments covering two years, using various types of protective materials, showed that glacine paper is far superior. This protection speeds growth to the extent that tomatoes reach maturity two weeks earlier.

Eleanor Rainey, '27, Birmingham, president of Omicron Nu, has been selected to attend the national convention of that fraternity being held at Kansas State next month.

A condensed College catalog of thirty pages has been published by the registrar's office. It is designed to serve as advance information for prospective students and contains a general account of the work offered at the College.

Bishop Francis J. McConnell, of Pittsburgh, will deliver the commencement address on June 22, it has been announced by the committee in charge. Dr. Lloyd C. Douglas, pastor of the First Congregational church at Akron, Ohio, will be the baccalaureate speaker.

Work on the new boulevard to connect Lansing and East Lansing along the Michigan avenue route has been started by the state highway department and proceedings are underway to obtain the necessary rights of way for sections not already under the control of the state.

With an unusually persistent winter held responsible, the Red Cedar, dammed by the ice which accumulated and closed parts of its customary channel, has broken bounds and covered the old athletic field. Outdoor practice for the baseball team has, of course, been impossible under these conditions.

Under the direction of Alexander Laurie, department of horticulture, students in floriculture will be assigned the task of designing and planting shrubbery on the Capitol lawn. The students who will be allowed to participate in this work are those of the advanced classes who have already had intensive work in the floricultural department.
By the provisions of the Purnell act, Michigan State College and other land grant colleges have received appropriations for research and investigational projects which afford these institutions an avenue of activity which is entirely new and practically unexploited.

The act enables these colleges to study rural and urban life from every angle. At the College, although the work has not been in progress for any great length of time, it has been carried on sufficiently to show that the problem is one which grows as the investigations are continued.

Under the direction of Professor Eben Mumford the College's share of the work is being systematically carried on. Mumford has two assistants who are actively employed in the field, J. J. Thaden, Iowa State and P. H. Pearson, Minnesota. As an initial effort five counties in the general locality of the College are being studied, namely Ingham, Clinton, Shiawassee, Eaton and Livingston. These counties are being studied in relation to every phase of human activity in the community.

In Doctor Mumford's office there is a series of maps of these five counties. One shows the churches in each community. The denomination and whether or not the church has a resident pastor is also noted. Another map indicates the distribution of fraternal organizations, their kind and membership. Others show trading centers, creameries, threshing centers, boys' and girls' clubs, banking centers, schools and voting areas. In other words, these important features of life in the rural and city sections are all graphically illustrated.

According to Dr. Mumford, every conceivable type of human activity has an influence on community life and spirit. "Human activity," he says, "resolves itself into three natural groups, education, religion and employment and trade. Such a classification is also of great assistance to us in carrying out our work. It gives us a starting point in every case. Churches, boys' and girls' clubs, country stores, county agricultural clubs, school groups, fraternal lodges and even county boards, all afford us concrete means of obtaining initial figures and contacts."

To substantiate these investigations seminars are held every Monday evening at the College. Rural leaders from the five counties attend these meetings. Some drive a distance of 40 miles to lend their efforts to the work.

At present the entire project is merely in its infancy. The time needed to collect initial data, the scattered nature of the people in these regions, the diversity of the aims of the various organizations now contributing to community life, the lack of central motive behind these groups, all tend to retard rapid progress. The dominating purpose in such an exhaustive investigation as outlined by the Purnell act is not to standardize the community nor to break down existing institutions. It is rather for the purpose of unifying the scattered efforts along educational lines. It will not only lead to more centralized community life but will be a direct aid to Americanization and the solution of the rural residents' problems. Marketing, education, closer contact with neighbors and with the outside world, co-operation, all will be possible in a more efficient degree.

Other natural centers will be studied as soon as the Lansing area has been studied more intensively. The entire work is a pioneering project and the initial territory is educational to those conducting the work as much as it is to the community itself. Grand Rapids has already requested that
a study be made of its region. According to Dr. Mumford, each natural section will be studied in turn, Jackson, Detroit, Muskegon, Bay City, Northern Michigan and others until the state has been covered.

In regard to the courses offered at the College for the study of sociology, Professor Mumford stated that the entire curriculum is being built up to meet the demands of the expansion of the College program in general. It is now possible to minor, major or take advanced work in this subject. The degree of doctor of philosophy can now be granted by the department.

ALUMNAE AT WORK
ON BUILDING PROJECT

Lou E. Butler, '17, secretary of the alumnae council submits the following report of the recent meetings and business of the council:

The alumnae council meeting of March 8 was not so largely attended as it had been hoped; but, considering the dangerously icy streets, the presence of thirty members showed a good interest in the undertaking of furnishing the women’s lounge.

Several committees which had been appointed at the meeting of the executive board on February 19, reported as to the desirability of various ways of raising money, selling certain articles, holding a benefit bridge party in the Union Memorial building, or a dancing party in the same place, and silver teas.

The conclusion was reached that the best way to raise funds was to mail circular letters to all women graduates and former students of Michigan State College, and ask each one to contribute a sum of money. After this plan had been given a good trial, it would be decided whether it would be necessary to raise money in other ways.

Mrs. W. F. Kaltenbach was appointed corresponding secretary and has, since the meeting, had letters mimeographed to go to one thousand women who were students here. She is asking for $2.00 each. Larger or smaller sums will be thankfully accepted, but an average contribution of $2.00 each will make possible the amount required to furnish the room. Mrs. Kaltenbach hopes to reach everyone, but in this large number of addresses some one may be inadvertently missed, and she asks that this notice in The Record be considered a personal invitation to contribute.

It is not necessary to wait for the letter, anyway. Already two contributions have been received. Fern Fillingham Leonhardy started the ball rolling the night of the Alumnae meeting, and a few days later the Themian Alumnae sent us a check for $25.00. Mail your checks to the treasurer, Lou Butler, East Lansing. Please do not expect receipts, but look for your name in The Record.

The Council also decided to sponsor things other than furnishing of the women’s lounge, which was the main issue. The suggestion was made that we work for an old-time alumni party Commencement Week.

A. C. BURNHAM OFFERS
NEW SENIOR COURSE

Alton C. Burnham, ’93, has been added to the College staff for the spring term. He will be instructor in the new life planning course, which has been added to the curriculum as an elective for seniors. It is expected that a great number will take advantage of this chance to secure valuable advice on how to select their careers.

Regular classroom work will be augmented by seminars, lectures and personal conferences. The course will also include a survey of business opportunities and public life as a profession as well as studies of the individual members of the class as types.
ALL-COLLEGE BALLOT
DRAWS HEAVY VOTE

It is believed that the all-college elections staged on March 12 set a new record as far as total voters is concerned. The student council has announced that 1,039 took part in the elections which were held in the lobby of the Union building. This vote is more than 300 over the 1925 total.

The election was watched with more than passing interest for several reasons. One was the race between Keith Himebaugh, '27, Lowell, and T. L. Christie, '27, Lansing for the position of editor of the Michigan State News, successor to the Holland. The vote on whether or not college activities should be placed on an eligibility basis also drew a large number of voters. In these two important issues Himebaugh was elected editor by more than 600 majority and the activity issue was favored by a heavy majority as well.

After the elections, Harry Wakefield, Kinde, president of the student council, stated that the conveniences offered in the Union for the staging of an election had a direct bearing on the number of votes cast. In former years they have been held in scattered places on the Campus, whereas this year, the main lobby of the Union placed the polls in a position directly in the path of student travel.

PHONOGRAPH FUND
DRAWS CONTRIBUTIONS

There are some prospects of the Union Memorial building being equipped with one of the latest type phonographs if the results of the past week are to serve as an indication of what is to come. J. C. DeCamp, '10, a member of the faculty of the forestry department, and R. B. McPherson, '90, have contributed to the fund being raised to provide the machine. Thus the ten year classes are far in the majority and have apparently taken the matter into their own hands. The field is not limited but those who are especially interested in this project could soon make up the entire amount if the different groups were to canvass.

The importance of such an instrument can be readily conceived by comparing the cost of hiring one man to operate it with that of engaging an orchestra to give the same service. The quality of the music can be much higher than that given by a local group because of the large selection of records. It would be possible to have operatic and sacred concerts as well as programs consisting only of dance music. As an educational influence such a machine would operate the same as exhibitions of masterpieces of art and it would make available to the great majority of the students what is now within the reach of but a few. Informal affairs in the Union Memorial building would be more numerous and the structure given more general use as a result. If you are interested your check should be sent to the Phonograph Fund, M. S. C. Association so that the sum will not be credited to your account with the Memorial building fund or The Record when you are particularly desirous of seeing the building equipped with a phonograph.

FREDERICK, '27, CHOSEN
BASKETBALL CAPTAIN

Charles Frederick, '27, Saginaw, has been elected captain of the 1926-27 basketball team. Frederick played center during the season just passed, being shifted to that position from guard due to shakeups in the squad through ineligibility of several players.

Kenneth Moco, '29, Detroit, was elected captain of the freshman team for the season completed and Allen Berquist, '27, Ironwood will lead the State wrestlers next year.
UNION CHOOSES CO-ED PRESIDENT FOR YEAR

For the first time in the history of the M. A. C. Union (it still retains that title) a co-ed has been elected president of the board of directors. Ruth Ketcham, '27, will assume the chairmanship of the organization at the beginning of the spring term and hold office for a year. Miss Ketcham has been an active member of the board for a year and was the only student member to be re-elected. In addition to her work in the Union she has taken part in class athletics and holds offices in two co-ed organizations. Her father is Congressman John C. Ketcham of Hastings.

This is doubtless the first time in the history of Union organizations in American colleges that a woman has been elected chief executive, unless there be cases in women's colleges where Unions have been organized. Whether or not an inherited trait which carries talent for politics is responsible for her success is a subject for discussion among learned eugenicists.

NEW TYPE OFIODINE FOUND BY CHANDLER

A discovery which Dean Ward Giltner of the veterinary department believes will open up entirely new channels in surgery and medicine has been made by Wallace L. Chandler, Ph. D., assistant professor of bacteriology at the College.

During the past six years Chandler has been doing research and investigational work to find a remedy for intestinal parasites in animals. The result of this work was that he found a remedy which is equally effective for humans and for animals. But it is the incidental discovery which accompanied the above which Dr. Giltner states is really the remarkable part of the project, namely, the discovery of a type of iodine which is non-corrosive.

This iodine, developed by Chandler, can be held in suspension in very finely divided particles. Tincture of iodine, as now used, is often irritating to the skin, but the new form is non-irritating as well as stainless.

As iodine is the only thing known that will kill parasite eggs, its use in the new form is very valuable as a disinfectant for animal quarters. Vermicidal iodine as a result of Chandler's investigations, has been found to be very efficient in ridding men and animals of parasites. The new form can also be used with match-like applicators.

Chandler has been called into consultation by physicians in charge of various cases and his services are in general demand. He has specialized in parasitology and did much of this work in cases of veterans of the world war, many of whom suffered from parasitic infections.

Alfred A. Vogel, Evanston, Illinois, and Cecil E. Radwen, Lansing, seniors in the department of landscape architecture, recently acquired experience in their chosen profession by making a study of the proposed park and recreation center for the city of Portland, Michigan. The Portland Review, in commenting on the work of the embryo artists, stated that the plans had been officially adopted by the city.

"Michigan Staters" has been selected as the official nickname for College athletic teams. A committee composed of members of the faculty, student council and Varsity club chose the new name from an enormous list that was submitted by the student body. Pauline Edkin, Lansing, submitted the winning name.

Professor G. H. Coons, of the botany department, who recently returned from an extended investigational tour of Europe for the federal government, stopped off at the College for a few days while on his way to Colorado and California, where he will continue his investigations in sugar beets.
L. C. Brooks writes: "Some of the old acquaintances of the early '90's might be interested to know that I have joined President Coolidge's army of defense of the 'back to the farm' movement. As many of your old readers know, I have been following the electrical industry, especially the marine applications, for the last 25 years, the last eight of which I have been electrical engineer of the Bethlehem Shipbuilding corporation, which position I have just resigned. I expect to take a much needed rest of a few months, after which I shall settle on a fruit farm in Nashoba fruit belt in Groton, Mass. My address after April 1 will be Common street, Groton, Mass. Professor Gunson will probably be very much interested in this venture as he will no doubt recall the days when I worked in the hort department with him."

Fred L. Woodworth now lives at 3267 Calvert avenue in Detroit.

Clara M. Steele has moved to 133 Woodlawn avenue in Albany, N. Y.

Hugh Gunnison will soon be returning to his home at 103 Richton avenue in Highland Park. Of his winter in Florida Gunnison writes: "We have had a pleasant winter. Missed some severe weather. A bit cold here at times for this state. Attended the Palm Beach regatta, also the Tampa regatta where I won the national yachtmen's race. We leave on the 17th for Miami, then home."

Lawrence H. Taylor lives at 924 San Jose avenue, Burbank, Cal. He is a member of the civil engineering firm of Davidson-Taylor & Tegart in Burbank.

Grace Taft Kunze is living at 7 Ingleside avenue, Catonsville, Md.

Wedworth V. Baker, 4022 Hogarth avenue, Detroit, is general manager of the Detroit Sheet Metal works.

Clara Morley, 4743 Second boulevard, Detroit, writes: "Am still in the advertising business with the Allman advertising agency. Am handling accounts for several of our M. S. C. folks."

Glenn H. Hayes, 4109 Vicksburg avenue, Detroit, is assistant right of way agent for the Detroit Edison company.

Mrs. L. L. Peppard writes: "I continue to enjoy my work at Rhode Island State college. Kingston. While in Alaska last summer I met two State graduates. At Whitehorse, Y. T., just before the boat left the dock for the Klondike, Amy Hurlbert Fowler, '09, came aboard for a few minutes. On the S. S. Prince George I heard someone praising the valor and achievements of the men of M. S. C. This booster was Edward B. Hodges, '09. If these two good friends see this in The Record I hereby send them greetings."

C. E. Jacobs, 3283 Glynn street, Detroit, is vice president and sales manager of the Cope-Swift company, manufacturers of automotive radiator cooling fans, grey iron castings, etc.

F. N. Howe now lives at 2024 E. Colvin street, Syracuse, N. Y.

Vivian G. Anderson, 300 N. Binney street, Bay City, writes: "Still with the Industrial works—the one big credit to the city. If you hear of any big business that wants a location send it to Bay City. Lots of room. Most of the saw mills are gone. Town is free from saloons."

Ion Cortright, athletic director at North Dakota State college, Fargo, has won the basketball championship in the north central conference. It will be remembered that his football team did likewise. Cortright writes: "Have met many old Staters around the loop at Omaha, Des Moines, Sioux City and St. Paul. Always happy to meet them. Glad to see the old school prospering so well."

Carl H. Taylor, 4239 Richton avenue, Detroit, is in charge of the salvage department of General Motors in that city.

E. B. Reid, for the past two years director of the legislative department of the American farm bureau federation at Washington, is leaving that position to become publicity man for the federal farm loan system, according to a Washington newspaper account. The article goes on to state: "His job will be to keep Uncle Sam's farm loan organization more directly in front of the people. No one in America knows the ins and outs of the agricultural game better than Reid, both from the farmer's point of view and from the equally important angle of official Washington. Reid
HOW ABOUT THAT REUNION??

Saturday, June 19

is ALUMNI DAY
