Wickes Boilers

are used by many plants to generate steam for power, heating, or processing. Boilers of different types, sizes and pressures are fabricated to the highest standard of workmanship in the Wickes Shops. The Horizontal Return Tubular, the Vertical, the Horizontal Cross Drum, or the Three Drum Curved Tube may be selected to meet the plant requirements as well as the user's preference.

Descriptive Bulletins will be mailed on request to anyone interested in steam generation.

The MICHIGAN STATE COLLEGE RECORD

Established 1896
Member of the American Alumni Council
Published for the alumni and former students of the Michigan State College by the M. S. C. Association.
Published monthly throughout the year.
Membership in the M. S. C. Association, including subscription to THE RECORD, $2.50 per year.
Unless members request a discontinuance before expiration of their memberships, it will be assumed a renewal is desired.
Checks, drafts and money orders should be made payable to the M. S. C. Association.
Entered as second class matter at the postoffice at East Lansing, Michigan.

N O T E

One time president of the College, dean of applied science, professor of chemistry and instructor, Dr. Frank S. Kedzie has been intimately connected with the institution all his life. Now, as historian, he is in charge of all old records and equipment of the oldest agricultural college in the world. His knowledge of and acquaintance with all the earlier students of the College is very helpful to the alumni officers not only at commencement season but throughout the year.

Listening In

G R A D U A T E S of 1929, newest recruits in alumni ranks, are now readers of The Record. Before leaving the campus the class organized with permanent officers to serve for the first five years. Several hundred of the class paid their alumni membership while others simply overlooked the matter or were too busy in the rush of packing the trunk the last time. To these the magazine goes this time, with the compliments of the Association, composed of members who have paid.

And welcoming the newcomers to the Michigan State family there is just this plea: when you move, as many of you will in the fall, don’t fail to notify the alumni office. The Record, traveling second-class, is not forwardable; and it sometimes happens that we send it for a whole year to an address vacated by a member. Then when he gets a statement for his alumni dues (sent first-class and thus forwarded to his new address), he complains that he hasn’t had the magazine. But we didn’t know that! How could we?

And it is not always the new members who forget to tell us they’ve moved. Not only the alumni office but your friends will be interested in knowing all about you, your job, the new baby, and such interesting things.

M I C H I G A N S T A T E alumni throughout the country find that Intercollegiate Alumni hotels are serving a definite purpose in helping them to maintain contact with classmates and friends. At the present time many of the best hotels of the country, and even some of the Eastern summer lodges, are included in the long list. The united effort of members of the American Alumni Council constitutes the largest scale factor in keeping the alumni and alumnae of American colleges in touch with each other in their travels throughout the country.

Now that the ice is cracked, we refer to the Rabbi’s motto, “It won’t be long now.” The first ten years were the hardest and I sincerely hope there are a few more thousand whose 10th year is high upon them. We thoroughly enjoyed Alumni Day back in East Lansing, and you are to be congratulated on the program lined up. Best wishes for the continued success of Michigan State and its alumni association.—Larry Ross, 21.

I have yours of June 8 regarding the Annual Alumni Fund. In response I am enclosing herewith my check for $25.00. Your letter is a winner. Here’s hoping you get the response from alumni that your letter deserves.—E. G., ’96.
Reunion classes of '83, '04, '09, and '14 are here pictured after their class luncheon in the Union. The photographer believes he missed a few in each class as they lingered to greet old friends of other classes. You will recognize "Uncle" Frank Redzie and Warren Gunston, '06, as the adopted members of the class of '04. The fine youngsters and their mothers were only a part of those who waited for the photographer after the baby show. The seven happy faces with their smiling mammas tell you at once they were the winners.
July 24, 1929

To the Graduates and Former Students of Michigan State College:

We are glad of this opportunity to send greetings to all graduates and former students of Michigan State College. We always like to think of you as a part of the great institutional family realizing that mutual interests necessitate the maintenance of strong bonds of friendship and a spirit of cordial cooperation. The members of our large staff are all striving earnestly to do their very best for M. S. C. The administrative forces of the State, the State Board of Agriculture, the legislature and the citizens of the State are manifesting an unusually kindly interest in the institution and are lending hearty and generous support. The student body is responding splendidly to the appeal for the observance and attainment of higher standards scholastically, socially, morally and spiritually so that M. S. C. may become the safest and best place in the world for parents to send their sons and daughters for an education. The magnificent chimes tower with the striking of its clock and the ringing of its bells has already become one potent source of inspiration on the Campus constantly reminding all to strive for the attainments of those standards heretofore mentioned for which the institution is to stand in a markedly characteristic way. The friendship, support and cooperation of all graduates and former students is greatly desired by the administration and staff of the institution.

Sincerely,

President
Above—In the foreground at the dedicatory services are seen, President Shaw, Dr. Kedzie, Daniel Strange, ’67, Warren Gunnison, w’66, W. L. Carpenter, ’75, T. Glen Phillips, ’02, and architect Donaldson.

Above—The ten-bell English chimes are installed in the tower. They can be heard for several miles around the college and are sounded every 15 minutes.

Memorial Tower Dedicatory Program Impressive
Speakers Laud Donors; President Accepts Gift For College

A LUMNI Day took on a new interest and special significance this year with the dedication of the beautiful Memorial Tower, the gift of Mr. and Mrs. Beaumont, of Detroit. The dedicatory exercises, held Saturday afternoon, June 22, immediately following the class reunion luncheons and the annual business meeting of the alumni association, meant the realization of a dream cherished by Mr. and Mrs. Beaumont for nearly half a century, a fitting replacement of the pioneer hall of all the agricultural colleges of our country.

Dr. Frank S. Kedzie, '77, college historian, chairman of the program, addressed the alumni present as follows:

"SEVENTY-TWO years ago the thirteenth of last month, a large assembly—not so large that day—met in what was known as Old College Hall; the governor was to be there; and the enormous sum of fifty-six thousand dollars, the result of the government grant of twenty-two sections of salt spring land, was announced. That was the opening of the College. That was the first college for the teaching of agriculture on this continent or in the world. Nobody recognized what that meant. History is always deceiving when you are making it.

Of all the people who gathered together at that meeting in Old College Hall, a picture of which stands there (pointing to an oil painting on easel at base of tower)—this tower stands on the northeast corner of the site of that building—of all the men and women who were present at that first meeting, there is but one living person, Mr. Warren Gunnison.

Mr. Gunnison, will you rise?

Of the graduates of the College, the oldest living graduate is Mr. Daniel Strange. Mr. Gunnison fell a little bit by the wayside. He should have graduated in '61. Mr. Daniel Strange, oldest living graduate, will you rise? Mr. Strange of the class of '67.

The oldest member of the teaching force of the College, who is with us today, alive and lively, is Mr. Charles W. Garfield, of the class of '70.

Mr. Garfield,
faculty, contributed more than any other single factor to make his life successful and useful. Exactly what he believed were the benefits he received by this training and association I cannot state. But, I who have had the privilege of being his intimate friend for forty-five years can state what I believe those benefits were. It is my thought that to this four years work, training and association, he is largely indebted for the acquisition of admirable character and winning personality, which are his most distinguishing attributes, and that it is due to this character and personality that his life has been what it is.

Several years ago Mr. and Mrs. Beaumont determined to do something to testify their gratitude for what the college had done for Mr. Beaumont. Just what the nature of that testimonial should be received long and careful consideration and they finally decided that it should be a tower to be erected on this site. So this structure you behold was built. The donors wish me to say that much of the credit for this achievement should go to Mr. John M. Donaldson, the architect who designed the tower and superintended its erection. For he took their conception when it was without form and made of it this object of beauty. This tower is given in the belief and with the hope that it will revive and preserve Old College Hall memories and be a spiritual inspiration to the present generation of graduates and students, and to those who may come after them.

Pres. Shaw Accepts Tower

PRESIDENT ROBERT S. SHAW:

"THERE are a number of reasons why the presentation of this magnificent chimes-tower to Michigan State college just at this time is highly appropriate indeed.

The institution has grown to quite large proportions and this tower, with its chimes will be the one factor on the campus that will daily and hourly direct the movements and activities of more than three thousand students and a very large faculty. Very timely, indeed, because I can recall distinctly that lone, old, crude, cast-iron bell on top of Williams tower which jingled at the end of each hour, nearly tearing out the heart strings with its shadow, cast metallic melodies, if you like to call them such.

With the disappearance of that old bell there were years following of intricate considerations doing with the installation of clocks and a gong system throughout the various buildings. That system, it seems to me, would have been something like unto chaos in its effect upon the soul and enthusiasm of the people connected with the institution.

Then, all of a sudden, comes a donor who offers the institution this magnificent gift, and so, I believe, in the future it will be one of the trysting places. It will no longer be "We will meet at 100 Ag Hall" or "in the Little Theatre" or "at the Union," but this will change to "at the foot of Memorial tower" which will be considered as the meeting or trysting place of the students, student groups or organizations, the center of all the activities of this institution.

I think that we had just come to the point where there was a great need for a unifying factor. Your attention has been called to the early beginnings, away back seventy-three years ago. There was just one organization at that time, that may be likened in the multiplication of its activities to the multiplication of the very lowly microscopic organism known as an amoeba. It has its nucleus, and then there is a further division and we have four, and a further division and we have eight. So, this first organization was divided until it is now made up of a large number of units.

The ringing of these chimes with their wonderful melodies and the striking of the hour will be the one thing at Michigan State college that will be a constant and hourly reminder to the students and staff of this institution that we all belong, not to the "Home Ec division" or "the Ag division" or the "Engineering division," but to Michigan State college. I believe that will be one of the great and most desired advantages.

And then, I believe there is going to be something inspirational about this gift. I know that some people might think that I am awfully Ericked if I were to undertake to parody a quotation from Scripture but our habits are like river beds; they are not easily changed. Usually, when I come to my daily task, I come right up that walk. I never come up that walk without raising my chin on my bosom and looking up at the chimes clock, and there comes to me that passage which I shall quote as follows:

"Unto the hills will I lift up mine eyes; from whence cometh my help?"

And so, I want to change that just a little bit because it appeals to me every day as I look up at the Tower:

"Unto the Memorial tower will I lift up mine eyes; from whence cometh my inspiration."

I believe that this tower, those chimes, and that clock are going to act as a very great source of inspiration to the students and the staff of the better things. I would like to have associated with this idea of inspiration, the idea of the matter of standards. Inspired to do what? Inspired to advance and to elevate and to live up to higher standards, scholarship, socially, morally and spiritually in all our affairs. In connection with Michigan State college, I hope the tower may answer as an inspiration and the inspiration may point towards achievement and the maintenance of these higher standards. I greatly appreciate the opportunity of personal acquaintance with the donors, Mr. and Mrs. Beaumont. I have a keen appreciation of the splendid service rendered this institution by Mr. Beaumont during the time that he was a member of the board of control.

Representing the administration of the institution, the board of donors, Mr. and Mrs. Beaumont, the faculty, and the students, in accepting this wonderful gift, I want to assure you that every person concerned with the institution in an official way speaks with a heart full of appreciation. We greatly value this gift, coming just at this time, in the epoch making period of the history of the institution, which I believe it is. Our students and our faculty have been looking forward with great anticipation to seeing the statuary which has been carved on the side of the building, which carries a moral along with it.

I think that anticipation and the associated ideas have had a great deal to do with bringing about during the year the quiet and peace and calm in which I hope and believe prevail on this campus.

The one thing I appreciate more than anything else among my experiences of the past year is the wonderful attitude of mind on the part of the student body. I think that the anticipation and the influence of this harmonious, artistic, aesthetic edifice, which they have been thinking about, have at least played an important part in this.

So, it is with a feeling of great grati-
IDENTIFYING himself almost immediately after graduation with the State Highway department, he has aided materially in building up the organization and reputation of that agency in the state of Michigan. Since 1908, he has been invaluable as chief engineer for the Wayne County Road commission, and with them has developed a road program known nationally. With the commission, Mr. Smith has been responsible for the expenditure of fifty millions of dollars, building in excess of 500 miles of concrete roads, 72 modern highway bridges, 30 grade separations, two separations of intersecting highways and seven county parks along roads.

In cheerless toil, the day goes by, In sudden sleep the night, No beauty greets the waking eye, No dream foretells the light. All suddenly on starlit air, There breaks the sound of bells, Clear, distant, sweet; without a care My heart within me swells! Base metal late immured in earth, Now from a towered height Proclaims to all a glad new birth And toil looks up to light. Smooth was the wide obedient sea, Shining the lines of power Which bore from far these bells to thee, O, waiting, well-braced tower.

Editor’s Note:
The circumstances which caused this poem to be written were revealed just last week by Mr. Beaumont. It so happened that during the early spring when Mr. and Mrs. Beaumont were staying in the south, a friend of theirs living near East Lansing reported to them that the chimes and bells of the Memorial tower could now be heard several miles distant, and that an elderly lady as the hours passed through the night awoke to hear the melodious sounds of the chimes. This cheerful news was given Madam Holden, while the Beaumonts were in South Carolina, and the interesting poem, “Those Beaumont Bells” was written.

Mr. Johnson has for years been engaged almost continuously in automotive work and has played a conspicuous part in the design of the Cadillac, Lincoln and Model “A” Ford cars, as well as in connection with the Liberty motors of war time. He is chief engineer of the Lincoln Motor Car company at the present time.

FRANK JOHNSON, ’95
Detroit
Degree of Mechanical Engineer

In cheerless toil, the day goes by.
In sudden sleep the night.
No beauty greets the waking eye.
No dream foretells the light.

All suddenly on starlit air,
There breaks the sound of bells,
Clear, distant, sweet; without a care
My heart within me swells!

Base metal late immured in earth,
Now from a towered height
Proclaims to all a glad new birth
And toil looks up to light.

Smooth was the wide obedient sea,
Shining the lines of power
Which bore from far these bells to thee,
O, waiting, well-braced tower.

Again upon the evening air,
There steals the blessed sound,
Calling a willing world to prayer,
Shedding sweet peace around.

Welcome, my soul, the cleansing flame,
Have done with doubt and fear.
Like these glad bells, with joy proclaim
A world of love and cheer!
—Jean Stansbury Holden.
Mother of James S. Holden, w’93.
Many Classes Represented at Reunions Alumni Day
Good Weather Aided Events; L. O. Gordon, ’06, Elected to Executive Committee

All of the chroniclers of Michigan State alumni reunions of the last few years have shown a marked inclination to ring various changes on the time-honored phrase of “the best yet.” It is a natural temptation. But Alumni Day this year, celebrated on Saturday, June 22, was aided by weather of quality making it seven successive years of sunshine holidays for the June-time homecomers.

In mere point of numbers other reunions have been larger, a situation to be expected inasmuch as the Dix plan this year “drew out” many of the older classes whose columns have dwindled materially in the past few years. Successful reunions, however, are not to be judged by mere size. While the total-registration in the lobby of the Union listed less than 600 there were no doubt several hundred more who were too busy greeting old friends or breathing about the favorite spots on the campus.

Better Golf Scores Reported

While the going is tougher, the scoring is better, the prize list is bigger, the annual alumni golf tournament draws more of the good old gang to the greens and bunkers every year. Thirty entrants were recorded by L. L. Primodig, ’17, efficient chairman of the tournament, who directed the play over the excellent course at the Lansing Country club where Blake Miller, ’16, acts as professional.

George Gauthier, ’14, that little wily, flashy and amiable football coach of Ohio Wesleyan university, walked off with medal honors, and was awarded the alumni association trophy. Burt, ’30, and John Kelly, ’29, tied for first on the blind bogey and each received six golf balls. Bob Huxtable, ’19, was runner up and received his share of the second dozen. Third place went to Pay Burroughs, ’09, of Toledo, while “Dad” Burrows, ’12, of Plymouth, received a book on how to play golf, having turned in the poorest card of the tournament.

“Chet” Spaulding, ’14, of Des Moines, Iowa, won three balls for having the lowest score on the four par three holes and J. D. Towar, ’86, was given another quarter of a dozen balls for being the oldest alumnus to take part in the competition.

Classes Meet for Luncheon

Regular class reunion luncheons were held for many but the class of ’14 with 48 present took all honors for attendance. Next in order were the classes of ’09 and ’04, celebrating their twentieth and twenty-fifth anniversaries. Numerous other class groups filled the large ball room in the Union and only the lack of reservations by class secretaries prevented the food being served more promptly. At noon in the private dining room of the Union, the “patriarchs”—at least those of them in the class of ’78, and those re-matching in the classes before who in recent years have formed an unbreakable reunion habit when they have completed their half century after leaving their Alma Mater,—met together as a special Dix plan group as guests of the College and were officially entertained by President R. S. Shaw and Dr. F. S. Kedzie. Among those attending the luncheon were the following:

Arthur C. MacKinnon

UNITING in his efforts in behalf of the M. S. C. Association, Hon. Arthur C. MacKinnon, ’95, of Bay City, was the unanimous choice of the alumni for their president for the third consecutive year. "Mac" never employs a publicity agent, but when the institution or the alumni need help during the legislative sessions he is always on the job. The past year he accompanied the secretary on several trips out of the state to meet with alumni.

The only classes to have 100% attendance were the classes of ’97 and ’71, who carried away that coveted honor.

A Wonderful Afternoon

The annual meeting of the M. S. C. Association was scheduled for two o'clock on the third floor of the Union. President MacKinnon, ’95, seizing the opportunity of having the varsity band give a concert on the lawn in front of the Union quickly shifted his amphitheatre and without warning over 300 old grads and alumni were listening to the annual report of Ye Ed of this here magazine. Dr. Don Coburn, ’24, acting chairman of the canvassing committee, reported the re-election of A. C. MacKinnon, ’95, of Bay City as president of the association; O. Verne Broughton, ’12, of Detroit, as vice-president; R. Bruce McPherson, ’90, of Howell, as treasurer; and L. O. Gordon, ’06, of Muskegon as the new member of the executive committee.

By special order of business it was voted to make the president of the Alumni league a new member of the executive committee, and Mrs. Turner Broughton, ’17, of Lansing will represent the interests of the alumnae for the present year.

"Pete" Woodworth, ’86, Reads Resolutions

Acting with some temerity as he called it, Philip B. "Pete" Woodworth, ’86, of Chicago, chairman of the resolutions committee read the following report which was adopted and filed:

REPORT OF RESOLUTIONS COMMITTEE

To the President and the Members of the Michigan State College Association:

Your committee on Resolutions recommends the adoption of the following resolutions:

RESOLVED 1. That we, as members of the alumni of Michigan State college, have observed with deep satisfaction and pleasure the continued progress of our Alma Mater in point of attendance and in the balanced development of its various divisions.

That we recognize this condition to be the result of a full measure of cooperation and understanding on the part of the State Board of Agriculture, the administrative officers, and the faculty and that we do hereby express to them our heartfelt thanks for their untiring efforts in behalf of our College.

RESOLVED 2. That we observe with appreciation the continued sound support given to our institution by the Michigan state legislature and state administrative officers, and that we especially commend the efforts of our alumni members of the legislature in looking after the affairs of the College.

That we urge upon them the further recognition of the expanding program of the College and the need for adequate financial support with which to provide facilities for the increasing attendance and the demands being made for service by the greatly varied agricultural and industrial interests of the state.

(Continued on page 14)
"Close Beside the Winding Cedar"

William Roscoe Kedzie, '99, has been appointed executive secretary of the Congregational Foundation for Education, and will supervise national educational work sponsored by that denomination. Mr. Kedzie resigned a position as pastor of the First Congregational church in Cleveland to take up the national work.

Floyd Frye, '18, has accepted a position with the state as supervisor of oil and gas and pipe line companies. The position was created by an act of the 1929 legislature to relieve both the conservation department and the utilities commission of new duties growing out of the rapid increase of the oil and gas industry in the state. Mr. Frye has been employed as production superintendent of the Empire Oil and Gas company of Oklahoma.

Ralph Rose Jr., is in New York where his play, "Fauvette," is being made ready for production. It is a dramatization of Cecil Roberts' "The Love Rack," and the hero is a violinist like the author himself. Mr. Rose has an unusual record for a boy still in his 'teens, having already been successful in concert as a teacher, and now a writer. He plans to return to Lansing next fall to take up his duties under Michael Press with whom he studies.

Dr. and Mrs. N. A. McCune and son, John, sailed July 13 on the S. S. Lapland for Antwerp, Belgium. From Belgium they will go to Geneva, Switzerland, where Mr. McCune will make a study of the work of the league of nations and Mrs. McCune will attend the triennial conference of American Association of University Women which meets there August 7 to 14. From Geneva they will go to Paris to spend two weeks and then Mr. McCune will spend the fall term in study at Oxford.

"The Golden Hour," a landscape by George Elmer Browne, has been loaned to the College by the Ranger fund. It was through the efforts of Professor Arnold Scheele that the loan was secured. The Ranger fund is connected with the National gallery at Washington, D. C, administered by the Smithsonian institute and provides for the purchase of good work of American artists to be loaned to institutions of an educational nature for exhibition. The picture is hung in the art gallery in the library, and is worth a pilgrimage to East Lansing for anyone interested in colorful things.

Lewis Richards, director of the Michigan State Institute of Music and Allied Arts, will appear at the White House as harpsichord soloist on October 16, after opening his concert season as soloist with the Philadelphia Symphony orchestra on October 9. The command performance at the White House is a very pleasant prospect for Mr. Richards, inasmuch as he was closely associated with President Hoover in Belgian relief work.

Dr. Donald B. Meyer, '27, who has been working with Dr. Hallman in the pathology department, took charge on July 1 of a cooperative experiment under the direction of Dr. Huddleson. The laboratory of the bacteriology department and that of the bureau of animal industry of the United States department of agriculture are conducting a test of a new vaccine discovered by Dr. Huddleson. The vaccine is used to immunize cattle against an infectious disease.

The experiment will last for several years, and it will occupy Mr. Meyer's entire time for the period. All experimentation will be conducted on herds in Michigan, among which will be the experimental herd owned by the College.

Welcoming a chance to become a student again, Professor Arnold G. Scheele and Howard W. Joyner of the art department, left their teaching days behind them and departed for a summer of work—painting. Professor Scheele will make it more than a summer and will not return to East Lansing until the beginning of the winter term.

His immediate plans take him to the coast of Oregon, there to paint the Pacific ocean as much as can be confined to a canvas. The changing moods and colors of the sea prove a constant fascination to Professor Scheele, he says, and his greatest joy in art is the painting of marines.

From the Pacific he will journey to the Atlantic where he may paint a while on the coast and where he will eventually spend some months in New York to see exhibits of as many kinds of art as there are to be seen, to visit the variety of art schools about the city and to study with Henry B. Snell at the Grand Central School of Art. He possibly will take some work at the Art Student's League.

Mr. Joyner will spend the summer at the University of Minnesota, working with Kenneth Hudson of the Yale School of Fine Arts.

Fraternity hell-week—Knock hell out of the Hellenists.

Adelbert D. VanDervoort, '19, was recently elected commander of the department of Michigan at the closing sessions of the annual encampment of the Veterans of Foreign Wars of Michigan held at Bay City.

The May issue of the Uptowner contains an article written by Robert H. Powers, '26, entitled "College in the Jungle." It tells of a visit with the late Charles Fuller Baker, '91, at his cottage home in the Philippines.

An ordinance has been passed by the East Lansing city council prohibiting the posting of bills on telephone poles in the city. The poles along the boulevard have recently been cleaned of all their many tacks and painted white for a considerable distance from the ground.

Professor Albert Naeter, whose resignation from the electrical engineering department was recently announced, will go to Stillwater, Oklahoma, next fall to take over the duties of head of the department of electrical engineering at the Oklahoma Agricultural and Mechanical college there.

Headed by Gilbert T. Shilson, '14, correspondent in charge of the Associated Press bureau in Lansing, a commission composed of five veterans of the North Russian expedition, departed recently for Archangel to recover the bodies of 114 of their wartime comrades who were killed in action on the eastern front.

The classification of the East Lansing postoffice was raised to that of a first class office by the United States postoffice department on July 1, according to Postmaster Charles S. Wilcox. In order to so classify, a postoffice must have receipts of $40,000 or more a year and it has just recently been that the local office could so classify. (They should admit that the Alumni Association helped boost their amount of business.)
ALMA MATER SENDS GREETINGS

ALMA MATER sends greetings to her sons and daughters, members of the Michigan State family. We want you to read the letter President Shaw has written to you in this issue. The State Board of Agriculture, the administration and staff of the institution wants every former student and alumnus of this great college to feel the friendship which the university extends toward its graduates. The mailing of a copy of this issue to every former student of Michigan State is made possible only through the generosity of the governing board. They want you to know that Alma Mater lives in you; your success is her success; your joy her joy; your achievement her pride.

WHY JOIN THE ALUMNI ASSOCIATION

THERE are many reasons why every college man, when the campus gates have clanged behind him, should actively identify himself with the Alumni Association. There is loyalty of course, for instance, gratitude toward his Alma Mater. The human craving to be a member of a restraining club, his duty to his college, a matter of service, even to a winning football team. They are all good. We pass them by.

"There is one greater. It is more selfish than the others, if you will, for by it a man receives more than he gives. But it is a compelling motive. It is the memory of youth, of days gone forever, of pictures so etched on the mind they never wear, of memories of the boys I used to be, of friends such as one never makes again."

"Oh, those friends! How they draw one's heartstrings! Whether you are sitting before the open fire, with the pipe well lit, whether at your desk with the telephone jangling, whether on sick bed, or vacation in tropic heat, or arctic cold, how the recollection of those friends instantly blots out your surroundings, and you are carried back on wings of time to the grass green under the towering elms and stately pines, a room in a fraternity house or dormitory, a night out with the gang, a football game. Those were the happy days in which most men get beneath each other's skins, and friendships, such as we are never privileged to make again, flowered in their fullness.

"We have left those days behind. We have scattered over the face of the earth. Carees, deep and engrossing, consume our time and energy. But memory is always with us. Eagerly we snatch at bits of news of college friends. And that is why we have an Alumni Association. We get more news from it than we ever expected, contact from drifting away altogether from that island of dreams. There is no way in which one can receive more or as much. And reason prohibits that there lives any man, anywhere, with soul so dead, who would not eagerly align himself with the Association of his fellows to keep alive the flame of the memory of youth, and his friendships of college days."

THANKS TO THE SCOTCHMAN

"T"In a comparatively short time nearly a quarter of a million dollar deficit at Michigan State college has been wiped out through the financial genius of its president. This success is no accident. It is the result of long hours of careful planning to cut necessary expenses without crippling the work of the institution. This has been accomplished within the regular budget margins, for which the taxpayers of the state are deeply indebted to President Shaw."—Editorial in Michigan Farmer.

THANKS MR. YOST

THE fire has been kindled, burned, and died. Harry Kipke has come, coached, and gone. Michigan's athletic program is complete for the 1929 campaign, while Michigan State's is only a matter of uncertainty and conjecture.

To some the resignation of Mr. Kipke and his ultimate signing as head coach at Michigan "came out of a clear sky," but not to all. We believe Mr. Yost's plans have been well laid for some time. He didn't wake up one night last week in the middle of his sleep and decide that Harry Kipke would be more useful at Ann Arbor than Ted Wieman. Neither was Harry Kipke taken by surprise when "suddenly" approached with the Michigan offer. Not in the last week or two, anyway.

Michigan State has been suddenly left without a coach. Mr. Yost must certainly regret this because he would have no desire to directly inconvenience or humiliate Michigan State, but in big business such as intercollegiate football the time element is much more important than that of ethics.

There was no room for Harry Kipke at Ann Arbor as long as Ted Wieman was there. Mr. Yost's problem was disposing of Mr. Wieman, and Mr. Wieman duly disposed of, Mr. Kipke was signed, even though it was less than three months before the beginning of another season.

There is no hard feeling on this campus toward Mr. Kipke in his recent action. He has truly met with a wonderful opportunity and we all hope that supreme success will be his in all his endeavors at Ann Arbor. On the other hand, it seems that Michigan State has been the butt of another one of Mr. Yost's jokes along with George Little and Ted Wieman. Harry Kipke being only a necessary accomplice in Mr. Yost's program.

We trust, Harry, that time will never provide the same fate for you."

—Editorial, Michigan State News, Friday, June 14, 1929.

MEAT FOR POPULAR WRITERS

"MY IMPRESSIONS when I first came to the college to make arrangements to enter," says a graduate of some years ago, "sound rather strange now. I looked into the classrooms and saw classes at work; I went to the library and saw students with books propped up before them. Even in the dim old natural museum the chairs by the windows were occupied by busy students.

Today, the prospective student is likely to see the campus for the first time at some big game or celebration when the holiday and play spirit predominate, when books and recitations are laid aside. He may go to a palatial fraternity house as a prospective brother, where the most popular book is the telephone book. No doubt, too, he has already read all about us in the popular magazines, which tell of all the side-shows and practically nothing about the real college. He may have seen also the page advertisement in the papers showing several "prominent" students taking the blindfold cigarette test, and unerring picking out the proper one.

It's about time for some writer who can command a wide and popular audience to tell the thousands of young and impressionable people something about the real colleges and universities. Plenty of dull and uninteresting writers are doing it, but they reach mainly those people who don't need reaching.
"What a Time! A Great Sunset Supper!" -- Alumni
Mary Allen's Songs, President Shaw's Talk, and Announcement of New Football Coach Thrills Crowd

That tired committee, who had worked for several days planning that big feed in the Demonstration hall, looked over the field where the varsity nine were contributing their mite to the joyousness of the occasion by trouncing the Auto-Owners team of Lansing. The report that only 165 supper tickets had been sold before the baseball game was not good news, but the victory on the diamond and the call for a "big feed" brought literally hundreds of fans over to the Demonstration hall. There, thronging the aisles in those informal reunions moreprecious than any others, the hostess committee seated the alumni and their guests at the tables stretched in long rows, snow white beneath the dome of the high-roofed hall. In an instant many waitresses were at their task and the second annual "Sunset Supper" was in full swing.

79 In Spotlight

On a raised platform, surrounded by boisterous reunion classes, were the distinguished guests of the alumni association with President Shaw and President MacKinnon of the alumni association. Winding its way through the happy throng the Swartz Creek band, campus clown musicians, brought the reunion classes to a spirit of revelry. After extending the greeting of the association to all, President MacKinnon turned the gavel over to Martin DeGlopper, '13, who acted as toastmaster for the evening. A group of songs by our own Mary Allen Phillips, '09, of New York City, was the first thing that would quiet the celebrants. The applause which followed each group resounded loud and long among the Demonstration hall rafters. Prizes for the winners in the baby show were awarded by Secretary Stewart of the alumni association, while L. L. Frimodig, '17, made the awards to the winners in the golf tournament.

President Shaw Speaks

Pinchhitting for the regular speaker who was taken ill, President Shaw in his usual characteristic manner took the entire group into his confidence and gave what he called "his annual report." He stated that during the past year the finances of the college had been advanced to a sound condition. For the next school year, already announced publicly, additions are to be made to the faculty personnel in the way of men of truly impressive scholastic attainment. His talk filled the hearts of alumni and guests with pride and happiness over the accomplishments that had been made during the past year. Before bringing his remarks to a close President Shaw touched briefly on the athletic situation, men-
the men in this department and I have come to know Michigan State teams through seeing them play my alma mater. There is a wonderful athletic plant here and I am going to buckle into the harness for all that I am worth. If I don't produce some winning teams here it is because I haven't the stuff in me to attain that goal. I'm certainly tickled to be here and know that I am to be your football coach." And with a smile he added a touch to his brief address that brought forth loud cheers from the assembled alumni. "This is your college, and now my college, if you please."

And finally Alma Mater at the close,—with Mary Allen Phillips, '09, leading the singing throng—the lights gleaming (for now it was nearly dark outside), huge shadows of the steel girders in the gray reached high above.

Close beside the winding Cedar's Sloping banks of green,
Spreads thy campus, Alma Mater,
Fairest ever seen.

Shall the chorus! Let it echo
Over hill and vale,
Hail to thee, our loving mother,
M. S. C. all hail.

Prize Winners Announced in Second Annual Baby Show

Just as everyone expected, the second annual baby show held in the forenoon of Alumni Day brought forth nearly thirty entrants and dozens of interested spectators. After being duly registered and favored with toy balls and blue ribbons the youngsters enjoyed an happy hour playing with the toys and novelties in the nursery rooms of the home economics buildings. Under the direction of Miss Annabelle MacRae, '28, four senior co-eds took charge of the judging. Inasmuch as the show was booked as an entertaining feature only simple unscientific rules applied in making the awards. In judging the three classes the senior girls placed their unanimous choices on the following youngsters: Class 1, 0 to 1 year: girl, Joan Marie Southworth, age 11 months. Lansing; boy, Robert John Branaman, age 8 months, East Lansing; Class 2, 1 year to 3 years: girl, Nancy Every, age 2, East Lansing; boy, Richard Trull, age 18 months, East Lansing; Class 3, age 3 years to 5 years: girl, Peggy Lou Middlemiss, age 5% years, Detroit; boy, Russell Redfern, aged 4 years, Saginaw. A special prize for entrants coming the longest distance was won by Mrs. Eil Middlemiss and daughter, Peggy Lou of Detroit, who won first place in class three.

J. ALETHA KEISER GRUBAUGH, '19, with her daughters, Lois and Joyce, of Biddeford, Maine, came the longest distance to attend the baby show, and right, Mrs. Eli Middlemiss and daughter, Peggy Lou of Detroit, who won first place in class three.

The battles of England are won, they say, on the cricket fields of Eton. Likewise, the enthusiasm that makes success of Michigan State grads is learned, oftimes, in the fervor of the fifty-yard seats.

Prize Winners Announced in Second Annual Baby Show

A special prize for entrants coming the longest distance was won by Mrs. Eil Middlemiss and daughter, Peggy Lou of Detroit, who won first place in class three.

J. ALETHA KEISER GRUBAUGH, '19, with her daughters, Lois and Joyce, of Biddeford, Maine, came the longest distance to attend the baby show, and right, Mrs. Eli Middlemiss and daughter, Peggy Lou of Detroit, who won first place in class three.
Record Class Given Diplomas
At Seventy-first Commencement

UNDER almost ideal weather conditions and a most beautiful setting in the Demonstration hall, the largest senior class ever to be graduated from Michigan State received their diplomas Monday, June 24, before an audience far in excess of 3,000 people.

Unlike last year, when rain descended with deplorable steadiness, commencement morning saw a bright sun break out of the skies and the traditional exercises began with a parade from the steps of the gymnasium to the Demonstration hall. President Shaw and the commencement speaker, members of the State Board of Agriculture, the minister and honored guests, deans and military officers, members of the faculty, advance degree applicants and members of the graduating class, made up the parade.

At the Demonstration hall the procession caught the strains of La Reine de Saba, the processional played by the college military band, under the direction of Leonard Farnico. Co-eds as ushers met the groups at the doorway and escorted the commencement officials to the platform, while the faculty and those seeking degrees were seated in a reserved section in the main hall.

Following the opening exercises which consisted of the invocation by Dr. Fred W. Ingvolstad of Lansing, and a solo, Che Faro Senza Euridice from "L'Allegro," by Mary Allen, '09, President Shaw introduced Dr. Paul Frank Voelker, president of Battle Creek college, who delivered the commencement address.

Speaking directly to the 381 members of the senior class Dr. Voelker stressed that life is a battlefield on which each man must fight every inch of his way. He told graduates that perseverance, courage, ability to face problems squarely and adaptability to the environment count more in life than does the intelligence quotient.

He declared, "the size of the opposition does not matter if the fighter knows how to handle his own resources. Members of this class will succeed. They must fight, poverty, find it necessary to fight if they would ignoreance, disease, fear, obscurity, laziness, hatred, criticism, their own feelings of inferiority, and their indifference. Hiding one's head in the sand and not seeing opportunity or responsibility is easy. A fighter can quit. He can run away from the fight, or he can compromise. Each way leads to defeat."

Three Honorary Degrees

In addition to the 381 seniors receiving bachelor's degrees, 33 graduate students received advanced degrees from President R. S. Shaw. Honorary degrees were conferred upon Leroy C. Smith, '09, chief engineer for the Wayne country road commission; Frank Johnson, '06, chief engineer of the Lincoln Motor Car company, Detroit, and E. J. Frost, '36, founder of the Frost Gear company, Jackson. Mr. Frost and Mr. Johnson were given mechanical engineer degrees, while the degree of highway engineer was awarded to Mr. Smith.

Lieut. Col. T. L. Sherburne awarded reserve commissions to 61 graduates who have completed the four-year course in military training. Tribute was paid to 57 students with high scholastic records. Of this number 26 were graduated with honor and 31 with high honor.

Dr. Stone Baccalaureate Speaker

Baccalaureate exercises were held Sunday afternoon preceding commencement, in the East Lansing People's church. Dr. John Timothy Stone, president of the McCormick Theological seminary, in Chicago, was the speaker. He dwelt on the necessity of a return of interest in the soul. No one today, he declared, doubts the importance of the mind, the heart, or the body, but the reality of the soul is not stressed in present-day thought.

The college orchestra, under the direction of Arthur Farrell, conductor, played the processional and recessional. The invocation was delivered by Rev. Norman W. Kunkel, of the People's church and Mary Allen, '09, rendered several solos.

A university is an institution where knowledge is preserved, advanced, and disseminated. — President Butler of Columbia University.

Advanced Degrees to 39

THIRTY-NINE advanced degrees were awarded graduate students at the commencement exercises Monday, June 24, according to Miss Elida Yakely, registrar.

Degrees awarded were master of science, master of arts, doctor of philosophy, mechanical engineer, metallurgical engineer, and civil engineer.

The complete list follows:

Master of Science—Lawrence Marion Ames, East Lansing; Joseph Emest Archer, East Lansing; Harold James Barnum, Sidney, Mont.; Ellsworth J. Beesly, Whitehall; Har­low Robert Brigham, Richland; Edward Davis Clifford, Flint; Earl Wilson Coiler; Charle­ton; Ray Lewis Cook; Lansing; Samuel Harold Dwight, Decatur; Maynard Samuel Gunder, Bentley; Wayne Neil Headley, Wil­liamston; Roberta Ruth Hershey, Lansing; Howard Whitney Johnson, Eaton Rapids; Edgar C. Jensen, Grant; Reuben Warren Leby, Montrose, Col.; Winfred Carl Lewis, Lansing; Frank Hiram Maxwell, Tampico, Ill.; Lane A. Morse, East Lansing; Dorothy Fer­mar, East Lansing; Fred LaMont Reynolds, DeWitt; Phillip Oscar Ripley, Len­contre, Quebec, Canada; Walter Daniel Rosson, Utica; Leland Ed­wards Scott, Ludlow; R. Hoytice L. Thomas, East Lansing; Goodwin S. Tolles, South Haven.

Master of Arts—Verna Harriet Church, East Lansing; David Glerven, Lansing; C. A. Jacques, Grand Rapids; Robert Henry Hay, Grand Palls, Mont.

Doctor of Philosophy—Guy Webb Adrian, College Station, Texas; John Franklin Fon­der, Grand Junction, Colo.; Lawrence C. Karp, Hamilton, Ohio; George Cecil Tuttle, Lincoln, Neb.; Charles Edwin Kellogg, East Lansing; James Dayton Nourse.

Mechanical Engineer—Royald G. Bigelow, Northport; Leslie John Smith, Pullman, Washington.

Metallurgical Engineer—J. Ward Percy, Monroe.

Civil Engineer—James B. Buesch, Wash­ington, D. C.

G. HARRIS COLLINGWOOD, '11, and Mrs. Collingwood, of Bethesda, Mary­land, used this little picture on their Christmas greetings cards last year. It appealed to us and we asked permission to reproduce this fine family group for our Record readers. Harris writes us that "from the biggest down to the littlest the family is as follows: Charles, age 12; Thomas, age 10; Eloise, age 6; Jean, age 5; Rebecca, age 4; and George Harris, Jr., age 2; that's all."
Who Will Be the Leaders Tomorrow?

The leaders tomorrow will be the young men of today who are proving their worth. Never have opportunities been so great for deserving young men who show by their energy and thrift that they are worthy of bigger responsibilities.

A savings account is the best reference for any young person—a silent partner always ready to help you climb up the success ladder.

Your College Days

What is your daily reminder of your good old days at Michigan State? Is it a college souvenir on your desk, a photograph of the campus, the Red Cedar, or a building?

See that your office or your desk has a suitable reminder of your college days. Write us or come and visit us when in East Lansing.

Deaths

Virginia Matthews, 1927

Word has been received of the death of Virginia Matthews, w'27, on March 22, 1929, in Phoenix, Arizona. Virginia was the daughter of John W. Matthews, '85, who died in Detroit in 1923. She is survived by her mother and a sister, Josephine, of the class of 1922, and brothers.
Gridiron Eleven Books An Ambitious Football Schedule

The football schedule for 1929 is one of the most ambitious ever attempted by a Michigan State college team. It is replete with games that will test the mettle of the righting Spartans to the utmost, and will satisfy the appetite of the Spartan followers with many different types of football shown by the opposition. Teams from the east, south, southeast, and midwest will be met, which will give the schedule a broad tang of intersectionalism.

On September 28, the Spartans will meet Alma college in the first game. Alma has always been a leader in M.I.A.A. circles, and this year will bring a veterans team to East Lansing.

The next Saturday, October 5, will see the team in action in the bowl at Ann Arbor. This game will be of special interest because the Spartan warriors will be showing their wares before their former coach, Harry Kipke. Michigan and Michigan State college games always speak for themselves.

The strong Colgate team will be the host to the Spartans on the next Saturday at Hamilton, N.Y. The Colgate-State game is becoming a fixture on the schedule and is assuming the aspect of a traditional classic.

October 19 will see Adrian college on the Spartan field. Adrian for the past two years has had the strongest teams in her history and this year’s team looks to be the ultimate in her achievement.

October 26, Homecoming, will see the Spartans engaged in the key game of the season, North Carolina State college, a sister institution, will bring to East Lansing, a team determined to win the odd game of a three-game series. In 1927 the Spartans journeyed to Raleigh and lost to the Wolfpack in a sea of mud. In 1928 the Spartans went to Raleigh and lost the second game to the Spartans in a blinding snow storm. This year the game has been moved up in the season so that the two teams can battle each other instead of the elements.

Following the North Carolina game, Case comes to East Lansing on November 2. This is a new opponent for State, and a worthy one, for Case has always had fine teams with a strong reputation. For years they used to play the opening game with the University of Michigan.

On November 9, the Spartans will board the pullmans for a journey into the Sunny South, where they will meet Mississippi A. & M., one of the strongest teams of the cotton states. In 1928 “Ole Miss.” and the Spartans tied 6 to 6. Each Spartan is pledged to avenge that count and will be ready to do battle to wipe out the tie issue.

And for the season’s climax, November 16, University of Detroit at East Lansing—Spartan stronghold.

B A S E B A L L

For the fourth time in four successive years, Coach John Kob’s Spartan ball tossers won the home game from the University of Michigan. The game was a 10-inning thriller, and when the smoke cleared away the score was—Michigan State college, 1; University of Michigan, 3. In addition to this great victory the Spartans defeated the scrappy Hillsdale college team, who had been winning from everyone in state circles, and who eventually won the M.I.A.A. championship.

The feature of the season, was the pitching of Jerry Byrne, who has the distinction of being the only State college pitcher who can boast of having pitched his team to two victories over the University of Michigan during his college career. Jerry did the trick in the spring of 1928 and also this year.

T E N N I S

The tennis team participated in dual meets in 1929 against the University of Michigan, Notre Dame, Marquette, Colgate, Chicago Armour Institute of Technology, Western State Teachers college, Detroit City college and Albion. In addition to these, competition was met in the annual state meet, held at East Lansing, and the Central Intercollegiate conference meet, held in Chicago. Because of the many splendid courts, and the effort made to carry as large a squad as possible, Michigan State college is especially endowed to furnish every opportunity to those interested in this great sport.

L I S T I N G

Listing the senior class according to divisions is the annual task of Miss Elda Yakeley, well known college registrar. Heading the big graduating class of 389, the division of liberal arts claims 121. Other divisions rank as follows: agriculture and forestry, 83; engineering, 72; home economics, 64; applied science, 30; veterinary and medical biology, 11; physical education, 1.

Andrew Carnegie once said:

“I have never known a concern to make a decided success that did not do good honest work, and even in these days of fiercest competition, when everything would seem to be a matter of price, there lies still at the root of great business success the very much more important factor of quality.”

For ten years the Campus Press has been striving to give its valued customers the best in printing—Quality, Service and Consideration.

The Four Horsemen of the National Championship Notre Dame Team of 1924

HERALDED the country over as one of the cleverest and most alert teams ever to step on any gridiron the national championship team of Knute Rockne's with its powerful "Four Horsemen" finished the season undefeated and held victories over Eastern, Southern, Midwestern and Far-western teams. Jim Crowley played left halfback in 1922-23-24, when the South Bend football forces won 29 games and lost but two. The famous Four Horsemen pictured above are left to right—Stuhldreher, Miller, Crowley and Layden.

The New Coach

Complete satisfaction over the selection of James H. (Sleepy) Crowley as the man to succeed Harry G. Kipke has been expressed by alumni and students everywhere. Prolonged applause greeted the announcement made by Ralph H. Young, director of athletics, as he introduced the new gridiron mentor at the alumni Sunset Supper, Saturday evening, June 22.
SPARTAN CLUBS
NORTHWESTERN MICHIGAN PICNICS

While some of us folks here in the northern part of the lower peninsula could not return to the campus for Alumni Day, it was decided that we have a picnic by ourselves. The place chosen was on the beautiful shore drive about 17 miles northwest of Harbor Springs. Letters were sent to the old alums on the list you sent me. The day started out rather gloomy and foggy but by noon when we gathered in a group for dinner, it was bright and warm. After a real husky feed, it took a ball game to wear some of it off, followed by a dip in Lake Michigan. Old and young Staters were on hand during the day. Because the attempt for such a gathering proved so successful, the remark, "We must have more of these get-togethers" was passed again and again.

Those present were: Benjamin Halstead, ’97, and wife, Petoskey; George Gould, ’99, and wife, Harbor Springs; Clarence Christofer, ’01, and wife, Petoskey; L. V. Benjamin, ’20, and wife, Gaylord; Capt. Ernest Burt, ’17, and wife, ’14, District of Columbia; A. R. Schubert, ’22, and Ruth Featherly Schubert, ’20, Petoskey; Mrs. Helen Gould Nelson, ’24, Northport; Carl Brown, ’26, and wife, Harbor Springs; Emory Hauk, ’26, and wife, Battle Creek; Kenneth Bordine, ’27, and wife, ’27, Alanson; Mrs. Esther Halstead Coleman, ’27, Hastings.

—A. R. SCHUBERT, ’22.

MICHIGAN BREAKFAST IN BOSTON

The Record is indebted to May E. Foley, ’18, state nutrition specialist of Amherst, Massachusetts, for her thoughtfulness in sending us the list of persons who attended the Michigan breakfast during the American Home Economics conference in Boston on July 3. A number of other Michigan State people were at the convention but previous engagements prevented their attending the breakfast. Those present were:

Mrs. L. L. Peppard (taught ’06-18); Florence F. Harrison, ’10; Pearl Mac Donald (taught ’07-11); Dorothy Hanigan, ’23; Rebekah Gibbons (former instructor); Anna E. Bayha (clothing); Irma H. Gross (foods); Rosalind M. Jewett (extension); Louise H. Campbell (extension); Elizabeth Van Denbergh, ’30; Erma Christiansen, ’30; Ruth D. Morley, ’24; Emily Herkimer, ’23; Ruth Freytag (extension); Marie Dye (research); May E. Foley, ’18; Julia F. Tear (clothing).

Among M. S. C. folks present at the convention but not at the breakfast: Edna Smith, ’03 (M. S. C. extension); Florence Hall, ’00 (U.S. department of Agriculture); Rose Hogue, ’18.

GOLF

In 1928 a golf team was organized at Michigan State College for the first time. The team played a schedule of eight games and came through in remarkable fashion, winning six games and losing two.

In 1929, after the splendid record of the year before, the golf team carried on, under the coaching of Harry Kipke, and established another brilliant record. Five matches were played and the team lost only one, the undefeated University of Detroit, being the only team to beat the Spartans. The City College of Detroit and the Grand Rapids Junior college were each defeated twice.

BASKETBALL

The basketball schedule for the coming year includes the usual games with the University of Michigan, University of Notre Dame, Marquette university, and the University of Detroit. Other high spots in the schedule include Syracuse university, Ohio Wesleyan, and Oberlin college at East Lansing. There will be an eastern trip to the Pittsburgh district, where the Spartans will meet Carnegie Tech and one other strong team.

The team will again be coached by Benjamin F. VanAlstyne who has turned out prominently successful teams for the past three years.

THE HOTEL OLDS

Strategically located opposite the State Capitol, and easily reached from all centers, the Hotel Olds, distinguished for its quiet air of refinement, is naturally favored by many members of the faculty, student body and returning alumni of Michigan State. In its appointments the Hotel Olds avoids any note of flashiness, confines its appeal to those who prefer an atmosphere of gentility and unobtrusive service.

Record is not a mindreader. We must tell him where we are and what we are doing, in order that he may pass it on to others whose interest in us would be flattering if we but knew. I have had a son at M. S. C. for two years, and my daughter will enter in the fall. I do so wish to see and hear from old college friends oftener than I do."

Mrs. Drolett lives in Lansing at 1623 W. Main street.

E. W. Ranney writes from Greenville, Michigan:—"Working hard. Daughter, Mary Emily Whitelaw and son on way home from Canal Zone. She and husband are to be stationed at Port Benning, Georgia."

The following is continued on a blue slip from Hugh P. Baker: "As I now have a permanent place to camp down, in Washington, please change address from business address at Chamber of Commerce, U. S. A. to 2800 Ontario road, Washington, D. C. Daughter graduated from Vassar, son entering Michigan:- "Working mostly on the phony disease of the peach at the U. S. peach disease field laboratory, Fort Valley, Georgia," writes Lee M. Hutchins, Bureau of Plant Industry, Washington, D. C, reaches him.

R. Emmet Shanahan gives his address in Grand Rapids, Michigan, as 1405 Dunham street, S. E. He is general superintendent of the E. O. Bulkman Manufacturing company.

H. K. Wright sends his blue slip from P. O. Box 1404, Philadelphia, with the following note: "As a delegated representative of the American Veterinary Medical association and also in the interest of the H. K. Mulford company, I recently had the pleasure of spending five weeks in London investigating the new preventive treatment for distemper. After five years painstaking research conducted under the auspices of the Field Distemper fund, the British scientists, Drs. Laidlaw and Dunkin, have developed a practical means of rendering dogs positively immune to this scourge. No discovery of greater importance to dog owners and veterinarians has ever been announced."

does Auto-Owners service for the vacationist stop there. Most Auto-Owners passenger car policies carry with them Emergency Trouble Service—good within 10 miles of any garage—not only in Michigan—but everywhere in the United States and Canada as well. It provides gasoline delivery, 30-minute starting, lighting or ignition trouble-shooting, delivery of a loaner battery, and towing on the road.

These Touring and Trouble services are the privilege of those who each year buy standard automobile Protection at Cost from Auto-Owners. On June 30, 1929, assets of $1,580,178.89 gave strength and safety to Auto-Owners policies on the automobiles of 30,000 motorists.

1929
Rolan W. Sleight, Secretary
Lansing, Mich.
If you travel to any extent you should have in your possession at all times an introduction card to the managers of Intercollegiate Alumni Hotels...It is yours for the asking...It assures courteous attention to your wants and an extra bit of consideration that frequently means much.

Your alumni association is participating in the Intercollegiate Alumni Hotel Plan and has a voice in its efforts and policies. At each alumni hotel is an index of resident alumni for your convenience in looking up friends when traveling. Other desirable features are included.

If you wish an introduction card to the managers of Intercollegiate Alumni Hotels, write to your Alumni Secretary or use the coupon.
A QUESTION . . . TO THE MAN WHO IS "LOOKING AROUND" IN THE $1000 CLASS

Can you swing maybe a hundred dollars more on your down-payment—and shoulder perhaps three additional payments?

That actually is all you have to consider in order to own a Reo Flying Cloud. But that, however, is not the whole story. By the end of the third year, with a Reo, you will have saved in repairs alone far more than your added investment—and you will have a fourth, fifth, sixth year and even more of really outstanding service to look forward to. Reos are built the way only the finest cars are built—to last. And people who know motor cars will tell you that for long life, performance and mechanical dependability a Reo is to be compared only with cars in the highest price-brackets . . . Besides, wouldn't you rather drive a care that hasn't an obvious price tag attached to it?

Look around, of course—but be sure to look in at your Reo dealer's.

Now you can have a Reo Flying Cloud at a lower price than ever before.

REO MOTOR CAR CO. - LANSING, MICHIGAN
