Lighted Tree Dresses Campus in Christmas Spirit

December 1929
Cleveland’s New Railway Terminal
Is G-E Equipped

This great $60,000,000 station marks the latest advance in the electrification of union passenger terminals in America. It will be opened early in 1930.

Seven railway lines, all heavy passenger carriers, converge at Cleveland. Only an electrified terminal could carry the daily thousands of travelers to and from the heart of the city— with the necessary speed and convenience and, with the comfort and smoothness demanded of modern railways.

Twenty giant electric locomotives, each eighty feet long and each able to haul seventeen 75-ton Pullman cars, will be supplied with power by five 4000-hp. motor-generator sets. A single operator in the passenger station automatically controls the two power substations miles away.

All these new electric locomotives carry the General Electric monogram. So do the big motor-generator sets. So does the floodlighting system, which gives special distinction to the terminal tower. The same General Electric mark of dependability is also found on thousands of other electric products, such as MAZDA lamps and electric refrigerators,—home necessities which promote health and comfort.
LISTENING IN

ALUMNI DINE

Detroit Club—Weekly luncheons every Wednesday at 12:15, main dining room of Masonic Temple. Informal bowling after lunch in E. C. Krehli, '08, president. Grand Rapids Club—Weekly luncheons every Monday at 12:15, Elks Temple cafeteria. Basketball gossip in private dining room. Berrien County—Annual meeting of Berrien County alumni will be held Saturday evening, December 28, at the Memorial hall, St. Joseph. A pot-luck supper starting at 7:00 will be followed by an interesting program.

Three and four-story buildings are the rule at comparatively pastoral universities where land is not so valuable, as contrasted with Columbia, Northwestern, and other metropolitan universities where buildings commonly run up to a dozen stories or more. Of course the most conspicuous example is the new tower building of the University of Pittsburgh, called "The cathedral of learning."

There is a rising feeling almost potent enough to be called a conviction, that many alumni of many colleges are intellectually competent and worthy of a closer and more equitable relationship with the college; that the college owes them a greater return for their interest, for its own good, and for the developing of that interest, for its own good, should build for the exchange of amenities a two-way street over which the alumnus could continue, after graduation, to receive certain services looking toward his intellectual preservation.—W. B. Shaw.

Much of the joy of living lies in anticipating the future. When good fortune comes to us, we find pleasure in contemplating the future. When adversity is our lot, we look to the future for better things. May good health and happiness and all the good things you are looking forward to be yours in 1930.

NINETEEN TWENTY-NINE wasn't such a bad old year after all. We managed to live with it for twelve months, and that's probably about as much as we shall be able to do with 1930. However, we do have one resolution to announce as we enter this "new batch of opportunity." We promise to try to do a better job of Listening In in 1930. "More and Louder Listening In in 1930."

A UNIVERSITY is an institution where knowledge is conserved, advanced, and disseminated.—President Butler of Columbia University.

Why a college education?—To qualify young men for the different professions and for the honorable discharge of the various duties of life.—From the Charter of Grinnell College.

"An alumni fund is a continuing agency devoted primarily to the raising annually of unrestricted gifts to a college or university from its former students."—American Alumni Council.

The purpose of an alumni association—To create interest in the University among the alumni where that interest does not exist, and to mobilize it for the university welfare where it does."—Ohio State University Association.

The EDITOR of Judge last year wished to fill two lesser jobs on his staff and so he sent out queries to 82 college humorists. He got 81 replies! And most of the collegians were willing to quit school at once if they were offered the jobs.

DETROIT'S NEW, GREAT HOTEL IN THE THEATRE DISTRICT

Detroit-Leland Hotel
Bagley at Cass Avenue
William J. Chittenden, Jr., Manager

Downtown, near inter-state bus terminals
and railway stations

Out of town visitors invariably appreciate the fine, old-fashioned hospitality of this home-like hotel, the faultless cuisine and the large, well-ventilated and tastefully furnished guest rooms. Moderate prices. Personally managed by William J. Chittenden, Jr., of the Pontchartrain and old Russell House for Bowman Management, Inc., directors of the famous New York Biltmore, Commodore and other metropolitan hotels of reputation.

Reduce—One Slice of Basy Bread With Each Meal
EDITORIAL COMMENT

A TRYING SITUATION

UNFORTUNATE CIRCUMSTANCES that developed during and following the playing of the University of Detroit football game this fall served to mar an otherwise successful season. The action of certain followers of the Detroit team caused a furor in East Lansing and Lansing, the rumblings of which will not die down in some quarters for a long time to come. Those who stood in the stands and saw riotous scenes enacted, many of them out of keeping with what has come to be accepted as collegiate atmosphere, or those who read of these occurrences in the press of the middle west, were loath to see Detroit again placed on a State football schedule.

Resentment still burns in the breasts of those who believed that vandalism ran riot. Expressions have been made and are still being heard against the return of Detroit to the schedule. While the situation cannot be dismissed with a wave of the hand, yet the thoughtful alumnus after calm consideration, must recognize some certain facts.

Contrary to reports, the material damage caused by the celebrating followers, we hesitate to say students because it is known that, a large percentage of the following did not include those enrolled at the Detroit institution, was greatly exaggerated. A careful survey has revealed that the amount of damage will not exceed $100. The Detroit school's quick apology and expression of desire to compensate for all losses and the punishment of certain student parties who were responsible confirmed the general belief that the institution's authorities desire to maintain high standards.

Some excuse for the conditions may be found in the fact that Detroit has largely a day student enrollment. Perhaps because it is located in a metropolis some of the students have missed those fine traditions that maintain on a campus separate and apart from a city. May it not be that a city can swallow a university just as it is that a university can absorb and dominate such communities as Ann Arbor, Champaign or New Haven? It is possible and probably true, that the young institution hasn't the background that makes for such commendable attitude at the scene of so many college athletic contests.

Detroit is growing as an institution. If State is sufficiently generous to overlook irregularities during the early stages of development, a wholesome rivalry may develop.

The college faculty and officials have seen fit to recommend a continuation of relations with Detroit. Those who know our College well and have the disciplined minds of mature and cultured men and women believe that Detroit has another chance due. The thought is that the best has been made of a trying situation.

ACTED WISELY

THE STATE BOARD OF AGRICULTURE has accomplished another fine bit of work. Action which resulted in the construction of a portable basketball floor for Demonstration Hall laudable in more respects than one. With the student body of the College grown to more than 3,000 it was impossible to accommodate all in the gymnasium, scenes of basketball games for the past ten years. Alumni and those townspeople who follow with interest and lend material support to State teams would have been completely shut out of games had all the students demanded that they gain what they paid for in their athletic ticket.

Then, too, Coach Ben Van Alstyne has given State some of its greatest basketball teams in history and it is fitting that the successful coach and his star performers should be provided with a place where all might come and see them play the game.

The alumnus who has forgone the pleasure of coming back to the campus to see the basketball games because of the limited seating facilities, may rest assured now that the condition has been remedied. He may come and bring his friends to see one of the most modern basketball plants in the land and be assured of having a comfortable seat, breathing pure air and seeing the best basketball team in the world wear the Green and White in a manner that will make him proud. The State Board met the issue squarely and acted wisely.

TRIBUTE OF A TRUE SPARTAN

ANYTHING I may have won or accomplished, I owe to my coach, Morton Mason. Before I started running here at State I didn't amount to much."

A true Spartan, the greatest member of a great team. The coach spoke those words this fall on the conclusion of a successful season. Lauren P. Brown is the best cross-country runner to represent Michigan State college in history. Brown is a senior and has finished his three years of service as a State harrier. In giving his coach credit for the startling performances he has turned in against the best talent that the national intercollegiate field could produce, Brown not only paid a shining compliment to his teacher but he also put the sterling mark upon his college and what it has to offer.

For three years the Michigan State college cross-country team has won every dual meet. Michigan and Notre Dame have been notable victims. In New York at the national championships, the I. C. A. A. A. M. meet, the Spartans won second place, being beaten only by Pennsylvania. Teams from all over the East trailed State's band of midgets. Brown's generosity and honesty is worthy of a Michigan State college athlete. It is a fitting tribute that many alumni who long since have left the banks of the Red Cedar far behind might well shape to suit a compliment to their alma mater.

TWENTY YEARS AGO

INSERTED in this month's issue is a reproduction of a picture of the Michigan Agricultural college faculty taken in 1909. The presentation of this feature was made possible through the co-operation of "Uncle Frank" Kedzie, college historian, who we all know has a treasure house filled with memories of former days on the campus. As most of the figures in the picture are identified, it is at once something to value. A few copies are available for framing.

ON TO 1930

LOWING OUR WAY across the entrance of the campus through the deep white fluff, we suddenly realized that we turn a new calendar month soon. Nineteen twenty-nine has been a most interesting year and we are glad to have had our small part in alumni work with you.

But we enter the new year filled with enthusiasm for the most triennial period in the history of the College. That the interest of our readers and alumni increase in this big program is our wish as we pass on to 1930.
THE MATTER of the attendance of first-year students to American colleges and universities, particularly those receiving state support, has become important. The urgency of the need for more rigid selection is being clearly recognized. Naturally and rightfully, there is a conviction that when elimination of applicants is increased it should apply first to those of lower previous scholastic standing. This would be simple, and it could be affected mechanically, except for the fact that amongst the high school graduates whose records place them below the average academically there are many individuals who are potentially better than their records indicate. These can hardly be denied consideration, and be automatically rejected without a hearing. They deserve a chance, and are worthy of discovery.

At Michigan State college, the duty of deciding upon applications for entrance devolves upon a committee consisting of representatives from the several divisions of the college. As the chairman of this committee, I desire to present a study based upon some of the work of the committee for the school year 1928-29, the presentation to be limited to a group of applicants who ranked in the lower third of their respective high school graduation classes.

All told, the committee considered 242 cases of the above type. Besides taking account carefully of the information contained in the formal applications, every possible effort was made to obtain additional guidance with respect to the individuals in particular. Personal interviews were sought and secured in numerous instances. Of these 242 cases, 65 (27%) were rejected, 155 (65%) were granted admission on trial, and 22 (8%) were given permission to enter regularly. The general policy was that of being reasonably liberal in giving these applicants an opportunity, and secondly, to be firm in holding them to their bargain after they were enrolled and had had a chance. At present, no state educational institution can justly and safely pursue a policy less generous.

From the total number of trial entries about ninety, whose high school records were shown the most completely on the applications, were selected at random for the purpose of close analysis, extending through the freshman year of their college careers. The results are as follows:

**High School Records**

A. Grades—All the high schools of the State of Michigan do not use an identical grading system. Consequently, calculations which adjusted the grades to a common basis were made. This basis was a scale wherein A equals 93 to 100 with midpoint at 96; B 85 to 92, midpoint 90; C 75 to 84, midpoint 80, and D 65 to 75, midpoint 70. Seventy was used as the passing grade, and where the high school's passing grade was either lower or higher than this, adjustments of all grades were made accordingly by the use of appropriate factors of conversion. Five subjects, namely English, language, history, mathematics and science (physical and biological) were considered, other subjects being left out of account. Our results showed modern language to be the lowest, science the highest, but they differed by only 2.2%. It seems that in using average grades as criteria of scholarship within such a class of students the average for any one subject is as reliable as that of any other or even that of all subjects combined.

D. Failures—The application blank requires that the student list the subjects in which he failed in high school. A good many omissions occur, and these are not always corrected by the school officials who complete the applications. Fifty-seven of the 89 students failed one or more high school subjects. The total number of failures was 166, giving an average of 1.9 failures per person. Lack of interest and laziness seemed to be the most popular explanations of failure. Six questioned their own ability for learning.

C. Extra-curricular activities—Outside activities are often blamed for poor scholastic standing. Applicants are usually thorough in reporting these. They have the notion that it may strengthen their cause with the college committee. Our tabulations show that two was the modish number of activities, while the average was almost exactly three. Strange as it may seem, there was no correlation between either activities and failures or activities and average grades. Are we to conclude that these students simply did not or else could not get their work, and it would have been the same if they had not engaged at all in outside activities, in which case they would have been idle rather than active in any way connected with high school procedure?

E. Estimate, of personal qualities—The principal or superintendent is requested to give a formal estimate regarding the candidate's ability, interest in academic work, originality, application to study, seriousness of purpose, strength of character, and leadership. These qualities are rated on a scale of five gradations—very low, low, average, high, very high. Tabulations showed that excellent or very high interest in academic work the students concerned were rated above the average. The rating with respect to character is especially high. This is inconsistent with the grades shown which assign them to the lower third of their classes and below average. Clearly, the high school officials considered these students were potentially better than indicated by the grades they made in academic subjects. I suppose it may be inferred that they do not believe there is a very close relationship between scholastic achievement and personal qualities in persons of high school age. It will be of interest to follow these students after their entrance into the college, or through their freshman year of work.
Faculty Men Open State College
Club Rooms in Union Building

STATE COLLEGE CLUB quarters, the new center of Michigan State life on the campus for all men on the staff, thrown open last month through the joint efforts of the State Board of Agriculture and faculty members, has started its first season as an innovation in the Union Memorial building. It is obviously too early to attempt to give an appraisal of the success of the new club rooms. It will be another year or so before those who are closely concerned with the venture will be in a position to estimate whether it is making those contributions to the life of the staff members that were the reasons for its inauguration.

Situated on the third floor of the Union the space occupied by the club rooms is accessible from the west stairs. The spacious formal lounge room with its large fireplace at one end is very comfortably fitted with choice pieces of furniture. An arch on either side of the fireplace leads to the recreational room where billiards, pool and card tables are available. The room adjoining the play room is richly furnished as a small den or writing room, and by removing the connecting doors, leads as a passage to a large dining room. A caretaker is in charge daily, except Sunday, from noon until the closing hour. Besides being responsible for the quarters he handles the check room and cigar counter.

While awaiting the arrival of the last furniture the rooms were opened late in October, but the formal opening night was the evening of November 18, when nearly 100 members of the club and guests enjoyed an informal program and smoker. Special music was furnished by members of the State College Institute of Music. Hon. M. B. McPherson, representing the State Board of Agriculture, in presenting the rooms to the State College club, evaluated the use of rooms of this character in bringing together departmental and divisional workers where all college problems could be talked over more freely. The fact that this was the first time in the history of the college where all men on the staff could meet daily in their own quarters and pass away spare moments in a social and recreational way was characterized by Mr. McPherson as a true mark of progress.

President R. S. Shaw, previously assigned the renowned steamship AMERICA, of which Captain George Fried, of rescue fame, is the commander, as the intercollegiate flagship, with sailings from New York to Europe on June 4, July 2 and July 30, 1930, E. T. T. Williams, managing director of the Intercollegiate Alumni Extension Service, which is owned by the leading alumni organizations of the country, including the M. S. C. Association, in making this announcement said:

"There are several reasons why the alumni organizations have selected the United States lines and the Merchant Marine lines. There has been a tremendous interest in European travel since the war and numbers of college alumni going abroad rapidly increasing, we feel that the concentration of American college alumni on American ships will create many pleasant social contacts that will be of material assistance to us. The United States lines were designated as the official lines, not only because of the fact they provide excellent facilities for trans-Atlantic travel, but also because the colleges realize absolute necessity of fostering an American Merchant Marine. "The steamship company will cooperate with all affiliated alumni offices in this country to make the trips abroad more pleasant, while in Europe Gilmore T. Tilbrook, for many years alumni secretary at Carnegie Tech will maintain a card index system giving the names of American college alumni residing in Europe. Mr. Tilbrook will maintain an office in Paris with branch offices in many other cities of Europe."
SPARTAN CLUBS

Detroit Discusses Football

FOLLOWING A DINNER at the Masonic Temple on the evening of December 2, over fifty Michigan State men attended the smoker called by E. C. Krebl, '08, president of the Detroit club, for the express purpose of discussing the proposed football schedule for 1930.

Visitors from the college who took an active part in the discussion of the evening included Director R. H. Young, Assistant Director L. L. Frimodig, '17, Glen O. Stewart, alumni secretary, and Dean J. F. Cox, chairman of the Athletic Council.

A lively program was provided by Mrs. Bell, Mrs. Pearsol and Mrs. Parker, which kept everyone busy and amused.

Refreshments consisted of ice cream, home-made cake and coffee. A fund was started from which the club hopes later to purchase something for the M. S. C. Union building.

The present officers of the club are P. J. Hartsuch, president; Lee Bullen, vice-president; Charles Reynolds, secretary-treasurer.

Southern California

The Michigan State alumni of Southern California held their last meeting at the Woman's University club in Los Angeles according to recent information from their secretary, V. W. Bunker, '24, with an attendance of over forty.

As Dean Bissell is now near them they hope to have more pleasant meetings and receive news fresh from the campus. R. S. Simmons, '18, succeeds Mrs. Louise Kelly Pratt, '11, as president of the organization.

Basketball Schedule

THE GREATEST SCHEDULE of basketball games State has known for many seasons will open on January 1 when Coach Ben F. Van Alstyne will send his team against Syracuse U. at East Lansing. Only two or three men were lost to the 1930 team. This insures State of another year of the greatest basketball they have ever known.

Sixteen games are listed and the schedule includes some of the best teams in the United States. They follow:

Jan. 1—Syracuse University, East Lansing.
Jan. 4—Ohio Wesleyan University, East Lansing.
Jan. 9—University of Detroit, East Lansing.
Jan. 16—Bethany College, Bethany, West Virginia.
Jan. 22—University of Notre Dame, East Lansing.
Jan. 25—University of Detroit, Detroit.
Jan. 28—Hope College, East Lansing.
Jan. 31—Marquette University, East Lansing.
Feb. 7—Kalamazoo College, East Lansing.
Feb. 11—Bethany College, East Lansing.
Feb. 18—University of Michigan, East Lansing. (Floor dedication.)
Feb. 15—University of Notre Dame, Notre Dame, Ind.
Feb. 21—Hildale College, East Lansing.
March 1—Marquette University, Milwaukee, Wis.

Eleven home games; five games away.

MARRIAGES

ANDERSON REED

Charles Anderson and Olive Reed, '27, were married May 15, 1929. They are located at Tachoban, Leyte, Philippine Islands.

BRADLEY-MULVENA

A. Ferris Bradley, '28, and Dorothy Mulvena, '29, were married in the McCune chapel of Peoples church, East Lansing, September 28, 1929. They are living near Augusta, Michigan, in Inwood Park farms.

HOLLOW-WINANS

Earle S. Howell and Doris Winans, '27, were married in Lansing, December 7, 1929.

SPRAGUE-INGER

Kline A. Sprague, '29, and Bessie S. Unger were married November 30, 1929, in Peoples church in East Lansing. They will make their home at 617 S. Park street, Saginaw, where Sprague is employed by the Bell Telephone company.

WOODFORD-MACKINNON

Frank Bury Woodford and Mary Kirk Mackinnon, '26, daughter of Arthur C., '95, and Mrs. Mackinnon, were married November 14, 1929, in Bay City, Michigan. They are living in Palmer Lodge, 229 Covington drive, Detroit.

Appoints Committees

FOLLOWING A CUSTOM inaugurated several years ago President A. C. MacKinnon, '95, has announced that in compliance with the by-laws of the association two committees have been appointed to present nominations for the general elections of the association next June.

Each committee is to present a full slate of candidates, each committee will be responsible to the extent that all persons nominated shall have agreed to serve if elected, and further that each committee shall confer on suggestions received in time to publish their selections in the March issue of the Record. The committees appointed are as follows:

No. 1.
L. P. Dendel, '14, chairman, 422 N. Jenison avenue, Lansing; T. Glenn Phillips, '02, 1101 Charlevoix Bldg., Detroit; L. L. Frimodig, '17, East Lansing; Almira Brimmer, '14, Northern High School, Detroit; Ray Turner, '09, Takoma Park, Washington, D. C.

No. 2.

Leland N. Jones, '29, chairman, 532 Hillcrest, East Lansing; L. O. Benner, '12, 1500 W. Washitenaw street, Lansing; R. L. Kurtz, '09, 1321 Woodlawn Park Drive, Flint; Mrs. P. B. Woodworth, '92, 600 Hickory avenue, Glen Ellyn, Ill.; Carol Macgregor, '21, Michigan Inspection Bureau, Grand Rapids.

THE MICHIGAN STATE COLLEGE RECORD

December, 1929
The freshman class picture is never complete, not all the members seem willing to be photographed. A similar reluctance obtained when the "staff" were photographed twenty years ago.

Of the 107 persons shown in the picture, 24 are still on the staff roster this year.

We were unable to furnish a name for each face, and so ask you Record readers to help us make the list complete.

Six members of the cross-country team, unbeaten in dual meets for three years and runner-up to Pennsylvania for the national championship, were awarded major letters and gold track shoes, Saturday, November 30. Those accorded the honor are: Captain Theodore E. Willmarth, '30, Detroit; Lauren Brown, '30, Detroit; Elmer J. Roosien, '30, Grand Haven; Robert L. O'Connor, '32, Hastings; Clark S. Chamberlain, '31, Lansing; John D. Reid, '31, Ironwood.

Rain, freezing almost as it fell, turned all the Campus monochords to silver and encrusted every bush with crystal about ten days ago. Campus roads and East Lansing thoroughfares were glares of ice, and walking and driving were perilous endeavors.

Even sheep are becoming air-minded. One of the most valuable animals owned by the College was shipped from East Lansing to Chicago via Stout Air Line to compete for honors in the International Livestock exposition held November 30 to December 7.

A new book has been recently added to the shelves of the College library. It is the first volume of "Birds and Trees of North America," with hand colored illustrations by Rex Brasher, famous bird illustrator. This is a gift from W. K. Kellogg, Battle Creek, which was formally accepted by the state board of agriculture at a recent meeting. The set consists of twelve volumes purchased at a cost of $2400 by Mr. Kellogg.

Popularity of soil testing equipment known as "Soil Tex" invented by Prof. Charles A. Spurway, '09, of the College soils department is evidenced by the fact that the professor of soils at the Polish Agricultural institute has ordered fifty of the sets which have also been ordered in 22 other countries. Other countries ordering the equipment are: Trinidad, Cuba, Haiti, Porto Rico, Egypt, Scotland, England, Canada (all provinces), Honduras, Columbia, S. A. Chili, Wales, Isle of Man, Austria, Palestine, India, Japan, Borneo, Sumatra, Java, and the Philippines.

Ray Jennings, '30, Lansing, manager of the 1930 Union production, has announced Thursday and Friday evenings, February 6 and 7, as the date set for the Union production this year. Friday evening will be college night. "Page the Prince," a two-act musical comedy by Noble Hill has been chosen for presentation and will be under the direction of the John B. Rogers Producing company of Fostoria, Ohio. Actual rehearsal and drilling of choruses will be started January 1. About 50 persons will take part in the production which will include sixteen principals and a number of choruses.

A fairy scene, heavy with the scent of beautiful flowers and vivid with glorious coloring, was glimpsed Friday afternoon, November 15, when A. G. Boehringer, w'96, Bay City, head of the Michigan State Florists' association, threw open the doors of the great riding hall of the new Armory, and formally dedicated the association's second annual flower show to the public.

The second show opened with more formality than the first a year ago. The experimental stage has passed and Michigan is now assured of an annual exhibition sponsored by the Michigan florists and the department of floriculture and horticulture of the College.

The exhibition was not only gorgeous in its wonderful colorings, but this year exhibitors vied with each other in artistic arrangement and the choicest selections. Beautifully appointed tables, wedding bouquets, a miniature rock garden, and mass displays drew forth many appreciative comments.

The retail flower booth to which Mrs. Mary Stewart, proprietress of the Mary Stewart tea rooms in Lansing and East Lansing, died at St. Lawrence hospital in Lansing, Monday evening, December 9. Death was attributed to a streptococcic infection.

Sylvester G. Torrance, of Lansing, died suddenly Saturday morning, November 30, at the chemical laboratory building at the College. He had been employed at the College for fifteen years.

Establishment of the "hello tradition" in effect at Colgate university has been urged at State. Under the plan all freshmen and sophomores would be required to speak to everyone they meet on the campus, and fraternities would aid in establishing the tradition by requiring members to set a precedent for other students.

Arthur Farwell's orchestral suite "The Gods of the Mountains" will receive its American premiere in Minneapolis on December 13 when the Minneapolis Symphony orchestra will give it on one of the regular programs for the season. Already Mr. Farwell has been besieged for publicity material, photographs, biographical sketches, analytic notes and the production will add once more to his fame as an American composer. Professor Farwell is associate professor of music at the Michigan State College Institute of Music.

Blue bloods for the blue-book of agriculture, hailing from all sections of the nation and Canada, were in the making Sunday, December 1, in Chicago as the experts set about the task of picking the champions at the international livestock exposition and hay and grain show.

Michigan State college won the purple ribbon for the champion wether in the Ramboillet section. Many other honors were given the college exhibits.

At a recent meeting of the Board of Trustees of Cornell university an anonymous gift of $4,000, to be used for the furnishing of the lobby of William Straight hall was announced. This building serves as their union building. We will welcome that visitors whose first impression of our building's noble interior is marred by a certain feeling of bareness in the great lobby and concourse.

Although the gentle art of dueling with swords has been passed for many years, fencing, its succeeding sport, is not child's play. Beverly Gibbon, '32, Camden, was injured recently when a fencing foil pierced his neck. Hospital authorities report his condition as good.
Macpherson, '74, of Washington, D. C., Makes Statement of State College

ONE OF THE STRIKING personali­ties of the Washington, D. C., alumni group of the College is Donald Macpherson, of the class of 1874. It is not recalled that he has missed the alumni meeting of the M. S. C. Washington alumni association more than two or three times in 35 years.

Mr. Macpherson is one of the oldest, if not the oldest, M. S. C. graduate now living, having been born on a pioneer farm in Ionia county, Michigan, October 15, 1843, of Scotch ancestry. Mr. Macpherson states:

"My estimate of the State College of Agriculture and Science is beyond my ability to represent, but with my increase of experience, acquirements and some ability, my estimate of its system of education is entitled to final scientific approval."

Some of Mr. Macpherson's friends recently handed down some stories of student life in old Saint's Rest in the early '70s. It seems that on one occasion Mr. Macpherson was involved in some dormitory duty that brought him before the faculty court of honor. At that time Dr. Robert Keezie, father of "T Uncle Frank," was usually designated as the investigating attorney for the faculty. In his series of questions he received prompt replies from the defendant but on a quick cross question Mr. Macpherson amused the faculty court with the reply "I am not fortified on that point, sir!"

Following graduation in 1874, Mr. Macpherson entered the law department of the University of Michigan and graduated with the degree of Bachelor of Laws in 1877. He then practiced law at Ionia and was elected circuit court commissioner for Ionia county. On or about December 2, 1882, he removed to Washington, D. C., where subsequently he entered the law department of the National University and graduated as Master of Laws in 1886, where he practiced law as a dilettante. His time and career has been concerned with investments as a business.

Mr. Macpherson states:

"My general occupation has been that of a student of limited literature, as law, common, statutory and international. Particularly have I been interested in many of the elements or collaterals of science, viz., economic and sociological, I have had in affrays a considerable range and mental activity, but I must conclude that the plan of my career was ideal, but the execution was not."

Mr. Macpherson is still hale, with erect carriage and firm step, with the prospect of many useful years yet before him.—Contributed by C. B. Smith, '94, Washington, D. C.

DOES THAT FRESHMAN MAKE GOOD AT MICHIGAN STATE?

(Continued from Page 6)

group extra attention in the way of guidance and discipline. At the end of each of the three terms of the year their records were scrutinized in detail, and they were either dropped, continued on trial, or released from the condition of trial. Five of the total of 87 failed to complete registration.

Our figures show that 42% of this group of students made scholastic records which satisfied the requirements of the standards of the college, and were removed from probation. An equal number was dropped for inadequate scholarship, while 16% withdrew voluntarily.

B. Relation between High School and College Work—How precisely is the scholastic record of the high school a criterion for what the student will do in college? An answer to this interesting question was found by working out the coefficients of correlation, calculated term by term and in general for the various academic subjects separately and collectively.

On the whole the college work was better than that of the high school, because 42% of the group was retained. Furthermore, the arithmetic means for college grades were generally above those of the high school. Due to the continuous presence of a goodly number of individuals who did no better and some few even worse than in high school, who were eventually dismissed, the differences are not very great nor perfectly consistent, yet, they are worthy of consideration, especially those for English, Science, and all subjects combined, where the numbers of individuals were higher.

Conclusion

In view of the statistics that have been presented it seems pertinent to conclude that, while it may not be advisable to open the doors of the colleges and universities for the free entrance of all graduates of accredited high schools, it is not proper to automatically exclude the entire group with lower scholastic standing. There is considerable good material in that group, which, for many possible reasons, has not been displayed in high school, and is not evidenced in the subject grades that appear on the records. A chance in college is not too much to give. When by careful selection of candidates and later the exercise of firm discipline in weeding out the impossibles, 42% of those admitted on trial show ability for higher education and meet the established academic standards, it pays to offer an opportunity to this class of students.

After all, the one best way to determine whether or not high school graduates are of college caliber is to give them an actual trial in college. If we desire to erect special institutions to serve as trial grounds, where the connection between high school and the college proper, this will be an interesting experiment. In the meantime, the liberal yet protected use of the college for this purpose is justified by the facts, as well as by the sentiment of democracy with respect to publicly supported educational institutions.

Short Courses Popular

THE USUAL sixteen weeks course in agriculture which started late in October has the largest enrollment this year ever known. Other courses offered by the college are five subjects in dairy husbandry, five courses in horticultural subjects, and one each in poultry, agricultural engineering, home economics, bee-keeping, seed production, farm management, and veterinary medicine, all of which are to be held in January, February and March.

The interest of Michigan farmers in learning new angles of their business has increased, according to class records kept in the office of Ralph Tenny, '19, director. The discussions on short courses, three in number were given in 1897. Forty-five students enrolled in those courses. Last year nineteen short courses were given by the college.

Dean Bissell Praised

AT A RECENT MEETING of the Lansing Engineers Round Table a resolution was passed and voted to be transmitted to Dean G. W. Bissell now located at Monterey, California. According to R. B. Holt, secretary of the organization the message reads:

"First, the Lansing Engineers Round Table have suffered a loss in your retiring from this community.

Second, for the interest you have shown in our club, its organization and progress, we extend our sincere thanks and appreciation.

Third, for your future welfare, the Lansing Engineers Round Table assure you our best wishes!"
Major Wm. D. Frazer, '09, Author of Popular Book on Pistol Shooting

As explained by the author in the foreword to his work, his main purpose in writing this book was to provide a means of instruction in all forms of pistol games in America today. In this laudable attempt Major Frazer, who graduated here with the class of 1909, has succeeded to a high degree.

Having been actively connected with the pistol shooting game for many years in the capacity of coach and shooter on Coast Artillery National match teams and a shooting member of championship International and Olympic pistol teams, and in addition been a keen and progressive student of the difficult art of pistol shooting in its many varied phases, no one is more qualified to write with authority than he.

The book, which the author has already placed in the College library, has an appeal to all people interested in shooting whether they are experts or novices at the truly American art of pistol shooting. The various chapters of the book deal with all the ins and outs of pistol shooting, including the selection of pistols for various kinds of shooting, shooting form, the aiming problem, holding and squeezing, shooting against time, free pistol shooting, aerial practice, defense shooting and quick drawing, suggestions for police officers, exhibition shooting, shooting psychology, competitive shooting, coaching, instructing ladies, game and long range pistol shooting, use of the service automatic, holsters, ammunition hints and accessories.

It is understood that Major Frazer's 25 years of pistol shooting experience was partially obtained here on the campus where his classmates accused him of shooting cut the little incandescent lamps that hung on the corners of old Williams Hall, and which annoyed those living in the corner rooms. After leaving Michigan State Frazer picked up considerable experience in his knowledge of the manipulation of the six shooter from the cowpunchers on the cattle ranges of Wyoming and Montana during the short but interesting periods of wanderlust. On the whole, his knowledge of military shooting came from his twenty or more years in the military service where he taught marksman ship and coached national matched teams. While a student at Michigan State Major Frazer was a member of the varsity football team for three years when the "Aggie" team was known by its prowess in the middle West.

rooms for transient use by alumni are available in the Union Memorial building. It is advisable to send in reservations as far ahead as possible. Each room has private bath and is suitable for two persons. Rates: Single $2.50 and $3.50; double $5.00 and $4.00.
Certainly. I'm going to remain there. Why not?

That statement and significant query following it should cheer alumni, students and other followers of Spartan athletic destinies. Coach Jimmy Crowley, the man who this fall gave State its best looking and most successful team in many years was the spokesman.

Crowley made his statement in answering a questioner who was anxious to know if one season of Michigan State football was going to work the same way on Crowley as it did on Harry Kipke, who deserted the post to take over a coaching job at the University of Michigan after one year. Crowley's "why not?" removed all doubt of his sincerity.

Crowley Pleased

"I am pleased with the season we have just completed," Crowley stated. "We won five games and lost three. That's better than an even break and in view of the fact that I scarcely knew these boys by name when they entered two of their hardest games. I am not surprised that we lost. We beat two teams, North Carolina State and Mississippi A. and M., that were in our class and I didn't see my boys play a single game but what I was glad I was their coach."

Although the season has just been completed, Crowley is thinking football and is looking forward to another year that will bring spring drills and the autumn grind.

The Michigan State team will be about 30 per cent stronger next season," Crowley opined. "And when I say that, I am not looking to the freshmen for any particular stars. My basis for prediction is largely on the varsity material that I will have back next year and the fact that Judge Carberry has decided to stay here with me and coach the line. Carberry has been of great assistance. I can think of no other person I would rather have with me developing a football team. The freshman team, always a shaky foundation to place any faith upon because of the large numbers who fail in their studies or for other reason fail to return, this year was strong where the varsity was weak, in the backfield. We need tackles and ends badly."

A review of the season's record shows that State compiled 244 points in eight games to place within the first 10 high scoring college and university teams in the nation. The average game found State scoring 33½ points to 13 for the opposition, not a record to be despised by any means.

Five victories and three defeats were marked up. Not a team in State's class won a game while the Spartans took the measure of two foes who were rated on even footing. Alma, the undisputed M. I. A. A. champions, fell before State 59 to 6 in the opening game. Then Michigan won 17 to 0 and Colgate administered the worst defeat of the year, 31 to 0.

These games were played four weeks after Crowley joined his squad for the first time. Crowley's ability to build a winner was well demonstrated in the next three games when Adrian was taken 74 to 0, North Carolina State was thoroughly licked in a Homecoming day contest 40 to 6, and Case blanked 38 to 0.

Crowley achieved another touch of glory when he took his team to Mississippi A. and M. and under great weather handicaps beat the southerners 33 to 19, the first triumph that a State team scored away from home in six years.

There are people who were disappointed by State's 25 to 0 defeat in the season's final with the U. of D. Without exception, these were the followers who do not dip deep into the existing facts surrounding teams and are generally carried away with their enthusiasm. The cool heads and others appreciative of the situation were not hurt. Detroit's victory may be dismissed with the statement that Detroit had a great team. State played inspired football all year, far better than any another coach would have ever been able to extract from the talent available.

Spirited Eleven

Two pleasing results were obtained by Crowley. He put daring fight into his team and equipped it with a versatile offensive that was a threat at every stage of the game. Crowley clearly showed that he has an attack that will work against the most highly touted teams and given material that is better than the average in every position, he will return a real winner.

Titans Win Over State

For the third year in succession the Spartan football team bowed to a superior brand of the autumn sport and the University of Detroit won the final game of the 1929 schedule on College field November 16, by the score of 26 to 0.

While few alumni followers entertained genuine belief that their favorites would humiliate the Detroit team, they were a mite disappointed in having the score go as high as it did. The State team did put up a scrappy fight and on many occasions gave the Spartan chering section many opportunities to go into action but Detroit's superiority was too great an obstacle to hurdle in achieving a victory. The Titans' triumph was clean-cut and earned. Superior offensive technique, harder charging, better blocking and a sterner defense yielded the 25 points and kept the Detroit goal line uncrossed.

The following summary in statistical form indicates how the two teams played before the largest East Lansing crowd in several years:

First downs, Detroit 21, State 14; gain from scrimmage, running, Detroit 214, State 136; gain from scrimmage, passing, Detroit 153, State 48; gain by penalties, Detroit 20, State 30; loss by penalties, Detroit 55, State 30; loss from scrimmage, Detroit 23, State 22; passes attempted, Detroit 13, State 7; passes intercepted, Detroit 2, State 1; fumbles, Detroit 1, State 2; fumbles recovered, Detroit 2, State 1.

New Basketball Floor

An important addition to the athletic facilities will be made when the new basketball floor, now under construction, will be put in play in the Demonstration hall. Granted permission by the State Board of Agriculture the Athletic Council voted funds at their last meeting to build the structure needed badly for over three years.

With the addition of more space hundreds of Lansing fans and team followers will be able to witness the games without the crowded conditions that always prevailed in the gymnasium. Seating capacity of over 6000 will accommodate the 3000 students and all others who wish to attend. Season tickets are now on sale by L. L. Primodig, assistant athletic director.

The new floor will be in use for the curtain lifter with Syracuse university on the evening of January 1, and will remain until February 15.
Football Fans Feast Gridders
Jubilantly at Annual Fall Bust

THAT CENTRAL Michigan alumni club annual football bust held at the Union Saturday evening, Dec. 14, was a "whiz" a "whoopie"; a "hoopla". It was a big evening that tingled with Spartan enthusiasm.

Nearly six hundred jubilant Spartan alumni and football fans crowded into the great banquet hall at the Union and shouted, and clapped and laughed—and ate. From overhead in the balcony the Swartz Creek college clown band poured down into the banquet hall a stream of music that started festivities off with a bang.

At the speakers table on a raised platform sat the dignitaries—sans dignity. There were Fred and Bill, Ralph, Jim, and Mike, Wilbur, Herman and Joe and Stub—Oh yes, and Robert Shaw.

There were speeches of course—but they didn't spoil anything. Fred Radford, '01, of Lansing, acting as general chairman of the annual bust for the Central Michigan club introduced C. W. "Bill" Otto, secretary of the Lansing Chamber of Commerce, who acted as toastmaster. Bill saw to it that every bit of the program contributed to the fun and enthusiasm of the occasion, and had a big part in all plans for the party inasmuch as his Junior Chamber men were in charge of ticket sales.

Prexy gave a fine welcome to the visitors and told them what a fine institution of higher learning we had here. "Dick" Remington, of the Detroit News, presented awards to his nineteenth all-state high school eleven.

There were many surprises in the entertainment features this year but most impressive were the musical numbers given by the Dixie Octet and entertainers of the Ford Motor company, and Hugh DeLamater, ex-service man with his dramatic soliloquy.

Other speakers on the program included A. L. Thompson, state director of athletics, Ralph H. Young, director of athletics at the College, Hon. Wilbur M. Brucker, Attorney General, Coach Jim Crowley was of course the headliner for the high school boys. Jim said a lot of things that Spartan fans love to hear, told something of Rockne's tactics before big games, but what registered most effectively was what he had to say about the gallant boys on the team that represented Michigan State this year.

The following Michigan State men were honored with awards by the coaches of their respective divisions: Varsity Football Major Letters—Max B. Crall, Fred W. Danziger (Captain), Vern E. Dickerson (Captain), George D. Ferrari, James G. Hayden, Marion L. Joslin, Henry W. Schau, Gerald Breen, Rueben E. Dill, Cecil C. Fogg, Roger R. Grove, Floyd W. Lewis, Carl A. Nordberg, Donald G. Ridler, Harold E. Smede (Captain-elect, Claude R. Streb, Lester W. Exo, Jacob P. Fase, Milton C. Gross, Harold E. Haun.

Andrew Carnegie once said:

"I have never known a concern to make a decided success that did not do good honest work, and even in these days of fiercest competition, when everything would seem to be a matter of price, there lies still at the root of great business success the very much more important factor of quality."

"If I Had Only Played Safe"

HIS expression has been heard the length and breadth of the land since the stock market slump. Day after day, tens of thousands have eagerly turned the pages of their newspapers to learn the latest reports concerning the funds with which they have gambled.

No need for those whose money is in a savings account to worry—they know it is safe; they know it is earning interest steadily day and night; they know it will be ready for them when they want it.

Speculation helps one person to win where a thousand lose.

Play safe and climb the ladder of success. We will help you.

A. C. Anderson requests that his Record be sent to him at Hotel Clifton, Detroit, for the winter months.
R. E. Keech gives his address as R. 1, Box 194K, East Akron, Ohio, and notes the following: "When I came to Akron nearly thirty years ago was not struck with the fancy of living in town so came out in the country and bought a piece of land out of an old woodlot and after having it sawed into lumber used this and other material and built a fairly decent home. Should it ever be convenient for former friends or others from there to look me up they will find me about a half mile east of what is known as McKnight's crossing. This lonely spot is located some six or seven miles from downtown Akron on the Canton road just before reaching Springfield Lake. We also happen to be about three miles due east of the new Akron airport where the two mammoth Zeppelins are to be built. Since coming to Akron early in 1917 I have been employed by the Goodyear Tire and Rubber Company and have been engaged in powerhouse work for the past eleven and half years. If Professors Frank Reden, Herman Vedder, Hedrick of Economics department and Sawyer of electrical and Chace Newman of mechanical drawing are still there I would like to give them my kindest regards believing they will all remember me. Others that come to mind and who were ever patient in trying to drill sense into our heads and with whom I would like to speak or get word to have gone to other fields or to the great beyond."

1908
Harry H. Musselman, Secretary
East Lansing, Mich.
Early in September, Fannie Beal entertained six members of the '08 class at luncheon at her home in Ypsilanti. Those present were: Neina Andrews Ash of Edmonton, Canada; Bess Clover Gould and Irma Muzzall Gregg of East Lansing; Mabel Mosher of Lansing; Mary Pratt Potts of Washington; and Amy Hurlburt Fowler of Pontiac.

BUILDING

an ESTATE

What Can Be Done With Life Insurance

To plan and build an estate of substantial size is a serious and often a life-long problem.

Is the estate you will leave sufficient to do for your family all you would like to have done? If not, do you know how you can increase it immediately? How you can make sure of leaving adequate financial means for them?

Through Life Insurance, with a comparatively small annual premium, you can build an estate of substantial size and effectiveness,—the proceeds payable at whatever time and in whatever manner you designate.

If interested, cut this out, write your name and address across it, mail to Inquiry Bureau, 197 Clarendon Street, Boston, Mass., and receive our booklet, "This Matter of Success."
