HON. L. WHITNEY WATKINS, '93
The football game was a thriller. Old alumni were so worn after the game was over that they could hardly blow their horns as fans usually do at the plaudits of the visitors.

The M. S. C. band again won a year. That is why October 31 was designated as Homecoming day. About a third of Michigan State's alumni now cultivate and conquer Mother Earth outside of the state, and many great faculties and industries over the land have Michigan State men in posts of importance. These old timers traveled a total of many thousands of miles to attend the football game, a dance or two and to spend a few hours visiting fellow alumni and former instructors.

WEATHER NO EFFECT ON ENTHUSIASM

The football game was a thriller. Old Man Weather was very unkind and the rain-barrel spatulated all afternoon Friday and more or less intermittently all day Saturday. The cross-country boys won easily from Michigan, but the yearlings lost to the U. of D. eleven. The field was muddy in spots and both teams lost yardage on the slippery turf. The M. S. C. band again won the plaudits of the visitors.

Fans who came for excitement got it in great gobs, as fans usually do at any game with which "Jim" Crowley is connected. Even the 23 traffic cops were so worn after the game was over that they could hardly blow their whistles. Certainly the stadium on Homecoming afternoon was no place for anyone with a weak constitution. This was the first time the advance made in more desirable living conditions for college students. Many comments were offered to the girls who acted as hosts, but the expression of most alumnae was, "My, if we only had had this when we were in school."

WATKINS TESTIMONIAL HIGHLIGHT

OUTSIDE of the game the main event in the Homecoming program was the testimonial banquet planned by the alumni varsity club and the alumni association honoring L. Whitney Watkins, '93, who retires from the State Board of Agriculture January 1. Mr. Watkins has served the College two terms for a total of 18 years and during this entire time he has been chairman of the athletic committee of the governing board.

His name a byword among Michigan State athletes for more than a score of years, Whitney Watkins rightfully deserved the special honor given him on October 31. Honored not only for his interest in athletics but for his achievements in the fields of statesmanship and business and respected for his wise leadership in the affairs of the College, he is at the same time loved by countless sons of M. S. C. for his sterling qualities of gentlemanly character.

Every college with history and traditions behind it has its select group of alumni who stand out as idealistic and inspirational figures for those generations which come after—and of this small circle is Whitney Watkins, one of State's nominees to an everlasting court of honor.

While still an undergraduate, Mr. Watkins displayed the initiative and ability for leadership which were to mark his later career. He was a pioneer in the athletic life of the College, being one of its first outstanding athletes and undergraduate managers. Throughout all his years of connection with M. S. C. he has fought steadily for the development of a sound program of competitive athletics and physical education. As well as many other evidences of athletic advancement around the Campus, may be attributed directly or indirectly to Whitney Watkins' tireless efforts.

SERVICE TO COLLEGE SETS RECORD

Soon after graduation in 1893 Mr. Watkins was appointed a member of the governing board of the College—the youngest man ever given this honor. He filled a six year term at that time, and then was elected in 1919 and again in 1925 to give two six year terms of service to his alma mater. No other person has given a longer period of service to the State.

On January 1, 1932, Mr. Watkins will end his present term as a member of the State Board, and members of the alumni association and varsity clubs selected the fall Homecoming day as time to do honor to the reception and influence which he appropriately called the first "distinguished service award" ever given to a prominent alumnus of the institution.

PRESENTED DISTINGUISHED AWARD

More than 200 former varsity club members and friends of the honored guest attended a reception and testimonial dinner at the Union immediately following the football game. A. L. Bibrin, T. J. of Syracuse, New York, president of the alumni varsity club acted as toastmaster. Short talks were given by President R. S. Shaw, Jim Crowley, Ellis W. Ramsey, A. C. MacKinnon and Ralph Young.

Three presentations were made to the honored alumni at the close of the banquet. Through their chairman, Dean J. F. Cox, the athletic council presented an oil-tinted picture of the stadium which was an air-plane view taken during the dedication ceremonies. The active varsity club through their president, Clark Chamberlain, presented a varsity club blanket, properly inscribed. On behalf of the alumni body and alumni varsity club Mr. Bibrin presented Mr. Watkins with a beautifully engraved bronze plaque which he appropriately called the first "distinguished service award" ever given to a prominent alumnus of the institution.

With "Fat" Taylor leading the guests the Homecoming festivities closed with the singing of Alma Mater. It was "hats off to you Whitney—here's luck to you and may you never sever your ties with old M. S. C."
Who’s Who Among the Alumni

Benjamin H. Anibal, '09 Eng., was born on a farm near Linden, Michigan, in 1886. He entered Michigan State in the fall of 1905 after graduating from Fenton high school. Foreseeing that the automobile would become fundamental in the field of transportation Ben started his engineering work with the Olds Motor Works immediately after graduation. He spent two years in the engineering department, his duties consisting of general drafting on motor car design. For the next ten-year period, from 1911 to 1921 he was connected with the Cadillac Motor Car company, starting as designer and working up until he became chief engineer. During the World War he represented the Cadillac engineering department at Washington in connection with producing Liberty motors for the government. Here he also served as assistant chief engineer of the aircraft division for General Motors. From 1921 until 1924 Mr. Anibal carried his automotive knowledge to the Peerless Motor Car company in the capacity of chief engineer and a director of the company. After spending one year at the Studebaker plant he returned to the General Motors corporation and was made chief engineer of the Oakland Motor Car company. In July 1926 he was promoted to the position of vice-president in charge of engineering. The Anibals live in Pontiac at 115 Ottawa drive, and have one daughter, Eleanor Christine.

Art Davis, '23 Eng., has gained a national reputation as a commercial air pilot and in carrying away a high percentage of all prizes at air races from coast to coast. Born November 25, 1895, at Grand Junction, Iowa, Art moved with his parents to Allegan county, Michigan, and graduated at the Martin high school in 1916. While he entered Michigan State with the class of 1921 he took 14 months out to serve Uncle Sam first as cadet at Kelly field, San Antonio, Texas, later receiving his ground school training and certificate at the University of Illinois. Always interested in aviation he found that summer months afforded a splendid opportunity to stunt at local fairs and through prize money collected in this manner paid his entire expenses the last three years at Michigan State. With the development of air races exhibition work offered the greatest remuneration to him upon graduation. Today he participates in more than 50 meets a year. His home east of the College will scarcely house his trophy collection. He has had two minor forced landings due to motor trouble but no crack-ups. His wife is also an enthusiastic pilot, winning her share of events with women competitors. Art's hobby is collecting Indian relics and he boasts the best array of arrows in the state. In college Art was a charter member of Phi Kappa Tau fraternity and his plane flies the emblem of the Lansing Exchange club. The Davis family boasts of one air-minded son, Art Jr.

Myrtle M. Moore-Canavan, w'02, H. C., gained her professional degree from Woman's Medical college of Pennsylvania in 1905 and married on her graduation day, James F. Canavan, M. D., Michigan 1899, of Traverse City. Upon his death in 1907, she went to Massachusetts and began work in the Danvers State Hospital as an assistant, later became chief of the Boston State Hospital laboratory and as opportunity arose, visiting pathologist to the entire system of hospitals for mental disease, a unique position in the United States. In 1924 she was appointed curator of the Warren Anatomical Museum of the Harvard university medical school and also teaches neuropathology in the University of Vermont medical school, and at the Boston university school of medicine where she is associate professor. In 1930 she was granted leave of absence and visited Japan, where many pleasing honors were shown her by former Japanese medical students. During this whole period, many articles, more or less technical, have been published and the research point of view has been kept, even in times of detailed routine. For the last six years gardening has been the hobby which has contributed to her perfect health. She says she is a lucky woman.
Glimpses of Russia

—being the impressions gained by Jim McElroy, '28, after spending many months in the employ of the Soviet government.

This is the introduction to a series of copyrighted stories which Jim McElroy, '28, has prepared exclusively for our many alumni readers following his recent return from thirteen months spent in Russia. The December Record will carry an interesting story of his impressions of Russian life.—Editor.

I NIUSIA, or the Union of Socialist Soviet Republics, a term much preferred by the Communists, is at once one of the most interesting yet extremely difficult places in the world in which to carry on successful work.

Interesting, in that day by day countless new experiences, new conditions surrounding the life of the foreign engineer present themselves. Difficult, because one is forced to work in connection with a system of government, the very nature of which produces almost insurmountable obstacles in the way of a person "imported" by that government, trying to give value received for the money paid him.

There is a tendency to explain away these difficulties, by the mere statement of the huge size of the country; its population of 160 million people, estimated to be increasing at the rate of three and one-half million per year; the monstrous proportions of the task which they have undertaken, but it is the Russians themselves who have preached to their "comrades" and are continuing to do so, that we will "reach and surpass the United States of America in five years."

CONTRACT MADE WITH SOVIET AUTHORITIES

Caring little for the difficulties which might present themselves, more what the Reds were doing in their own back yard, and a contract made with the Soviet authorities, direct, stowed away in my pocket. I found myself sailing from Montreal in May which might present themselves, more than a contract with the firm of Bryant and Detwiler, building contractors of Detroit, had made possible this trip, for it was with John K. Calder, formerly a building superintendent with that firm who had asked me to accompany him back to Russia. He was at that time out on a vacation after completing the building of the Stalingrad factory on the Volga river. There was to be gold and horse-meat—the gold to be in an East Lansing bank and the horse-meat, if any, in Russia.

Those of us who went into that great country feeling that it had been a nation downtrodden during the days of the Czars and that the people were now lifting their heads and honestly striving to progress at the expense of no one, were shocked and surprised to find after living, working and talking with these people at first hand, that conditions were very little if any different now than during the Czaristic regime. There were just two exceptions.

PROLETARIATE GAINS POWER

First, there is a complete reversal of position of the ruling class. Instead of nobility and the church controlling the lives of the Russian people as in the old days, there is now an aristocracy composed of the proletarian membership in the Communist party. It is so strong and so powerfully knitted together, that with the help of that vicious organization known in Russia as the G. P. U., or secret police, anyone in or out of the U. S. S. R. who thinks that the downfall of that power is a possibility, at once shows that he is positively unfamiliar with its methods of operation.

Secondly, the present "aristocracy of power" is doing that which no Czar ever considered, either through laziness, or lack of knowledge of the feeling of the masses. It is building up as far as possible with its own resources within the country and with its own people, the agricultural, mineral and industrial development of the U. S. S. R. How that is being accomplished is another story.

FIVE-YEAR PLAN CALLS FOR TRACTORS

A part of this great program, commonly known as the Five-Year-Plan is the huge new tractor plant being built in Cheliabinsk, Siberia, just beyond the Ural mountains. It is located approximately 1500 miles east of Moscow and about 150 miles south of Sverdlosk, which is on the trans-Siberian railroad. Sverdlosk is that city in which the late Czar and his family were shot.

Being designed to eventually produce 40,000 sixty horse-power caterpillar tractors per year, this plant is a big cog in the wheel of Soviet progress. The new buildings, include an assembly building, the largest in the world under one roof; forge shop and foundry, power house, office building, experimental plant, 64 apartment buildings, laundry, club house, post office, nurseries, communal kitchens, etc., the plant covering an area of several hundred acres.

Many times the question has been asked, "why is the plant located where it is?" There are several reasons. It is located close to Magnitogorsk, the world's largest steel mills, now in the process of construction, and from which point the major part of the ma-
Botanizing in the South

By Liberty Hyde Bailey, '82

WHILE SPENDING a few days of the vacation period in Ithaca it was my privilege to visit in the home of L. H. Bailey, '82, whom a certain newspaper syndicate terms the "least photographed man of prominence in America." I wanted our alumni readers to share with me some of the interesting experiences of this great botanist and my editorial request was gladly granted.

—Editor.

My "investigations in the South for which you ask in your recent letter for The Record readers are in the line of botanical collections. These enterprises have taken me to interesting places, many of them in the tropics. The purpose is the study of certain groups of plants and the adding of material to my personal herbarium at Ithaca. For about a score of years I have been much interested in the study of palms with a view to the identification of the many species. Several thousand kinds have been described and named in the course of time by many persons, but the botany and natural history of the family are yet very imperfectly understood. The reason for this lack of knowledge is largely the labor of securing herbarium and museum material that adequately represents a palm tree and that can be preserved for comparison and record. Without such material the palms, like other plants, cannot be understood.

The collecting of material in the palms requires a particular intention when one goes afield—the preparedness to attack any tree, however large, and to bring to the ground sufficient foliage, flowers and fruits from which good representative specimens may be prepared and taken home. One does not go merely with pocket knives and garden trowels, but with machets, saws, perhaps axes and ropes and sometimes ladders, and with helpers to assemble and handle the heavy product. Many of the palms grow in inaccessible places, perhaps in great morasses, on far mountains, or on sandy burning-hot savannas. Photography must be liberally employed and this requires equipment that will meet the requirements of the subject and be usable in rain or shine, wind, shade, twilight forests, and in places where even standing room may not be available. All photographs must be carefully focussed time exposures, and supplies must be taken for the speedy development of the exposures and for their safe keeping under conditions of rough travel, wet, and damaging temperature. In our own work (often with my younger daughter) we also collect all other plants that may be on condition.

Trip Filled With Adventure

In pursuit of such objectives as these, with heavy equipment and strong chests and cases for storage and transportation, one finds oneself frequently in strange predicaments and in adventures that cannot be foreseen; but these are all part of the day's work and need no particular comment. The real adventure is in the quest and the completion of the undertaking, not in the episodes. The contact with other peoples and language, experience with their customs and institutions, and sympathetic approach to their attitudes toward life, constitute an absorbing part of the work; and in order that we may miss none of these gains we make all our arrangements and as far as possible deal first-hand with the situation.

The present year has yielded large collections in Cuba, Jamaica and Panama. Former journeys have taken us much farther away. We had the special privilege of living in June and July on Barro Colorado Island in Gatun Lake, Canal Zone. This island was once a great hill or low mountain but was surrounded by the rising waters when the Chagres river was dammed to form the water for the locks. On it are imprisoned more kinds of animals probably than in any similar area in the world, and the vegetation is overwhelming in its excellence and variety. Eight years ago the governor of the
November, 1931

THE MICHIGAN STATE COLLEGE RECORD

Canal Zone set aside the island as a preserve, without molestation, for biological research; and the administration of the island in the interest of investigation is in the hands of the National Research Council in Washington. The island is not open to the public, and no one goes for study unless regularly permitted and authorized to do so. Sportsmen are not admitted. How the great variety of animal and plant life will adjust and subsist itself will be the subject of absorbing study as the years come and go.

The island is a dense forest of more than 4,000 acres. There are no inhabitants except three or four Panamanian caretakers, no telephone connection, no communication except as the launch at the island goes across the lake for supplies or to carry persons who are authorized to explore and study there. Under these conditions Barro Colorado (that is, red clay) island is one of the most significant places for the outdoor investigator, and it is becoming well known among the scientific fraternity.

We went to Barro Colorado in the rainy season particularly to collect and study the palms, which are abundant there. Our collections are now safely havened home and the study of them, with a view to publication along with similar collections in Jamaica and elsewhere, will be the natural outcome, and I hope the prompt result will be the subject of absorbing study as the years come and go.

Our collections are now safely havened home and the study of them, with a view to publication along with similar collections in Jamaica and Cuba and elsewhere, will be the natural outcome, and I hope the prompt result for other expeditions are on the horizon.

I trust these few paragraphs together with the photographs will satisfy the curiosity of your readers as to some of my interests in later years. Meantime, the evil habit of writing books continues.

NO STANDING ROOM HERE
—there is no shore, the vegetation meets the water's edge in the rainy season.

GLIMPSES OF RUSSIA

(Continued from page 5)

materials to be used in the building of the tractor will come. (The tractor shown in the picture accompanying this story was the first of its kind ever produced in the U. S. S. R., composed of 70% Russian-made parts and 30% American-made parts.) This tractor plant is also located in the center of that region in Russia which is most inaccessible from a military point of view. Eventually that district will contain 78 different industrial developments, and all at least 2500 miles to the nearest frontier.

Progress at Chelabinsk Tractor-stroy as it is officially named, and where I spent ten of the thirteen months I was in Russia, has been and will continue to be slow. Its executive head is qualified for the position which he holds only because of proletarian birth, and that by profession he is a Communist.

In common with many other of his "Comrades" in similar positions throughout the Soviet Union he has no technical or executive training which will make it possible for him to know ways and means of expediting the job in such a way that it will be completed by the time set. Arrogant, listening to no one but the dictates of those in supreme command in Moscow, he rules with an iron hand. His engineers dare not differ with him, fearful of the consequences.

All this had its influence on our work as foreign engineers in Russia, but there are other conditions which were worse. Bureaucratic in the extreme, the system is so unwieldy as to be practically immovable. Moscow, the seat of the government, and the location of hundreds of bureaus, all so hopelessly interlocked as to make it an impossibility to find where the responsibilities of one end and the other begin, was a constant source of trouble when information was needed.

The Russian engineer is so afraid that his judgement may not be right every time that he hesitates to exercise his thoughts. One error which is serious enough may mean a long term of service in a so-called "house of correction", with his family left to shift for itself. Incentive toward advancement is destroyed, for with the larger place in the scheme of things, goes a correspondingly large chance of being found guilty of sabotage, or malicious waste. It is the word which carries with it the greatest fear of any word in the Russian language.

Yes, Russia is interesting and difficult.

SPARTAN CLUBS

HANS KEYDEL, '20, president of the Detroit alumni club has just issued two important announcements to the men in the Detroit area.

First, the annual "Dutch-lunch" smoker of the M. S. C. and U. of M. men will be held at the Fort Shelby hotel Friday noon, November 13, at 12:15. Speakers will include Coaches Crowley and Kipke and several others.

Second, the M. S. C. Alumni club of Detroit will sponsor a dinner and smoker at the Detroit-Leeland hotel Friday evening, November 20, at 6:30 o'clock. With Coach Crowley and his team in the city that evening as guests an unusual opportunity for a big pre-game feast is at hand. The Detroit alumni have invited the Athletic Council to hold their monthly meeting the night before the U. of D. game and they will also attend the dinner.
Leaves fall gracefully, the trees are red, yellow, brown, the grass is crisp, nights grow cold. Fall is upon us, and the Campus is beautiful when the driving rainstorms keep themselves away. When the wind blows cold there is melancholy in the air, but the summer is not yet altogether gone. It is that moment of leave taking when the fires within the house seem too warm to leave, and by their very beauty seem to deny that winter is just outside. Somebody, long ago, called it Indian Summer.

The Inquiring Reporter, a new Michigan State News feature, asks questions such as, "What do you think of the banning of the class rush?", "What do you think of the cut system?", "What do you think of our student self-government?" and receives the customary pertinent and characteristic answers.

Some student sentiment is in favor of giving to each of Coach Jimmy Crowley's "Iron Men" some sort of an iron figurine, ornament, or watch charm as an award for their stamina.

The Hesperian society won the Interfraternity Council cup for the best decorated booth at the Homecoming time. The Hesperies put on a very lavish display, mingling the green and the orange even on the trees surrounding their house. Delphic fraternity, last year's winners, will surrender the cup.

The extensive improvement program which in a few years has placed Michigan State college in a class with the best universities, is still under way. New plans are: construction of a shops and laboratory building, addition of a new one thousand horse power boiler, remodeling of Abbot hall, and replacement of cinder walks by short asphalt pavement.

Services were held Wednesday, November 3, at the Peoples church, for Hannah Lou Bird, '32, Jackson, an Alpha Phi and prominent in college dramatic circles. Miss Bird died after a month's attack of infantile paralysis. Members of the Alpha Phi society attended the rites in a body. Miss Bird was a daughter of Ralph C. Bird, '06.

Short course activities opened here October 26 with the beginning of the two-year sixteen weeks' course in general agriculture. More than 37 counties were represented by students enrolled in this course.

Practice house number 8 rears its bare rafters to the chill fall winds these days, while workmen raze it slowly. The old building on the southwest corner of the Union had outlived its usefulness and was entirely removed. Of late years it served as a music practice center while a number of years ago Professor L. R. Taft and family called it "home".

Theta Alpha Phi, campus actors' society, has decided on its program for the fall term. "The Gossipy Sex" was produced November 11. "To the Ladies" is scheduled later in the term. A corps of veteran actors are to fill the parts.

Sphinx, senior women's honorary, in keeping with the times, is offering a "Depression Drag" on Friday, November 12. The price will be ninety-eight cents.

Another stern move which the Student Council recently made was to cut the issue of "comps", or free passes. Hereafter only students on a registered list which includes all prominent student heads will be given complimentary tickets to parties and banquets sponsored by campus organizations.

In one of the most decisive actions ever taken by a student self-governing body the Student Council, meeting October 22, banned the traditional sophomore-freshman class rush. At the same time they ruled that all hazing of the lower classmen was a thing of the past. The action was a result of the five major accidents which resulted from the recent 1931 class rush when the freshmen decisively trounced the second year men, 90-35. Student and faculty leaders hailed the decision as a praiseworthy departure from the rah-rah, collegiate attitude of the past.

At the premier concert of the College music course, Louis Graverune, Alexander Schuster, and Michael Press presented numbers, as well as the M. S. C. string quartet, composed of Michael Press, Izler Solomon, Zinovy Kogan, and Alexander Schuster. A large and enthusiastic audience packed the Peoples church to hear them.

Michigan State harbors the only medical biology department among state colleges in the country. Lately our department received a certificate of approval from the Registry of Technicians of the American Society of Clinical Pathologists. Cause—general excellence of the department.

Purpose fraternity, national swimming honorary, introduced a new type of water marathon November 2, when they started an around America swim in the college pool. One length of the pool represents 10 miles covered, and the total distance will be well over 10,000 miles or 1000 pool lengths. The start was figuratively made at Detroit, thence to the ocean by the St. Lawrence river, down to the Panama canal, and up to Portland, Oregon.

Growth of culture on the Campus was seen with the beginning of a series of organ recitals at the Peoples church and the second faculty art exhibit in the Union. The recitals are the work of students taking organ work, and will be continued throughout the year, while the art exhibit in oils, watercolors, and modeling, shows the work of art instructors.

Following the example of the University of Michigan and other schools, State has decided to allow non-students to enter the college chorus. The director, Zinovy Kogan, expects many faculty members, as well as people from the vicinity of East Lansing, to apply for membership.

Freshman class elections yielded the following results: President, Richard G. Pendell, Saginaw; vice president, Angelica Rodney, East Lansing; treasurer, Robert Stoll, Battle Creek; secretary, Louise Sachs, Lewiston. All contests were very close, two being won by scant majorities of five or six votes.

When the new system of restricted parking—necessary by the cementing of campus drives—was inaugurated, it was feared by many that the space reserved for autos would be inadequate. Just how wrong they were is shown by a recent survey made by the college police. With 990 places provided, only 487 automobiles were parked.
WINDING CEDAR

Dean Marie Dye of the home economics department served on the advisory council for Governor Brucker's conference on child health and protection, which was held in Lansing November 9, 10, and 11.

They now tell the story of an enemy linesman, who, in one of State's football games, rose toward the end of the 200-yard for a touchdown over the loquacious lineman.

Monnett? Where is he? We've heard about him all week, but he doesn't seem to be here." On the next play, just for introduction's sake, Bob ran 56 yards for a touchdown over the loquacious lineman.

Eugene Davenport, retired dean of agriculture at the University of Illinois, and his wife, recently celebrated their golden wedding anniversary. Former Dean Davenport graduated from State in 1878 and was known as one of the foremost educators in the country. Dean J. F. Cox represented the institution at station WLS on Sunday, November 1, where a number of Mr. and Mrs. Davenport's friends gathered.

The solution of several robberies which puzzled campus and city police was affected with the arrest of Ronald Snook, a graduate student in dairy. Snook confessed to having broken into the dairy building and stealing checks and cash to the amount of $119.62 and about 2000 milk checks, as well as to having had master keys made for Mary Mayo hall and college shop buildings. He could not be connected with the recent Wells hall burglary.

No more will huge machines resembling prehistoric saurians puzzle the military students at Demonstration hall. The annual road show has been discontinued, since the Michigan Good Roads association will not sponsor another exhibit, for this year, at least.

Carl Haradine, 32, an Alpha Gamma Rho, placed fourth at the National Dairy Products exposition in Atlantic City, N. J., and won a $750 scholarship. The judging team of which Haradine is a member acquitted itself well at the contest, taking a first in judging cheese, a second in butter, fourth in ice cream, and third in judging all products.

To prevent loss to its depositors the Michigan State bank in East Lansing closed its doors Friday, November 6, with the consent of the state banking commissioner. The East Lansing State bank, established in 1916, immediately issued orders that loans would be made to any students or townpeople whose finances were affected by the other bank suspending operations.

Despondency and unemployment were the reasons advanced by relatives of Henry Johnson, 22, son of Professor W. W. Johnston, who committed suicide at his home in East Lansing, November 6.

A new policy of complete cooperation between student and faculty administrative heads was introduced at a banquet given recently by the Student Council. Guests of honor included President R. S. Shaw, Dean Elisabeth Conrad, Professor L. C. Emmons, and Marian Kline, 32, president of A. W. S.

The annual memorial service honoring the Michigan State men who died in the World war was held in the Demonstration hall Sunday afternoon, November 8.

A new policy of complete cooperation between student and faculty administrative heads was introduced at a banquet given recently by the Student Council. Guests of honor included President R. S. Shaw, Dean Elisabeth Conrad, Professor L. C. Emmons, and Marian Kline, 32, president of A. W. S.

The annual memorial service honoring the Michigan State men who died in the World war was held in the Demonstration hall Sunday afternoon, November 8.

The Grand Rapids alumni club meets each Monday night at the Chamber of Commerce cafeteria. Visitors are always welcome, according to John Lazell, 33, secretary. The boys still meet in Detroit every Tuesday noon in the main dining room of the Masonic Temple. Bowling has already started according to Don Robinson, 22, a recent Campus visitor.

January and February are the big months for our alumni clubs. Even at this date the secretary's office has received inquiries about speakers. Looks like the old grads are proud to be called Michigan Staters just as much as ever.

Yes, the freshmen went through those I. Q.'s again this fall just as many of you did. Someone still thinks that a mushroom is a breakfast n oak.

Coach Russell "Jake" Daubert predicts his 1931-32 team will be the strongest aggregation of swimmers ever turned out at State and that the 1932-33 crew will be even stronger.

Football Bust December 12. Central Michigan Alumni club invites you to attend.
OME to Ann Arbor! The familiar cry that is annually heard along the banks of the Red Cedar once again fills the November air as Coach Jimmy Crowley turns up his Spartans for their appearance in the Wolverines' big bowl. For the second time in many, many years State is playing Michigan in late November. In 1928 State held the Wolverines to a 3 to 0 victory, a fact which will say that the score this fall is going to be better than that.

State goes into the game with Michigan better fitted than in any previous game. The reason for this is that Coach Crowley and his assistants have brought along the reserve squad until now it is capable of taking its place alongside the regulars. The reserve force are pitifully weak, particularly in the game with Army and Georgetown. The talent right now is what Crowley would like to have it, but he has done his best to develop the strength and must be content.

Early in the season it looked as though Michigan would not have the power that had been predicted. But the Wolverines arose in mid-season and decisively whipped Illinois and Princeton. State's team goes to Ann Arbor with the knowledge that only its best brand of football will have a chance. It the attack of the Syracuse game could be matched with the defensive power of the Army contest and there were no serious injuries, State would give the Wolverines a very, very busy afternoon.

One of the Spartans' weaknesses in the earlier games has been defense against forward passes. It was the aerial game that turned State back at West Point and the tide in the Syracuse game was turned in the same manner. Close followers will be watching this department of the Spartans' play closely at Ann Arbor. It may be the point where the outcome hinges.

Michigan will have the advantage of a vast amount of strong reserve material while Coach Crowley must depend largely on his starting team.

Spartans Ready for Michigan; Defeat Georgetown and Ripon

**Spectacular Homecoming Game Lost to Syracuse**

*The Michigan State College Record, November 1931*

Spartans Conquer Georgetown

SWEET REVENGE came to State this year in the Georgetown game. The Spartans remembering well their 14 to 13 defeat at the hands of the Hoyas in Washington last year, turned in a 6 to 0 victory before a crowd of 10,000 spectators. With any kind of luck, State would have won by three touchdowns. At least one critic chose to say the Spartans were lucky to win by one touchdown. He was alone in that contention.

State scored in the very first period. Taking advantage of a short kick that went out of bounds about the 25-yard line in Georgetown territory, State marched to the 5-yard line. Meiers, center, threw the ball over Monnett's head on the next play and it resulted on an exhibition that has seldom, if ever, been matched for dramatic football.

Each team held the lead twice. Two great offensive machines moved up and down the gridiron with such precision that the crowd was in a continual uproar. Thrust for thrust was the order of the day.

State opened the game by capitalising on a chance at field goal. Bob Monnett, the Spartans' contribution to the 1931 All-American ranks, proved his versatility by booting a goal from placement for three points in the first period. The kick traveled a total of 26 yards, hit the bar and fell across for a score.

Syracuse retaliated with a touchdown from a forward pass. The heave was from the 49-yard line to State's 25-yard line and the runner went 25 yards unimpeded to score. That was in the first part of the second period. Before the crowd had swallowed its disappointment, the Spartans rushed back to score a touchdown. Monnett made a 15-yard sprint off tackle to score after the ball had been advanced for 69 yards. Monnett kicked the goal to give State a 10 to 6 lead at halftime.

Passes Lick Spartans

THE Orange came back with a touchdown in the third period. A 44-yard gain, resulting from another forward pass, put the ball on the 20-yard line and the Orange marched to score. On fourth down with six inches to go, Cramer scored in the corner of the field by a matter of inches. There was a great dispute about the touchdown but it was finally allowed. This, and the goal kick, sent Syracuse in front.

The rest of the game saw a spectacular exhibition. Both teams threw everything out on the gridiron and played desperately to the finish. A fumbled pass from center by Eliowitz resulted in a safety, giving Syracuse two more points. The game, played in a drizzling rain, was marred somewhat by fumbles. The rain was the only drawback of the day.

Twice the Spartans came down the field to embarrass Syracuse but were stopped short of the goal.

The Spartans closed their home schedule November 7 by crushing Ripon college eleven 100 to 0. The game was featured by sensational running from start to finish, with Monnett scoring 32 points and bringing his total to 132 for the season. For nearly half of the game the reserves performed with the ability of the regulars.

Annual Football Bust at Union, December 12. Tickets are $1.75. Come!
The Michigan State College Record

November, 1931

Victories over Michigan and Butler marked the opening of the Spartan's cross country schedule. Captain Clark S. Chamberlain won his ninth consecutive victory in the race with Michigan on homecoming day. Butler was humbled 19 to 36 and Michigan fell. 24 to 31. Chamberlain, national intercollegiate champion, has won nine races and set eight course records in a dazzling stretch of galloping.

Michigan State freshmen lost their opening football game to University of Detroit, 6 to 0. The young Spartans outplayed their rivals nearly all the way but fell victim to a forward pass that spelled victory for the Titan cubs. Against such a strong opponent as Syracuse university, Bob Monnett, Michigan State’s great halfback, gained a total of 146 yards. He had runs of 25, 22, 20, 15 and 12 yards. He threw passes, one of which was good for a 20-yard gain and was strong on defense.

Michigan State's great halfback, gained a total of 146 yards. He had runs of 25, 22, 20, 15 and 12 yards. He threw passes, one of which was good for a 20-yard gain and was strong on defense.

ALUMNI AFFAIRS

1910
Mrs. Minnie Johnson Starr, Secretary
627 Madison Ave., Grand Rapids, Mich.
W. L. Gilson may be reached at Los Angeles, California.
1912
C. V. Ballard, Secretary
East Lansing, Mich.
Charles W. Knapp has moved in Niagara Falls, New York, to the Jefferson apartments.
1913
Robert E. Lare, Secretary
East Lansing, Mich.
Leroy H. Thompson may be reached at 604 W. Madison street, Lansing, Michigan.
1914
Henry L. Piblow, Secretary
East Lansing, Mich.
Major Ernest H. Burt may be reached at the headquarters of the seventh corps area, Omaha, Nebraska.
F. C. Gilbert lives in Royal Oak, Michigan, at 636 E. University avenue.
Edna Watkins is a librarian, assisting in compiling Sabin bibliography, at the New York public library, 476 Fifth avenue. She lives at Tatham house, 138 E. 38th street, New York City.
1915
Relan W. Sleight, Secretary
Laingsburg, Mich.
Paul S. Armstrong, for the past six years assistant general manager of the California Fruit Growers’ Exchange, has been made general manager of the Sunkist citrus cooperative. He is the youngest man who has ever held this position. The California Fruit Growers’ Exchange is one of the oldest, largest, and most successful cooperative farmers’ marketing organizations in this country. It has 12,500 members and distributes more than one hundred million dollars worth of California citrus fruits every year. The Exchange handles seventy-five percent of the California citrus crop and markets the better grades of its fruit under the famous “Sunkist” trade-mark.

1916
Herbert C. Cooper, Secretary
Katherine Vedder Chapman may be reached in New York City at 138 West 71st street.
Alice Smallegan McLaughlin writes from Uulllampatti, Madura district, South Africa: “I well remember the reunion of 1926. We are looking forward to commencement of next year, hoping to be in U. S. A. and at East Lansing for it.”

1917
Mary Labelle, Secretary
429 W. Michigan St., Lansing, Mich.
Dimitre Atanasoff is professor of plant pathology on the faculty of agriculture at Sofia, Bulgaria. He lives in Sofia at Toun Exarch 55.
Capt. Harry L. Campbell, of Fort Hayes, Columbus, Ohio, writes of the new alumni directory: “I think the new directory is one of the best stunts ever put over by the Michigan State alumni association. We are hoping to organize an alumni club in Columbus this winter.”

Alton M. Porter, for a number of years superintendent of schools at Northport, Michigan, has given up the teaching profession to enter horticultural research work. At present he is working on his master’s degree at M. S. C. and lives in East Lansing at 229 Division street.

Bertel W. Straight is in the accounting and cost methods department of the Western Electric company Inc, 195 Broadway, New York City. He lives at 11 Park place, Bloomfield, New Jersey.

1918
Willard Conover, Secretary
1265 Randolph S. E., Grand Rapids, Mich.
Edgar S. Anderson is arboretum of the Arnold Arboretum, of Harvard university, at Boston.
Henry Dorr, Jr., may be reached at 2306 Foster avenue, Chicago. Dorr received his master’s degree in forestry from the University of Michigan last June, and was an instructor in the Purdue forestry summer camp at Henryville, Indiana, for the summer.
John H. Harman is with the federal plant quarantine and control administration in Springfield, Ohio, where he lives at 150 Hampton place.
Bert C. Vail lives in Detroit at 14909 Strathmoor avenue. Vail is a certified public accountant with Ernst & Ernst, Detroit.
A catalog recently received from the University of Nanking, Nanking, China, shows Mr. Kua-Shen Sie (M. S. ’17) as co-dean of the college of agriculture and co-director of the experiment station.

“The new boss arrived October 21 and has been named Thomas James. Added to three year old girl makes two
children we now have," writes T. W. Keating from 718 Mills building, El Paso, Texas. He continues: "Occasion­ally see Percy Rice, '22, who is help­

ing build a lot of hotels and schools and big buildings around here as construc­tion engineer for a big contract­ing firm."

William DeYoung is assistant agro­nomist in charge of detailed soil sur­vey at the Montana experiment station. Boezenan, where he lives at 419 W. Cleveland. He says: "When you visit Yellowstone park visit Boezenan also located in Gallatin valley."

Karl Davies, Secretary
712 Clifford Street, Flint

Margaret Partlow is doing research work in textiles at the University of Missouri. She won the Purnell scholar­ship which provides for such work toward a master's degree. Paul A. Piper is a draftsman with the Consolidated Aircraft corporation of Buffalo, New York. He lives in Ken­more at 214 Parkwood avenue.

**1929**

Phil Olin, Secretary
46 Delaware Ave., Detroit, Mich.

William L. Bigler is a landscape architect in the department of national parks. 409 Underwood building, San Francisco, California. He spent last year at Massachusetts Agricultural col­lege doing graduate work.

Ray F. Bower is an instructor in for­est extension at the New York State College of Forestry at Syracuse.

W. Arthur Coakes is a metallurgical engineer for the Michigan Valve and Foundry company, 3061 Parkwood avenue, Detroit. He lives in Dearborn at 5066 Calhoun street.

Florence Cowles has started her third year of teaching home economics in the Mt. Pleasant, Michigan, high school. In addition to her work with the junior girls she is running a cafe­teteria. She reports that her brother, Glenn Cowles, '29, spent a summer school at the University of Chicago, and returned to Hart, Michigan, for his sixth year of teaching.

Oscar J. Dowd is in the bureau of plant industry of the U. S. department of agriculture in Washington, D. C. He writes: "After finishing the M. S. degree in June at Oregon State college: I had a fine trip through California and the southern states enroute to Washington, D. C. where I am employ­ed as a junior plant physiologist in Dr. Charles Brooks office. We are study­ing the carbon-dioxide storage of fruits and vegetables at the present writing. Wendell Davis, '29, is connected with the forestry department of the University of California. He is staying at Inter­national Hall on the Berkeley campus."

Iva L. Ferguson is laboratory assistant at Parke Davis & Company, Detroit, and lives at 3269 Lathrop avenue.

Edwin R. Gruettner writes from 922 Fiftieth avenue, West Allis, Wisconsin: "People want something new, some­thing different. I have H. H. The Villa Landscape Construction company of Milwaukee, of which I am president. The primary purpose of the company is to give the clientele the best in land­scape work. We first create on paper the landscape project, whether it be a road, a swimming pool, or a quiet, pas­toral scene, and then with a graduate construction engineer as supervisor we
proceed to build the landscape project on the grounds, interweaving the landscape and engineering knowledge to create everlasting beauty. My old pals at school, principally those with whom I worked in Professor Halligan's class room might be interested to know that part of my ambition is being realized. I have purchased a farm not far from Milwaukee for the sole purpose of creating an arboretum. The arboretum has many types of soil on it, a creek running through it, and there has the possibilities of growing all of the ornamental plants that this climate favors. Incidentally, I still retain my position as assistant landscape architect for Milwaukee county."

Floyd T. Roberts is a ranger in the Blanco district of the San Juan national forest, and may be reached in care of the U. S. Forest Service, Pagosa Springs, Colorado. 

Dorey A. Miller is working for the Kalispell Company in Kalama-zoo, Michigan, and living there at 1007 Reed street.

Carlos Heath is a metalurgist with the American Brass company at Waterbury, Connecticut, where he lives at 174 Willow street.

John Hawkins has accepted a scholarship at the New York State College of Forestry at Syracuse. He will work under the direction of Dr. J. F. Ulrick on a problem in forest management.

Hathaway J. Hanes lives at 1439 Elm street, Youngstown, Ohio. He is in engineering work.

Allen A. Gutekunst is a chemist at the General Foods research laboratory in Detroit, at 485 Milwaukee avenue. He lives at 150 W. Euclid.

Henriette P. Scovell is teaching in the Lansing Central high school, and living at 1407 W. Ottawa street.

Harold Wolters is a sales engineer for the Courage Farm company of Kalama-zoo, Michigan, where he lives at 121 Fellows avenue.

Marian Chinnick Swany (Mrs. R. A.) lives at 707 Morris avenue, S. E. Grand Rapids, Michigan.

Jessie M. Small is supervisor of physical education in the Norway, Michigan, public schools. Her home is in Bezonlia.

To Smith is coaching home talent plays for the Universal Producing company of Fairfield, Iowa. She may be reached through her home address, 301 Taylor street, Grand Ledge, Michigan.

Mary Surrine is a graduate student in bacteriology at the University of Chicago. She lives at 5605 Drexel avenue.

John Hawkins is in charge of government survey yacht 'Scajaquada' on Lake Erie.

The 'Scajaquada' crew is stationed at Lake Erie, Ohio, at 1744 South Ave., where they are working under the direction of Dr. R. E. Shullenberg. 

Hattaway J. Hanes lives at 1439 Elm street, Youngstown, Ohio. He is in engineering work.

Eric E. Babbitt writes from 1223-33 N. Michigan avenue, Chicago, Illinois: "Still junior engineer with the corps of electronics engineers of the war department. Right now I am working on an estimate for a water way between Lake Michigan and Illinois river. Am living up on the north shore and spending some time in River Forest. Stuart W. Moore, 30, is at Oswego, New York, on harbor construction work for the war department. Vernon "Mike" Donaldson, 30, has charge of a survey party on Lake Ontario. Stanley B. Hunt, 29, is in charge of some work on the St. Lawrence channels at Alexandria Bay, New York. Howard Pres-ton, 26, is in charge of government survey yacht 'Scajaquada' on Lake Erie. William B. Hanlon, 30, is with the U. S. geological survey at Albany, New York, covering the whole of New York state. James A. Stone, 30, and wife (Mary Clark, w'28) have a fine little home in Riverside, Illinois."

George E. Bower is a veterinarian in Tecumseh, Michigan, where he may be reached at 106 W. Pottawotomie street.

Nathan Brewer is a Weaver Research Fellow in physiology in Baltimore, Maryland, where he lives at 519 E. Lombard.

Irene Chapin is personnel manager of the P. N. Artsbrough company in Lansing. Last year she was connected with the John Shillito company, operators of one of the oldest department stores in Cincinnati.

Herbert Chickering is a fruit and vegetable inspector for the Trunk Line association, 143 Liberty street, New York City. He lives in Brooklyn at 22 S. Oxford street.

Ruth C. Clark may be reached at 213 University drive, East Lansing, Michigan.

Ruth M. DeArment gives her new address as 1044 Francisco avenue, Chicago. She is a dietitian at the Norwegian American hospital. Lawrence H. DeVries may be reached at R. 4, Zeeland, Michigan.

HOW TO SPEND THE CHRISTMAS HOLIDAYS . . . .?

A Trip Will Make Them Memorable!

Your energy and vigor need rejuvenating at the end of the year, and this time the calendar has connived to allow you a welcome respite!

Christmas Day falls on a Friday this year. So does New Year’s Day. You need miss only four business days between these two week-ends to enjoy a full 10-day vacation! With every extra day that you can spare, your trip becomes more comprehensive and you won’t miss much at home because business is certain to be at a low ebb between these two most important holiday week-ends.

Think of the benefits in recreation, rest, pleasure and gain to your health in escaping the cold weather and sailing away on palatial ships to the sunny, flowering West Indies that have never known winter. Or special trains will bring you to the golden cities and fashionable beaches of Florida. Or to Mexico, gay as Spain and enigmatic as Egypt. Here is a list from among which you will find a trip to suit your time and means and fancy:

CHRISTMAS VACATION TRIPS

To the West Indies

Longer Cruises

- “MARIPOSA” South Seas and Oriental Cruise—maiden voyage—sails Jan. 16, from New York; returns April 26 to San Francisco; 103 days; price from San Francisco $1250.00; from New York $1500.00
- “ROTTERDAM” Mediterranean Cruise—comprehensive itinerary; 20 ports, 17 countries; sails Feb. 6, returns April 16; 70 days; price from New York $900.00
- “SANTA BARBARA” and “SOUTHERN CROSS” Cruise-Tour around South America; leaves Feb. 13, returns April 20; 72 days $1695.00

EUROPE! NEXT SUMMER

Special Educational Tours

College men and women are especially interested in travel, for travel is conceded to be the most enjoyable and beneficial form of adult education. The American Express Company has studied the interests and travel preferences of alumni, and is offering special group tours of Europe which have certain cultural aims. An educational director, who is an authority in his field, will accompany each group. These tours will sail the latter part of June or early July, 1932, and be of six to eight weeks’ duration. These groups are being planned:

- “AMEX TOURS” of Europe
- “AMEXTOURS” means: Escorted tours under American Express management, at exceedingly attractive rates. They offer a great variety of trips for next summer from among which to make your choice; they vary in duration and price from a 25-day tour visiting London and Paris costing $278, to a more comprehensive tour of 86 days costing $941. Descriptive literature on this economical form of travel is already off the press. Send for it.

Convenient and Enjoyable Travel Assured by the Appointment of the American Express Company as the Official Travel Bureau of the Intercollegiate Alumni Extension Service!

No matter where you may wish to travel, the American Express can procure steamship, rail and air passage for you at regular tariff rates, also route your itinerary and make all arrangements in advance. Avail yourself of these new facilities open to alumni!
