HARVEST QUEEN

MICHIGAN STATE COLLEGE
TO ALUMNI OF MICHIGAN STATE COLLEGE:

Back in the days of the great and mighty class of '17, agricultural students took certain engineering subjects, foresters learned something about agriculture, an engineer was quite likely to take bacteriology, home eces took dramatics, and all of us shared in such courses as English, speech, economics, mathematics, political science, and history.

Eventually there came a day, less so at Michigan State College than at many institutions, when specialization dominated the educational stage. Not that specialization proved undesirable as such, but often it came so early in a student's career that it was so intense as to preclude adequate training in effective communication or the opportunity to study the relationship of a special field to other fields of activity or the needs of society as a whole.

It is to offset this tendency that there has developed a national urge for more general education, education which is centered on the student more than on subject matter, education which would help the student to deal intelligently with a variety of problems, not the least of which are those having to do with his opportunities and responsibilities as a citizen in a free society.

The Basic College represents a major effort on the part of Michigan State College to meet this essential need. The Basic College is an an administrative unit in which all freshmen and sophomores at Michigan State College are enrolled, regardless of their special fields of interest.

Here are its four major objectives:

1. The Basic College seeks to strengthen specialization by undergirding it with a broad foundation of general education. This foundation of general education is laid in seven basic courses. These are: Written and Spoken English, headed by Paul Bagwell, Wisconsin; Biological Sciences, C. A. Lawson, Michigan; Physical Science, S. G. Bergquist, Michigan; Social Science, Walter R. Fee, Indiana; Effective Living, Leo A. Haak, Harvard; History of Civilization, H. H. Kimber, Michigan; and Literature and Fine Arts, John F. A. Taylor, Princeton.

In brief, the work of these departments gives recognition to the fact that an effective citizen must be able to communicate his own ideas clearly and concisely and he must understand with discrimination, the written and spoken word of others.

These basic, general education courses take up about half of a student's time during his freshman and sophomore years. The rest of his curriculum is devoted to introductory courses in his chosen field. It is the blending of the general with introduction to a special field of interest that we believe lends much strength to the Basic College program.

2. The second objective of the program is to use this blending of general and special courses, along with careful counseling and testing, to give students a chance eventually to determine their special interests in the light of a lot more information about themselves than was formerly possible. Of the 9,000 students currently enrolled in the Basic College, about 1,600 have not yet chosen a definite curriculum. Another 2,000 students who have made a curriculum choice will find from experience that some other field is more to their liking.

3. Many students who enter college cannot go on to complete a degree granting program for financial, academic, and a score of other reasons. The Basic College recognizes this problem with its granting of two year certificates which may be designated as "general" if the student's work has been general in character, or it may specifically be a certificate in one of the several two-year curricula that have been set up, a number of them in the field of business. Most of all, the nature and sequence of courses have been so arranged as to make the first two years of college meaningful in themselves, rather than merely introductory to the upper class years of a four year program.

4. The Basic College, despite its large number of students, still recognizes students as individuals. Sections in the basic courses are as small as most of the freshmen and sophomore sections were when this college had 1,600 rather than 16,000 students. These classes are taught by full-time members of the college staff—not by graduate assistants whose major interest may lie elsewhere. Students who have difficulty are given the opportunity for special work, as in the reading writing, and speaking clinics of the written and spoken English department. All departments grant full credit in their course to superior students on the basis of a comprehensive examination without completion of the normal full three terms of class work.

The whole Basic College program was launched on the initiative of President John Hannah and its continuance has been made possible by the excellent cooperation of all of the units at Michigan State. Some students still prefer a highly specialized, highly vocationalized program, but many others have come to Michigan State because of the opportunities afforded by its Basic College.

It has been a pleasure to welcome the children of many classmates and friends to Michigan State College. I'm still waiting for the first one to drop in and say, "Grandpaw was a classmate of yours." I suppose it won't be long.

Howard C. Rather.

THE RECORD

Vol. 53, No. 7

November, 1948

THOMAS H. KING, Director of Alumni Relations; GLADYS FRANKS, '27, Recorder; FRED W. STANLEY, Sports Editor; MADISON KERN and JOSEPH G. DUNCAN, Historians; JOHN FITZGERALD, '47, Agricultural Editor; W. LOWELL TAYLOR, Director of Public Relations, JOSEPH K. GOUCH; Assistant Director of Alumni Relations. Campus Photos this Issue by EVERETT HUNY and BRANNSDORF BROTHERS.

Member of the American Alumni Council. The Record is published seven times a year by THE DEPARTMENT OF PUBLIC RELATIONS, Michigan State College. Entered as second class matter at East Lansing, Michigan, under the Act of Congress, August 24, 1912.
Nearly 5,000 MSC Alumni Back for 1948 Homecoming

Nearly 5,000 Michigan State College alumni participated in the 1948 Homecoming festivities at East Lansing, Oct. 15-16. According to Tom King, director of alumni relations, many came from as far away as North Carolina, New York, and Pennsylvania.

Highlight of the week-end was the MSC-Arizona football contest Saturday afternoon, when returning grads witnessed the powerful Spartans down a hapless Arizona team 61-7.

The crack MSC marching band, directed by Leonard Falcone, helped alumni choose between the merits of the two major contenders for the presidential race—Harry “Druman” and Tom “Toohey.” During half-time ceremonies the band displayed a mirthful parody on the coming elections.

Hundreds of alumni gathered on the field after the game, meeting with their classmates under banners designating their respective graduating years.

About 500 Attend Smoker

Friday evening’s events were marked by a rousing pep rally and street dance, followed by the annual Stag Smoker, sponsored by the Central Michigan Alumni club and the Alumni Varsity Club, and held at the Olds Hotel. About 500 attended the Smoker where Forest Evashevski, assistant MSC football coach, narrated movies of the Spartan-Notre Dame tilt.

Former Dairy students gathered at the annual Dairy alumni breakfast at 8 a.m. Saturday, while many college departments held open house for ex-students throughout the day.

Campus fraternities and sororities also held open houses and parties Saturday afternoon and evening. Living groups participated once again in novel Homecoming decorations. Many of them were mechanical in design, with electric motors. Judged by a committee of Lansing businessmen, Psi Upsilon fraternity and Gamma Phi Beta sorority were awarded prizes for top displays.

Saturday evening’s Homecoming Ball, a sell-out, was attended by more than 1,500 couples. Held in the college auditorium, dancing was to the music of Bob Strong’s popular orchestra. Highlight of the evening was the presentation of Homecoming Queen Sue Kern, senior from Cleveland Heights, Ohio. Attending Miss Kern as her court-of-honor were coed runners-up, Joy Butler, Lansing; Jean Cotter, Detroit; Charlys Pieritz, Saginaw; and Virginia Walter, Detroit.

Dr. Clark Chamberlain, Noted Physicist, Dies

Dr. Clark W. Chamberlain, 77, a former Michigan State College professor and one of America’s outstanding physicists and inventors, died Oct. 13 in Lansing.

Worked With Kettering

Dr. Chamberlain, who worked with Charles F. “Boss” Kettering in the early days of the automobile industry, was a physics and math professor at MSC from 1927 to 1940, and on a part-time basis from 1942 to 1944.

The “vibration absorber” was probably Dr. Chamberlain’s most ambitious invention. Its purpose was to cut down high-frequency impacts in vibrations, and it was used to great advantage in both wartime and peacetime production. With his service as consultant for the Packard Motor Car company, producer of the Rolls-Royce aircraft engines, and the Navy Department, Dr. Chamberlain’s invention proved of inestimable value to the Allied war effort.

Perfected “Optical Interferometer”

Dr. Chamberlain was also credited with the perfection of the “optical interferometer,” first instrument to measure in the millionths of an inch.

Member of many outstanding American and British scientific societies, Dr. Chamberlain came to MSC from Denison University of Ohio, where he had served as president for 12 years.

Funeral services were held in East Lansing and Granville, O., and burial was in the Denison University cemetery at Granville.

When the Homecoming game was over, and the footballers had departed, alumni swarmed onto the field. The pictures below show the size of the reunion, as alumni assembled around class markers held by students. At right is the prize winning men’s Homecoming display of Psi Upsilon fraternity.
THE AFFAIRS OF STATE

ENROLLMENT

Enrollment at Michigan State College surged upward to a new record high this fall, when more than 16,000 students signed up for classes.

While many other colleges throughout the nation began to feel the first pinches of veteran graduations with varying decreases in enrollment, Michigan State College was more than holding its own.

This year's total figure surpassed by over 800 the previous all-time high of 1947-48, when 15,208 regular and short course students attended the college. Of this year's total, 15,886 were regular students and 148 were taking short courses.

It is not difficult for some alumni to remember back ten or twenty years, when they were recorded as part of an "all-time" high student enrollment. The growth of Michigan State College's student population has been steady, even if sometimes slow. During 16 of the past 24 years, which included the depression of the early 1930's and World War II, record enrollment peaks were reached at MSC. Twenty years ago, enrollment stood at 3,056 and in 1938, the student population at Michigan State had increased to 6,227.

Of the 15,886 regular students enrolled, more than 8,300 are veterans, and the men outnumber women students by a ratio of 12,031 to 3,855. These figures represent slight decreases in the veteran and men percentages, according to Registrar Robert S. Linton. New students at Michigan State number more than 4,200, and men percentages, according to Registrar Robert S. Linton. New students at Michigan State number more than 4,200, with a noticeable increase in the number of students transferring from other colleges.

NEW PUBLICATIONS

Two new student publications, "The Spartan Engineer," and the "Homesteader," magazine of the home economics and agriculture schools, have taken their place alongside the growing list of MSC publication "regulars."

The second issue of the "Engineer," a quarterly edited by Carroll Augustine, Owosso senior, is scheduled for publication in late November. It will feature a survey of the many new engineering facilities at MSC, including the new electrical engineering and agricultural engineering buildings. Engineering school alumni activities will be fully covered, Augustine announced, along with several articles on new engineering developments.

"The Homesteader, also publishing its second issue, will appear November 20th. The magazine, which includes news and features about activities and developments of the college's home economics and agriculture schools, is printed once each term. Russ Mawby, Grand Rapids senior, is editor.

Coveted Assignment

Michigan State College's almost unique police administration department has been given a coveted assignment—research into alcoholic intoxication for the National Safety Council, headquartered in Chicago.

Several factors worked in MSC's favor when it was selected over a dozen Midwestern universities for the $5,000 grant from the National Safety Council.

One was the availability of two outstanding authorities in this field, Ralph F. Turner, associate professor of police administration at the college, and Dr. C. W. Muehlberger, director of the crime detection laboratory of the Michigan Health Department. Turner was for eight years laboratory supervisor of the Kansas City, Mo., police department, a pioneer in the use of chemicals for measuring intoxication. Too, MSC has its own campus police, headed by Prof. Arthur Brandstatter, which works in close cooperation with East Lansing and state police in their investigations. These factors gave Michigan State College a natural, practical tie-in for this research study.

Main objective of the project is to examine and re-evaluate the various types of "drunk-o-meter" instruments and other chemical methods in use, with an eye to overall standardization. Another phase of the work will be a study of factors which produce alcoholic tolerance in the human subject, Brandstatter said.

ROTC News

Michigan State's ROTC unit has the largest enrollment in the 91 years that military training has been offered on the Spartan campus, according to Col. Charles E. Dissinger, commanding officer.

Approximately 2,530 men, an estimated 800 increase over last year's record enrollment, have signed up for reserve officer training at the college. This total is a far cry from the handful of boys enrolled in the MSC "Plow Boy Infantry" unit of the Civil War era and the World War I strength of 687 men.

During the summer, Boyd Longyear, Mason senior, gained the title of "hot shot" of the national military police ROTC students. Longyear scored 390 out of a possible 350 to take first place in competition with MP cadets from all over the nation.

SALUTE TO MSC

Radio fans from coast to coast enjoyed an unusual "double-header," Saturday, Oct. 23, with Michigan State as the featured attraction.

The Alma Mater's story and songs were broadcast over a noon-time half hour program on the nationwide Mutual network, while later the same system carried the MSC-Penn State game at College Station, Pa.

MSC was honored as the first institution to be featured in the new series, entitled "Campus Salutes," sponsored by the Department of the Army in cooperation with the Mutual Broadcasting System. The series, originating in Washington, is scheduled to honor a number of great American universities during the coming months.
THE AFFAIRS OF STATE

STUDENT AFFAIRS

Michigan State College hit the national headlines last month—thanks to some overambitious students who decided that they didn’t have to graduate before going into business for themselves.

With the Spartan football team rated as one of the best in the nation, and everybody and his brother clamoring for MSC’s entry into the elite Big Nine, student enthusiasm in college football had reached an all-time high. The time seemed ripe for football pool syndicates, offering high rewards for selecting the week’s football winners, to move in on the Spartan campus.

Their operations were short lived. First appearance of these syndicates came after the Michigan game, and in two weeks, it was all over. Campus police arrested three students and questioned seven others in connection with illegal possession of gambling equipment.

Of the ten students questioned, three were suspended from college, and seven others placed on disciplinary probation by administrative action. The real “fish”—the syndicate contact men who brought the tickets to the campus and paid off winners, if any—were not caught according to campus police, due to “premature publicity given the investigation.”

Fall term, traditionally a boisterous season for students at Michigan State, is no different this year.

Pep rallies and Homecoming are as loud and noisy as ever; the “queens” and their dances are in full swing; and freshmen elections reached a high peak this fall when 76 petitions were entered by candidates for various class offices.

One of the candidates was Thomas R. Dewey of Grosse Pointe, who frankly admitted that he would be content to be regarded as a member of the Freshman Court of Honor, and serve as national vice-president in the USJCC organization.

Agricultural students went to the polls early in late October and elected pert Ruth Hawley as their 1948 Harvest Queen.

Amid corn stalks and pumpkins which decorated the women’s gymnasium, she reigned over the colorful annual Harvest Ball Oct. 23. Miss Hawley, a first quarter freshman from Hart, was crowned by Dean E. L. Anthony of the agricultural school.

One of five Spartan coeds named earlier in the week by the Ag Council, Miss Hart was voted queen Oct. 21. The other four finalists, who served as her court of honor, were: Janet Moss, Flint; Sherry Nevons, South Haven; and Jean Kumke and Pat Funk, both of Detroit.

New WKAR Tower

Last month, WKAR had a quiet dedication program for its new AM-FM radio tower, located in the South Campus farm area. Broadcasts on the new 15-hour FM schedule began Oct. 1, with the AM schedule remaining the same.

Faculty Affairs

Two MSC professors have resigned from the faculty to become department heads at other universities, and another has gained a national office in the home economics field.

Dr. Solon T. Kimball, a member of the Department of Sociology and Anthropology for the past three years, has accepted a position as head of the Department of Sociology at the University of Alabama. Dr. Alfred L. Bortree, who has served with the Department of Bacteriology and Public Health since 1939, is the new head of the Department of Veterinary Science at Pennsylvania State College.

Prof. Margaret A. Ohlson, head of the MSC Department of Foods and Nutrition, was elected secretary of the American Dietetic Association at the 31st annual meeting of the group in Boston, Oct. 18.

Paul D. Bagwell, president of the U. S. Junior Chamber of Commerce, has been selected to membership in the Academy of Arts and Sciences, International and the affiliated Order of Distinguished Americans.

Bagwell, on leave from his position as head of the MSC Department of Written and Spoken English, received these dual awards for academic achievement and outstanding work with the nation’s youth in the USJCC organization. Bagwell has been active in USJCC work for 18 years and served as national vice-president in 1947.

Harvest Ball

An average 15 per cent rent decrease on married housing units at Michigan State has residents of the trailer and barracks apartment areas happily rearranging the family budgets.

Nearly 2,000 Attend MSC Journalism Day

Professor A. A. Applegate and the Department of Journalism played host Oct. 13 to nearly 2,000 high school journalists from most of Michigan's 750 high schools attending the second annual MSC High School Journalism Day.

The day's slate included twenty panel discussions, each designed to help solve problems present in the publication of high school papers and yearbooks. Leading the panels were high school faculty advisers, professional members of the graphic arts trades, and members of the MSC faculty.

Featured speaker was Walt Ditzen, nationally known sports cartoonist, who entertained student journalists with a series of amusing "chalk-talks."

Highlight of the day's activities was the award of prizes for excellence in the field of high school publications. The coveted John S. Knight trophy, for the paper judged best in makeup, content, and general excellence, was presented to the "Reflector," publication of Jackson High School. Awards were made for excellence in other classifications.

Dr. C. B. Smith, USDA Executive, Dies at 78

Dr. Clarence Beaman Smith, formerly assistant director of the Cooperative Extension Service, U. S. Department of Agriculture, died Sept. 18 at the age of 78.

He was born in Howardville, Michigan, in 1870 and received his BS degree from Michigan State College in 1894 and MS in 1895. After serving as principal of schools at Lawton, Michigan, he joined the U. S. Department of Agriculture as an accountant in 1896.

Following travel in Europe, Dr. Smith became editor of the Department's "Experiment Station Record." In 1917, Michigan State awarded him an honorary degree of doctor of science.

Dr. Smith was closely connected with the development of the present cooperative extension system. At the time of his retirement in 1938, he was assistant director of the extension service.

Dr. Smith was one of the first five recipients of the MSC Award for Distinguished Service, being so honored at the June 1946 Commencement exercises.

He is survived by his widow, Mrs. Lottie Lee Smith, four sons, and two daughters.

Unique Industrial Production Line Used by MSC Engineering Students

What is probably one of the most unique industrial production lines in Michigan is in full swing in the shops of MSC's School of Engineering.

Developed as an instructional project during the past year, the student-run "factory" is currently manufacturing by regular mass-production methods, its first product, a small-sized air compressor. Student machinists and assemblers are well on their way toward a quota set at one hundred and fifty.

Almost every operation in the manufacturing process, from origination of design down to the polishing of the finished product is being accomplished in the college shops. Original designs for the compressors were executed by a group of students under the direction of Professor Leonard C. Price, during 1947.

The school's engineering foundry is currently producing castings for the machine's various parts from patterns made by students. According to Professor Price the only parts for the compressor which are not being manufactured by the student factory are highly tooled piston rings and bearings.

Even such technical production operations as die and tool design, and the manufacture of special tools and dies, are being accomplished by students.

Guidance Service Is Now Available to MSC Alumni

Guidance now is being extended to Michigan State alumni by the college Counseling Center. Alumni who are finding post-college adjustments difficult may consult one of the twelve counselors and two psychometrists who are highly trained in the field of guidance.

Recognized as one of the leading organizations of its kind in American education, the service is under the leadership of Dr. Paul Dressel, director of counseling and chairman of the board of examiners. Although originally organized to assist students with curriculum selection and the testing and analysis of aptitudes, the center has recently extended counseling services to several alumni with adjustment problems.

There is no fee for this service to alumni, and appointments may be made by contacting Dr. Dressel, Administration building, Michigan State College.

The project, initiated by Professor Lorin G. Miller, dean of the School of Engineering, was planned as a part of the machine course re-organization necessitated by heavily increased enrollment in the mechanical engineering curriculum.

Organization of the production line and supervision of its current production is the responsibility of Ralph Vanderslice, associate professor of mechanical engineering. Under the direction of Vanderslice, the department has acquired fifty-two new machine tools, mostly from war surplus stocks, and most of these are in use on the production line.

The institution of this shop is in line with the policy of the engineering school for closer service connections with the state industries, Dean Miller said.

J. K. Goundie Resigns

MSC Alumni Position

Joseph K. Goundie, Jr., assistant director of alumni relations at Michigan State for the past two years, will resign Dec. 31 and return to his home in Allentown, Pa.

Goundie, who accepted the alumni position in September, 1945, has been associated with the MSC Memorial Center fund campaign and did much organization and promotional work with the fund program.

A graduate of MSC with an electrical engineering degree in 1941, Goundie served for 41 months with the U. S. Army Air Forces as an air intelligence officer. He also had been affiliated with E. I. DuPont de Nemours and Co., Arlington, N. J., as a chemical engineer in plastics development.

Dr. W. L. Chandler Dies

Dr. Wallace Larkin Chandler, assistant professor of bacteriology at Michigan State College for 24 years, died Oct. 23 in East Lansing. Dr. Chandler, 63, had been retired for seven years.

Dr. Chandler received his Ph.D. degree from Cornell University in 1917, the same year he joined the MSC staff. Funeral services were held in East Lansing with burial in Evergreen cemetery in Lansing.
Irrigation Research
Under Way at College

The possibility that polluted water used in irrigating vegetables may carry communicable diseases is one of the latest research subjects of MSC scientists.

Under a grant from the U. S. Public Health Service, Dr. W. L. Mallmann, research professor of bacteriology, and Dr. Lloyd Turk, soils department, are seeking to determine how clean irrigation water must be to insure that vegetables will be free of harmful bacteria.

To conduct their tests, the MSC professors are subjecting 30 small plots in the college farm area to different treatments. The liquid being used in experiments ranges from almost pure water to undiluted sewer sludge.

Mallmann and Turk hope that their experiments will provide a measure by which farmers can be assured that their irrigated vegetables are not contaminated.

Dr. M. E. Muelder, MSC Professor,
Has Vital Role in Germany’s Future

One of the most important posts in the U. S. military government in Germany is being filled by Dr. Milton E. Muelder, on leave from the Michigan State history and political science department.

His official title is deputy director of the education and cultural relations division of the U. S. military government and he is responsible for the over-all education program for Germany. He assumed this post early in 1948.

Won Legion of Merit

This is not his first venture into international affairs since joining the MSC staff in 1935. He was on special loan arrangement to the army from January, 1944, to October, 1945, during which time he participated in planning and coordinating plans for military government control and administration of Germany. In recognition of this work he received the Legion of Merit award.

Dr. Muelder also served for two years as chief of the Program Branch Control Office of the military government in Germany, returning to MSC in 1947. His present post is one of the most vital of our country’s military government in Germany today.

He recently commented that we must now use the indirect approach on the Germans. The educator said, “We are interested in helping the Germans themselves to bring about certain changes. We have found that if our attitude is one of trying to work out problems in which we are all mutually interested, we accomplish more.”

Need Reference Materials

Dr. Muelder feels that the largest contribution of his group is the supplying the Germans with basic social science reference materials—things which have been denied them for 15 years.

The MSC professor said that the education group has a dual job—that of eradicating Nazism and also bringing about an understanding between the United States and Germany.

Hannah Is Named State Relief Group Chairman

Pres. John A. Hannah has been named chairman of the Michigan committee of the Christian Rural Overseas program—designed to give food relief overseas.

The program is sponsored by Church World Service, Catholic Rural Life and Lutheran World Relief, church organizations which have active relief agencies now operating in foreign lands.

Through the program, gifts of farm crops are accepted from American farmers and distributed to the needy overseas. This work will supplement government aid by reaching special groups such as orphans, widows, the ill, and hospital inmates.

MSC Given $23,000
In Gifts and Grants

Grants and gifts totaling almost $23,000 were accepted by the State Board of Agriculture for Michigan State College at the September and October meetings.

Included in this two-month total was $11,575 accepted at the September meeting and $11,283.45 at the October meeting. All these gifts and grants were for specified research projects or scholarships, according to Karl H. McDonel, board secretary.

Plans to accelerate the $300,000 memorial campaign were enthusiastically endorsed at the October meeting of the Alumni Advisory Council. In the above picture, Walter W. Neller, ’28, fund vice-chairman (left), is pictured explaining one of the many uses of the urgently needed Memorial Center to Mrs. Maribel McKnight Parker, ’28, Lee O. Benner, ’12, and Leslie W. Scott, ’33, council members. Alumni groups in Detroit, Oakland County, and Lansing are now working in support of the intensified project.
Spartans Aiming for 7-2-1 Football Record

Coach "Biggie" Munn's ambitious Spartans, playing the toughest schedule in MSC history, are gunning for one of the best records in recent Spartan football competition.

With the three undefeated greats of 1947—Michigan, Notre Dame and Penn State—disposed of in a highly creditable manner, the Spartans are looking forward to a seven won, two lost, and one tied record for the 1948 season.

When the Green and White held Michigan's mighty Wolverines to a hard-fought 13-7 victory in the season's opening game, the football world rubbed its eyes. A week later, State rolled at will over a colorful and ever dangerous Hawaii team by a 68 to 21 score, with everyone on the Spartan bench getting a chance to play but the water boy.

Then came Notre Dame, which was ranked tops in the national Associated Press ratings. Notre Dame won 26-7, but it was one of the toughest games they had played in the past two years. Michigan State, very much in the ball game until the last few minutes when Notre Dame intercepted a Spartan pass and scored the touchdown, muffing no less than four scoring opportunities. They led Notre Dame through the first 25 minutes of play after striking pay dirt in the first few minutes of play.

Against Arizona, Homecoming opponent, the Spartan regulars played only 20 minutes but the reserves continued to pour it on to rack up a 61 to 7 victory. It was a tough one for Mike Casteel, Arizona head coach, who was a Spartan coach for 15 years.

In the Penn State game, which ended in a 14-14 tie, the Nittany Lions could well consider themselves lucky to have emerged with their unbroken string of 13 victories. Two State touchdowns, one on a fake kick 81-yard run by Ed Sobczak and another on a 100-yard intercepted pass run by George Guerre, were nullified by clipping penalties against MSC. The Spartans were knocking at the Penn State gate no less than four times during the final quarter, only to see alert pass defense and a fumble spoil their bid for an upset victory.

With five games under their belts, the Spartans looked good enough to be ranked 17th in the nation in the Associated Press poll. Unless the Spartans fall apart at the seams, it seems a sure bet they will end up the season ranked as one of the top dozen football teams in the nation.

Sugar Bowl Tilt with Louisiana State Opens MSC Boxing Season Dec. 28

Fortified by two national champions, Coach George Makris is preparing his boxers for a return engagement in the Sugar Bowl tournament. The Spartans are scheduled to meet powerful Louisiana State University, victors last year by the slim margin of 4½-3½, in the New Orleans bowl Dec. 28.

Viewing the stiff schedule to follow the Sugar Bowl classic, Makris, a former NCAA champion himself, is modest about Spartan prospects.

"Last season our boys lost some close contests," he says, "but as the season progressed, they were developing noticeably better form. This year, with an even more difficult schedule, I hope we can turn in the best record seen in many years at Michigan State."

Headling a list of returning lettermen are Chuck Davey, three-time NCAA champion and Olympic participant, and Ernie Charboneau, newly crowned National Collegiate flyweight titlist.

Other returnees are Art Hughlett, heavyweight; George Smith, light-heavyweight; Phil Marshall, 165-pounder; Pat Dougherty and Vito Klimivicus, 155-pounder; Jack Tierney, 135-145-pound fighter.

Eyeing the future, Makris looks forward to a new freshman light-heavyweight, Chuck Speiser. The 18-year-old Speiser, another Olympic fighter, is considered by many the finest boxing prospect to come from Detroit since Joe Louis.

Up from freshman ranks this year are Gabby Marek, heavyweight; Jimmy Gemmel, 165-pounder; Bert Davey, brother of champion Chuck; Bert Alderson, 165-pounder; and Hank Amos, rangy 130-pounder, who carries a prep-school record of 35 wins against a single loss and one draw.

The season's schedule includes home dates with DePaul, Jan. 25; Louisiana State, Feb. 23 (tentative); Penn State, Feb. 26; Wisconsin, March 12; Virginia, April 1 (tentative). Engagements away will include: L.S.U. (Sugar Bowl, New Orleans), Dec. 28; Army, Jan. 22; Maryland, Feb. 18; Minnesota, March 5; and the NCAA Tournament, April 7, 8, 9.

Marty Kelly, Spartan right half, makes like an Indian "sun dancer" as he goes up and over in the Hawaiian game Oct. 2. Fellow Spartans and Rainbows watch Kelly's antics with rapt attention.
Swimming, And Mat Teams Prepare for 1948 Schedules

While Biggie Munn and his football team are deep in a ten game schedule, the other members of the MSC coaching staff definitely are not “vacationing.”

The basketball team is working out daily in preparation for the opening game late in November, and the boxers have a scheduled appearance in the Sugar Bowl on New Year’s.

Collins Begins 20th Year

Fendley Collins will be starting his 20th year as coach of the Spartan wrestling team. Last year’s team, one of the greatest in MSC history, won nine and lost none in dual competition and placed second in the NCAA championships. Two men are missing from the 1947 team, Gale Mikles, 165-pound star, and Gene McDonald, 128-pounder.

The return of several lettermen and some outstanding sophomore prospects makes the wrestling picture brighter. Boh Maldegan, MSC Olympic heavyweight wrestler, and Dick Dickenson, NCAA 136-pound champ, will provide a firm foundation for the 1948 team. Other major letter winners returning include Don Anderson, 145-pound three-year letter winner; John Dowell, Jack Dreiner, Pat Sullivan, and Bob Gang.

Many Veterans on Swim Team

Charles McCaffree, head swimming coach, has been working with his 1948 swim team daily in the Jenison pool. With only two losses from last year’s squad, Bob Allwardt and Abel Gilbert, McCaffree is looking forward to one of his best seasons.

Two Olympic swimmers, Howard Paterson, backstroker, and George Hoogerhyde, free stylist, will be on hand. Other Spartans filling out the aquatic squad will be Jimmy Duke, Bill Clemons, Ed Deloia, Roger Miller and Don Paton, free stylers; Don Korten and Don Miller, backstrokers; Dave and Paul Siebold, and Howard Wilson, breaststroke artists; and Ray Williams, diver.

Macklin Field at Capacity . . .

More than 51,500 football fans jammed into the enlarged Macklin Field Stadium Sept. 26 for the dedication game with the University of Michigan. The above picture, snapped by a Flint Journal photographer, was taken when the game was all tied up at 7-7. Note the spilling of gridiron enthusiasts onto the sides of the field.

Ben VanAlstyne Begins 23rd Year as Cage Coach

Ben VanAlstyne, head basketball coach at MSC, will begin his 23rd year at the helm of the Spartan basketball ship when the season’s 21-game schedule opens Nov. 29.

VanAlstyne is faced with the problem of finding a replacement for Bob Brannum, All-American center, who signed a professional contract with one year of eligibility remaining. Likely successor is letterman Jack Wulf, 6 ft. 8 in., junior from Chicago, Brannum’s understudy last year.

A veteran group of 10 lettermen greeted VanAlstyne when practice sessions opened. Much of the scoring punch this season may rest with Bob Graham, last year’s runner-up in scoring. Other lettermen Van Alstyne will use as a basis for his team strength include: Don Waldron, guard; Hugh Dawson, junior, guard, of Hammond, Ind.; Robert Robbins, junior, guard, of Bellflower, Cal.; Stan Petela, junior, forward, of Branford, Conn.; Bob Stevens, forward, of Sidney, Ind.; Bill Rapchak, junior, forward, of Whiting, Ind.; and Leon Hess, junior, guard, of Auburn, Ind.

Newcomer Al Cummings, who transferred from the University of Kentucky, seems destined to play an important role for the Spartans. A 5 ft. 10 in. guard, he is exceptionally fast, a fine shot, and should prove valuable to the VanAlstyne forces.

Season Opens Nov. 29

MSC’s schedule opens Nov. 29, with a double-header against Alma College and Hillsdale College. VanAlstyne plans to split his squad for the opener, giving more men an opportunity to perform. Dec. 4, the Spartans travel to Ann Arbor to meet Michigan. Indiana will offer opposition Dec. 6, while during Christmas vacation the Spartans meet Iowa, Dec. 18; Cornell, Dec. 20; and Mississippi College, Dec. 29. All of these games are at East Lansing.

The January schedule includes the following games: Marquette, there, Jan. 7; Detroit, home, Jan. 10; Western Reserve, home, Jan. 14; Detroit, there, Jan. 17; Wayne, there, Jan. 22; Wayne, home, Jan. 27.
By Madison Kuhn

Perry Holden sat listening to Professor Beal of the Agricultural College one January evening in 1876. It was the farmers' institute in Traverse City where Dr. Beal was describing his experiments in cross-breeding corn—discoveries that attracted the attention of Charles Darwin in England. Holden was thrilled. Nine years later he was a student at M.A.C., living in Dr. Beal's laboratory, tending his experimental corn plots, and learning the science of better seed.

When Perry Holden came to M.A.C. he was plunged into the controversy over the daily farm tasks required of each student. The labor program was designed to provide an opportunity for the application of the new discoveries of science to the practice of farming but Perry Holden spent his first afternoon cleaning a pigpen beneath a hot August sun. Little science was involved. Holden soon found himself a member, and later chairman, of a committee to improve the situation by securing the removal of the professor of agriculture.

Carries Science To Farm

When graduation time arrived there was a new professor of agriculture—Eugene Davenport—who was seeking two assistants who could make the labor program educational. As the assistant in farm crops, Holden devised means for mixing science out of the classroom onto the farm. He set W. O. Hedrick to sorting and testing seed potatoes, William C. Bagley to determining the effect of fanning on seed oats, and a group to determine why soil made a difference in dry weather. They liked it. Science had been carried to the farm and Perry Holden had begun a long career of teaching scientific agriculture to a nation.

When Eugene Davenport, ’78, went to Illinois as Dean of Agriculture he sent for Perry Holden. “When we were at M.A.C.,” he said, “the number one problem was student labor. That isn’t ours for we have only sixteen students.” Once more Holden had to carry science out of the classroom, even off the campus. So well-known and respected had Holden become that “Uncle Henry” better seed to every Iowa farmer who would listen. Thousands did. The train made twenty-minute stops while Professor Holden showed them how to select the best ears and how to test the kernels for germination. Three seasons were enough to cover the state and observers insist that Holden was a major cause for the rise in Iowa’s corn yield from thirty bushels per acre to forty.

Judging a corn show one night, Holden turned to the seventeen-year-old Henry Wallace and told him to plant seed from the winning ears and compare their yield. That experiment led to others out of which emerged Wallace’s hybrid corn. Holden, who had been inspired by Beal’s pioneer cross-breeding, struck a spark in Wallace, who was to convert the cornbelt to the use of hybrid seed.

Ran for Governor in 1912

That was only the beginning. In 1906 he organized one of the first extension departments and first community short courses. So well-known and respected had Holden become that “Uncle Henry” Wallace persuaded him to run in the 1912 primary for governor. Holden had a message—“Make this a Greater Iowa”—but he now considers it fortunate that it takes more than a message to win an election. He had a useful message and delivered it well, but it didn’t deliver votes. He was free once again to continue his educational work.

Leads Extensive Campaign

Iowa was a limited field and Holden moved on to organize the agricultural extension program of International Harvester. The next twenty years were strenuous ones; with offices in Chicago, and a home in Whitehall, Michigan, he spent much of his time away from both. There were bulletins to write, demonstrations, talks, conferences, and then the big campaigns when he organized crews of speakers to indoctrinate whole regions. Holden engineered the project which included eighteen hundred meetings in Arkansas in 1915 to sell diversification; two thousand meetings in the Memphis area in forty-two days; countless meetings and conferences in Missouri where he revolutionized the teaching of agriculture in rural schools; and extensive campaigns in Utah, Alabama, and Texas.

Through all those years in trains, Grange halls, Chautauqua circuits, and in rural school houses, Holden taught better farming and better living as well. Perhaps his most famous publication is the booklet still distributed by International Harvester from which he retired fifteen years ago: YOUNG FOLKS—DO SOMETHING, BE SOMEBODY.

His Motto: “Be Somebody”

His “classroom” was the whole Mississippi Valley and more, his “students” were numbered in the scores of thousands. His message still echoes where farmers gather, and Perry Holden, eighty-three now, lives quietly with his daughter and family (the Ellsworth Resemers, ’29) in Charlevoix near the scenes of his pioneer boyhood, near the seven schools he taught sixty years ago, and near Traverse City where he first heard Professor Beal explain the mysteries of crossbred corn.

The lecture tours and extensive educational campaigns are in the past but he is still busy. On a summer morning you may find Perry Holden in the field, puzzling over the pollination of corn.

Perry G. Holden

Shown above is a picture of Perry G. Holden, class of 1889, taken about ten years ago. His years of education on the “Corn Gospel Trains” have ended, but his teachings have spread all over the nation and world.
Following Alumni Clubs

By Tom King

John Day, '37, Elected Detroit Club President

John Day, '37, was elected president of the MSC Club of Detroit, at the Sept. 23 meeting of the organization's board of directors. Vice-president is Russell Holcomb, '39, Detroit, and Helen Sutton Kramer, '35, Grosse Pointe, was elected secretary. Edgar Jones, '38, Detroit, holds the office of treasurer.

Football movies of the MSC-University of Michigan game were shown at the Hotel Lee Plaza Oct. 5, the Notre Dame game Oct. 19, and the Penn State game Nov. 2.

With arrangements under the general chairmanship of Dick Colina, a Victory Dinner to celebrate the successful football season, is being planned by the Detroit organization for Nov. 30.

Plans are also in the making for a Founders' Day Dinner Dance, Feb. 12, 1949, and the annual Spring Dance is being planned for June 11, 1949. According to Jim Quello, '35, details of these future events will be announced later. Alumni may contact him at 11604 Rosseter, Detroit (Tel. Pingree 4862).

Genesee County

The MSC Alumnae League of Genesee County held its annual fall meeting Sept. 15, at the home of Mary Lou Miller, '42, in Flint. Feature of the occasion was a tea in honor of local girls who entered MSC for the first time this fall. Fifty-five attended, including nineteen honored freshmen who received corsages in school colors from members of the league.

Mabel Petersen, '32, the college's assistant counsellor for women gave a short review of Freshman Week activities and the college in general.

Joint Meet at Jackson

A joint meeting of Michigan State College and University of Michigan alumni was held Oct. 18 in the Hays Hotel at Jackson.

Allen Diebold, '39, and Tom Baylis, '42, were in charge of the meeting attended by approximately 109 persons. Pictures of the MSC-UM game were shown and Howard Worthington, '48, assistant director of personnel at MSC, gave a short talk on the college.

New Clubs Form

Two newest additions to the rapidly growing list of Michigan State College alumni clubs are the Tuscola County and Grosse Pointe alumni clubs. Both held organizational meetings in October, which were attended by Tom King, director of alumni relations.

Thirty-six alumni attended the gathering of the Tuscola County group, which met Oct. 18 in the Montague Hotel in Caro. Elected as officers for the club were Ken Priestley, '33, president; W. Dean Gordon, vice-president; Mrs. Mildred (Force, '17) Kinsey; and Mrs. Avis (Smith, '23) Benkelman, treasurer. A board of directors was also elected and plans formulated for the coming year's program.

Oct. 27 saw an organizational meeting of the Grosse Pointe Alumni club at the Grosse Pointe high school, attended by approximately 100 former MSC students. Tom Crowley, '47, and Bob Buckenheizer, '46, were in charge of the program.

Grand Rapids

The Grand Rapids Alumni Club has held regular meetings during the past two months, at which movies of the most recent MSC football games were shown. The meetings, presided over by President Rex Ten Eyck, '36, were held in the Ottawa Hills high school auditorium. Approximately 250 former students of Michigan State attended the gatherings, which were held Sept. 30, Oct. 14, Oct. 28 and Nov. 11.

The annual alumni dinner of the Grand Rapids club has been scheduled for Dec. 2 in Grand Rapids, and alumni in the area have been requested to call Rex Ten Eyck, 104 Colrain, S.E., Grand Rapids (Tel. Glendale 24179), for further information.

Oregon

Twenty-four alumni of MSC's Oregon group attended the organization's annual reunion-picnic Aug. 15, at the home of Mrs. H. C. Raven in Portland.

Coming as far away as Seattle, Washington, and Eugene, Oregon, returninges included: Mr. and Mrs. E. N. Bates, '06; Mr. and Mrs. C. W. Bale, '00; L. V. Benjamin, '20; Mr. and Mrs. C. S. English, '89; Mr. and Mrs. A. J. Gillette, '92; Mr. and Mrs. E. D. Searing, '92; Mr. and Mrs. F. E. Semon, '99; Mr. and Mrs. L. C. Thomas, '34; Mr. and Mrs. R. W. Nahstoll, '40; Mr. and Mrs. K. B. Stevens, '00; and Mr. and Mrs. J. L. Shaw, '16.

Plans for entertaining members of the MSC football team and college officials after the MSC-Oregon State game, Oct. 30, at Corvallis, were discussed, and a committee appointed.
1889

1891
Dr. Alexander F. Gordon, who had dental offices in Lansing for many years, died Oct. 3 in Northampton, Mass. Dr. Gordon received his M.D. from the college in 1907 and his D.D.S. from the University of Michigan in 1901. He practiced in Lansing until his retirement in 1940. He is survived by his daughter, Gladys Gordon Brockway, '19, and his son, Dr. Robert K. Gordon, '23.

1892
A huge parade was one of the features of the Albany, Oregon. centennial celebration late in August, and winning top honors in the special- ties division was the entry contributed by Albert R. Gillett, who recently retired from active service as a teacher.

1898
Word has been received of the death of Colonel Otto C. Cole Sept. 9 in California. Calif. He left his boyhood home in Lansing at the start of the Spanish-American war to become a private in the Army. Remaining in the service he worked up through the ranks to a colonelcy, serving in both World Wars. He retired from active duty a few years ago and made his home in California. His widow and two sons survive.

1902
Wilber S. Palmer writes from Rapid City, South Dakota. Mich., that he retired on May 16 after spending 35 years in public utility work, and adds: "We hope to spend the coming years on the shores of beautiful Torch Lake, fishing and enjoying life."

1903
"I am retiring from over 42 years in the practice of medicine," writes Dr. Raymond L. Clark, formerly of Detroit and now living in Lakeland, Fla.

1907
Scott B. Lilly, chairman of the division of engineering at Swarthmore College, since 1906, died Aug. 19 at his home on Plum Mill road in Wallingford, Penn. Receiving his B.C. from Cornell in 1909, Mr. Lilly joined the Swarthmore faculty in 1916. In 1917 he left the college to become assistant plant engineer for the Merchant Shipbuilding Corporation, with which he remained during World War I. After two or three years as a consulting engineer, he joined the staff of the Ohio Locomotive Crane company. He was with the Florida Rock Industries company and the Bedford Foundry and Machine company before returning to Swarthmore in 1929. He was coauthor of "Analytic Mechanics" and held memberships in the American Society of Civil Engineers, American Concrete Institute, American Association of University Professors, and the Society for the Promotion of Engineering Education. He is survived by his wife, the former Jean McCay, '29, a son, and a daughter.

1912
Carl F. Barnum, manager of the seed-procurement division of Eastern States Farmers Exchange Inc., of Buffalo, N. Y., died Sept. 26 in that city. Mr. Barnum was on the M.S.C. experiment station staff for several years, leaving to become associated with the Michigan Farm Bureau in Lansing. He was managing the bureau's seed service when he joined Eastern States in 1927. Nationally known in his field, Mr. Barnum was called into consultation on trouble problems many times and at the time of his death was chairman of the Seeds Advisory committee under the Research and Marketing Act. He had just completed two years on the executive, legislative, and crop improvement committee of the American Seed Trade Association, and had been a member of the OTA Seed Industry Advisory committee for field and vegetable seeds. Surviving are his wife, a son, and a daughter. Jean Barnum Setson, '44.

The sympathy of the class is extended to Clinton Cheston, of Detroit, whose wife died May 18. Besides her husband, a son and daughter survive.

1913
Wlffred Kelley, teacher of science, manual training, and agriculture in schools in Minnesota, Illinois, and Michigan for many years, died Aug. 27 at his home in Traverse City. He was active in civic affairs; the Methodist Church; and Masonic circles, being past master and life member of the Belgrade lodge, and past high priest of the Traverse City Masonic group. His wife and three children survive. The sympathy of the class is extended to Laura Crane Eaton whose husband died June 27. Mrs. Eaton lives at 912 Sixth street, Fargo, North Dakota. Her two sons, Leslie and James, are attending North Dakota State College, and her daughter, an alumna of NDSC, is married and has two children.

1914
Theodore R. Hinger, a founder and former officer of the Universal Manufacturing Company in Novi, Mich., died Oct. 10 at his Lane Lake lodge. Well known in Detroit engineering and industrial circles, Mr. Hinger was active in the Farmington Lodge F. & A. M., the Detroit Commandery, and was a member of the American Legion, the Farmington Methodist church, and Sigma Chi fraternity. He is survived by his wife and one son.

1916
Karl O. Schreiber, vice president of the International Harvester Company, died in Chicago on October 5. Mr. Schreiber joined the Harvester company in 1916 as general foreman of assembly department in the Akron plant. Later he was made superintendent of the Springfield, Ohio, plant and was elected vice president in charge of manufacturing in 1942. Dr. Frank Bates is most importanter for the Board of Health in the state where he built the `Lake County Club'.-- J. A. Berry is doing research in food preservation in the USDA's western regional research laboratory in Albany, Calif.
Mr. and Mrs. Paul F. Rahl (Alden Orr) of 4569 Brier Rd., Grand Rapids, announce the birth of Gretchen Anne on May 24.

1937

John Boyle is a consulting engineer with J. R. Webb in Detroit where he lives at 10228 Benningfield. . . . Josephine Carrow in Detroit has moved from her name and address, she is now Mrs. Robert J. Cole of 7555 24th avenue S.W., Seattle. . . . Dr. Donald J. Droke of Dr. and Mrs. Fred Drelet (Grace Lundy), 909, has completed three years of specialized training at the University of Michigan and St. Joseph's Mercy hospital in Ann Arbor, and has opened his practice in offices shared by his father and brother, Dr. Lawrence Drelet, '31, at 901 Prudien building, Lansing. . . . Lee Lindsay is auditor and chief accountant for the William S. Merriam company of Cinncinati, where he and Mrs. Lindsay and their two daughters live at 2429 Remont, . . . Yona May Skidmore and George L. Albert (southern State) were married on August 1, . . . Paul Pfefferle was recently appointed plant metallurgist at the National Standard company in Niles, Mich., where he lives at 1520 Savannah. . . . Dorothy Robinson, (Mrs. Robert R.), of 3936 Oakwood, and William G. Kingman were married July 10 and are making their home in Detroit at 10531 St. Marys.

1938

John Blyth has been transferred from Michigan Bell to American Telephone and Telegraph in New York. . . . Mr. and Mrs. W. A. Ross (Irene Williams) and their two sons are living at 84 Mt. Hebron road, Upper Montclair, N. J. . . . James and Virginia (Serratt), '39, continue to live in 1510 Campbell, Wheaton, Ill., and he is consulting engineer for Graham, Crowley and Associates, in Chicago. . . . Katherine Foster Barnfield is placed in the personnel department of Western Electric's new plant in Indianapolis where she lives at 40 W. 32nd street. . . . Wilson Holmes is located in Bega, Columbia, as petroleum engineer for the Tropical Oil company. . . . George S. Patterson owns a hardware company bearing his name at 207 W. Main, Carbondale, Ill. . . . Mr. and Mrs. Giles Cornell (Marjorie Suen) announce the birth of Cheryl Dee on May 25, . . . Oscar Warbach is located at the Patsautex Research Refuge in Laurel, Md. . . . William and Virginia (Stone, '40) Welles, and their three children, are living on a farm near Horseheads, N. Y.

1939

Frank and Ruth (Eagner, '25, Anderson write from R. 2, Lawrence, Mich., "All pulled up about the best peach on our family tree. Robert James, born May 19, joining Billy, 3. and Marjorie, 7. We are all helping manage an orchard and dairy farm here." . . . E. E. Bankston gives his address at 10954 30th Street, Chicago, Ill. . . . Mrs. Edith Schaefer (Mrs. Harry E.) announcement the birth of Cheryl Dee on May 25, . . . Oscar Warbach is located at the Patsautex Research Refuge in Laurel, Md. . . . William and Virginia (Stone, '40) Welles, and their three children, are living on a farm near Horseheads, N. Y.
Upjohn Advertising Job Goes to Gauntlett, '40

J. Curtiss Gauntlett, '40, was recently appointed assistant advertising manager of the Upjohn Company of Kalamazoo, Mich.

A member of the Upjohn Company since 1941, Gauntlett served as a member of the Navy Informational Field Service group and as a naval officer in the Pacific.

Gauntlett is a member of Kappa Sigma, and while on the Spartan campus was managing editor of the Spartan magazine and a member of the freshman baseball team.

High USDA Position Given to Knoblauch

Harold C. Knoblauch, '31, has been appointed assistant chief of the Office of Experiment Stations, U. S. Department of Agriculture.

Dr. Knoblauch, who received his bachelor's degree in agriculture at MSC, will be in charge of administration of federal-grant funds for research appropriated for use by the state, territorial and Puerto Rico agricultural experiment stations. He has been connected with the O.E.S. for the past eight years, recently being head of the Division of Grant Fund Administration.

W. R. Hinshaw, '23

Given Two Awards

W. R. Hinshaw, '23, professor of veterinary science, University of California at Davis, Calif., recently received two awards for his contributions in the field of poultry diseases and especially for his researches on avian salmonellosis, and diseases of turkeys.

The first of these was the tenth annual Borden Award given by the Borden Foundation and Poultry Science Association, consisting of $1,000 and a gold medal. The second was the annual research award of the National Turkey Federation, consisting of $500 and a bronze plaque.

members of the family are Patricia Irene, b. and Martin Wayne, d., 2, Vera Matthews and Nelva Mangels were married March 11, and are living at 682 42nd, Oakland, Calif. . . . Carl H. Moore has completed work for his Ph.D. at Purdue University and has accepted a position as agricultural economist with the Federal Reserve bank of Dallas, Texas . . . Geraldine Marie was born Oct. 1 to Mr. and Mrs. Carl Nelson, of 8010 Connecticut, Cheng.

Leone Schavey Butters and Dale E. Turner were married Sept. 26 and are making their home in Lawrence, Kan., at 1302 Strong street. . . . Irving and Beverly Powers, '41, '43, and their two children are living at 1340 University, Adrian, Mich., where he is a 4-H club agent for Lenawee county. . . . Karl and Mary Walpole Zippe of 5762 E. Comstock, Kalamazoo, Mich., announce the birth of their fourth daughter, Melinda Joyce, on May 29.

1940

Word has been received of the recent death of William H. Lull, major on General Patton's staff during World War II, in Veterans Hospital in Batavia, N. Y. Before entering service in 1942, Mr. Lull was employed as a research chemist at the Linde Air Products in Buffalo, to which he returned after his discharge in 1946. He is survived by his wife and daughter, his father, three brothers, and a sister, Sybil Lull Fallan, '41.

Major Harry H. Stanford, Jr., of Detroit, was killed early in October when his AT-2 training plane crashed near Victoria, Texas, while engaged in an air search for a missing craft. Major Stanford, holder of the Distinguished Flying Cross, flew 72 missions in the African campaign and engaged in the aerial battle over the Stylla Straits. His wife and two daughters survive. . . . Frederick Griswold may be reached at the Daniel Boone hotel in Charleston, W. Va.

Ted and Jane Hagen Caldwell report a change in address from Macdonald, Ohio, to 87 Homer road, Midland, Mich., where Ted has a new job as sales manager of magnesium die castings at the Dow Chemical company; and they announce with pride the birth of a daughter, Kay, Sept. 17. . . . Alton Karta is on leave of absence from Rio Grande College to work on Ph.D. at Ohio State University in Columbus, where he will also serve part-time as director of Christian education at the First Baptist church. . . . Mr. and Mrs. John Paunil (Doris Road) of 115 Higman Park, Benton Harbor, Mich., announce the birth of their second daughter, Charlotte Ann, Sept. 21. . . . Carl Swetka is employed at the Axelson Manufacturing company in Los Angeles and lives in Baldwin Park at 597 Meeker avenue.

1941

Mr. and Mrs. George D. Prude Jr. (Bernice Beardslee) of 3802 Riley street, Eaton House, La., announce the birth of George Dannon III, Jan. 15. . . . Robert and Elizabeth Derbyshire Bigelow and their two sons recently moved into their new "Bliesbach" home at 204 Waverly avenue, Grand Rapids. . . . C. C. Chamberlain has moved to 204 Arington street, Stillwater, Okla., where he is on a graduate fellowship to complete work for a Ph.D. degree. . . . Edwin S. Fletcher and Betty Jo Campbell (Mills College) were married Aug. 28 and are living in Anchorage, Alaska, where he has charge of the drafting department for the Civil Aeronautics administration. . . . Wallis Hines, of R. 4, Box 94, Lansing, received an M.S. in organic chemistry at MSC in March.

Deanne Kilbourne is located in Lewiston, Mont., as geologist for The Texas Company. . . . Leonard and Martha Reams Kyle and their small Lucinda are living in West Lafayette, Ind., where he is research assistant in animal sciences at Purdue University while working on his master's in farm management. . . . Eleanor Turner is an administrative dietitian at the University hospital in Madison, Wis., where she lives at 429 Lorel. . . . Shirley E. Price (Mrs. Robert L. Price) was married during the summer and are making their home at 459 Alford street, Flint. . . . John VanHouten is located in Paul Squire, Ariz., as assistant director of the Bureau of Reclamation. . . . George W. Williams is employed by the U. S. Forest Service in Corvallis, Ore., where he lives at 461 Washington street.

1942

Rosemary Brown is director of dietetics at the Toledo Hospital, North Cove boulevard, Toledo, Ohio. . . . On a "duplicative freight bill, Brot Transit Line" Mr. and Mrs. John Church, of 1352 Campbell Court, Midland, announce the birth of Mary Eleanor on Oct. 5. . . . Mr. and Mrs. Carl Canon (Loretta Devito) of 5404 S. Vernon, Chicago, announce the birth of Helen Kathryn on Jan. 31. . . . Leslie Durkee Smith (Mrs. Carter T.) is located at 120 S. Chester road, Swarthmore, P. S., where her husband is a student and she is working on the Swarthmore College Endowment fund.

Maurice Henahaw and Mildred Gibson were married on June 12 and are making their home in New York City where he is senior technologist for the Shell Chemical Corporation, 4 W. 46th street. . . . Leo Keeks is associated with the ACE Provision company, 2518 Orleans street, Detroit. . . . Edward Colin Wadley is living in Land O'Lakes, Wis. . . . Capt. and Mrs. Sidney A. Knuston proudly announce the birth of their second daughter, Carol Sue, on June 19. Capt. Knuston is stationed in Japan where Mrs. Knuston and the girls expect to join him in December. . . . On clever little prescription blanks, Dr. and Mrs. Marvin McCollin (Jeanette Kimmel) of 8291 Dayton avenue, Cincinnati, Ohio, announce the birth of Craig Thomas on Oct. 8. . . . A son, James, was born May 1 to Charles and Mary (Harvin, '44) LeBaron. . . . Gerald and Beverly Joanne Marshall announce the birth of a daughter, Kimberly, on March 3. . . . William and Allie Penney Morgan announce the birth of their second son, Gregory, in February, . . . Genevieve Ream Wicks (Mrs. William R.) teaches nutrition and diet therapy to student nurses at St. Joseph hospital in Alton, III., where she lives at 520 California avenue. . . . Doris Sharpe and Winthrop Richardson (Brown University) were married Aug. 27. They are making their home at 521st street, Merced, Calif., where both are teaching.

Ray Sheld has been promoted to manager of the Higginbotham Park, 619, 4th street, Universal C.I.T. Credit Corporation. . . . Tom Wafer is staff announcer for the American Broadcasting company in Detroit where he lives at 10410 E. Jefferson. . . . Mr. and Mrs. Joseph A. Watson Jr., of Dayton, Ohio. . . . On clever little prescription blanks, Dr. and Mrs. Marvin McCollin (Jeanette Kimmel) of 8291 Dayton avenue, Cincinnati, Ohio, announce the birth of Craig Thomas on Oct. 8. . . . A son, James, was born May 1 to Charles and Mary (Harvin, '44) LeBaron. . . . Gerald and Beverly Joanne Marshall announce the birth of a daughter, Kimberly, on March 3. . . . William and Allie Penney Morgan announce the birth of their second son, Gregory, in February, . . . Genevieve Ream Wicks (Mrs. William R.) teaches nutrition and diet therapy to student nurses at St. Joseph hospital in Alton, III., where she lives at 520 California avenue. . . . Doris Sharpe and Winthrop Richardson (Brown University) were married Aug. 27. They are making their home at 521st street, Merced, Calif., where both are teaching.

Zindel Is Re-elected "S" Club President

Officers and directors for the "S" Club were elected at the annual Stag Smoker held in the Hotel Olds, Lansing, Friday evening, Oct. 15.

Howard C. Zindel, '37, and Len Kositchek, '39, were re-elected president and vice-president, respectively, and Wendell Patchett, '35, was chosen secretary-treasurer of the club. Mr. Zindel was re-elected to his post as the Athletic Council representative.

The four-man board of directors selected at the meeting are: Len Osterink, '38, Bob Herrick, '35, Allen Diebold, '39, and Dick Colina, '36.
Boston Hotel Position

Go to Chambers, '40

John C. Chambers, 1940 graduate of Michigan State's hotel administration department, was recently appointed manager of the Myles Standish Hotel, Boston. He left a position as resident manager of the Hotel Somerset in Boston to take the new post.

Chambers joined the armed forces in 1943, was wounded at Casino, and later transferred to the Officers' Rest Hotel Section where he organized and transformed civilian hotels in Europe to accommodate recuperating officers and enlisted men.

He is a member of Sigma Gamma Epsilon, honorary hotel fraternity, and Kappa Sigma fraternity. He is married, has a two-year-old child, and resides in Salem.

Allyn and Ada Hough Van Dyke are living at 109 Pammel court, Ames, Iowa, where he is a graduate student and instructor in animal husbandry at Iowa State College. . . . Rebecca Lee was born Aug. 15 to Fred and Emma (Harris) '46 Grant Talbot Dean received his Bachelor of Science degree from Michigan State College in June and is now junior assistant at the University of Chicago library. He is living in Stanford, Calif., at 536 Alvarado Row. . . . Edna Dieke and Joe P. Vick were married Sept. 11 and are making their home in Winton-Salem, N. C. . . . Shirley Erickson teaches chemistry at Peries Institute in Big Rapids, Mich. . . . Mr. and Mrs. John Corley (Dorothy Gower) announce the birth of Susan Elizabeth on Aug. 30.

Dr. U. P. Hedrick, '93 Publishes New Book

Ulysses P. Hedrick, '93, is the author of a new book which has just been released by the Oxford University press, called "The Land of the Crooked Tree."

About this book, W. K. Kelsoy of the Detroit Free Press, commented: "An important literary and historic event occurred last week when the perfect book about Michigan was published . . . ."

Hedrick writes about his childhood and youth spent in the Little Traverse region of Michigan. A story of the life of the people of this section among Indians, Frenchmen, half-breeds, and early white settlers, the book is a document of sociology and history. Hedrick has recorded what he saw between the ages of four and 18, when he entered Michigan State College.

Critie Kelsey added: "It will be a treasure for future historians and politicians who will want to know just how people lived in that place and period. Little has been left undescribed; the schools, the churches, the hotels, the homes, all are there. It is a vivid volume, a Must for Michiganders."

Hedrick, who received his B.S. and M.S. degrees in horticulture from MSC and his L.L.D. from Utah Agricultural College, is director emeritus of the New York Agricultural Experiment Station at Geneva, N. Y. He was one of the four recipients of the MSC Alumni Awards for Distinguished Service last year.

Calendars Available

Alumni requests for Michigan State College's attractive 1948 appointment calendar are being received in increasingly greater numbers, according to Al Bransdorfer, Union Board President.

This calendar, designed specifically for alumni and containing 53 of the most familiar campus scenes and weekly schedule pages, is just off the press.

Alumni orders for the calendar can be filled immediately, Bransdorfer said. Due to the fact that only a limited number of these calendars have been printed, alumni are urged to order their copies now by mailing $1.00 to: APPOINTMENT CALENDAR DEPT., ALUMNI OFFICE, Union Building, Michigan State College.
at Fort Belvoir, Va., announce the birth of their daughter, Linda Leigh, on June 28. . . . A son, Charles Bick and Mrs. Lamar C. Fiskelson (Bethany Uehlin) of 16535 Fenmore, . . .
