CONFERRAL OF GRADUATE DEGREES
Friday, December 6, 7:30 P.M.

CONFERRAL OF BACCALAUREATE DEGREES
Saturday, December 7, 9:00 A.M. and 1:00 P.M.

The Jack Breslin Student Events Center
East Lansing
MICHIGAN STATE UNIVERSITY

Michigan State University, one of the nation's leading land-grant universities, was founded in 1855 as the first agricultural college with only six faculty members and three buildings to provide youths with an education in farming. Now, 140 years later, MSU continues to strive for excellence in providing a diverse student body with a broad and rich combination of liberal and practical education.

Today, the East Lansing campus looks quite different than it did in 1855. More than 5,200 acres of land encompass more than 400 buildings, and more than 3,000 faculty and staff are engaged in teaching, research and public service. More than 40,000 students — 85 percent from Michigan — attend the University's main campus.

Our student body represents every county in the state, every state in the nation, and 107 foreign nations. Minority students comprise more than 14 percent of the campus population, and our campus includes the largest number of African American students among all Big Ten schools.

Michigan State University's commitment to diversity and multiculturalism in its student body, faculty, staff, curriculum and outreach programs is exemplified through world-wide services in numerous research, extension, and international programs.

More than a century after its agricultural beginnings, Michigan State has a Graduate School and 14 colleges: Agriculture and Natural Resources, Arts and Letters, the Broad College of Business, Communication Arts and Sciences, Education, Engineering, Human Ecology, Human Medicine, James Madison, Natural Science, Nursing, Osteopathic Medicine, Social Science and Veterinary Medicine.

Today, three colleges represent the central academic disciplines which most universities refer to as the liberal arts and sciences: Arts and Letters, Natural Science, and Social Science. These colleges also provide outstanding undergraduate and graduate degree programs with majors in traditional disciplines while also providing special programs that enable students to obtain a broad, multidisciplinary education. The College of Education collaborates with the colleges to help prepare students to become teachers in the secondary schools of Michigan as well the nation. Our residence hall system is designed to complement and enhance the learning experiences of our students.

The Honors College, which attracts fine young scholars nationwide, enables students to waive standard graduation requirements and undertake enriched academic programs. MSU has produced 13 Rhodes Scholars, six Marshall Scholarship winners, and 11 Churchill Scholarship recipients. These British scholar- arship recipients are among the most distinguished and prestigious academic awards that an American student can receive.

Multimillion dollar, sponsor-funded programs support a wide array of outstanding research activities at MSU. Major facilities include the Pesticide Research Laboratory, operated with the U.S. Department of Energy as a national plant biology center; and the MSU/W.K. Kellogg Biological Station, which has been designated as a National Research Preserve. In collaboration with both the National Science Foundation and the U.S. Department of Energy, the National Superconducting Cyclotron Laboratory at MSU is able to study the nuclei of the heaviest elements.

The public significantly benefits from the University through University Outreach, MSU Extension Service, and the Agricultural Experiment Station which provides technical information and course work for many Michigan citizens. The Kellogg Center, one of the finest nationwide, annually hosts some 30,000 adults who come to the campus for approximately 600 conferences and other educational meetings.

Service to the international community is equally important. Supported by grants from the federal government and private foundations, MSU sustains educational and research assistance projects internationally. These projects have given many faculty members overseas experience and have added new dimensions to their teaching.

Michigan State University is a member of the Association of American Universities, National Association of State Universities and Land-Grant Colleges, American Council on Education, American Council of Learned Societies, International Association of Universities, Association of Graduate Schools, Council of Graduate Schools, and the Committee on Institutional Cooperation.
ACADEMIC COSTUME

In 1905, the Intercollage Commission, a group of leading American educators, introduced an academic costume code which by design of gowns and hoods would indicate the various degrees, and which by colors would identify the various facul­ties.

Three types of gowns are indicted by the code. Those worn by masters have long, pointed sleeves. Those worn by masters have long, closed sleeves with the ar of a circle near the bottom. Doctor’s gowns are faced with velvet. The sleeves are full, round, and open with three bars of velvet on each sleeve. The velvet facing of the bars on the sleeves may be black or the same color as the binding of the hood.

Hoods are made of material identical with the gown and are lined in the official academic color of the institution conferring the degree (e.g., green and white for MSU; burnt orange and white for the University of Texas; blue and gold for UCLA). If the institution has more than one color, the chevron is used to introduce the second color. Colored velvet or velvetene binds the hoods and indicates the department of faculty to which the degree pertains.

The color of the velvet of the hood is distinctive of the subject to which the degree pertains. For example, the trimming for the degree of Master of Science in Agriculture should be maize, representing agriculture, rather than golden yellow, representing science. Generally, the code for the velvet of the hood is the same as listed below for tassels.

At Michigan State University, it is customary to identify the candidates graduating from the different departments of study by tassels of the official department color as established by the Intercollage Code.

HONORARY DEGREE

WILLIAM DAVID BROHN

A musician, composer, orchestrator and conductor, you have excelled for four decades in your profession. Your varied skills traverse the landscape of music from classical to theatrical to jazz to popular.

You earned a B.A. in music from Michigan State University in 1955, following this with a master of music degree from the New England Conservatory of Music. You once said early in your career that the “playing of music was like paradise gained – a dream.” As a double bass player and pianist, you have lived the dream of many musicians, performing with ensembles and orchestras throughout the country, including the prestigious Boston Pops. You also moved to the other side of the baton, conducting for national tours of the Robert Joffrey Ballet, the Royal Ballet and popular musicals.

You recreated the sound track from the 1937 Russian classic film “Alexander Nevsky” in 1987. Since then, the film has been shown around the country accompanied by major orchestras to rave reviews. In 1995 you super­vised the first production by a University orchestra for the presentation of the film on the MSU campus.

In addition to this and other film orchestrations, you have orchestrated numerous albums for classical and operatic stars such as James Galway, Placido Domingo and Marilyn Horne. You have excelled in the world of theater, receiving a Grammy Award nomination, as well as the Drama Desk Award for “Outstanding Orchestration” in 1991 for two shows in the same year. Your orchestration for “Crazy for You” helped earn it the Tony Award for “Best Musical of 1992.”

Today your eclectic projects include the orchestration of the musical “Ragtime” and a retrospective of the works of Andrew Lloyd Webber. Your sustained success since graduating from Michigan State reflects a pioneering spirit to venture into new musical territories that makes us proud to claim you as one of our own. It gives me great pleasure to recognize your achievements by granting you the honorary degree of Doctor of Fine Arts.

HONORARY DEGREE

FRANK ALBERT COTTON

Your contributions to inorganic chemistry have been called “seminal,” “revolutionary,” and “influential” by your colleagues and the scientific press. As a researcher, theoretician, educator and author, your work has “singu­larly redirected the course of modern inorganic chemistry.” Soon after joining the faculty of MIT in 1957 as an Assistant Professor, you wasted little time in challenging a hundred year’s worth of conventional wisdom on the na­ture of metal compounds. Your research eventually proved the existence of multiple-bonded metal compounds, creat­ing a paradigm shift in the field of inorganic chemistry that has been called “one of the most stunning scientific dis­coveries of this century.”

Your research and depth of knowledge has led to both 1,500 scientific papers and a number of standard textbooks on inorganic chemistry. In fact, as a protégé of yours who teaches at Michigan State has said, “Every inorganic chemistry student, at the undergraduate and graduate level, knows Albert Cotton, through his textbooks.” Translated into numerous languages, your textbooks have enlightened and inspired a generation of chemists around the world. In your laboratory you have trained some of the most influen­tial chemists of our day. And, I am happy to report that two recent MSU graduate students are currently fortunate to be under your direction.

You also have influenced greatly the profession of science, serving on prestigious boards, such as the National Science Board which has oversight over the National Science Foundation. You have served as Councillor of the American Chemical Society and as Chair of its Division of Inorganic Chemistry in 1978. You have received numer­ous national and international awards, including the Na­tional Medal of Science, presented by President Reagan in 1982. You are a member of the National Academy of Sci­ences.

In recognition of your forty years as a pioneering researcher and an outstanding educator, I am pleased to present to you the honorary degree of Doctor of Science.
HONORARY DEGREE
DAVID C. HOLLISTER

A leader in Michigan politics for 20 years, your career has embodied the ideals of “community service,” championing educational, health, environmental, social and civil rights causes for the citizens of Michigan.

Born in Kalamazoo, you earned a master’s degree in government and history from Michigan State University in 1967. Your public service began in 1965 as a teacher during which time you developed Lansing’s first alternative school program. You also taught in the Mississippi Freedom School during the Civil Rights Movement. After serving as a county commissioner for six years, you were elected to represent Lansing in the Michigan House of Representatives in 1974.

As State Representative you dedicated yourself to improving the lives of ordinary citizens. You chaired committees on Social Services, Mental Health, Public Health and Corrections and served on many others. You led the passage of important legislation affecting minority communities, senior citizens, child care, health care, consumer rights, clean water and governmental reform. For your work, you have been honored by numerous civic and professional organizations.

In 1993 you were elected as Mayor of Lansing, where you continue to put people first. You have been a catalyst in developing a regional identity and cooperation among governments, business and education through the Greater Lansing community.

You have practiced the principles of diversity and inclusion throughout your career—principles which Michigan State University warmly embraces. In recognition of this spirit and your contributions to the betterment of the Lansing community and the citizens of Michigan, I am pleased to award you the honorary degree of Doctor of Laws.

HONORARY DEGREE
Marilyn Horne

The premier mezzo-soprano singer of our time, you have performed in the world’s leading opera and concert halls. The New York Times described you, “She is surely the most American of all operatic singers...in the best sense: a can-do technical command of the voice, ready intelligence, Protestant work ethic...firm grounding in the popular culture, melting-pot versatility.”

By your own account, your career began before you were two years old, singing in your native Pennsylvania. When you were four, you sang at a rally for Franklin Delano Roosevelt. And since that time, you have sung at the White House for presidents of both parties, including, most recently, at President Clinton’s 1993 Inaugural.

In 1954, you came into the public spotlight with your role in the movie Carmen Jones. Soon after that the great composer and conductor Igor Stravinsky took notice of your talents and you joined him for performances at the Venice Festival and other venues throughout Europe. In 1964 you returned to the United States to join the famous San Francisco Opera. Eventually, you went on to perform with all the world’s best opera companies, including the Metropolitan Opera, La Scala, Paris Opera and Chicago Lyric, to name a few.

You have distinguished yourself as a versatile and tireless recitalist and soloist with over 1,000 performances over the years. As comfortable with Porter and Gershwin as Verdi and Rossini, you have been instrumental in nourishing and popularizing American music by bringing it to the same energy and commitment you lavish on demanding operatic roles.

The recipient of numerous awards and honors, including the National Endowment for the Arts’ National Medal of Arts, several Grammy awards and the coveted Kennedy Center Medal of Honor, you have distinguished yourself as a mentor and educator of young musicians. You recently formed The Marilyn Horne Foundation, a nonprofit organization, devoted to training the next generation of artists.

For this dedication to the education of future artists, and in recognition of your wonderful career, I am pleased to present you the honorary degree of Doctor of Fine Arts.

HONORARY DEGREE
Homer Neal

As a professor and university administrator, you have had a singular impact on the realms of high energy physics and higher education for the past 30 years. You have distinguished yourself as a top-flight researcher at the University of Michigan as well through your service as Vice President for Research and, most recently, as interim president.

After earning a bachelor’s degree in physics at Indiana University in 1961, you went on to the University of Michigan where you earned a Ph.D. in physics in 1966. After appointments at Indiana University and the State University of New York at Stony Brook in the 1970s and 1980s, you returned to the University of Michigan in 1987 as the Chair of the Physics Department.

While at the University of Michigan, you participated with other leading physicists in the DZERO experiment at the Fermi National Accelerator Laboratory. Last year this group of scientists made the remarkable discovery of the “top quark,” one of the basic building blocks of matter. Your continuing active involvement in research at Fermi Lab along with your equally demanding work as Vice President for Research at the University of Michigan is a source of inspiration. The quality of your work in both arenas, one MSU professor noted, has “commanded an enormous measure of respect from both physicists and university presidents.”

Your quest for scientific knowledge has garnered accolades from your colleagues and numerous awards and appointments to scientific and educational boards, including the Smithsonian Institution and the National Science Board. You have testified before Congress on matters ranging from the funding of national laboratories to the state of science education in colleges and universities.

As a colleague, and as a representative of another major research university in the state, I commend your vision and leadership in higher education and fundamental scientific research. It is my pleasure to award you the honorary degree of Doctor of Science.
