Conferral of Graduate Degrees  
Friday, December 10, 7:00 P.M.

Conferral of Baccalaureate Degrees  
Saturday, December 11, 9:00 A.M. and 1:00 P.M.

The Jack Breslin Student Events Center  
East Lansing
Michigan State University, one of the nation's leading land-grant universities, was founded in 1855 as the first agricultural college with only six faculty members and three buildings to provide youths with an education in farming. Now, 140 years later, MSU continues to strive for excellence in providing a diverse student body with a broad and rich combination of liberal and practical education.

Today, the East Lansing campus looks quite different than it did in 1855. More than 5,200 acres of land encompass more than 400 buildings, and more than 3,000 faculty and staff are engaged in teaching, research and public service. More than 40,000 students — 85 percent from Michigan — attend the University's main campus.

Our student body represents every county in the state, every state in the nation, and 107 foreign nations. Minority students comprise more than 14 percent of the campus population, and our campus includes the largest number of African American students among all Big Ten schools.

Michigan State University's commitment to diversity and multiculturalism in its student body, faculty, staff, curriculum and outreach programs is exemplified through world-wide services in numerous research, extension, and international programs.

More than a century after its agricultural beginnings, Michigan State has a Graduate School and 14 colleges: Agriculture and Natural Resources, Arts and Letters, the Broad College of Business, Communication Arts and Sciences, Education, Engineering, Human Ecology, Human Medicine, James Madison, Natural Science, Nursing, Osteopathic Medicine, Social Science and Veterinary Medicine.

Today, three colleges represent the central academic disciplines which most universities refer to as the liberal arts and sciences: Arts and Letters, Natural Science, and Social Science. These colleges also provide outstanding undergraduate and graduate degree programs with majors in traditional disciplines while also providing special programs that enable students to obtain a broad, multidisciplinary education. The College of Education collaborates with the colleges to help prepare students to become teachers in the secondary schools of Michigan as well the nation.
ACADEMIC COSTUME

In 1895, the Intercollegiate Commission, a group of leading American educators, introduced an academic costume code which by design of gowns and hoods would indicate the various degrees, and which by colors would identify the various faculties.

Three types of gowns are indicted by the code. Those worn by the bachelors have long, pointed sleeves. Those worn by masters have long, closed sleeves with the arc of a circle near the bottom. Doctor’s gowns are faced with velvet. The sleeves are full, round, and open with three bars of velvet on each sleeve. The velvet facing of the bars on the sleeves may be black or the same color as the binding of the hood.

Hoods are made of material identical with the gown and are lined in the official academic color of the institution conferring the degree (e.g., green and white for MSU; burnt orange and white for the University of Texas; blue and gold for UCLA). If the institution has more than one color, the chevron is used to introduce the second color. Colored velvet or velveteen binds the hoods and indicates the department of faculty to which the degree pertains.

The color of the velvet of the hood is distinctive of the subject to which the degree pertains. For example, the trimming for the degree of Master of Science in Agriculture should be maize, representing agriculture, rather than golden yellow, representing science. Generally, the code for the velvet of the hood is the same as listed below for tassels.

At Michigan State University, it is customary to identify the candidates graduating from the different departments of study by tassels of the official department color as established by the Intercollegiate Code.

HONORARY DEGREE

HARM J. de BLIJ

You were the popular geography editor on ABC’s “Good Morning America” for seven years and in 1996 joined NBC News as its geography analyst. You have appeared from locations around the world using your trademark maps to explain the geographic background of major events. As America’s television geographer, you shared an Emmy Award from the Academy of Television Arts and Sciences.

A native of the Netherlands, you attended college in Africa and earned advanced degrees at Northwestern University. In the course of your teaching and research, you have visited more than 100 countries.

For educating the public about regional differences and place of the United States in world affairs and for interpreting complex global linkages in ways that engage and challenge the public while maintaining your own scientific integrity, Michigan State University is pleased to award you the honorary degree of Doctor of Science.

HONORARY DEGREE

CLARE FISCHER

You are recognized by jazz professionals as one of the most original and creative composers, arrangers, and pianists of our time. You have recorded more than fifty albums and received two Grammy awards. You have composed and arranged music on more than a hundred albums and compact discs for other artists, including some of the most famous contemporary jazz artists and pop performers.

What makes your music unique is the remarkable depth of your understanding and assimilation of the essential aspects of classical music, jazz, and Latin American music. Your consistently excellent music balances spontaneity and highly sophisticated organization and incorporates melodic and rhythmic elements that are rooted in the folk music of the Americas as well as the classical music of early twentieth-century European composers. You have synthesized these elements into a personal and convincing vocabulary for musical self-expression that places you in the forefront of modern musicians.

You are considered, with Duke Ellington, one of the most significant American composers and one of the greatest living jazz pianists and arrangers. Your creativity is universally lauded. One reviewer described your improvisations as something “even Mozart would envy.”

Your music communicates equally well with audiences in Europe and the United States. Michigan State University, where you earned both Bachelor’s and Master’s degrees in music, is a particularly fortunate beneficiary of your accomplishments as you frequently return to share your musical expertise with students.

For your creativity and excellence as a jazz composer, arranger, and performer, Michigan State University is pleased to award you the honorary degree of Doctor of Fine Arts.
You are a distinguished scholar who challenges people to think about science and its complex social consequences. The popularity of your books, lectures, and magazine columns as well as the numerous awards bestowed on you demonstrate your effectiveness as an interpreter of science for the public.

Your challenging presentations cover even controversial subjects: scientific arguments for racial equality, theories on the nature of excellence, humanity's amazing but not miraculous origins, Darwin's revolutionary breakthrough in thought. For your ability to communicate about such profound topics, you won the National Magazine Award for Essays and Criticism in 1980 and in 1981 received an American Book Award for Your Power and Your Glory and the National Book Critics Circle Award for The Mismeasure of Man.

You were among the first recipients of the MacArthur Foundation Prize Fellowship. The Zoological Society of London awarded you its Silver National Medal. You received the Glenn T. Seaborg award for contribution to public interest in science and the Committee for the Scientific Investigation of Claims of the Paranormal In Praise of Reason Award.

You earned your Bachelor's degree in geology at Antioch College in 1963 and your Ph.D. at Harvard University in 1967. You have been a professor of geology and zoology at Harvard University ever since. Although you describe yourself as a paleontologist and an evolutionary biologist, you also teach the history of science.

For your achievements as an accomplished scientist and thought-provoking interpreter of science to the public, Michigan State University is pleased to award you the honorary degree of Doctor of Science.

You are a Fellow of the American Academy of Arts and Sciences, a member of the National Academy of Sciences, and Fellow of the Royal Society of Edinburgh. Discover magazine named you Scientist of the Year in 1981. You received the Glenn T. Seaborg award for contribution to public interest in science and the Committee for the Scientific Investigation of Claims of the Paranormal In Praise of Reason Award.

You earned your Bachelor's degree in geology at Antioch College in 1963 and your Ph.D. at Columbia University in 1967. You have been a professor of geology and zoology at Harvard University ever since. Although you describe yourself as a paleontologist and an evolutionary biologist, you also teach the history of science.

For your achievements as an accomplished scientist and thought-provoking interpreter of science to the public, Michigan State University is pleased to award you the honorary degree of Doctor of Science.

CONFERRING OF DEGREES
PETER MCPHERSON
President, Michigan State University

REMARKS
DOROTHY GONZALES, Chairperson, MSU Board of Trustees

ALMA MATER
M.S.U., We love thy shadows
When twilight silence falls,
Flushing deep and softly paling
O'er ivy-covered halls,
Beneath the pines we'll gather
To give our faith so true,
Sing our love for Alma Mater
And thy praises, M.S.U.
(The Band, Mr. MacMullen and Audience)

RECESSIONAL
The MSU Symphony Band

We would like to express our appreciation to the staff for their assistance at the commencement exercises. The audience is requested to remain at their seats while those in the procession are entering and leaving the arena.
