Michigan State University, one of the nation's leading land-grant universities, was founded in 1855 as the first agricultural college with only six faculty members and three buildings to provide youths with an education in farming. Now, 140 years later, MSU continues to strive for excellence in providing a diverse student body with a broad and rich combination of liberal and practical education.

Today, the East Lansing campus looks quite different than it did in 1855. More than 5,200 acres of land encompass more than 400 buildings, and more than 3,000 faculty and staff are engaged in teaching, research and public service. More than 40,000 students—85 percent from Michigan—attend the University’s main campus.

Our student body represents every county in the state, every state in the nation, and 107 foreign nations. Minority students comprise more than 14 percent of the campus population, and our campus includes the largest number of African American students among all Big Ten schools.

Michigan State University’s commitment to diversity and multiculturalism in its student body, faculty, staff, curriculum and outreach programs is exemplified through world-wide services in numerous research, extension, and international programs.

More than a century after its agricultural beginnings, Michigan State has a Graduate School and 14 colleges: Agriculture and Natural Resources, Arts and Letters, the Broad College of Business, Communication Arts and Sciences, Education, Engineering, Human Ecology, Human Medicine, James Madison, Natural Science, Nursing, Osteopathic Medicine, Social Science and Veterinary Medicine.

Today, three colleges represent the central academic disciplines which most universities refer to as the liberal arts and sciences: Arts and Letters, Natural Science, and Social Science. These colleges also provide outstanding undergraduate and graduate degree programs with majors in traditional disciplines while also providing special programs that enable students to obtain a broad, multidisciplinary education. The College of Education collaborates with the colleges to help prepare students to become teachers in the secondary schools of Michigan as well the nation.
ACADEMIC COSTUME

In 1895, the Intercollegiate Commission, a group of leading American educators, introduced an academic costume code which by design of gowns and hoods would indicate the various degrees, and which by colors would identify the various faculties.

Three types of gowns are indicated by the code. Those worn by the bachelors have long, pointed sleeves. Those worn by masters have long, closed sleeves with the arc of a circle near the bottom. Doctor’s gowns are faced with velvet. The sleeves are full, round, and open with three bars of velvet on each sleeve. The velvet facing of the bars on the sleeves may be black or the same color as the binding of the hood.

Hoods are made of material identical with the gown and are lined in the official academic color of the institution conferring the degree (e.g., green and white for MSU; burnt orange and white for the University of Texas; blue and gold for UCLA). If the institution has more than one color, the chevron is used to introduce the second color. Colored velvet or velveteen binds the hoods and indicates the department to which the degree pertains.

The color of the velvet of the hood is distinctive of the subject to which the degree pertains. For example, the trimming for the degree of Master of Science in Agriculture should be maize, representing agriculture, rather than golden yellow, representing science. Generally, the code for the velvet of the hood is the same as listed below for tassels.

At Michigan State University, it is customary to identify the candidates graduating from the different departments of study by tassels of the official department color as established by the Intercollegiate Code.

HONORARY DEGREE
RITA R. COLWELL

You have achieved success and international recognition as a microbiologist, teacher, and administrator. You are known for your ability to distill and convey the human impact of scientific findings, connecting complicated scientific phenomena to everyday life.

You have distinguished yourself in the study of marine biotechnology and molecular genetics of marine bacteria, discovering that zooplankton is a transmitter of cholera. Your research results appear in 16 books and more than 500 publications. You produced the award-winning film, Invisible Seas.

You are also known as a leader in science and technology policy, having served in many advisory positions in the U.S. government, private foundations, and the international community. President Bill Clinton selected you in 1998 to be director of the National Science Foundation, the premier federal agency supporting fundamental research in science and engineering. Your previous experience as a member of the National Science Board and as president of the American Association for the Advancement of Science, the University of Maryland Biotechnology Institute, the Sigma Xi National Science Honorary Society, and the International Union of Microbiological Societies enabled you to apply your management skills for the benefit of the science community and prepared you for this role.

For your achievements as a scientist and as a leader of scientists, Michigan State University is pleased to award you the honorary degree of Doctor of Science.

HONORARY DEGREE
ARNOLD L. DEMAIN

Your remarkably productive career as an industrial microbiologist began with bachelor’s and master’s degrees from Michigan State. After earning your Ph.D., you accepted a position at Merck Sharp & Dohme Research Laboratories, where you rose to lead the Department of Fermentation Research. You are now professor of industrial microbiology at Massachusetts Institute of Technology.

You are known around the world for your contributions to studies of antibiotic synthesis and microbial production of other bioactive agents. You undertook to decipher the complex of proteins that constitute the cellulose-digesting system of Clostridium thermocellum. You are currently researching the microbial production of cholesterol-lowering drugs and immunosuppressive, antitumor, and antifungal drugs. Your work on the effect of microgravity on microbial production, with its potential impact on space travel as well as commercial production, is just the most recent evidence that you stand in the forefront of your field. Your research has generated more than 430 publications, nine books, and 16 U.S. patents.

You have served as mentor and role model to more than 100 graduate students and postdoctoral fellows in “Arnie’s Army,” as they call themselves, and they have demonstrated their affection and respect for you by holding symposia in your honor. Your peers have recognized your accomplishments with numerous honors, including election to the National Academy of Sciences and honorary memberships in scientific societies of other countries, invitations to lecture, and awards from science and industry organizations worldwide.

For your accomplishments in the microbial sciences, Michigan State University is pleased to award you the honorary degree of Doctor of Science.
HONORARY DEGREE
MURRAY GOLDSTEIN

You are a world-renowned authority in neurological diseases with a career that has included a number of “firsts.” You were the first osteopathic physician to enter a residency in neurology at the Mayo Clinic and the first to reach the rank of Rear Admiral in a commissioned corps of the United States. You were the first and only osteopathic physician to direct one of the National Institutes of Health—the National Institute of Neurological Disorders and Stroke. You represent the highest standard of academic achievement. You have been an advocate for research on neurological diseases and disorders and have linked the principles of osteopathic medicine to research in both basic science and clinical investigation. At the same time, you have challenged the osteopathic profession to reach higher and farther. You maintain high standards of patient care by integrating intellect, compassion, and comprehensive knowledge in the diagnosis and treatment of patients, and you apply those standards as Medical Director of the United Cerebral Palsy Research and Educational Foundation.

Your peers have recognized your accomplishments with honors and awards from institutions around the world. You are a Fellow or Honorary Fellow of nine professional organizations. You have received awards for distinguished service from the U.S. Public Health Service, the American Academy of Neurology, the National Parkinson Foundation, and the Association of University Professors of Neurology, among others.

For your significant contributions to the health and well-being of people around the world, Michigan State University is pleased to award you the honorary degree of Doctor of Science.

HONORARY DEGREE
JAMES D. WOLFENSOHN

As president of the World Bank Group, you direct resources and programs that fight poverty by investing in people, helping them help themselves and their environments.

The ninth World Bank president since 1946, you will begin your second five-year term in June. You have visited more than 100 countries to see first-hand the challenges facing the Bank and its 181 member countries and to forge partnerships with governments, the private sector, regional banks, and the United Nations. In 1996, with the International Monetary Fund, you established the Heavily Indebted Poor Countries Initiative as the first comprehensive debt reduction program to address the needs of the world’s poorest countries. You are working with developing countries to pilot a more inclusive and integrated approach to the Bank’s development mission. This Comprehensive Development Framework is focused on a long-term vision and supported by strong partnerships.

Your previous experience in international investment banking included establishing your own firm. You are also an ardent advocate for numerous cultural activities, especially the performing arts. You are Chairman of the Board of the Institute for Advanced Study at Princeton University and Chairman Emeritus of the Board of Trustees of the John F. Kennedy Center for the Performing Arts in Washington, D.C. You are a Fellow of the American Academy of Arts and Sciences and a Fellow of the American Philosophical Society. Queen Elizabeth II awarded an Honorary Knighthood for your contributions to the arts. The governments of Australia, France, Germany, Morocco, and Norway have also recognized your accomplishments.

For your efforts to enhance life by relieving poverty and supporting the arts, Michigan State University is pleased to award you the honorary degree of Doctor of Humanities.

ORDER OF CEREMONIES
Graduate Degrees
Presiding
PETER MCPHERSON, President, Michigan State University

PROCISIONAL
The MSU Wind Symphony
JOHN WHITWELL, Conductor

THE STAR SPANGLED BANNER
Oh, say can you see by the dawn’s early light
What so proudly we hailed at the twilight’s last gleaming?
Whose broad stripes and bright stars thru the perilous fight,
Gave proof thru the night that our flag was still there.
Johannes Brahms, arranged by Joseph Spaniola

MOMENT OF SILENCE

PRESENTATION OF HONORARY DEGREE CANDIDATES
ROBERT J. HUGGETT, Vice President for Research and Graduate Studies
Michigan State University

ADDRESS
RITA R. COLWELL
Director, National Science Foundation
Arlington, Virginia

SPECIAL MUSIC
Academic Festival Overture
The MSU Wind Symphony, led by Jeffrey Brown

CONFERING OF DEGREES
PETER MCPHERSON
President, Michigan State University

INTRODUCTIONS AND REMARKS
The Honorable COLLEEN MCNAMARA
Vice-Chairperson, MSU Board of Trustees

ALMA MATER
M.S.U., We love thy shadows
When twilight silence falls,flushing deep and softly paling
O’er ivy-covered halls,
Beneath the pines we’ll gather
To give our faith so true,
Sing our love for Alma Mater
And thy praises, M.S.U.
(The MSU Wind Symphony, Brown and Audience)

RECESSINAL
