PAULA KOPPISCH
JEFFERY MILLER
TED MINNICK
ULREH MOSTOSKY

LINDA O. STANFORD
SCOTT VAUGHN
JAMES WELLINGTON, Student Representative
BETSY WHITE
KANIKA WILLIAMS, Student Representative
THOMAS WOLFF

On the cover is Beaumont Memorial Tower, constructed in 1928, a gift of John W. Beaumont, class of 1882. Restoration of the tower, carillon, and clock was completed in 1996, reviving the bells which had been silent since 1987. Beaumont Tower once again is a functioning symbol of the beauty and strength of Michigan State University.

DIPLOMAS WILL BE MAILED TO DEGREE RECIPIENTS APPROXIMATELY ONE MONTH AFTER THE END OF THE SEMESTER

FOR INFORMATION ABOUT THE SENIOR CLASS GIFT, PLEASE SEE http://www.givingto.msu.edu/seniorgift

MSU is an affirmative-action, equal-opportunity institution.

MICHIGAN STATE UNIVERSITY

Michigan State University, one of the nation's leading land-grant universities, was founded in 1855 as the first agricultural college with only six faculty members and three buildings to provide youths with an education in farming. Now, 140 years later, MSU continues to strive for excellence in providing a diverse student body with a broad and rich combination of liberal and practical education.

Today, the East Lansing campus looks quite different than it did in 1855. More than 5,200 acres of land encompass more than 400 buildings, and more than 3,000 faculty and staff are engaged in teaching, research and public service. More than 40,000 students — 85 percent from Michigan — attend the University’s main campus.

Our student body represents every county in the state, every state in the nation, and 107 foreign nations. Minority students comprise more than 14 percent of the campus population, and our campus includes the largest number of African American students among all Big Ten schools.

Michigan State University's commitment to diversity and multiculturalism in its student body, faculty, staff, curricula and outreach programs is exemplified through world-wide services in numerous research, extension, and international programs.

More than a century after its agricultural beginnings, Michigan State has a Graduate School and 14 colleges: Agriculture and Natural Resources, Arts and Letters, the Broad College of Business, Communication Arts and Sciences, Education, Engineering, Human Ecology, Human Medicine, James Madison, Natural Science, Nursing, Osteopathic Medicine, Social Science and Veterinary Medicine.

Today, three colleges represent the central academic disciplines which most universities refer to as the liberal arts and sciences: Arts and Letters, Natural Science, and Social Science. These colleges also provide outstanding undergraduate and graduate degree programs with majors in traditional disciplines while also providing special programs that enable students to obtain a broad, multidisciplinary education. The College of Education collaborates with the colleges to help prepare students to become teachers in the secondary schools of Michigan as well the nation.

Our residence hall system is designed to complement and enhance the learning experiences of our students.

The Honors College, which attracts fine young scholars nationwide, enables students to waive standard graduation requirements and undertake enriched academic programs. MSU has produced 13 Rhodes Scholars, six Marshall Scholarship winners, and 11 Churchill Scholarship recipients. These British scholarships are among the most distinguished and prestigious academic awards that an American student can receive.

Multimillion dollar, sponsor-funded programs support a wide array of outstanding research activities at MSU. Major facilities include the Pesticide Research Laboratory, operated with the U.S. Department of Energy as a national plant biology center; and the MSU/W.K. Kellogg Biological Station, which has been designated as a National Research Reserve. In collaboration with both the National Science Foundation and the U.S. Department of Energy, the National Superconducting Cyclotron Laboratory at MSU is able to study the nuclei of the heaviest elements.

The public significantly benefits from the University through University Outreach, MSU Extension Service, and the Agricultural Experiment Station which provides technical information and course work for many Michigan citizens. The Kellogg Center, one of the finest nationwide, annually hosts some 30,000 adults who come to the campus for approximately 600 conferences and other educational meetings.

Service to the international community is equally important. Supported by grants from the federal government and private foundations, MSU sustains educational and research assistance projects internationally. These projects have given many faculty members overseas experience and have added new dimensions to their teaching.

Michigan State University is a member of the Association of American Universities, National Association of State Universities and Land-Grant Colleges, American Council on Education, American Council of Learned Societies, International Association of Universities, Association of Graduate Schools, Council of Graduate Schools, and the Committee on Institutional Cooperation.
ACADEMIC COSTUME

In 1985, the Intercollegiate Commission, a group of leading American educators, introduced an academic costume code which by design of gowns and hoods would indicate the various degrees, and which by colors would identify the various faculties.

Three types of gowns are indicated by the code. Those worn by the bachelors have long, pointed sleeves. Those worn by masters have long, closed sleeves with the arc of a circle near the bottom. Doctor’s gowns are faced with velvet. The sleeves are full, round, and open with three bars of velvet on each sleeve. The velvet facing of the bars on the sleeves may be black or the same color as the binding of the hood.

Hoods are made of material identical with the gown and are lined in the official academic color of the institution conferring the degree (e.g., green and white for MSU; burnt orange and white for the University of Texas; blue and gold for UCLA). If the institution has more than one color, the chevron is used to introduce the second color. Colored velvet or velveteen binds the hoods and indicates the department of faculty to which the degree pertains.

The color of the velvet of the hood is distinctive of the subject to which the degree pertains. For example, the trimming for the degree of Master of Science in Agriculture should be maize, representing agriculture, rather than golden yellow, representing science. Generally, the code for the velvet of the hood is the same as listed below for tassels.

At Michigan State University, it is customary to identify the candidates graduating from the different departments of study by tassels of the official department color as established by the Intercollegiate Code.

HONORARY DEGREE

ROGER N. BEACHY

You are a renowned plant scientist recognized for making key early discoveries in agricultural biotechnology. You are committed to applying those discoveries to improve agriculture and human health for people in developing countries.

After earning your Ph.D. in plant virology at Michigan State University, you began a career in molecular biology. As a professor at Washington University in St. Louis, you discovered a way to immunize plants against viral diseases. In collaboration with scientists at Monsanto Company, you developed a virus-resistant tomato, the first such plant. The importance of this discovery and its impact on agriculture established you as an international leader in plant biology.

When Scripps Research Institute added a plant division with an emphasis on agricultural biotechnology, you were their choice to develop and lead the new program. A decade later, the Danforth Foundation recruited you to direct its new research center focused on plant biology. In these leadership roles, you continued your basic research on how viruses enter plant cells, are replicated, and move throughout the host. You are looking for new ways to control virus diseases, particularly those that limit food production in developing countries, and also exploring ways to deliver human vaccines in food.

You are an exemplary educator, involving students as significant members of your research team. You support education at MSU by serving on the Dean’s Board of Advisers for the College of Natural Science. At the Dunforth Center, you have trained more than 130 scientists in 19 countries to work in areas directly related to the research needs of their home institutions. You have also worked to educate the public and policy makers about the safety and value of modifying plants to be resistant to disease.

Peers have recognized your work with major awards, including election to the National Academy of Sciences and the top award of the American Society of Plant Physiologists. Most recently you received the Wolf Prize in Agriculture, perhaps the highest recognition available to agricultural scientists.

For your many accomplishments as a scientist and the impact they have had on the food supply for people around the world, I am pleased to award you the honorary degree, Doctor of Science, from Michigan State University.

HONORARY DEGREE

LEE C. BOLLINGER

You are a renowned legal scholar and educator who has provided notable leadership to the University of Michigan. Recognizing your accomplishments, Columbia University has tapped you to be its next president.

A graduate of the University of Oregon and Columbia Law School, you served as law clerk for Judge Wilfred Feinberg and for Chief Justice Warren Burger before joining the faculty of the University of Michigan Law School, where you also served as dean and became widely known for your contributions to free speech and First Amendment scholarship. After a term as Provost at Dartmouth College, you were named the University of Michigan’s twelfth president.

You have helped to inaugurate, with Michigan State University, a new era of cooperation among the state’s research universities. A notable result of that cooperation is the Michigan Life Sciences Corridor. The statewide funding program supports academic and industry research projects that will have a lasting impact on the state’s economy and the health and well being of its citizens. You helped foster the unprecedented partnership with MSU and the cooperative effort of the state’s major research institutions on a successful infrastructure proposal to the Life Sciences Corridor program. That proposal recognized the individual strengths of each institution and linked them to develop a plan to make state-of-the-art equipment available to researchers from all Michigan universities.

As President of the University of Michigan you launched important initiatives that include a study to explore the use of technology in teaching, research, and public service. You introduced science and technology issues into the traditional liberal arts curriculum. You enhanced the arts, planning a new theater facility for performing arts programs. As an ardent and eloquent supporter of diversity on your campus, you have developed a comprehensive defense of diversity policies. Under your leadership, research funding and private giving increased significantly.

For your dynamic leadership, your personal commitment to excellence in scholarship, and your strong support of cooperative ventures among the state’s universities, I am pleased to award you the honorary degree, Doctor of Laws, from Michigan State University.
HONORARY DEGREE
WILLIAM CLARK BUNTING

You are a leader in the production of nonfiction television programming, using one of the most effective modern communication methods to create award-winning programs that inspire interest in history and the natural world, particularly among young people.

After earning bachelor and master's degrees at Michigan State University and serving as a top aide to a Michigan congressman, you joined the Discovery Channel one month after its launch in 1985. You led program acquisitions and development to make the channel one of the most popular on cable television. Among the Discovery Channel productions you supervised, the documentary specials Watergate and Carrier: Fortress at Sea won Emmy awards. Normandy: The Great Crusade and People of the Forest won both Emmy and George Foster Peabody awards. Yugoslavia: Death of a Nation won a Peabody Award and the Gold Baton from the Alfred I. du Pont Center for Broadcast Journalism, the highest honor in broadcast television.

In 1996 you launched the Animal Planet network. Organized around the human fascination with animals, pets, natural history, and science, Animal Planet offers programs for elementary students, pet owners, and families. With its diverse, creative, and entertaining programming from every television genre, including game shows, it has become the fastest growing network in the history of cable television and one of the most respected. Many of your Animal Planet productions won acclaim, including an Emmy award for Twisted Tales. You produced a successful original movie and introduced a 13-part series that follows the worldwide animal adventures of a biologist. You also featured MSU's College of Veterinary Medicine in a 13-week series called Vet School Confidential. Filmed entirely on campus, each episode features an actual case at MSU's Veterinary Teaching Hospital and the students and faculty working there.

You have now returned to the Discovery Channel as executive vice president and general manager, overseeing all programming, management, and operations of the network you helped shape.

Your own interest in natural science is reflected in your work on the boards of several conservation organizations, including the Ocean Conservancy and the World Wildlife Foundation.

For your commitment to science education and your success at presenting science and natural history as fun and interesting as well as educational, I am pleased to award you the honorary degree, Doctor of Humane Letters, from Michigan State University.

HONORARY DEGREE
JAMES M. CORNELIUS

You successfully combined a remarkable business career with a commitment to family and community, setting an example for countless young businessmen and women.

The third generation of your family to pursue a business career, you followed your father's advice to "learn the language" and studied accounting at Michigan State University, graduating magna cum laude, and then earned an MBA in finance. You served as a lieutenant in the U.S. Army Finance Corps before joining Eli Lilly and Company. Determined to respect your wife's career, you settled in Indianapolis, working first in pharmaceutical marketing and then in economic studies, taking on the strategic task of pursuing new business opportunities for Lilly. You developed Lilly's Medical Devices and Diagnostics (MDD) Division, ultimately serving as president of one of the MDD companies and leading it to recognition as the nation's fastest growing medical device company.

You went back to Lilly to become chief financial officer and a member of the board of directors, helping lead the company to a dominant position in the health care industry. As that industry changed, you organized the separation of MDD companies from the parent company and became chairman, president, and CEO of one of them, Guidant. Under your leadership, Guidant grew to 10,000 employees, sales of $2.5 billion, and a market capitalization of more than $18 billion. With your conviction that a company's success depends on its people, you created an environment that enables Guidant employees to balance careers and families successfully. Fortune Magazine recognized your accomplishments by twice citing Guidant as one of the 100 best companies to work for and placing it 35th in the magazine's list of 2000 most admired companies.

You have enhanced your community as well. You served on the advisory board of MSU's Broad College of Business, contributing your expertise to strategic planning activities. You helped develop MSU's MBA curriculum specializing in high technology sales and marketing, and you provide internships for MSU students interested in that field. You serve on the boards of numerous other institutions, organizations, and industries that also benefit from your business acumen and personal values.

In recognition of your successful business career that reflects your commitment to valuing people, I am pleased to award you the honorary degree, Doctor of Humanities, from Michigan State University.

HONORARY DEGREE
RICHARD FRED SUHRHEINRICH

Throughout your career you have supported legal education. You taught at the Detroit College of Law and were a faculty member of the Trial Advocacy Workshop in the United States District Court for the Eastern District of Michigan. You were a driving force in linking Michigan State University and the Detroit College of Law, to the benefit of both. On the MSU-DCL Board of Trustees, you have worked to update the governance structure of the college and maximize those benefits. You have supported recruitment of new faculty and implementation of a new scholarship program. Your leadership has provided inspiration and encouragement that helped cement the affiliation of Detroit College of Law with Michigan State University.

Your commitment to your community is evident in your service on several hospital boards and a YMCA board and your generous legal representation of the economically deprived through intercity church programs.

For your vision for legal education in Michigan and your contributions to the legal profession, I am pleased to award you the honorary degree, Doctor of Laws, from Michigan State University.

ADDRESS
ROGER N. BEACHY
President and Director
Donald Danforth Plant Science Center
St. Louis, Missouri

SPECIAL MUSIC
Academic Festival Overture
The MSU Symphony Band
Arranged by Joseph Spaniola
JOHN T. MADDEN, Conductor

CONFERRING OF DEGREES
PETER MCPHERSON
President, Michigan State University

REMARKS
COLLEEN McNAMARA, Chairperson, MSU Board of Trustees

ALMA MATER
Key
M.S.U., We love thy shadows
When twilight silence falls,
Flushing deep and softly paling
O’er thy covered halls
Beneath the pines we’ll gather
To give our faith so true,
Sing our love for Alma Mater
And thy praises, M.S.U.

ALLISON BERRY, Senior, Music Performance, School of Music
The MSU Symphony Band and Audience

RECESSIONAL
The MSU Symphony Band
JOHN T. MADDEN, Conductor

We would like to express our appreciation to the staff for their assistance at the commencement exercises. The audience is requested to remain at their seats while those in the procession are entering and leaving the arena.
