The Honorable G. SCOTT ROMNEY, Birmingham

PETER MCPHERSON, Ex Officio, President, East Lansing
LOU ANNA KIMSEY SIMON, Provost, East Lansing
SUE CARTER, Secretary, Lansing

MICHIGAN STATE UNIVERSITY

For nearly 150 years, Michigan State University has been advancing knowledge and transforming lives. MSU, one of the nation's leading land-grant universities, was founded in 1855 as the first agricultural college with six faculty members and three buildings to provide youth with an education in farming. Today, MSU continues to strive for excellence in providing a diverse student body with a broad and rich combination of liberal and practical education.

The East Lansing campus looks quite different than it did in 1855. More than 5,000 acres of land encompass more than 400 buildings, and more than 4,000 faculty and staff are engaged in teaching, research and public service. More than 40,000 students—85 percent from Michigan—attend the University's main campus.

Our student body represents every county in the state, every state in the nation, and more than 100 nations from around the globe. Minority students comprise more than 15 percent of the campus population, and our campus includes the largest number of African American students among all Big Ten schools.

Michigan State University's commitment to diversity and multiculturalism in its student body, faculty, staff, curriculum and outreach programs is exemplified through world-wide services in numerous research, extension, and international programs. MSU's Study Abroad program, which offers 180 programs in 57 countries, is the third largest of any single-campus university in the nation.

More than a century after its agricultural beginnings, MSU has a Graduate School and 14 colleges: Agriculture and Natural Resources, Arts and Letters, the Broad College of Business, Communication Arts and Sciences, Education, Engineering, Human Ecology, Human Medicine, James Madison, Natural Science, Nursing, Osteopathic Medicine, Social Science and Veterinary Medicine.

Today, three colleges represent the central academic disciplines which most universities refer to as the liberal arts and sciences: Arts and Letters, Natural Science, and Social Science. These colleges offer outstanding undergraduate and graduate degree programs with majors in traditional disciplines while also providing special programs that enable students to obtain a broad, multidisciplinary education. The College of Education collaborates with the colleges to help prepare students to become teachers in the secondary schools of Michigan as well the nation.

Our residence hall system is designed to complement and enhance the learning experiences of our students.

The Honors College, which attracts fine young scholars nationwide, enables students to waive standard graduation requirements and undertake enriched academic programs. MSU has produced 16 Rhodes Scholars, six Marshall Scholarship winners, 14 Churchill Scholarship recipients, one Mitchell Scholar, and one recipient of the Gates Cambridge Scholarship. These scholarships are among the most distinguished and prestigious academic awards a student can receive.

Multimillion dollar, sponsor-funded programs support a wide array of outstanding research activities at MSU. Major facilities include the Plant Research Laboratory, operated with the U.S. Department of Energy as a national plant biology center; and the MSU/W.K. Kellogg Biological Station, home to one of the National Science Foundation's long-term ecological sites. In collaboration with both the National Science Foundation and the U.S. Department of Energy, the National Superconducting Cyclotron Laboratory at MSU is able to study the nuclei of the heaviest elements.

The public significantly benefits from the University through Outreach, MSU Extension Service, and the Agricultural Experiment Station which provides technical information and course work for many Michigan citizens. The Kellogg Center, one of the finest hotels and conference centers nationwide, annually hosts some 500,000 adults who come to the campus for approximately 1,400 conferences and other educational meetings.

Service to the international community is equally important. Supported by grants from the federal government and private foundations, MSU sustains educational and research assistance projects internationally. These projects have given many faculty members overseas experience and have added new dimensions to their teaching.

Michigan State University is a member of the Association of American Universities, National Association of State Universities and Land-Grant Colleges, American Council on Education, American Council of Learned Societies, International Association of Universities, Association of Graduate Schools, Council of Graduate Schools, and the Committee on Institutional Cooperation.
ACADEMIC COSTUME

In 1895, the Intercollegiate Commission, a group of leading American educators, introduced an academic costume code which by design of gowns and hoods would indicate the various degrees, and which by colors would identify the various faculties.

Three types of gowns are indicated by the code. Those worn by the bachelors have long, pointed sleeves. Those worn by masters have long, closed sleeves with the arc of a circle near the bottom. Doctor’s gowns are faced with velvet. The sleeves are full, round, and open with three bars of velvet on each sleeve. The velvet facing of the bars on the sleeves may be black or the same color as the binding of the hood.

Hoods are made of material identical with the gown and are lined in the official academic color of the institution conferring the degree (e.g., green and white for MSU, burnt orange and white for the University of Texas; blue and gold for UCLA). If the institution has more than one color, the clover is used to introduce the second color. Colored velvet is sewn between the hoods and indicates the department of faculty to which the degree pertains.

The color of the velvet of the hood is distinctive of the subject to which the degree pertains. For example, the trimming for the degree of Master of Science in Agriculture should be maize, representing agriculture, rather than golden yellow, representing science. Generally, the color for the velvet of the hood is the same as listed below for tassels.

At Michigan State University, it is customary to identify the candidates graduating from the different departments of study by tassels of the official department color as established by the Intercollegiate Code.

HONORARY DEGREE

You have had a long and distinguished career of service to the people of Michigan as a politician recognized for your honesty, integrity, and bipartisan approaches to policy issues. Your background as a fruit and vegetable farmer helped make you an effective and respected voice for Michigan agriculture and natural resources, but you have been an advocate for all.

Your public service career began in 1946 when you were appointed Lincoln Township treasurer. After serving in other local positions, you were elected State Senator, serving four terms before being elected State Senator in 1978. Your constituents re-elected you to the Senate four times. In the Senate, you chaired the Appropriations Committee and the Governing Board for the Senate Fiscal Agency. You also served as a member of the Natural Resources and Environmental Affairs Committee.

Your love and appreciation for the land are expressed in your sponsorship of legislation such as the Sand Dune Preservation Act, the Environmental Bonding Act and the Wildlife Conservation Act. You were in the forefront of sponsorship for legislation that created the Michigan Grape and Wine Industry Council.

You have offered a consistent voice in Michigan’s legislature for programs that support MSU’s land-grant mission.

HONORARY DEGREE

As the 47th governor of Michigan and the first woman elected to that position, you took office with a commitment to uplift all of Michigan’s citizens and communities, to protect Michigan families and educate children, and to run government more efficiently. You have called on the people of Michigan to work with you to accomplish these goals.

To meet your goals, you have made cabinet appointments that reflect the diversity of the state. You very early began soliciting input from citizens about issues your administration would face and established a new Constituent Services office to help citizens resolve their problems related to government services. You have maintained open communication with Michiganders as you confront the challenges of difficult economic times. You initiated a public-private partnership in which businesses lend executives to state agencies to look for ways to streamline government services and generate savings, and you created another public-private partnership to provide educators with online professional development opportunities.

Your plans for advancing Michigan include positioning the state as a leader in technology-based industries and focusing on education. You have placed a high priority on intellectual stimulation for children beginning at birth and made a commitment to assuring that children develop strong reading skills, asserting that reading is the basic skill necessary to succeed in life. You have challenged young people to contribute their skills to the communities and to use their power to change the world.

You were the first person in your family to attend college, graduating with honors from both the University of California at Berkeley and Harvard Law School. After a clerkship, you chose a career in public service, becoming a federal prosecutor in Detroit and then Wayne County Corporation Counsel, heading the county’s Law Department.

As Michigan’s attorney general, you focused on child protection, high-tech crime prevention, consumer and environmental protection, and senior citizen safety. You helped develop Michigan’s Mentoring Initiative, linking adult mentors with children who have had a brush with the justice system. You also worked with the State Bar of Michigan to introduce “Peace on the Playground,” a peer-monitoring program designed to help elementary school children solve their conflicts without violence.

For your commitment to the people of Michigan and especially to the protection and education of children, I am pleased to award you the honorary degree, Doctor of Laws, from Michigan State University.
HONORARY DEGREE

JANE LUBCHENCO

You are a renowned scientist, a highly effective teacher and mentor, and an influential spokesperson for science and technology policy. Through your research and service, you have helped set the future path for ecological science and policy.

In your research at Oregon State University you have discovered fundamental ecological relationships among animals and plants in complex coastal ecosystems, and your publications on this work have become "Science Citation Classics." This work has played a critical role in raising awareness of the value of protecting marine areas. You have helped policy makers and the public understand that ecosystems provide food, fiber, medicines, and services like flood control and purification of air and water and that these benefits affect health, the economy, social justice, and national security. Your work has helped explain the value of such benefits and the cost when they are disrupted.

You believe that scientists must do the best possible science and also communicate what they believe will be the likely consequences of policy options. Through your work with the Aldo Leopold Leadership Program that you helped found, you have helped 60 other ecologists since 1998—including one at MSU—become more effective communicators. You are an exemplary communicator yourself, called on by government officials and news media to explain the ecological implications of global change. You were one of the first scientists to advocate the importance of incorporating clearly stated ecological principles into public policy.

Your peers have recognized your accomplishments by electing you a member of the National Academy of Sciences and president of the American Association for the Advancement of Science and the Ecological Society of America. You have served on numerous commissions and advisory councils for such organizations as the National Science Board and the Pew Oceans Commission. As a member of the board of the David and Lucile Packard Foundation, you helped make the foundation a leader in support for the emerging field of sustainability science, which you helped develop.

For your commitment to making the world a better place by exploring ecosystems and then sharing the knowledge you develop, I am pleased to award you the honorary degree, Doctor of Science, from Michigan State University.

HONORARY DEGREE

GLENN S. SCHAER

You are a successful businessman and a dedicated member of your community who values education, family, and hard work.

As the second of eight children, you took on the responsibility of running your family's dairy farm after your father died when you were 14. Though diligent in your responsibilities, you were eager to attend college and build a different kind of career for yourself. After earning an accounting degree at Michigan State University you did just that. From your first job at Peat Marwick Mitchell and Co., you went on to earn an MBA and move through executive ranks at several firms until you joined Pacific Life Insurance Company in 1986 as vice president for corporate finance. In 1992 you were elected senior vice president and chief financial officer and in 1995 were elected president. As president, you set a goal of increasing the company's size and reputation, and through your leadership, it has become one of the largest and most prestigious financial services companies in the world.

You have provided invaluable new ideas for the Department of Accounting and Information Systems and helped develop a strategic plan for the Eli Broad College of Business that resulted in a major improvement in the college's national reputation. As a member of the search committee for a new dean for the college, you were a leader in looking for someone with a strong commitment to undergraduate education. In recognition of the role MSU played in your success, you have generously supported your alma mater financially in many ways since your initial gift of one dollar shortly after you graduated.

You advise young people to work 10 percent harder in order to get 100 percent farther. It's a philosophy you apply in all areas of life with the result that you are known as an outstanding business leader, a dedicated alumnus, a devoted husband and father, and an active member of your community, serving charitable organizations that include the YMCA, the American Cancer Society, and the Court Appointed Special Services Advocates that assists abused children.

For your generous support of business education at Michigan State University and your dedication to your work and community, I am pleased to award you the honorary degree, Doctor of Business, from Michigan State University.

HONORARY DEGREE

GEORGE A. MCMANUS, JR.

You are a tireless supporter of Michigan's agriculture and natural resources and the industries based on them. You are known for your keen mind and depth of knowledge about agricultural production and marketing. You have been effective at integrating diverse information to solve complex problems.

You began your career as a district fruit marketing agent with the MSU Cooperative Extension Service (now MSU Extension), helping growers organize Michigan's first cherry bargaining program. You subsequently became Extension director and agricultural agent for Grand Traverse County. In that position you worked with cherry processors to establish the Cherry Central Cooperative, a federated marketing cooperative, and a national tart cherry promotion program. More recently, you served as chair of the board of Cherry Growers, Inc., the largest cherry processor in the country. Throughout your career you focused on helping the fruit industry improve marketing opportunities and address financial issues, and you fostered the development of industry leaders.

After retiring as Extension director for Grand Traverse County, you served as a State Senator, chairing the appropriations subcommittee on agriculture and natural resources and serving on the higher education, retirement, and capital outlay subcommittees. You were the principal architect of the groundwater stewardship program that encourages conservation measures to minimize leaching of nitrates and herbicides into Michigan's groundwater. You authored legislation to create agricultural renaissance zones that encourage investment in the food processing industry. You introduced and helped pass legislation to retain the cap on property tax assessments when farmland is passed to the next generation, helping young people get into farming and maintaining land in agriculture.

A graduate of Michigan State University with both bachelor's and master's degrees, you have supported research and education that advances agriculture through your advocacy for Michigan State University's Animal Industry Initiative, Project GREEEN (Generating Research and Extension to Meet Economic and Environmental Needs), and the Diagnostic Center for Population and Animal Health. You are an ardent supporter of this university's land-grant philosophy that serves the people of Michigan through research, education, and extension activities that meet human needs.

For your exceptional record of public service and genuine concern for the residents of Michigan, I am pleased to award you the honorary degree, Doctor of Agriculture, from Michigan State University.

PETER MCPHERSON, President, Michigan State University

PROCESIONAL
The MSU Wind Symphony
JOHN L. WHITWELL, Conductor

THE STAR SPANGLED BANNER
--------------------------Key--------------------------
Oh, say can you see by the dawn's early light
What so proudly we hailed at the twilight's last gleaming?
Whose broad stripes and bright stars thru the perilous fight,
O'er the ramparts we watched were so gallantly streaming?
And the rocket's red glare, the bombs bursting in air,
Gave proof thru the night that our flag was still there.
Oh, say does that star-spangled banner yet wave
O'er the land of the free and the home of the brave?
(The MSU Wind Symphony and Audience, led by Lara Troyer)

MOMENT OF SILENCE

PRESENTATION OF HONORARY DEGREE CANDIDATES
ROBERT J. HUGGETT
Vice President for Research and Graduate Studies
Michigan State University

ADDRESS
JANE LUBCHENCO
Wayne and Gladys Valley Professor of Marine Biology
OSU Distinguished Professor of Zoology
Oregon State University
Corvallis, Oregon

SPECIAL MUSIC
Academic Festival Overture
The MSU Wind Symphony
Arranged by Joseph Brahms

INTRODUCTIONS AND REMARKS
The Honorable P. DAVID L. PORTEOUS
Chairperson, The MSU Board of Trustees

CONFERRING OF DEGREES
PETER MCPHERSON
President, Michigan State University

ALMA MATER
M.S.U., We love thy shadows
When twilight silence falls,
Flushed deep and softly paling
O'er thy ivy-covered halls.
Beneath the pines we'll gather
To give our faith so true,
Sing our love for Alma Mater
And thy praises, M.S.U.
(The MSU Wind Symphony, Troyer and Audience)

RECESSIONAL
The MSU Wind Symphony
