CONGRATULATORY LETTERS

December 2007

Dear Graduates and Families:

At Michigan State University, we recognize that graduation is an important milestone for our graduates and their families. At commencement ceremonies we acknowledge our graduates for their accomplishments at Michigan State University. We also acknowledge the encouragement and support that family and other significant individuals have provided them. Reaching this milestone marks the completion of a degree program and the beginning of the next chapter in each student's life.

December 2007

Dear Graduates and Families:

Congratulations to our graduates and your families! As President Simon encourages you to come home often, so do I!

More than three decades ago, I earned a bachelor's degree at Michigan State University, and although I earned advanced degrees at other institutions, that first college degree has served me well. I am pleased to be here at a time when Michigan State University is extending its academic reach to new places around the world. You have had the opportunity to study and to expand your views, and to grow as individuals and global citizens.

As a student of MSU you are a member of a vibrant community united by the common interest we share as scholars. I hope that, even after earning your degree, you will always remain members of this community—that is, be hungry to learn, to seek new knowledge and to share and apply that knowledge for the betterment of others.

Our graduates go forth as caring global citizens, and although we bid you farewell and wish you a very bright future, we invite you to come home often.

Sincerely,

Kim A. Wilcox, Ph.D.
Provost and Vice President for Academic Affairs

CONGRATULATORY LETTERS

MICHIGAN STATE UNIVERSITY

Michigan State University, founded in 1855, is defining what it means to be a land-grant university in the twenty-first century. From its roots as the nation's pioneer land-grant institution, the university has had a long tradition of using the research and knowledge developed at MSU to create practical solutions that make a difference in the lives of individuals and in communities across Michigan and around the world. As a major public university with global reach, MSU continues this proud tradition of advancing knowledge and transforming lives.

The East Lansing campus looks different than it did in 1855. 5,200 acres of land encompass 579 buildings. 15,000 acres throughout Michigan are used for agricultural, animal, and forestry research.

MSU has more than 45,000 students from all 83 counties in Michigan, all 50 states in the United States, and about 130 other countries. More than 460,000 Spartan alumni live around the globe.

Since its agricultural beginnings, MSU has grown to 17 degree-granting colleges offering more than 200 programs of study, and is the only university in the country with three on-campus medical schools. According to both Newsweek and MSNBC, MSU ranks as one of the Top 100 Global Universities.

The Honors College attracts young scholars internationally and enables students to waive standard graduation requirements and undertake enriched academic programs. MSU has produced more Rhodes Scholars in the past 25 years than any other Big Ten school.

Sponsored research totaled nearly $377 million in 2006-07. The top federal funding agencies included: National Science Foundation, U.S. Department of Health and Human Services, and U.S. Department of Agriculture. Other externally funded national and international research programs include the MSU-U.S. Department of Energy Plant Research Laboratory, the Center for Advancing Microbial Risk Assessment, the Composite Vehicle Research Center, the U.S.-China Center for Research on Educational Excellence, the Center for Advanced Study of International Development, and the Center for International Business Education and Research. The National Superconducting Cyclotron Laboratory is the premier rare isotope research facility in the nation.

MSU Extension reaches into all 83 counties in Michigan to provide practical, university-based knowledge. Providing technical information and course work for Michigan citizens, the Michigan Agricultural Experiment Station funds the research of more than 300 scientists on campus and at a network of 12 field research stations across the state.

University Outreach and Engagement connects faculty with external audiences to address community issues. MSU Global extends academic and professional degree and certificate programs to off-campus learners, with more than 13,000 enrolled in 29 degree and certificate programs, making MSU one of the top three in online learning in the Big Ten.

The national leader in study abroad among U.S. public universities during 2006-07 (according to the Institute of International Education Open Doors report), MSU has more than 245 programs on all continents in 62 countries. 2,975 students studied abroad through MSU during 2006-07.

Michigan State University is a member of the Association of American Universities, National Association of State Universities and Land-Grant Colleges, American Council on Education, American Council of Learned Societies, International Association of Universities, Association of Graduate Schools, Council of Graduate Schools, and the Committee on Institutional Cooperation.
ACADEMIC COSTUME

In 1895, the Intercollegiate Commission, a group of leading American educators, introduced an academic costume code which by design of gowns and hoods would indicate the various degrees, and which by colors would identify the various faculties.

Three types of gowns are indicated by the code. Those worn by the bachelors have long, pointed sleeves. Those worn by masters have long, closed sleeves with the arc of a circle near the bottom. Doctoral gowns are faced with velvet. The sleeves are full, round, and open with three bars of velvet which by design of gowns and hoods would indicate the various degrees worn by masters have long, closed sleeves with the arc of a circle near the bottom. Doctoral gowns are faced with velvet. The sleeves are full, round, and open with three bars of velvet which by design of gowns and hoods would indicate the various degrees.

The sleeves are full, round, and open with three bars of velvet which by design of gowns and hoods would indicate the various degrees. The Michigan State University mace, 42 inches in length, includes important institutional symbols in its finial, crown, and shaft. The finial is the circular University seal, which includes an image of "Old College Hall." This oak-carved seal derives from an 1869 State Board of Agriculture (now, Board of Trustees) authorization for a woodcut to be used as the frontispiece of the college academic catalog. College Hall, built in 1856, was the first instructional building erected in the United States for the teaching of scientific agriculture. When it collapsed in 1918, John Beaumont (class of 1882) provided funds to erect Beaumont Tower in 1928 at the same location. The tower stands as a symbol of Michigan State's beginnings as the first land-grant college dedicated to teaching "agriculture and the mechanic arts" with "a liberal and practical curriculum."

The mace's crown is trimmed with a maple samara and acorn pattern carved from walnut, a pattern drawn from the "Michigan State College" limestone relief at the Abbot Road campus entrance that also adorns markers at other campus entrances. An image of Beaumont Tower lies in the crown's oak center. Below the crown is the cylindrical shaft, whose alternating, horizontal oak and walnut bands descend to a brass tip. Its oak is purported to be "Beaumont oak," from one of the original saplings surrounding College Hall. Its walnut is from a tree removed to clear land for the Wharton Center for Performing Arts of 1982.

In its soaring verticality, Beaumont Tower continues to inspire the MSU community and is an appropriate symbol for the MSU mace. As President Robert S. Shaw (1928-41) stated at the tower's dedication, it has served as "a unifying factor" to remind us, even through our individual activities, of the overall mission of Michigan State University: to inspire us by "appealing to many of the better things in us" and to encourage us to "live up to higher standards, scholastically, socially, morally, and spiritually in all of our affairs."
Peter Löscher

You are known as a straightforward and down-to-earth leader with an outstanding international reputation and wide-ranging experience in business development and strategy. You are innovative, receptive to change, respectful of tradition, and insistent on ethical business practices.

Your restructuring efforts as president of Merck's Global Human Health Unit were praised by Wall Street analysts and other pharmaceutical companies. In your time there, the company received FDA approval for several products and saw substantial sales growth. As president and CEO of GE Healthcare Bio-Sciences and GE Healthcare in Britain you led a company developing medical technologies and services to improve patient care.

This year you took on the challenge of leading a large, complex German electronics and engineering conglomerate when you became CEO at Siemens AG, Europe's largest engineering company with products ranging from hearing aids to trains. To move the company into a more profitable and secure future, you are setting clear lines of responsibility, encouraging a culture of teamwork and transparency, and aiming for a faster, more focused organisation. You recognize the value of education for developing highly qualified workers who can succeed in such high-tech, global businesses.

Your international management experience began with the Hoechst Group, where you worked for eleven years in positions in Germany, Spain, Britain, Japan, and the United States. As head of corporate planning at Hoechst AG in Germany, you were a leader in reorganizing the company from a broad conglomerate to a focus on life sciences. You accomplished this major restructuring by offering support and resources to employees feeling threatened by the changes.

Your education was also international. You studied economics and business in Vienna, Hong Kong, and the United States. You speak five languages.

For your commitment to global partnerships, your contributions to advancing technology to improve life, and your dedication to integrity in business, I am pleased to award you the honorary degree Doctor of Engineering from Michigan State University.

Winston Elliott Scott

You are known as an accomplished astronaut and aviator and a leader who values and promotes the importance of education for enabling young people to achieve their dreams.

Your musical talent and personal determination led you from a largely segregated and disadvantaged public school education to college where you discovered an aptitude for math and engineering. In the Navy, you earned a master's degree in aeronautical engineering and logged more than 5,000 hours of flight time in twenty different fixed-wing and rotary-wing aircraft, flying as a production test pilot and a research and development project pilot.

As an astronaut, you traveled more than ten million miles on two Shuttles, Endeavour and Columbia, logging more than 24 days in space as a mission specialist. Your three spacewalks, one of those walks, you helped recapture a malfunctioning satellite called Spartan-201. On other spacewalks, you evaluated construction techniques for the International Space Station and the resistance of spacesuits to extreme cold.

For your personal accomplishments and your commitment to scientific exploration and the education of scientists and engineers, I am pleased to award you the honorary degree Doctor of Engineering from Michigan State University.

Ian Wilmut

You are known for innovative research that has made you one of the foremost pioneers in the field of animal genetic engineering. Your discovery that adult cells can be reprogrammed to an embryonic state capable of directing development of a new offspring revolutionized developmental and reproductive biology. You are best known for the application of this discovery that produced the sheep called Dolly, work that captured the attention of the world, but your research has had much broader impacts on science and medicine.

Your early research on reproductive technologies in domestic animals led to better understanding of the causes of prenatal death in sheep and pigs and the technology that allows embryos to be frozen for storage. This mechanism is now commonly used for human fertility treatments as well as for animal breeding.

This emphasis on improving life for people and animals underlies all of your research. The experiments that resulted in the cloned sheep Dolly began as a search for a way to generate recombinant human proteins in domestic animals. Your goal is to find a means of producing animals that manufacture valuable proteins that are difficult to produce elsewhere.

This effort lays the groundwork for solving the major challenges facing cell and tissue transplantation: the production of compatible cells for treating diseases including heart disease, diabetes, Parkinson's disease, and spinal cord injury. Your latest research attempts to make embryonic stem cells from cells of patients with Amyotrophic Lateral Sclerosis (Lou Gehrig's disease) in an effort to develop a new tool for understanding and treating this always fatal disease.

You are known as a fair and honest leader of your research team. As director of the Scottish Centre for Regenerative Medicine you lead interactive interdisciplinary teams to build strong academic and industrial collaborations working to move research toward therapies.

For your commitment to advancing knowledge that improves lives, I am pleased to award you the honorary degree Doctor of Science from Michigan State University.
America the Beautiful

O beautiful for spacious skies
For amber waves of grain,
For purple mountain majesties
Above the fruited plain!

America! America!
God shed his grace on thee
And crown thy good with brotherhood
From sea to shining sea!

Star-Spangled Banner

Oh, say, can you see, by the dawn's early light,
What so proudly we hailed at the twilight's last gleaming.
Whose broad stripes and bright stars, through the perilous fight,
O'er the ramparts we watched were so gallantly streaming?
And the rockets' red glare, the bombs bursting in air,
Gave proof through the night that our flag was still there.
O, say, does that star-spangled banner yet wave
O'er the land of the free, and the home of the brave!

Alma Mater

M.S.U., We love thy shadows
When twilight silence falls,
Flashing deep and softly paling
O'er icy-covered halls.

Beneath the pines we'll gather
To give our faith so true,
Sing our love for Alma Mater
And thy praises, M.S.U.

The lyrics of the Alma Mater were written by Bernard Traynor (MSC Athletic Department, 1925-1927). The melody is based on Donizetti’s Lucia di Lammermoor. It was not until March 30, 1949, after a vote by the students, that the popular song on campus known as the MSC Shadows was finally adopted as the official Alma Mater. Today, the Alma Mater is known as the MSU Shadows.

The University acknowledges candidates for the bachelor's degree who will graduate as Academic Scholars (A), from the Honors College (H), With Honor (*), or With High Honor (**). Academic Scholars completed a two-year honors program including at least four honors-caliber courses. Honors College graduates are academically talented students who have participated in rigorous, highly individualized programs of study, including at least eight honors-caliber courses. Graduation Honors. The current minimum grade-point average for seniors graduating With Honor is 3.5 and those graduating With High Honor is 3.8, which is approximately 20 percent of graduating seniors who have earned the highest grade-point averages. Recognition of graduation honors in the commencement program is based on the grade-point average of all work at MSU completed prior to the opening of the semester of graduation. To be eligible for graduation honors, transfer students must earn a minimum of 50 semester credits at MSU.

RESERVE OFFICERS TRAINING CORPS

Douglas W. Estry, Associate Provost for Undergraduate Education and Dean of Undergraduate Studies

The following students have completed their ROTC education at Michigan State University and have received their commissions as reserve officers of the United States Air Force or the United States Army.

Graduated—Summer Semester, 2007

Veterinary Technology
* Theresa J. Dennis
Jennifer Ann DeVoe
Stephanie Jo Herrbach

Veterinary Medicine
Michelle Lynn Griffin
Melissa Kay Jager
Sarah Ann Kleinhach

Candidates—Fall Semester, 2007
Star-Spangled Banner

Oh, say, can you see, by the dawn’s early light,
What so proudly we hailed at the twilight’s last gleaming.
Whose broad stripes and bright stars, through the perilous fight,
O’er the ramparts we watched were so gallantly streaming?
And the rockets’ red glare, the bombs bursting in air,
Gave proof through the night that our flag was still there.
O, say, does that star-spangled banner yet wave
O’er the land of the free, and the home of the brave!

Alma Mater

M.S.U., We love thy shadows
When twilight silence falls,
Flushing deep and softly paling
O’er ivy-covered halls.

Beneath the pines we’ll gather
To give our faith so true,
Sing our love for Alma Mater
And thy praises, M.S.U.

The lyrics of the Alma Mater were written by Bernard Traynor (MSC Athletic Department, 1925-1927). The melody is based on Donizetti’s Lucia di Lammermoor. It was not until March 30, 1949, after a vote by the students, that the popular song on campus known as the MSU Shadows was finally adopted as the official Alma Mater. Today, the Alma Mater is known as the MSU Shadows.

COLLEGE OF ENGINEERING

Satish S. Udpa, Dean
Graduated—Summer Semester, 2007

Degree of Master of Science

Kinesiology
Seungyoun Hwang

Civil Engineering
Hui Chen
Shiyei Chen
Jana Ignerova Czudaszay
John Russell Enfield
Timothee Joseph Likens
Pallavi Poolebray
Sudharsan Sankaranarayanan

Computer Science
Gregory Roger Brown
Carl Dassarma

Electrical Engineering
Minghong Cai
Michael Scott Kirkpatrick
Martin Douglas Povilaitis

Mechanical Engineering
Zhenwen Peng
Lester Michael Simpson
Jacob David Swury
Oghoide Oluwemimi Udohho
Nasiraudin Robert Usher
Luma Karihi Vasiljevic
Stephen Allen Ziel

Materials Science and Engineering
John Wendell Foltz IV

Environmental Engineering
Vijaya Srinivasan

Candidates—Fall Semester, 2007

Civil Engineering
Nicholas Andrew Brake
Rustin Sprite Fish
Ramneek Palmaneia

Molteni Demirkus
Daniel Mark Findler
Syed Idris-ud-Din
Folarin Oludapo Olu

Electrical Engineering
Jason David Beth
Tony Onah Davis
Jiarong Ying-Mei

Environmental Engineering
Wesley Stanion Edwards
Renee Ann Fennner

Mechanical Engineering
