EPC: ‘No consensus’ on proposed college

The Academic Council Tuesday voted to accept the conclusions of the University Educational Policies Committee (EPC) regarding its study of the proposed College of Urban Development and Social Change.

The Council further asked the EPC to recommend the “most effective organizational structure” to implement the University’s strengthened and broadened commitment to solving urban problems.

Approval came after long debate, at which time the Council members expressed concern over the emotionalism of the issue and alleged lack of impartiality. But a motion to establish a separate group to take on the EPC’s unfinished charge was defeated.

The Council’s action authorizes the EPC “to go beyond its original charge — which was to evaluate the college proposal from the Center for Urban Affairs.” EPC Chairman Lester Manderscheid, professor of agricultural economics, told the Council that in evaluating the proposal, the committee looked at broad educational policies involved: The proposed college’s mission, validity, possible duplication of existing programs, and financial implications.

Manderscheid said that because of the complex issues involved and because evidence obtained by the EPC is at times either “scanty or contradictory,” the committee needs to look at a range of alternatives to the college, as well as at the college, and to study implications of each.

The EPC was then directed to present its recommendation to the Provost and to the Council as soon as possible.

Degrees set for 1,600 at Sunday’s two commencement ceremonies

Commencement ceremonies for nearly 1,600 candidates will be held Sunday (March 12) in the Auditorium.

The total includes 1,033 candidates for the bachelor’s degree, 444 for the master’s, 118 for the doctoral, 1 for the specialist degree.

Advanced degrees will be awarded at 10 a.m. and baccalaureate degrees at 3 p.m.

Vernon E. Jordan, executive director of the National Urban League, will speak at the afternoon ceremonies.

Jordan, who will receive an honorary doctor of laws degree at the ceremonies, has been in the forefront of civil rights activities for many years as executive director of the United Negro College Fund, Georgia field director for the National Association for the Advancement of Colored People, and as an attorney - consultant with the U.S. Office of Economic Opportunity.

Also receiving honorary degrees will be Argentina author Jorge Luis Borges, doctor of humane letters; Francis E. Ferguson, president of Northwestern Mutual Life Insurance Company, doctor of laws; and William W. Keeler, president of Phillips Petroleum Company, doctor of laws.

On page 5 of today’s paper, an MSU faculty member reports on one of the honorary degree recipients.

The winter has ended...

... at least as far as the News-Bulletin’s publication schedule is concerned. But our first spring issue will appear March 30. Deadline for that issue is Tuesday, March 28.

Not only leashed, but someone on the other end

It is now illegal to bring an unleashed pet onto the MSU campus, or to bring any animal into any University building or onto a University bus, according to the pet ordinance approved by the Board of Trustees Feb. 25.

Not only must the animal be leashed, but there must be a person holding onto the other end of the leash, the ordinance states.

Animals are also not to be brought into such areas as the Real Botanical Gardens or the Horticulture Gardens when such areas are posted to prohibit the presence of animals.

Exceptions to the ordinance include seeing-eye dogs for the blind, animals being brought to the veterinary facilities for treatment or research, animals being transported and remaining inside such vehicles as cars, trucks or trailers, and animals being brought to events sponsored by departments or registered student organizations. The ordinance, developed by the University Committee on Buildings, Lands and Planning and approved by the Academic Council last fall, is the result of complaints from faculty, staff and students, about cleaning problems and injuries (i.e. dog bites).
22 named to lifelong education task force

Twenty-two persons, including 12 faculty members and administrators, have been named to the Presidential Task Force on Lifelong Education.

The task force's immediate task is to make an intensive study of the University's long-standing commitment to continuing and adult education. It will also examine the possibilities of developing a lifelong education component to respond more effectively to the growing needs of Michigan citizens.

Presidential Wharton has asked the group to aim for at least a preliminary report by Sept. 1, and a final proposal by the end of the year.

Supported by an $80,000 grant from the Kellogg Foundation, the task force is an outgrowth of one of the recommendations from the Presidential Commission on Admissions and Student Body Composition.

Wharton said that universities must respond to the unarticulated needs of a new constituency "as well as widen access to traditional higher education for young people. He described the task force as a major step here in providing educational service for our adult population."

Wharton will be chairman of the task force, and Provost John E. Cantlon will be vice chairman. William R. Wilkie, special assistant to Wharton, will direct the task force.

Appointees include: Kuvlev Olouz, dean of business; Lawrence Von Tiersch, dean of engineering; Clarence Wierer, dean of social science; Richard Clapier, director of libraries; Robert Davis, assistant provost; Armand Hunter, director of continuing education; and George McIntyre, director of cooperative extension.

Faculty appointees are: Patricia Bamer, Center for Urban Affairs; Alex Cade, counseling, personnel services and educational psychology; Mildred Erickson, American thought and language; Michael Harrison, physics; Russell Kleck, administration and higher education; Daniel Kruger, labor and industrial relations and Joseph Spielberg, anthropology.

Student members are: David Anderson and James Votora, both graduate students, and Mark Jaeger, undergraduate.

Bruce Osterink of Grand Rapids and Edward Rothman of Bloomfield Hills are alumni members. Members at large are: Tony Benavides, director of the Cristo Rey Community Center, Lansing; E. M. Minutiz of Howell and Rev. E. C. Hawkins, pastor of the Friendship Baptist Church, Lansing.

Continuing Education Service: A quick guide

With the naming of the Presidential Task Force on Lifelong Education, there has come a variety of questions about the Continuing Education Service.

Members of the task force will undoubtedly spend many weeks seeking answers especially those involving the "why" and "how" aspects of CES.

Here, at least partially, is a brief overview of the Continuing Education Service.

The CES might be called the expression of MSU's commitment to extending educational opportunities beyond the campus population and outside the extension Service. Viewing these shares in developing and using the CES through assistant deans or directors.

Nerve center for the service is the Kellogg Center for Continuing Education housed in the administrative offices of the University.

University Extension may be the best known CES division. Under Melvin C. Buchman, it has helped in many Michigan cities. It is offering courses through regional offices in Marquette, Traverse City, Grand Rapids, Benton Harbor, Saginaw - Flint, Rochester and East Lansing. More than 73,000 people took part in these courses last year, and many others used the regional offices in contacts with MSU.

University Extension's second section - the Evening College under Charles A. Hager - serves some 4,000 adults by arranging noncredit courses on varied topics.

Working even further afield is the University Public Service, Conferences and Institutes Division, headed by Floyd G. Parker. Its Office of International Extension, directed by Sheldon Chemney, produces credit work for students and adults traveling or living abroad, taking classes to such scattered places as Tokyo, London and Bogota. And throughout Michigan it develops noncredit courses aimed at greater international understanding.

In contrast, this division's Office of University Conferences and Institutes, directed by Clayton Wells, attracts adults from around the world to hundreds of educational events, mostly at Kellogg Center.

Also extending beyond the state boundaries are some operations of the Special Programs Division under Louis A. Doyle. The University of the Air, directed by Duane L. Gibson, supplies noncredit courses for credit or just for pleasure. Under Donald F. Aschom, the Insurance Program's institutes help some 1,500 insurance professionals each year to develop their expertise. Paul L. Moore directs the Nursing Home Administration Program. It helpfully provides 400 persons with their state certification educational requirements, and the Mill Work Home Study Program, the service's only correspondence course.

The University also appoints to the Institute for Community Development and Services. Directed by Duane L. Gibson, they work in interdisciplinary research and educational efforts to help governmental units of all sizes.

The Highway Traffic Safety Center, under Gordon H. Shehe, also works with a wide range of governmental units to help reduce motor vehicle deaths and other traffic problems. These involve teaching, including 35 credit courses, research and planning, and the dissemination of safety information.

Hunter directs the University Broadcasting Services, radio (WKR-A - FM - AM under Richard D. Estell) and television (WNSB under Robert D. Page).

Abrasum Planitarian, directed by Von Donlen, is another division of the historic facility and its use for adult classes.

Another CES function is the Adult Counseling Service, coordinated by Dorothy R. Ross. It helps adults use the Counseling Center for assistance in career and life planning.

And to assist the many Continuing Education Service sections, several University service operations - the Business Office, Library, Office of Research and Information Services - have satellite offices in Kellogg Center.

- RICHARD E. HANSEN

DONALD YATES, professor of romance languages, was elected president of the International Institute of Latin American Literature at that group's 15th Congress in Lima, Peru. At the same meeting, MSU was chosen site for the North American session of the 1973 congress.

THOMAS W. JENKINS, associate professor of anatomy, is the author of "Functional Mammalian Neuroanatomy," a textbook detailing the nervous system in mammals. It is published by Lea and Febiger of Philadelphia.

Science notes

A huge accelerator is fired up

For a time at least, the United States leads the hardware race in high-energy physics. Last week the National Accelerator Laboratory at Batavia, Ill., fired its beam of protons to 200 billion electron volts, and now MSU physicists are taking the first steps in experiments with the monstrous machine.

Until last week the U.S.S.R. had the biggest particle accelerator, a 70 - billion electron volt device.

Why all the acceleration just get to part of the universe.

Put simple, the accelerating machines are built to help scientists learn more about different kinds of matter of the universe. The idea is that the more the energy used, the more the knowledge gained. And MSU physicists - including Mario Abolins, K. Wendell Parker, M. Ming,

Ma, Robert J. Spralf and Gerald A. Smith - will be among the first of the high-energy physicists to use the unique machine.

Costing on the order of $300 million, the accelerator is expected to be adjusted accurately enough to handle its first experiments sometime before this fall. It boasts a single fundamental instrument, and no one knows when it will be accurate enough to begin its first peek into the heart of an atom. In a few years the energy of the proton accelerator is expected to be raised to 400 billion electron volts.

As a result of the "world machines" (already Soviet scientists are preparing their experiments at Batavia), high-energy physics has received hundreds of fundamental particles of matter.

What atomic insights come from the big machines is anybody's guess. No one knows what will happen at 200 billion electron volts - yet, MSU physicists will be there to see and to learn first-hand.

The urban college proposal
Toward more "human problem solutions"

The educational policy committee's (EPC) report on the proposed College of Urban Development and Change is based partly on an eight page proposal completed on Dec. 7, 1971. That document is an updated abstract of the initial 122-page proposal submitted last September by the Center for Urban Affairs (EPC's provost, Charles Manderscheid).

Following are excerpts from the updated Dec. 7 proposal.

RATIONALE

Prospective colleges within this University do not facilitate assembling the necessary subject matter (in urban and social problems). Further, the departments and colleges with the closest interests have evolved as discipline-oriented entities which tend to develop as silos (i.e., are adimensional as either sociological or psychological, or economic). Current opinion suggests that traditional academic preparation may be inadequate for specialization in experimental human problems.

It is urged that each of the social and natural sciences continue to contribute and improve its specialized knowledge about each human problem. The existing applied college system of foundations and federal agencies... is intended that the proposed college be problem oriented...in the generic area of racism...the forces that produce and perpetuate their present missions. It appears equally clear that a new integrated multidisciplinary body of knowledge needs to be generated which organizes and coordinates the approaches of the various sciences in a body of theory about human problem solutions.

SPECIAL CHARACTERISTICS

It is intended that the proposed college be problem oriented...in the generic sense including such major and persistent problems as...ethnic minority, urban health, urban education, urban housing, rehabilitation of those in conflict with society, and so forth...

...the work of the new college should be multidisciplinary (and)...focus will be upon problems rather than disciplines per se. However, it will be essential that the views of the main disciplines that can contribute to the solution of the problem be brought together in a common body of knowledge.

A third feature will be the combination of traditional coursework, field study in the community and applied research.

A fourth unique characteristic of the college will be, the emphasis upon the formulation, development and testing of strategies and tactics for creative and constructive social change consistent with humanizing values and scientific knowledge.

THE COLLEGE STRUCTURE

Since the unit will have a significantly different mission than most disciplinary-oriented groups, it is felt undesirable to subsume the unit in any college. A freestanding college would permit greater multidisciplinary interchange with existing colleges in the University.

NAME AND FOCUS OF THE COLLEGE

...A unique feature of the proposed College (of Urban Development and Social Change) is a broad and central examination of racism—the factors that brought it into being, a comprehension of its nature, and the implications for disciplinary-oriented groups, it is intended that the proposed college be problem oriented...in the generic area of racism...the forces that produce and perpetuate their present missions.

...The proposed college should focus on urban development as a social process. Its purpose would be to create a level of social consciousness that would be available for a broad range of social change and development activities in the community and...as a social process. It is intended that the proposed college be problem oriented...in the generic area of racism...the forces that produce and perpetuate their present missions.

The proposed college should focus on urban development as a social process. Its purpose would be to create a level of social consciousness that would be available for a broad range of social change and development activities in the community and...as a social process. It is intended that the proposed college be problem oriented...in the generic area of racism...the forces that produce and perpetuate their present missions.

...The proposed college...will not be restricted beyond the requirements of the college to draw on the expertise of the faculty, students and consultants and methods (could)...It is recognized that the instructional model (field study, research and action programs) is costly if full and adequate supervision is to be maintained...

The college-cum-university will comply with all University general degree requirements...

For this reason, the number of students admitted to "areas of concentration" will not be limited. It will be possible to admit a number of students with an "area of concentration" will be from 50 to 100 in the entering class.

FINANCIAL AND FACULTY RESOURCES

According to the Office of Institutional Research, the present full-time-equivalent faculty at the Center for Urban Affairs is 22.75...Legends of the Academic Budget Office indicate available funds in CUA for approximately an additional 7.25 FTEF, bringing the faculty total to 30.0 (instructor through professor levels). This faculty is available without withdrawing CUA funds from ongoing projects...

The 30.0 FTE faculty would provide the new College...with a larger faculty than that of Lyman Briggs and James Madison, or a faculty somewhat smaller than that of Justin Morrill, or a faculty three-fifths the size of human ecology and communication arts.

EPC conclusions on urban proposal...

The PROPOSAL for the new urban college has been in the educational policies committee since January. After intensive work with the proposal during the winter term (including some 11 hours of discussions last Thursday and Saturday), the EPC has almost completed a 13-page report on the proposal. Manderscheid said the full report should be ready for public hearing by the end of the winter term.

And he emphasized that the EPC deliberations within this context were in the area of planning, not that of Lyman Briggs and James Madison, or a faculty somewhat smaller than that of Justin Morrill, or a faculty three-fifths the size of human ecology and communication arts.

And he emphasized that the EPC deliberations within this context were in the area of planning, not that of Lyman Briggs and James Madison, or a faculty somewhat smaller than that of Justin Morrill, or a faculty three-fifths the size of human ecology and communication arts.
MSU's Donald Yates and author Jorge Luis Borges.

A literary giant riding the wave of admiration

Note: Donald Yates, professor of romance languages and author of following story, was first introduced in the writing of Jorge Luis Borges in 1933, when he was permitted permission to translate and later credit some of the main author's work. The two met in 1962 when Yates won a Robert K. Storl Research Fellowship, and Yates has visited Borges three times since, Borges will be here next week to receive an honorary degree and to lecture. Yates will then accompany Borges on the latter's lecture tour of this country under the auspices of the Department of State.

Jorge Luis Borges' literary career spans nearly 50 years, during which he evolved from poet to critic to novelist, quickly beginning to spread his greatest living writer throughout the English-speaking world.

In the 1962 year-end listing of "best books", Time included Borges' "Labyrinths", "The Aleph", and "Ficciones". These two collections of prose "fictions" and essays were the first volumes of Borges' writings to appear in English. With their publication, Borges' fame, already firmly established in Europe, quickly began to spread throughout the English-speaking world.

The wide acclaim for his work today shows no sign of abating, and now, at 72 almost totally blind, Borges journeys to MSU at the very crest of a great wave of popularity and admiration. He is a prominent candidate for the Nobel Prize for Literature.

Borges' writings are very tense, controlled adventures of the mind that all seem to be played out within the confines of his intellect. Borges' fictions are concise, rarely drawn out beyond eight or nine pages, and typically dealt not with sympathetic, feeling human beings, but rather with ideas.

Philosophical and metaphysical ideas tend to replace people in Borges' stories, and speculation on concepts such as time, space and identity occupy the place that in other writers' work would be taken up by sentimentals or psychological probing.

He once declared modestly, but significantly: "I am quite simply a man who uses perplexities for literary purposes."

Borges, retired professor of American and English literature at the University of Buenos Aires and, since 1955, director of the National Library in that city, made one previous visit to MSU, November of 1969 when he gave a memorable lecture. On Monday (March 13) Borges will speak informally with students and faculty at 4:30 p.m. in the Gold Room of the Student Union. At 8 p.m. that evening in Fairchild Theater he will give a public lecture in English entitled "A Writer's Compass."

What MSU is reading

Beyond Freedom and Dignity, by B. F. Skinner (3)

Bury My Heart at Wounded Knee: An Indian History of the American West, by Dee Alexander Brown (3)

The Last Whole Earth Catalog, edited by Stewart Brand (3)

A Clockwork Orange, by Anthony Burgess (2)

Future Shock, by Alvin Toffler (2)

If They Come in the Morning, by Angela Davis (2)

Islands in the Stream, by Ernest Hemingway (2)

Jonathan Livingston Seagull, by Richard Bach (2)

Notes to Myself, by Hugh Prather (2)

Teacher and Child, by Haim Ginott (2)

Wheels, by Arthur Hailey (2)

The survey was taken during the week of Feb. 21, and includes top-selling books and paperbacks at their local source: MSU Book Store, the two Campus Book Stores, the Student Book Store, Paramount Newsstand and Tom Sawyer's Book Raft. Inside the parentheses are the number of stores at which each book is among the top 10.

Agreement reached on bargaining unit

Collective bargaining may or may not have come a step closer to MSU last week, when representatives of three University groups met in an informal hearing before a Michigan Employment Relations Commission (MERC) hearing officer.

Administrators, representatives from MSU Faculty Associates and from the AAUP met with Ernie Fry of MERC and agreed upon a bargaining unit definition.

That definition would include in a bargaining unit the following: All full-time teaching and research faculty, including ranks from professors through instructors, assistant instructors and specialists, plus faculty at those ranks who are employed for half-time or more for three or more consecutive terms.

It would also include nonsupervisory academic staff such as librarians, nonsupervisory directors of academic programs, artists in residence, counselors, and academic advisors.

The unit would exclude cooperative extension personnel (who do not hold academic rank in an academic graduate assistantships; research associates: post-doctoral fellows; divisional libraries; head coaches; visiting professors; adjunct faculty; clinical adjunct faculty; career military faculty; assistant, associate and department chairmen; assistant and associate and directors of administrative units; assistant and associate deans and deans; confidential employees; administrative-professional staff; other executive and supervisory employees, and all other employees.

That definition is broader than the one originally proposed by the Faculty Associates (MSUFA), and changes the number of authorization cards needed to call for another certification election. The MSUFA had 30 per cent of the required number of cards, under their original definition, but now are between 500 and 700 cards short. The AAUP would qualify as an intervenor in the election with about 10 percent signatures of the defined unit.

There is some question about the exact number of votes that will be cast. The MSUFA representatives say that they have told the University that the agreed unit definition totals 2,460 faculty, but MSUFA questions that number. The group has requested an official list of faculty from the provost. If they are unable to get the list from the provost, they say they will approach the Board of Regents.

There is also disagreement on the unit between the AAUP and the MSUFA. The strongest point of contention, according to AAUP Chapter President Sigmund Nowoz, is the status of department chairmen. MSUFA and the University have agreed that the chairmen are supervisory personnel and should be excluded from a bargaining unit. MSUFA representatives say they base that on provisions in the Bylaws for Academic Governance.

But the AAUP contends that department chairmen are colleagues rather than supervisors and should therefore be in the unit. The group is using that argument as a main basis in the ensuing race for more authorization cards from faculty.

Banks: A new dean assumes the job of juggling priorities

Robert F. Banks has eased quite naturally into the role of the second dean of James Madison College.

As acting dean since Sept. 1, and an associate dean under Herbert Garfinkel since the college's inception, Banks has been involved with the whole range of decision making and administrative function.

He sees his new role as one of juggler. "In an institutional setting such as ours," he said, "you must juggle the priorities of faculty views, student interests, and economic responsibility.

We must live up to the commitments to our students to provide a high quality liberal arts education, meet the needs of our faculty for a proper teaching environment, and provide these objectives in the context of economic feasibility."

EFC meeting

The Elected Faculty Council will meet Monday, March 13, at 3:15 p.m. in the Con Con Room of the International Center.

* Continue debate on proposed interim grievance procedures.
* Discuss the report of the ad hoc committee on collective bargaining.
* Hear a report on the request to the Michigan Employment Relations Commission for an MSU bargaining unit.
* Hear a report from an ad hoc committee to study the possible affiliation of MSU with the Association of Michigan Collegiate Faculties.

Banks: seen many advantages to assuming the leadership of a small unit such as James Madison.

"The dean in a residential college carries the combined duties of dean, department chairmen, and deans. But the chairman and deans are particularly interested in the practical application of their skills in curriculum committees," he said. "I still am able to teach, for which I am grateful."

"Because I must be open to involvement with faculty and students and I must be an intervenor in the election process."

What are his goals for the college?

Banks said that he feels "a commitment to expand and innovate in the area of undergraduate education, such as critical and analytical skills and writing ability."

Based on the general evaluation of the residential colleges now in progress, Banks said that he hopes to "identify those areas of deficiency and weakness, and try to remedy them through reform at the margin."

He also said that he wants to explore ways in which the college might better serve students in the general University as well.

Banks emphasized that the program is not "all soul and no substance."
"A builder looks to retirement"

"One upon a time, a young man named Foster treated the family cow for a handful of magic beans, earned a master of fine arts degree from East Lansing... whereupon dormitories sprang up and more students, and a great University grew... and grew..."

** Emery Foster, now in his 31st year as an MSU administrator, has undoubtedly been one of the key figures in the rapid growth of this University. After a year's consultation beginning in June, Foster will retire from his life work of housing and advising students.

"The entire dormitory and food service operation is a tribute to him," Executive Vice President Jack Brenlin said. "He built the biggest, and probably the best, system in the world."

Foster's career at MSU began when he came back to his alma mater in 1941 as manager of the Union Building. The college of 3,000 students he had

** Faculty works shown at Kresge

Two one - man faculty shows are on display at the Kresge Art Center Gallery.

The artists are Anthony DeBlasi and Allen Leepa, whose paintings occupy the outer walls of the Gallery. While the entrance gallery will be devoted to works in various media by members of the Michigan Academy of Science, Arts and Letters.

The exhibit, open to the public without charge, continues through March 26.

DeBlasi, associate professor of art, has studied at the Art Students' League of New York with Sydney Dickinson, Will Barnett and Frank Mason. He taught at Keystone and Jefferson College before joining the MSU faculty in 1966.

He has received a number of prizes including the Founders Purchase Prize this winter at the Detroit Institute of Arts.

Leepa, professor of art, has received the Charles Ady Gallery Award Foundation for his paintings, plus such awards as the 1968 first prize Purchase Award in the National Institution Exhibition of the American Academy of Arts and Letters, New York.

His works have been seen in New York's Museum of Modern Art, the Musée d'Art Moderne in Paris, the Sao Paulo VII Biennale in Brazil, the Venice Biennale, the Edinburgh International Festival and a retrospective exhibit at Hadza University in 1965.

He has received a number of prizes including the Founders Purchase Prize this winter at the Detroit Institute of Arts.

"EMERY FOSTER IS not just a manager in the strict sense of the word," Jack Brenlin said. "I have always had the interest of the kids at heart and don't just think in terms of money."

"...there are many retiring professors who may never catch up with Foster.

"Everybody would like to see the campus about the size it was when he was a student," he added.

"...that the mistake of overbuilding," Foster points out, "he did not create the academic, the Academic Freedom Report, and the demise of in loco parentis."

"There used to be a feeling among parents that we should do things that they weren't willing to do themselves."

"JOHN MC KAY"

The hours of testimony heard by the Board of Trustees at the hearing on the status of women (News - Bulletin, March 2) generated many recommendations. Following is a summary of some of those recommendations:

- On salary: Establish an unbiased pay scale for women.
- On promotion: Institute an unbiased equal promotion policy.
- On hiring: Post all open positions and advertise them as open to all qualified persons; actively recruit young women to fill assistant professor positions; attempt to fill vacancies at professorial and administrative ranks in the next five years with women; give women adequate representation in all faculty ranks, in all departments, where they would actually work and be encouraged. And make administrative positions available to women, provide them with the necessary training and experience to prepare them for these positions.
- On benefits: Investigate and improve retirement benefits for women.
- On part - time faculty: Make part - time appointments available with proportionate benefits and responsibilities to utilize competent individuals who choose to work part-time; revise tenure rules to include coverage for women; establish an equal number of tenured careers for women faculties.
- On students and women: Counsel and advise women students on financial aid and career counseling; establish a "plan of continuing education for women" to coordinate, disseminate and advise future women on further education.
