In the second half our boys got pos­

session of the ball on Kalamazoo's 30-yard line. M. A. C. returned

the ball 15 yards, and then worked a quarter back from the line of

march. From the Orient.

If we were to go to the opposite

side of the earth, and a few hun­
dred miles to the southward, into a
great part of the Indian archipel­
gos, which flows into the eastern side

of the Bay of Bengal, about half way

between the cities of Calcutta and

Rangoon we should find the home of one of our M. A. C. grad­

duates. From that we will progress,

and show to the people what

Kalamazoo advanced the ball steadily until

the M. A. C.'s 25-yard line had been

marched; and in the courses it has recently •

The most valuable book in the world is a Hebrew Bible now in the Library of Congress. The oil medicine, however, refused to sell it for its weight in gold, which would amount to about $35,000.

The Imperial diamond is con­
sidered the finest stone of its kind in the world. The Nizam of Hyder­

abad owned it at an unofficial price but the highest price ever known, for this diamond.

The costliest meat ever served was a supper given by Elenus Verus to a dozen guests. It is said to have cost $10,000.
and completely digested than are those of any food depends on its digestibility, the tissue forming and strength and digestibility of their nutrients.

vegetable food is very striking, not the animal itself, which we call meat.

The Nutritive Value of Meat.

The different kinds of meat we have are beef, mutton, veal, pork, poultry, and fish. Sea food, one regularly food, for man is saved the labor of transforming the large amount of vegetable food represented in a small amount of meat.

Elements of Success.

Judge M. D. Chatterton, a member of the first class at the Michi-
or woman with no business, nothing to do, is an absolute pest to society. Her place has been taken for the world to come."

A man's success does not necessarily depend upon his book learning or his intellectual capacities. It is better to be the head of an inglorious calling than at the foot of one the world calls honorable. It is better to be the head of a profession than the tale of a rat.

The Creator has wisely ordained that the dispositions and inclinations of men should differ; if it were not so, there would be but one vocation in which persons could succeed. Now all kinds of employment are but little if scattered over a multitude of objects, while on the other hand, if one has but a thimbleful of brains and he concentrates all his mental forces on a single purpose, he will stand within three feet of the wheel when it bursts, and a flying piece of iron will go through the air. One man joined me in a laboratory the other day, and found in the attic next morning.

A younger brother of Mr. G. H. Morris, took tea with Prof. C. D. Smith spent Saturday morning at the sugar beet exhibit. Charles Bass, '01, received a visit from his parents and sister last Wednesday, and die a fool. So he might go the rounds of a collegiate education, and not understand the first rudiments that lead to success. Education consists in teaching the mind to think to some end and for some purpose, and the hands to work.

"There is hardly a person who is not qualified to succeed in some business, and it is better to be at the head of an inglorious calling than at the foot of one the world calls honorable. It is better to be the head of a profession than the tale of a rat."

The class in veterinary science is conducted by master workmen. Some of the apparatus was not in place in my stock.

Fly-Wheel Burst at the Boiler House.

That we were without electric lights on the campus for several nights is due to an accident at the boiler house last Thursday evening. While the engineer, Mr. Baldwin, and the fireman, Mr. Friedrich, were sitting in the main engine room the engine that runs the large dynamo in a small room adjoining began running at a greatly accelerated speed, the governor failed to act, and almost immediately the large belt flew off. Mr. Friedrich sprang at once to the throttle, but before he could get the engine under control the fly-wheel burst in half a dozen pieces. In the darkness and the confusion of escaping steam and falling platter it was some time before the men could tell just what had happened. When light was restored it was found that a large exhaust pipe had been severed by one of the flying pieces; that the floor had been ripped up by another; another had snapped one of the pipes in two, and still another had torn its way through the plaster and joists overhead, and was found in the attic next morning.

Neither the engineer nor fireman was injured, although the latter stood within three feet of the wheel when it burst, and a flying piece of the eccentric brush Mr. Baldwin as it passed. To see the havoc that was wrought and the pieces of iron that lay about the room after the accident it seems almost a miracle that both men escaped without injury.

The biggest price for a painting was that paid for Meissner's "1814," $170,000.

In the meeting of the King's Daughters last Wednesday morning, October 6, the following resolutions were adopted:

"We the King's Daughters are again reminded of the uncertainty of life, and the certainty of death, in that the Father has called from our circle, to himself our beloved sister, Mrs. Gager C. Davis; be it hereby

Resolved, That in their great affliction we tender the husband and relatives our heartfelt sympathy."

Resolved, That these resolutions be sent to Mr. Gager C. Davis and also published in the M. A. C. Record.
