Natural History Society.

The Natural History Society held an evening meeting in the zoological lecture room on Friday evening last. Mr. Skeels gave a talk on the Arum family of plants. The calla, which was spoken of as not a lily at all, is perhaps the best known member of the family. Plants of this family have double and single flowers, and are often found in swamps. Several common plants belonging to this family were mentioned; the skunk cabbage, so named from its odor; the water arum, which has an odor even stronger than that of the skunk cabbage; the calla, which has white flowers and is a near relative of the calla lily; the well known Indian turnip, and the skunk cabbage, which is perhaps the best known member of the family. The professor of agricultural science, the first president of the society, spoke of practical agriculture, the first taste of which he gained on the farm, while he was a boy. His words were filled with the enthusiasm for the operations of the farm, which had been so important in his life. He spent much of his time in writing, and spent the time in dancing until the morning of July 11.

The junior Hop.

The report of the committee on apportionment, made at the last meeting, was taken from the table and another was discussed.

Mr. Prof. Frank S. Kelzke was granted leave of absence for the summer vacation and fall term.

The committee on employees was authorized to employ an assistant in the agricultural station.

The report of the farm committee, made at the last meeting, was taken up for reconsideration, by section; it was not adopted.

Friday morning the Board met and adjourned to meet at the call of the president of the College.

The President.

The informal hop, held by the juniors in the Eclectic and Olympic society rooms Friday evening last, was a most enjoyable affair. Twenty-five Juniors with their ladies, and forty Mrs. Woodward and of the up the merry party. After dancing till o'clock, the party adjourned to Cse, where a fine banquet was served by Mrs. Rugg, assisted by Messrs. Cowling, Green, Littell, Longworth, and Ireland. Class president and toastmaster was Mr. Fynn announced the following toasts which were responded to in a style:

"To those we love best—Our noble selves,"

A. Thorn Stroh's "Call for Class Success."

Tressie A. Bristol

"Before and after the Road." "Mr. freer's nation good resolution and breaks it and make no whatever.

Affirmative.

Mr. G. C. Abraham, Mr. R. C.

Mr. Hamlin, Mr. Morrow, Mr. Shoshimith, Mr. Kendall. A Summer Institute.

The Junior Hop.

INFLUENCE OF READING ON CHARACTER.

We are as a rule very particular about the people with whom we associate and things which more or less agitate the minds of American parents than the society in which their children are to move. About the principle of discrimination it is not necessary to say anything. We all go as far as the people will allow. There are people whom we want to know; there are others whom we treat with reserve. There are some whom we keep at arm's length. This is the essence of our dignity—or, let us call it, our self-respect. When our principle of discrimination is false, our dignity may become un- dignified; but when our principle of discrimination is sound, when we want to know the good and noble and are indifferent to the vulgar distinctions of wealth and counterfeited character, our dignity becomes absolute by virtue of its discerning choice and vigorous self-restraint in the exercise of its judgment.

You will all agree, then, that the society that we keep is not a matter of indifference; for it may make us better, or it may make us worse; it may make the world a better place to live in, or it may make us throw away our chance of happiness by increasing our freedom of choice; or it may make us throw upon us our most important duties, and it may make us face the world with a more resolute and valiantly for ourselves.

Now the object of this paper is to point this out. There is the world, and when we have admission to society of all kinds, to society of all ages; that means the world from the lowest to the highest, and that the influence which the mind exercises over us is incalculable; and that therefore the choices which we must bring to bear in the selection of what we read should be even more intelligent, more careful, more particular, more select, than the regulations of the society that we keep is not a matter of indifference; that the matter of companionship.

"But if these sober companions in life are daily increasing, as the pure sub- stance, as a food of so much importance as sugar has been, there is no substitute, from a comparatively recent period. We cannot conceive how long we have the privilege of enjoying the fruits of the great mistake that we have made, but is it not possible may gain from it a lifelong aver- age is sufficient. Because his approaches seem so reasonable, there is a danger that between an author and a careful reader an intimacy is formed which regulates the selection of our companions and friends.

"The more we read, the more we are able to form a good idea of what sort of books women through the written page is often more intimate than that which is formed with living people; that the influence which the mind exercises over us is incalculable; and that therefore the choices which we must bring to bear in the selection of what we read should be even more intelligent, more careful, more particular, more select, than

Such persons need have no fear that their subscriptions will be manufactured here. For sugar, which might just as well be manufactured here, will not be confined to tropical climates, but in the West Indies, where a large sugar industry quickly arose. Then if it was used in Europe to be used as a fuel. The introduction of tea and coffee did much to diminish the amount used in Great Britain was 10,000 tons; in 1800, 1,500,000 tons; and in 1885, 1,100,000 tons.

In 1747, Magriff discovered a large amount of sugar in the white beet, but it was not until about 1800 that it began to be used in the production of sugar. It was introduced into Europe by Napoleon, and the "sweet cane from a far country," referred to in Jerome's "Apologies," and it seems to have taken the place in those days.

But although sugar is spoken of, one naturally thinks of cane sugar, there are several kinds in existence, this name being given to chemists everything having the general properties of sugar, a sugar; hence the name, sugar of lead. It is on

At College.

Miss Dunston has been very ill for a few days, but is better at present.

Mr. G. H. True spoke at Institutes at Hudson and Reading last week.

Prof. Mumford has been attending Institutes at Manchester and Hanover.

Prof. Smith has returned from conducting the Long Dairy Institute at Hudson.

The girls report a very enjoyable time at the senior banquet last Friday evening.

Mr. G. N. Eastman is engaged in getting out a new map of the College grounds.

On Saturday evening the Union Literary Society held its annual "Faculty night."

C. Middleworth and Fred Burt, '01, are on the fourth-pound list at their homes in Lincoln.

Professor and Mrs. Holdsworth entertained four tables at progressive whist last Friday night.

T. G. Anew, '01, and T. J. Leavitt, '00, visited at their homes in Corunna over Sunday.

Mr. P. H. Davis, of St. Johns, special instructor in the Home Dairy Course, has returned home.

Prof. F. S. Kedzie is contemplating a tour in Europe during the coming summer and summer.

D. T. Hal, '98, received a visit from his brother and sister, of Benton Harbor, Mich., last week.

Mr. John Stein, of St. Clair, Michigan, called upon P. E. Fletcher, '99, Wednesday of last week.

Last Wednesday, Miss McDermott gave a small dinner party, in honor of President and Mrs. Clute.

Miss Miriam Graham, '01, entertained her friend, Mr. T. Shanahan, from Ann Arbor, a few days last week.

The temporary pond north of the Horticultural laboratory has furnished excellent skating for about a week.

Last week John Stewart, '01, received a visit from his father, who will stay and attend the Round-Up Institute.

A large number of M. A. C. people attended Shure's Access at Baird's Opera house, last Wednesday night.

Two cows in the Grade Dairy herd are in the fourteen-pound list, and quite a number are in the ten-pound list.

The latest reports of the American Pomological Society are now in the hands of the Horticultural Department.

Miss Pierce, '01, spent Saturday and Sunday with Miss Gertrude Glick, '00, at the home of her grand parents.

President Snyder and Professor Taft attended the meeting of the Horticultural Society in Grand Rapids last week.

The sophomores have commenced their dairy work in the Agricultural Laboratory. Each student will have three weeks of the work.

The freshmen in rhetoric are writing a five chapter history of the Israelites, from the enslavement to the escape across the Red Sea.

Mr. P. S. Langley, secretary of the Smithsonian Institute has presented our library an illustrated volume of the history of that institution.

Chapel exercises will be led next Sunday morning by Mr. C. B. Collingwood, '85, who will speak on John Robinson, pastor of the Pilgrim Fathers.

Miss McDermott spent last Thursday and Friday at the Institute at Hanover, where she gave a talk on "Co-education at M. A. C." Mr. L. Whitney Watkins, '93, was also on the program.

The Round-up Institute begins this afternoon with a conference of institute workers. This evening they will enjoy a social time, at which the Domestic Science Department will serve refreshments.

While entrance examinations were in progress last fall one young man was asked to name five leading statesmen who were concerned in the establishment of our present form of government. With the result of the last National election fresh in his memory he promptly responded, "McKinley, Hobart, Hanna, Burrows and Long."

Mechanical Institute in Detroit.

By invitation of the Detroit Y. M. C. A., the Mechanical Department of this College will conduct a mechanical institute in Detroit on Thursday and Friday of this week.

Prof. Weil and Instructors Westcott and Leonard will give short talks on heat, steam engines, boilers, mechanical drawing, and designing. Methods at M. A. C. will be discussed; as will also the question of organizing, in our larger towns, mechanical clubs in connection with college extension work. It is probable also that samples of work from our shops will be exhibited.

Colleges and Exchanges.

Seven young ladies of Olivet have organized a cooking club.

Li Hung Chang graduated at the head of a class of 1,500.—Ex.

A. J. Townsend, Kalamazoo's czar clock, left, for the Klocktime last Wednesday.

Out of 262 cabinet officers, 178, or more than two-thirds, have been college graduates.

And now the Shiphard Hall girls at Olivet have a music box that dispenses sweet music in the dining-room during the meal hour.

The theoretical work of the Michigan College of Mines is supplemented by frequent trips to the mines in the vicinity of Houghton.

Owing to the refusal of the under-graduate committee on discipline to exercise its power of expulsion, Northwestern University has gone back to faculty government.

Dartmouth college has the distinction of having issued the first college paper in the United States, and the greater honor in having Daniel Webster as editor-in-chief.—Ex.

The boating conference at New York last Thursday resulted in the arranging of a race at New London between Yale, Harvard and Cornell, and of another at Poughkeepsie or Saratoga between Cornell, Columbia and Pennsylvania.

Mr. L. Whitney Watkins, '93, was also on the program.

News from Graduates and Students—
and myself, '95. We see one—Hicks, '92; W. W. Traylor, Jr., '93; graduates of Michigan colleges are held in Gaylord, Mich. in the register of deeds' office. Prof. C. C. Georgeson, '78, shows the esteem in which the graduates of the University of Virginia the memories of the dear old campus form a halo around the four brief years, which love makes brighter with the lapse of time. I believe that to the campus more than anything else is the esteem in which M. A. C. is held by the majority of the boys. Some appreciate her for history, some for what she has done, others for her object. But it seems that the campus itself holds the main cord. In this section it was somewhat matter for regret that the handsome calendar contained so few views of the grounds. Perhaps it is selflishness, but I cannot be helped, I would not have one view of the buildings, or of the grounds close by left out. I still wish that the year had as many months as days and that there were a view for each day.

Teacher—What do you know about the law of gravity?

Pupil—Oh, if I snicker in church I have to read two chapters in the Bible when I get home.—Harper's Weekly.

The Wandering Singer and His Songs.

One of the handomest College souvenirs ever published is the book of poems by Frank Hodgeman, '95, of Climax, entitled "The Wandering Singer and His Songs and Other Poems." The book is bound in polished white cloth with blue and gilt titling, contains 165 pages, and is printed on silver paper in a type said to be beautifully illustrated with half-tones of Climax and other scenes and with sketches by Prof. W. S. Holdsworth, '87, and E. N. Thaxter, '91. In that part of the book devoted to College poems there is hardly a thing to suggest what a poet, not sung of days gone by, not for the student, or the student but for the student of the class as well. Everybody who has seen the work has spoken highly of it—M. A. C., Feb. 5, 1898.

Price 50 cents. It ordering by mail add 6 cents for postage.
