Saturday raised our baseball standing in the M. I. A. A., and also in the hearts of our reserves and vic­tory. In the foremost our first nine gave the Normals their first defeat ever. Our players pounded out four runs in the first inning, and from that time in to the close, our winning line in hand at every stage, was very ef­fective at critical times, and aided materially in the run getting by excel­lent work with the bat. The seventh, with three men on bases, he lined out a three-base hit. But two men scored. In the fourth inning while the Normals made many:

Score: \[1 - 2 \]

Batteries, Millar and Krentez; M. A. C, 6 4 .667

After the game at Ypsilanti our boys went to Ann Arbor to play the Varsity team, but were too tired to put up a creditable game. They be used. Life is not to be ruined tyrant, deceived and betrayed

Still further—the man who through lack of self-control or self-control takes the life of another, thereby forfeits his own life; but if before final action he repents, he may be restored to har­mony with the moral order of the world, without having to surrender his own life. In Othello, the Moor, himself noble in all the thoughts and interests of his heart, becomes from ever-trustfulness blinded and maddened with jealousy; he kills his innocent wife, and, though repent­ent, recognizes and executes his own death-dealing hand. On the other hand, Iago, the incarnation of intel­lect divided from conscience, the world's business is carried on by a Brutus, the idle listlessness of a Romeo trans­formed itself into the fury of despair, the victorious general Macbeth becom­ing the bloody vengeance of a ruined ambition, King Lear betrayed by his own lust for power.

size. They are very careful in this respect, not only in regard to the weight of the coins, but in regard to the gold filings. The floors are very smooth so that they are easily swept, and all refuse from the floor is burned and the ashes tested for gold. In this way about twenty thousand dollars are saved every year.

After the planchets are weighed they are taken to the rolling machines where the raised rim that one sees on all coins, to protect the face from wear, is put on. These pieces are still called planchets, and in order to become coins must go through one more process, that of coining. The machine which does this is similar to the one which cut the gold sheet into planchets, except that just beneath the opening there is a steel die from above moves down, presses on the die below; here the coin is held for a second by the pressure of two hundred and seventy-five tons, then the die part and the coin is completed. In this manner all the coins are made, the methods only differing with different metals in the extraction from ore.

The United States mint is located at Philadelphia, although there are others at Denver, New Orleans, San Francisco, and Carson, Nevada. The Philadelphia mint produces coins of all kinds, the others, only gold and silver.

One might well ask, does the government make anything by the coinage of money? It does. The coinage of a cent costs Uncle Sam a little more than .5 of a cent. The nickel costs him only .1 of a cent. There is not much profit, however, on the coins of higher value, hence the smaller or subsidiary coins are legal tender only for small amounts, while the quarter, half dollar and gold coins are legal tender for all amounts.

Much more of interest and value could be said upon this secret of Uncle Sam's, and also upon others, such as the postal, naval and military service, and upon the paper money of the country, which would make interesting studies for all of us.

At the College.

Dr. Kezie was out on a fertilizer trip last week.

At Ann Arbor Saturday, Mr. Norton dislocated an ankle.

Miss Van Loo's mother and sister visited her a part of last week.

Prof. C. F. Wheeler went to the Moline Plow Co. and received from them a four-row beet seeder and a four-row beet cultivator, which will be used on the farm and exhibited around the State.

Miss McDermott entertained at her home last Thursday evening, to assist his father, who is in poor health. He expects to return in June for his examinations.

News from Graduates and Students.

C. A. Jewell, ’96, spent Thursday night at M. A. C.

R. L. Clute, ’96, called at the College Thursday evening.

Prof. E. J. Ewen, formerly professor of English history, is stationed at the Utah Agricultural College at an increase that makes his present salary $3,250.

Carl Hoppough, with ’99, was one of the M. A. C. boys at Charlotte Friday.

W. G. Merritt, with ’93, goes to Detroit as chemist for the Detroit City Gas Works.

Prof. A. A. Crozier, ’79, sailed from Hawaii April 20 on a sailing vessel for San Francisco.

Capt. R. S. Welsh, ’91, was rejected by the medical examining board at Island Lake.

E. C. Green, ’97, returned Thursday from Illinois, where he has been employed in exterminating the San Bug. He reports three months of very pleasant work, and will probably remain here for study during the summer season.

Ray S. Baker, ’99, who was in Northern Wisconsin writing up the lumbering industry for McClure’s, was detailed about the first of May to prepare two articles for a war number of that magazine. One article will be on the method and expense of collecting war news for the cosmopolitan papers, the other on the workings of the conscription department.

A Successful X-Ray Experiment.

Last week Mr. and Mrs. James M. Skinner, of Lansing, brought to the College their little son, who was supposed to have swallowed a silver half dollar, to see if the coin could be discovered by means of the x-ray.

Prof. Woodworth succeeded in taking a radiograph that showed quite clearly the bones of the spine, and demonstrated beyond a doubt the absence of anything metallic in the stomach of the child.

The New Foreman.

The Horticultural Department has secured the service of Charles A. Wood, of Napoleon, as foreman. Mr. Wood is an uncle of Mr. M. L. Dean's and has been a successful farmer and fruit grower. He is also an expert handler of fruit, having superintended the packing and shipping of large quantities of fruit for southern markets for several years. He will probably move his family here as soon as quarters can be secured.

Our Societies.

RESPERIAN SOCIETY.

The Ferorian Society was entertained at our rooms Saturday evening, April 23. After an informal reception the following program was given:

Dedication—M. Hance Hammond.

Reading—"A Pint's a Pound," Harry J. Westcott.

Critie's Report—Chas. W. Loosia.

The remainder of the evening was spent with games and dancing. Light refreshments were served.

Word has been received of the death of Bert E. Thomas, with ’96. J. Hickley Skaner, ’91, spent Sunday at his home in Cooper.

C. H. Parker and P. N. Lowtry took advantage of last week’s vacation to visit friends in Ann Arbor, incidentally intending to attend the May Festival.

ALLAN H. STONE,

Colleges and Exchanges.

President McKinley will deliver the commencement address at Iowa college.

Helen Gould has just given Rutgers $25,000 as a memorial to her parents.

The new president of West Virginia University started life as a Chicago newboy.

At the University of Michigan there is an anti-saloon league with over 350 members. Yale's track team has 190 men in the season in fidelity and punctuality.

The Wandering Singer and His Songs.

One of the handsomest College souvenirs ever published is the book of poems by Frank hodgkinson, '96, of Climax, entitled "The Wandering Singer and His Songs and Other Poems." The book is bound in pearl white cloth with gold and gilt trimmings, contains 88 pages, and is printed on very nice paper with full gilt edges. It is beautifully illustrated with half-tones of College and other access and with line drawings by Prof. W. S. Holdsworth, '87, and E. N. Thornbur. In that part of the book devoted to College poems there is hardly a line that does not capture some sweet memories of days gone by, not only for the student who has eaten his meals at the student of the school, as well. Everybody who has seen the work is delighted with it. —M. A. C. Record, Feb. 9, 1898.

At $5.00 it is offered by mail at 6 cents per copy for postage.

F. S. Gooding, Publisher, Climax, Mich.

THE REMARKABLE STORY—"Wanted—A Man," written by L. Christiessen, read by D. J. Halasz.

Dedication—M. Hance Hammond.

Reading—"A Pint's a Pound," Harry J. Westcott.

Critie's Report—Chas. W. Loosia.
