The annual field-day of the Michigan Intercollegiate Athletic Association was held at the Corn Hill Zoological Garden, Kalamazoo; Michigan Agricultural, Michigan Normal, and Olivet colleges, will be held at the State Fair grounds in Lansing next Friday and Saturday. The whole of two days will be devoted to baseball and Saturday night to wrestling in all weights and other in-door sports in the gymnasium. Special accommodations for the boys have been provided at a low rate in the city hotels; the young women will be entertained at the College and in private homes in the city. Special rates have been secured on all roads leading into the city, so that being spared by the local management, to make the meeting the most successful in the history of Michigan athletics.

Memorial Exercises.

Memorial Day was fittingly observed at the College yesterday. Service was held at the batteie ground, and the roll of those who fell in the war was read. Prof. Whipple, president, and addresses were made by Rev. G. C. Caswell of Lansing, and Prof. W. B. Dana of St. John. Music was furnished by the College band and the double quartette.

Mr. Caswell's remarks on the present situation were very brief. He thought the present war would result in the weakening of a new consciousness in our nation, in our taking a new place in the family of nations, and in closer alliance of the English-speaking peoples. Mr. Daboll spoke for nearly an hour and held the undivided attention of his audience throughout.

After a brief contemplation of the war of the Rebellion, his address was given to the English-speaking peoples. Mr. Daboll spoke for nearly an hour and held the undivided attention of his audience throughout.

The Annual Field-Day.

Monday's game with Olivet was an excellent one, but Olivet's superior work at bat won the game. For M. A. C. Ramen was the star, accepting ten chances without error, and batting for Olivet, getting a home run, two base hit and single; but Wright was their shining light. He was making three three in a row and center, accepting no fielding chances without error, he worked himself out of several very tight places. Twice bases were filled, with nobody out, but somehow the hits did not come.

Meeting of the M. I. A. A. Directors.

An important meeting of the M. I. A. A. directors was held in the Hubbard House Friday night. Field-day officials were elected as follows: Referee, Mr. Gearhart, N. Y. A.; judges, A. E. Davis, Lansing, T. Hancock, Hillsdale, G. H. Gordon, Ann Arbor; timers, R. E. Brackett, Lansing, Prof. Barr, Albion, Prof. Martin, Hillsdale. For the all-round championship the following entries are: Albion, Neuffer; Hillsdale, Whittem, Myers, Campbell; Kazoo, Hayne; Cornell, C. Rose, Hopkins, Wells; Normal, Morse, Lyster.

There are over one hundred entries besides those who will take part in baseball, tennis and class drills. Three baseball games will be played—Albion and M. A. C., Monday, May 28; Hillsdale and Normal, Saturday; and Olivet and Kazoo, Saturday afternoon. The estimated total expenses of the meet is $518, of which M. A. C.'s apportionment, including Lansing contributions, is $290.

Our Museum May Receive a Valuable Addition.

The Kent Scientific Institute, of Grand Rapids, has a large and valuable museum, which was intended to be a valuable auxiliary to the science work in the city high schools. An arrangement was made on the part of the city, to properly provide for this museum has called for the communication from Hon. C. W. Garfield to Dr. E. B. Daboll, president of the institute, in which Mr. Garfield, on behalf of the State Board of Agriculture, offers the museum a home at the Agricultural College.

We quote briefly from his letter: "If the gift of the museum is desired by the city of Grand Rapids the State will gladly furnish space for it at the Agricultural College. The next legislature meets will, beyond question, provide special accommodations in the interest of its constant usefulness, which is under contract with the United States to erect such buildings as are needful at the College, and the museum building at once if we can have the custody of so valuable a collection of animals. We have great faith in the kind of education which is aided by museums of natural science. We believe there is no other line of teaching which will give boys and girls the impulse toward an education that will in their life work. we have never before seen such an education."

New Photographic Room.

The basement of the Physical Laboratory being inconvenient and too dark for photographic work, Prof. Woodworth has arranged to remove the whole photographic outfit up stairs. Midway between the floor and ceiling in the work-room back of the office, a new floor has been constructed, with a stairway leading up near the top of the basement stairs. The west side of this new room is fitted up for photography and other photographic apparatus and also for a toning laboratory. East of this is the dark room and east of the dark-room a stairway leading to a roof printing-room with glass sides all around. The new arrangement is very convenient and we have never had for photographic work, and it also utilizes the space we have never before used in the laboratory.

Recent Bulletins.

Two bulletins have been issued this month; one on Hog Cholera, by Prof. A. Waterman, veterinarian, and one on Some Experiments with Poultry, by Prof. C. D. Smith and Mr. C. S. Brooks. The one on hog cholera does not give new information but is a compilation of information on the subject, from various sources. The cause, symptoms and treatment of the disease are given, together with directions for disposing of the dead and cleaning pens where animals have died.

The bulletin on poultry is quite comprehensive, and treats of the construction of a poultry house and management of an incubator; gives results of experiments at this Station on coarsely cracked yellow ground grain for young chickens, on broiler and layer mash, on the use of fresh fish, feedings, feeding layers; and makes comparisons of Golden Wyandottes, Lohmans, and Plymouth Rocks, as to the number and weight of eggs laid in a year and the food cost. One chapter is devoted to the feeding of capons, and another to the chemical composition of egges, the latter being the results of experiments for thesis work by F. A. Chittenden, 98.
THE M. A. C. RECORD.

PUBLISHED WEEKLY BY THE MICHIGAN AGRICULTURAL COLLEGE.
EDITED BY THE FACULTY.
ASSISTED BY THE STUDENTS.

SUBSCRIPTIONS SHOULD BE SENT TO THE SECRETARY, AGRICULTURAL COLLEGE, LANSING.

SUBSCRIPTIONS: 50 CENTS PER YEAR.

Send money by P. O. Money Order, Draft, Registered Letter. Do not send stamps.

Indexed as second-class matter at Lansing, Mich.

For various reasons the M. A. C. RECORD is occasionally sent to those who have not subscribed for the paper. Such persons need have no hesitation about taking the paper for one week, for so much will be made for it. The way, however, to secure the RECORD regularly is to subscribe.

Long Fruit Institute, Thursday Afternoon, February 17 at Grand Rapids.

By Bennie L. Holt. The paper deserves special mention, but is too long to compete for prize.

The afternoon session of February 17th was devoted to President Adams being in the chair. While waiting for the secretary, Mr. Adams dropped some very interesting remarks about the old Kent County Institute. The “Kent County Institute” has now come to be a permanent organization. An evening session of leaders of meeting together to talk over the solved problems of horticulture, the results of which many of which every man should avail himself.

The first on the program was the “Question Box,” which was conducted by Prof. Taft and Mr. Morrill. The questions asked were the kind given in newspapers. A portion of the answers of which will aim at perplexing fruit growers.

The fruit trees are injured by the “Raspberry Leaf East Lansing, Mich.” and the “Kent County Institute” has now become to be a permanent organization. ation to the Resources of the Ameri­

tical in the Hanna Rifles. Thursday

'R99, has opened a studio in New

ie Farmer" is the subject of a bul­

Farmer, chief of the United States
division of forestry, has been ap­

pointed director. The establish­

ment of this department was rec­

mended by Governor Illick of the

State of New York, on the ground

that no other agency could accom­

plish the State's work so eco­

omically and efficiently.—

The following letter comes from

The Wandering Singer

and His Songs.

One of the handsomest College souvenirs

on their way, and Saturday returned

Chillicothe Growing as an Addi­

of the American Farmer" is the subject of a bul­

which has just

been published by the U. S.

Department of Agriculture.

The letter may have been dictated

by the younger, but we strongly

suspect that Thornt wrote it.

Colleges and Exchanges.

"Mock Senate" is the name of a spe­

cial T. M. G. of M. for debating and

studying of parliamentary

law.

The University of New York

does not name to the person showing

the greatest development possible in

the course of the year's work.—Ex.

Harvard has the largest faculty

in the country. It has a total of

327, a body nearly as large as the

lower branch of Congress. Colum­

bus and the University of Pennsyl­

vania follow with 265 and 240

respectively. Brown has a faculty

of 91.

Ford, Davis & Co., of Detroit,

have offered $500 a year to establish

a fellowship at the U. of M.

The only conditions attached are that the

students shall be a good graduate, that

he shall not be required to teach,

shall do work in original investiga­

ion, and if at any time the donor

desire a problem investigation it shall

be done by this student.

At the annual relay race carnival

of the University of Pennsylvania

in Philadelphia, April 30, W. P.

Remington, of Pennsylvania, broke

the intercollegiate record for the

runner's broad jump by jumping 23

feet 4 1/4 inches. The intercollegiate

record was 22 feet 11 3/4 inches. J.

C. McCracken broke the intercol­

legiate record for the hammer throw,

slanding the weight 130 feet 9 inches.

The record was 136 feet 3 inches.

At a later athletic meeting in the

same city, McCracken broke the world's

record by throwing the hammer

147 feet, 10 1/10 inches.

A Medical College and a College of

Forestry.

Cornell university has recently

organized a medical college and col­
ge of forestry; the former being

embodied by generous personal gifts,

and the latter by the state. The

medical college will be located in

New York city although the first

half of the course, comprising the

pure sciences upon which practical

medical training rests, will be de­

plicated by the faculty of arts

and sciences at Ithaca. This depart­

ment will open next fall, and a num­

ber of distinguished physicians and

surgeons, bitherto members of the

faculty of the medical college of

the New York university, have been

appointed to professorships in the

new medical college. The organ­

ization of the college of forestry has

also been begun, and Dr. E. E.

Fernow, chief of the United States

division of forestry, has been ap­

pointed director. The establish­

ment of this department was rec­

mended by Governor Illick of the

State of New York, on the ground

that no other agency could accom­

plish the State's work so eco­

omically and efficiently.—

The Wandering Singer and His Songs.

One of the handsomest College souvenirs

ever published is the book of poems by

Francis Hodgeman, '93, of Climax, entitled

"The Wandering Singer and His Songs and Other Poems." The book is bound in pet­

ted white cloth with blue and gold letter­
ings, contains 165 pages, and is printed on extraordinary paper with full gilt edge. It is

beautifully illustrated with half-tone of College and college scenes and with pictures

by Prof. W. S. Holdsworth, '79, and E. N. Thayer, '93. In that part of the book

dedicated to College poems there is hardly a student who did not suggest someone

of days gone by, not only for the student of the

nineties as well. Everybody who has seen the work

is delighted with it.—M. A. C. RECORD, Feb.

'88.

In the six-mile road race at

Lansing yesterday, R. E. W., with a three minute handicap, won first prize, Brown, '01, got

d third time-price.
