Prof. Carpenter an Authority on Scopeage.

A striking discrepancy exists between ancient and modern popular ideas concerning subterranean water. As far as can be gathered from old legends—especially such stories as have sprung from the imaginative mind of Germans—it seems that to have been generally held that the "fountains of the earth" were fed from mighty reservoirs existing under ground, which could, by natural convulsions of the earth, pour forth enormous volumes of fresh water comparable in extent with that contained in some small sea. More modern popular opinion seems to err in the exact opposite extreme, and fancy that all water on the earth is either lying in the sea or flowing on the surface of the land. Although no mighty cavities are either lying in the sea or flowing in the exactly opposite extreme, they are comparable in extent with that contained in some small sea. For the general Electric Co., Schenec-

day, N. Y.; Mr. Sedgwick is in the office for the same company. The last lecture in the course on Biblical History, the last Monday afternoon. In beginning his lecture, Mr. Moulton stated that the Bible contains all forms of illumination of the century has proceeded from that source, and the laws which regulate such convulsions of the earth, pour forth enormous volumes of fresh water comparable in extent with that contained in some small sea. For further information concerning new mechanical courses, write to:

At the College.

Miss Keller visits in Detroit during vacation.

Mrs. Blunt is spending a few days in Ann Arbor.

We have fine sleighing for several days last week.

Miss Ronan’s vacation will be spent in Ypsilanti.

Next Monday evening at 8 o’clock we begin the short term of the year.

H. D. Fay; secretary, L. Carrier; treasurer, W. R. Calbert; marshal, R. Southwick.

The members of the Union Literary Society enjoyed their usual term-end party last Friday evening.

College Steers the Best.

The following clipping from the Buffalo Review of March 13 needs no explanation: “Included in today’s shipments were two prime steers of their weight and age that have been sent to this market this season. They were the property of the Michigan Agricultural College, near Lansing, Mich., and were shipped in with a load of cattle sent in by Horne and Resneltville, of Lansing, old-time and regular shippers to this market. These steers were very finely bred, both sired by a pure bred shorthorn bull, the dam of one of them being a pure bred Angus cow; the other one from a pure bred Hereford cow. They were raised and fed on the Agricultural farm, as an experimental test of what the farm feeders could do in the way of raising and breeding cattle for market, and were in every way an unqualified success. The steers averaged 1,390 pounds, and were bought by Zimmer Bros. for Eastman & Co. exporters, and sold at the strong price of $5.75 per cwt. being the top price for any cattle selling this day.”

A letter from the firm who sold the cattle says: “The steers were plenty large enough for the spring trade. Do hot want them as heavy as a few years ago. They sold at the highest price of the day and do not think of any way that they could have been bettered. We sold one straight load of Polled Angus cattle and good ones too, at $5.50.”

HAVE JUST RECEIVED A NEW LINE OF TIES

FOR EASTER SPRING LINES

Some Very Handsome Effects. Four-in-hands seem to be the best for Spring wear.

A complete line of HATS

Including DUNLAP’S, MERTON’S and YOUNG’S.

Also the swell things in Golf Caps and Hose.

Students patronage solicited.

ELGIN MIFFLIN.

ALL MEATS.

May look alike to you, but there is a very great difference in the quality we handle and that sold by some other markets. We handle none but the very best. Like the pudding, the proof of good meats is in the eating. A trial will convince you that you ought to trade with us.

GOTTLEBE REUTTER.

Washington Ave., South.

THE M. A. C. RECORD

R. B. Shank & Co.,

Leading Grocers and Confectioners.

The Celebrated ROYAL SHOES

We have secured the exclusive sale of this celebrated line of Men’s Fine Shoes for Lansing.

These shoes are made in all styles and all colors at the uniform price of Three Dollars and Fifty Cents.

They are without doubt one of the best special lines of shoes made for the Spring trade of the Five Dollar class wherever introduced.

G. D. Woodbury’s NEW SHOE STORE,

HOLLISTER BLOCK.
News From Graduates and Students.

Miss Bertha Malone with '99 teaches at Locke.

H. W. Hart '97 called at the College Wednesday.

E. A. Calkins '98 called at the College last week.

D. B. Lasting with '90 is a student in the Detroit College of Medicine.

A. R. Speare, our '96 sprinter is a butter merchant in Washington, D. C.

C. A. Dockstader '81, a Three Rivers druggist, called at the College Thursday.

E. Ralph Pierce with '94 is chief draftsman in the Murphy Iron Works, Detroit.

Joseph L. Horne with '96 is the proud father of a boy born March 14. Mr. Horne is still at Cornell and is specializing in pure mathematics.

"Not Failure, but Low Aim is Crime."

C. M. Keintel '98, Phi Delta Society.

Most men desire to become great.

They desire to have the approval of their fellow men. While this may be good in a way, it is not enough. The real value of public acts are worth little, if we cannot find applause when we turn within. The attainment of any end by unfair means is not success.

During the War for Independence our general ordered men not to fire unless they could see the whites of the enemy's eyes. The result was that the advancing column was cut into pieces. So is it in the struggle of life. The man who has a definite aim will accomplish his purpose while he who labors at random will scarcely accomplish anything.

The desire for success is universal. Every man intends to win. The acquisition of proficiency in any particular line of work, or the amassing of a fortune is a really desired success. But such success depends upon special application accompanied with hard work. It is only a man who labors loosely and at large do not often become proficient. One physician wishes to take medicine for thirty years without winning any distinction whatever, while his rival with no better education or opportunities, having made a specialty of some particular disease, has secured for himself a reputation the county over for his treatment of disease in consequence of his special knowledge.

Many men owe their failure to an effort to excel in every part of a narrow circle.

If he be a great man, they will be always the things that God meant him to do, and will be his best. No epoches or heart-rendings will enable him to do any better. If he be a great man, they will be always the things that God meant him to do, and will be his best. No epoches or heart-rendings will enable him to do any better.

Richard Sheldon, Yale '98, recently made a world's record by putting the 16-pound shot 44 ft. 11 inches.

The faculty of Pennsylvania University have granted a request from the football team to be allowed putting the 16-pound shot 44 ft. 11 inches.

The facility of any end by unfair means is not success.
