erick Parsons, an English artist, is interested in those who have worked upon the panels. It is suggested that it would be suggestive for the sculptor intended to convey—was the god who headed—Speculative Note Concerning the Apollo-Aurora Basrelief Panel (addressed to the Sculptor Thorvaldsen.)

In classic mythology, Apollo was one of the twin sons of Zeus, and was known as the god of music, poetry, and the arts. He was the god who protected the flocks and cattle; the god of healing and music, the god who delighted in men's civic progress, and the god of the Sun.

In Homer's writings, however, we find Apollo as the god of the Sun, are two distinct deities; and it was the god of the Sun, who was the god of the Sun god of the Sun. The following from Mr. Fredrik Kedzie:

But without dwelling longer on the possible details of the sculptor's paradigm, the key line and form, and the interpretations of this story must appeal to every intelligent mind. The influence of the figures upon humanity has been so powerful that most natural and healthiest, rural life, corresponds with the powers attributed to Apollo by the ancient Greeks. He said the husbandman, his presence is a prophecy, he punishes at times, and, when he abides in all his glory on a beautiful spring morning, when all animate and inanimate nature sings aloud to the Great Creator, the sun god, is indeed the greatest Master of music.

But it would therefore appear that the sculptor intended to convey—was the god who protected the flocks and cattle; the god of healing and music, the god who delighted in men's civic progress, and the god of the Sun.

In conclusion, we find that the sculptor intended to convey—was the god who protected the flocks and cattle; the god of healing and music, the god who delighted in men's civic progress, and the god of the Sun.

THE M. A. C. RECORD.

PUBLISHED WEEKLY BY THE MICHIGAN AGRICULTURAL COLLEGE, EDITED BY THE FACULTY, ASSISTED BY THE STUDENTS.

SUBSCRIPTIONS SHOULD BE SENT TO THE SECRETARY, AGRICULTURAL COLLEGE, MICH.

SUBSCRIPTION. 10 CENTS PER YEAR.

Send money by P. O. Money Order, Draft, or Registered Letter. Do not send stamps.

Entered as second-class matter at Lansing, Mich.

For reasons the M. A. C. RECORD is circulated to those who have not yet subscribed for the paper. Such persons need have no hesitation about taking the paper from the box; for no charge will be made for it.

The only way, however, to secure the RECORD regularly is to subscribe.

The member of the faculty who now has immediate control of the RECORD desires to make of this corner of the paper a place where he may talk frankly and candidly to the young people of his college, and which may arise from week to week. If it can be wisely managed, it will form an introduction to a college paper, and will certainly be helpful both to him who talks and hears it. And when such talker hopes that in talking his attitude will be distinctly recognizable, that the traditional professor seated in the infallible chair and speaking ex cathedra, but of a citizen perhaps a little older and of wider experience, but still only a citizen in a community of common interests and common aspirations, may not always be palatable but it will always have as its sole motive the contribution of personal experience to “talk back,” he will be given a fair showing as long as he observes the singleness of purpose and courtesy of utterance that it is hoped will always characterize this column.

Football.

The football team of the Detroit Athletic Club showed far better team work and weight than last year and they won over M. A. C. last Saturday because of their heavier and more experienced men.

Only three of our last year's team entered the game, and four have not played this fall on any regular team.

It has been impossible to keep the same team together for successively whole games, but the boys put up a gritty game throughout, and their condition and capacity to make a strong effort was shown in the last fifteen minutes of the game, when they outplayed D. A. C. and won their two touchdowns by straight hard football, Buckeridge being pushed over for a touchdown. Pingree was easily the star of the game.

D. A. C. kicked off to the fifteen yard line, and stopped its progress after a return of fifteen yards. D. A. C. by spirited play on tackle chiefly, carried the ball steadily down the field for a touchdown in five minutes without losing it. This seemed a little discouraging to our boys, but they made a brace and D. A. C. was enabled to score but once more in the rest of the half, when the score stood 10 to o for Detroit.

In the second half D. A. C. made two touchdowns in ten minutes of play, when M. A. C. took on renewed snap and determination and played the game fast and together, working Buckeridge over for a score. Captain McCoe kicked a pretty goal from a difficult position. Score, at end of game, 21 to 6.

Word has just reached us of the death of Ross G. Monroe which occurred at his home at Rochester, Mich., Oct. 1. Mr. Monroe attended the college only a part of the school year of 1898-99, being obliged to give up his work here on account of poor health. His friends at the college extend their sympathy to his sorrowing parents and friends.

J. H. Brown, with ’87, formerly connected with the Michigan Farmer, and the Chicago Date Farming and Gardening, a monthly rural home magazine, published in Indianapolis, Indiana. It is now editor-in-chief of a rural home magazine, published in Indianapolis, Indiana.

Mr. Irving Gingrich, ’08, has just started his thesis work in the west forcing house. His experiments are to show the effect of various kinds of lamps on the profligacy, size, and color of carrots.

Two beds 3 ft. x 3 ft. are used, one containing sandy loam with composted manure, and one containing sandy loam with composted manure. One-half of each bed receives the artificial light throughout the night. The other half receives the normal alternation of light and darknes, while the other half receives the artificial light throughout the night from two thirty-two candle power lamps which are shaded and turned so that they may strike the rays to the experimental bed.
