Albion Powerless Before the Aggressive Work of Their Opponents.

Two hundred and forty M. A. C. rooters and sympathizers saw their team defeated by the Green and Gold of Albion at Albion Saturday. The rain poured down incessantly all day making the field a quagmire, and the Albion gridiron a field of mud and water, and after the first scrimmage the players were the same color as the ground they played on.

The rooters along the side lines were splashed to their knees with the clayey soil and were soaked to the skin with rain, but none minded such slight discomforts; for it was an M. A. C. day from the referee's first whistle to the last down.

In greater detail.

It was an orderly and good-natured crowd that gathered from the Lake Shore depot at 10:30 Saturday for Albion. Three extra coaches were run and they were all needed, since the round-trip fare of seventy-five cents had made it impossible for few to accompany the team from Lansing. Enthusiasm was worked up by the various yells, which were rehearsed with Driskel, Frenchmen and Pullips as yellsmasters.

The Who can? What can? What can? song was sung.

"Can, can can, we Rubes can." told every village passed through, that something had been "turned loose" and it likewise proved prophetic of the afternoon's results.

Albion was reached at 11:35 and at that time the rain was pouring down harder than ever. The main hotel, where the team put up, was so crowded that many of the M. A. C. crew were forced to resort to little restaurants on side streets, no provision having been made by the hotel where M. A. C. had been so large a delegation had not been expected.

At 1:15 p.m., the crowd began to assemble at the field grounds. The M. A. C. rooters, who outnumbered Albion's, lined up on the north side of the field and made themselves as comfortable as possible on the hastily provided benches, planks and benches.

At 2 p.m. the Albion eleven came onto the field and were cheered by their friends, who occupied the south side line. A few minutes later M. A. C.'s eleven came onto the field and were cheered to the echo by the delegation on the north side line.

M. A. C.'s eleven looked lighter but snappier than Albion's.

First Half.

At 2:15 the game was under way with both teams in running signals, universal Fitzgerald blew the whistle, and M. A. C. having won the toss and choosing to kick for the goal. Church kicked off to Childs on M. A. C.'s fifteen yard line. Childs by an effort, returned the kick 25 yards, made a gain of 20 yards and brought the ball to Albion's thirty-five yard line, where M. A. C. fumbled, Blanchard, caught the ball, made a gain of ten yards and the next play Childs plunted and Albion took the ball.

In two plays, Albion gained two and a half yards, but on the next play given ten yards, because of an offside play by M. A. C. Albion succeeded in gaining 15 yards to half back and made a fifteen-yard gain. A few short gains by Albion brought the ball within the last fifteen yards of M. A. C.'s score.

SECOND HALF.

At 3 p.m. M. A. C. took the east goal and kids kicked off twenty-five yards to Albion, Albion making a gain of one yard before the down.

Albion could not gain by line plunges or end runs, so a clipped-back kick which nettled fifteen yards and possession of the ball. Albion on the next play made a gain of 10 yards but on a fake kick, after which M. A. C. took the ball on down.

After a gain by M. A. C. of three yards, the referee ruled a foul and Albion were to move from their own fifty-yard line for gains of from one to six yards. The ball was given ten yards because of an offside play. After making some gains, M. A. C. took the ball on downs, made a gain of 20 yards back for slight gains when time was called with the ball at M. A. C.'s twenty-five yard line, where M. A. C. held for downs.

Dr. Kezdie on the Beet Sugar Industry.

Whatever Dr. Kezdie writes is always of value to M. A. C. people and indeed to people in general. As a favor, therefore, to those of our readers who do not see the Free Press every day, we quote from its issue of October 10, parts of an article by the Doctor on the Beet Sugar Industry in Michigan.

The industry begins by drawing a comparison with the wealth-distributing power of other large wealth-producing industries, such as lumbering, salt-manufacture, and coal-mining. It then continues:

Sugar Beets the Thing.

"But there is one field in which the farmer is in evidence, and from the nature of the case must remain there; viz.; sugar beets for manufacturing beet sugar. Here the farmer is in evidence and the price for refining to suit themselves. The fact that the price of "common beet sugar" passed by was seen that monopoly and trusts in the sugar industry are impossible in our state. Farming is free to all, any capitalist can put up a factory and no trust is possible under such conditions; the only trust required is that the farmers and manufacturer should trust each other. To cleave the best sugar industry with the sugar trust is absurd. Take these two facts (1) that the American method enables the manufacturer to turn out refined sugar, the only kind sent out from any possible monopoly, and (2) beet sugar factories are possible only by the co-operation of the farmers in raising the best beets, any capitalist can put up a factory for making the sugar. Competition is absolutely free and the sugar trust is possible under such conditions; the only trust required is that the farmers and manufacturer should trust each other. To cleave the best sugar industry with the sugar trust is absurd. Take these two facts (1) that the American method enables the manufacturer to turn out refined sugar, the only kind sent out from any possible monopoly.
THE M. A. C. RECORD.

PUBLISHED WEEKLY BY THE MICHIGAN AGRICULTURAL COLLEGE, EDITED BY THE FACULTY.

ASSTISTED BY THE STUDENTS.

EDITORIAL COMMITTEE: T. M. BUSH, PUBLISHER; T. W. SHAW, EDITOR; H. M. KINZER, ASS'T EDITOR. AGRICULTURAL COLLEGE, MICH.

SUBSCRIPTION - 40 CENTS PER YEAR.

Send address by Dr. Money, Order, Draft, or Bank Check.

Boston Office with Lawrence & Van Berkom.

Founded by J. H. celebrations 128 (October 1890)

Entered as second class matter at Lansing, Mich.

For further reading the M. A. C. RECORD is occasionally sent to those who have not subscribed. This privilege is given no hesitation about taking the paper from the post office, for no charge will be made for it.

Record Staff.

Howard Edwards, State Elocutionists' Association.

On Friday, Oct. 25, one week from next Friday, the Michigan State Elocutionists' Association will hold its annual meeting at this College. The morning and afternoon meetings will be free and open to the public and will consist of papers and discussions by well-known elocutionists of the State. The evening session at 7:30 in the armory will be very attractive to the public, as the people and the townspeople as well. Such well-known and accomplished readers as Prof. Trueblood of Ann Arbor, Mrs. Workman of the Detroit School of Expression, Mr. Martin of Hope College, Mrs. Ravel of Detroit, Miss Galpin of Adrian, and others will give papers and a series of readings.

TUESDAY AFTERNOON MEETING.

"Relation of insects to the pollenization of pears and apples," O. L. Ayrs.

"Determination of the varieties of pears and apples from their flowers," W. K. Wonders.

"Grafting of herbaceous plants," W. S. Palmer.

The talks were abstracts from the work of the students and can judge from the attention given them that the talks and comments made last the class all old credit to themselves and the College.

SIGHTS ABOUT MONROE.

Wednesday morning we took in the sights about Monroe, and especially the noted Elm avenue, one of the finest streets of Elm in the country. We also noted the old dwelling houses.

Prof. Hedrick took us to see the old apple orchard supposed to have been planted by old Father Heindlick. One tree in particular measured about thirteen feet in circumference. We also did some sight-seeing in visiting Greening Bros' Nursery. Here we were treated royally. Mr. Greening showed us about the nursery and explaining each subject thoroughly. He was full of advice which the liberally gave to the boys, and his favorite was, "Pat yourself forward and you will come out all right." To this, he claims, is due his success.

The attractive feature to us was the steam-roller, by which trees are much faster and at a less expense than by hand.

In the afternoon Mr. Inglisfret drove us around the city to the acre, owned by Inglisfret Bros. We enjoyed this trip very much and gained a great deal of knowledge.
relative to the control of a large nursery. Mr. Inglefritz answered many questions asked by the boys and seemed to enjoy it.

At 4:30 we departed for home and on account of the repeated M. A. C. yellings given the Monroe people will not forget us for a while. Everyone, including the two juniors, was pleased with the trip and hopes to take another before the year is over.

Y. M. C. A.

Thursday evening prayer meeting was led by Ray G. Thomas. Theme: Our companionship with Christ and Christian fellowship with each other. All who were present at the Thursday evening prayer meeting, were pleased to have with them Clnt H. Parker, a former Y. M. C. A. president. His testimony was a pleasure to all.

Come again, Mr. Parker.

The chapel services Sunday morning were conducted by Rev. F. A. Perry, of the Methodist Protestant church, Lansing. Mr. Perry took as his text Hebrews xii, 2, and showed that everyone should have a definite purpose in life, and that it is our duty to do all we can to make the world better for our having lived in it.

The Sunday evening union meeting of the Y. W. and Y. M. C. A. was held in the chapel. The services were conducted by Dr. Waterman. For a scripture lesson the 15th chapter of St. John was read, after which Dr. Waterman spoke briefly on the need of becoming a Christian while young; "for," he said, "nine times out of ten as a man leaves college so he will remain for life."

While in Albion, Friday, ye reporter inquired into the condition of the Albion College Y. M. C. A., and was informed that about 50 per cent of the entire college enrollment are active Y. M. C. A. members; and, further, that all of the seniors but one, all of the juniors but two, and all of the sophomores but five are active members. In our home Y. M. C. A. less than 25 per cent. of our seniors are members.

The Mission study class will be organized soon. Anyone wishing to take the work may do so.

Hesperian Party.

Last Friday the Hesperians gave their opening party of the year. Although the weather proved to be very unpleasant, it did not dampen the least, the spirits of the large number who attended.

The rooms had just been redecorated and that together with palms and other potted plants artfully arranged, made them present a fine appearance.

Dr. and Mrs. Waterman favored the Society with their presence and as usual provided delightful chaperones. Punch and wafers were always on hand for those who wished to partake. The menu was excellent and the floor in the best of condition, the "last dance" coming all too soon. Promptly at 11 o'clock all retired and expressions of the "enjoyable evening spent" were heard on all sides.

Miss Alta M. Llwson, 1899-1900, is reporting society news for the Detroit Journal.

Military Hop.

The first military hop of the season will be given by the officers of the battalion at the College armory on Friday evening, October 18. All members of the battalion are cordially invited to attend.

Booth's orchestra of Jackson has been secured to furnish music and an enjoyable evening is assured.

Cadets attending, will be expected to appear in full uniform, including gloves. Freshmen, without uniform, will be admitted the same as other members of the battalion. Special invitation is extended to both faculty and sub-faculty. Dancing will begin at 7:30 sharp.

H. E. V.

Capt. E. A. Lewis, formerly commandant of cadets and prof. military science and tactics at this College, has been returned from the Philippines, and is now in command of Fort Mason, a one-company post in San Francisco, near the old Presidio. He and his family are very comfortably installed there. It will be a pleasure to his many old friends to learn that the injury to his little daughter Mary's foot, incurred in an accident on a train at the outbreak of the Spanish war, was not a permanent one, and she is growing up into graceful and beautiful womanhood.

The regular "meeting of women," in the "Try and Trust Circle" of The King's Daughters, will be held Wednesday, Oct. 16th, at 3 p. m., at the home of Mrs. Barrows. Text word, "Shield!" Mrs. Barrows, leader. All interested in the Order, are cordially invited.

Furniture

Headquarters

COMPLETE LINE OF FURNITURE FOR STUDENTS' ROOMS

Canvas Cots at 95c. Woven Wire Cots at $1.50. Woven Wire Springs at $1.35, $2.00, and $2.50. Mattresses at $2.50, $2.95, and $3.00. Tables at $1.50 and $1.35. Chairs at 50c up.

Steel Ranges $15.00 to $40.00; Cast Cook Stoves with Reservoir $16.00 to $25.00; Base Burner Coal Stoves $25.00 to $40.00; Soft Coal Air-Tight Stoves $12.00 to $18.00; Air-Tight Wood Stoves $5.00 to $9.00. Nice Oil Heaters $3.25 to $4.00. All of them fully guaranteed. A nice line of Pocket Cutlery, Razors, Shears, in fact anything needed in the Hardware Line you will find it and at prices to suit you, at

MORTON'S HARDWARE.
A. Korschelt, '99, writing to send subscription to the Record, gives several interesting points about himself. He graduated at Cornell last year, and since then he has been with the Bureau of Forestry for a month after the University closed; and then obtained the position he now holds as forester with the N. Y. State Forest, Fish, and Game Commission. He finds his position a pleasant one. During the summer he spent three weeks in the Adirondacks, traveling about in Frankco, and getting a description of each piece of land, whether forest, timbered, waste, meadow, denuded or burned, and also with the state officials with which M. A. C. does good work; the time I spent there was very well spent."

Thos. A. Chittenden, '99m, now on the department of mechanical engineering and mechanical arts, North Carolina College of Agriculture and Mechanical Arts, Raleigh, N. C., wrote a word or two about his work. After leaving College he spent nearly a year with the McKim-­ McGush & Seymour Co. of Atlanta, Ga. He then spent a year at the State Normal College, at Albany, N. Y., and then went to the State College, place at Raleigh, N. C.; he has this year full charge of the work in drawing, likes his work, has success in it, and has good opportunities for study is improving his spare time in his other subjects much, and forward," says he, "with great pleasure from week to week for the arrival of the Record. It is certainly most profitable and interesting paper to me and I cannot get along without it." His life is looking forward and looking for the time to come when I can visit my College home, and see once more the College scenes so dear to me.

Friday noon and much enthusiasm worked up for the Alumni game, Sec. Bird, Coach Dennan, Brindamore, Ricozomb and others spoke.

By request we publish D. J. Crosby's address. A letter will reach him if directed to him at the University, and he is now in the Department of Agriculture at Washington.

J. R. Stewart, '91, with the Bureau of Soils, Washington, D. C. has recently been given charge of a thirty-four acre experiment tobacco farm at Tariffs, Conn. The tobacco is raised under cheese cloth, which is the method of cultivation is a very propitious from a weather standpoint a number of the students reach him if directed to him at the University, and he is now in the Department of Agriculture at Washington.

By request we publish D. J. Crosby's address. A letter will reach him if directed to him at the University, and he is now in the Department of Agriculture at Washington.
