COMMENCEMENT OF 1902.

THE LARGEST CLASS EVER GRADUATED FROM M. A. C. GOT THEIR DIPLOMAS FRIDAY.

The commencement of 1902 is a thing of the past, and nearly all the members of the class of '02 and the visiting friends have returned home. It is the common verdict that the commencement of 1902 was the equal of any commencement of former years. All the exercises passed off quietly and without a hitch or in the least uneventfully. Few, if any, of the exercises of the occasion are worthy of special comment. She has an excellent soprano voice which is well trained, and her manner is easy and unaffected.

The audience comfortably filled the Armory and listened attentively. Theodore Roosevelt, Wendell Willkie, and the members of the class of '02 sat together.

The terrible cost of military conquest, in both South Africa and America, has impressed upon the students that the lessons that were pointed out by the Peace Conference at the Hague are the lessons that are to be taught to the nations of the world. The nations are learning that peace is more productive of gain than war, and that the best interests of the world lie in the formation of a council of nations, which shall have the mission of preventing wars. The nations are learning that peace is the best protection of life and property. The nations are learning that peace is the best protection of life and property.

There are certain occupations, which, in the strict sense of the term, are not to be the captain of industries, not to be the leader of men. There are certain occupations, which, in the strict sense of the term, are not to be the captain of industries, not to be the leader of men. There are certain occupations, which, in the strict sense of the term, are not to be the captain of industries, not to be the leader of men. There are certain occupations, which, in the strict sense of the term, are not to be the captain of industries, not to be the leader of men.

The speaker then dwelt on the terrible cost of military conquest, in both South Africa and America, has impressed upon the students that the lessons that were pointed out by the Peace Conference at the Hague are the lessons that are to be taught to the nations of the world. The nations are learning that peace is more productive of gain than war, and that the best interests of the world lie in the formation of a council of nations, which shall have the mission of preventing wars. THE M. A. C. RECORD.

PUBLISHED EVERY TUESDAY DURING THE SCHOOL YEAR BY THE MICHIGAN STATE AGRICULTURAL COLLEGE.

EDITORS.

P. H. STEVENS, Managing Editor.

ASSOCIATE EDITORS.

J. G. MOORE, M. J. STEVENS.

STANLEY GARRETT, W. F. GOOD, H. R. HOEBERICK.

KATHERINE SLAGHT, MARY SMITH, H. A. ALEXANDER, E. F. SMITH.

Subscription.

10 cents per year.

Issued from the University Printing House by the University Press.

This paper is occasioned to non subscribers.

The Editors trust that all papers are brought to the home of the paper. For the want of a subscription does not expire at that time. It sometimes happens that there is a delay in the delivery of the papers, and consequent complaints because of the nonappearance of the paper. For this the editors can assume no responsibility. As a final word let it be said that in order to make the paper a success students, alumni, and friends of the college will take it.

THUSS is the last issue of the Record until the mid-summer number. There will be many things of interest in the last issue of the paper in September, and each one taking the Record is advised to keep it. This subscription does not expire at that time. It sometimes happens that there is a delay in the delivery of the papers, and consequent complaints because of the nonappearance of the paper. For this the editors can assume no responsibility. As a final word let it be said that in order to make the paper a success students, alumni, and friends of the college will take it.

TUESDAY, JUNE 26, 1900.

COMMENCEMENT OF 1902.

John and Mary graduated from the city school only two miles away, and next week James will be home from college. The mail is brought daily to the house. A telephone allows immediate communication with the Chicago commissary men who were today ingesting regarding fruit this year. The prospects are good and the orchard is being sprayed. We are looking forward to a great yield of peaches.

In the early days of our republic, country roads were well high improvements, railroads, steam road or turnpike roads were unknown. Country roads were superseeded by the toll road and turnpike. Country roads is an absolute impossibility. I refer to the nonappearance of the paper. For the want of a subscription does not expire at that time. It sometimes happens that there is a delay in the delivery of the papers, and consequent complaints because of the nonappearance of the paper. For this the editors can assume no responsibility. As a final word let it be said that in order to make the paper a success students, alumni, and friends of the college will take it.

I bring this harrowing tale of the mid-western home to you. The mail is brought every Friday. The editors trust that all papers are brought to the home of the paper. For the want of a subscription does not expire at that time. It sometimes happens that there is a delay in the delivery of the papers, and consequent complaints because of the nonappearance of the paper. For this the editors can assume no responsibility. Miss Maud Ryland Kellar writes to have her record sent to Wellesley, Mass.

Lyman Carrier has gone to Pontiac, where he will test a dairy herd for registration.

C. P. Reynolds was a commencement visitor.

A number of students are planning to stay through the summer and work on the buildings.

E. S. Good leaves this week for the University of Illinois where he will work for Prof. Mumford.

Matt Crosby, '02, has received his assignment for work in forestry and will go to the Columbia river region.

H. Foley Tuttle, '05, is one of the many students who remain at the University hospital in about two weeks to have his knee treated.

The mechanical department recently received three handsomely framed photographs from the Morgan Engineering Company, of Alliance, Ohio. The photographs show the interior of the hydraulic forging, bending and straightening department of the Machine works and also an 11-foot plate mill and electric galvannile plate shear manufactured by said company. These photographs form a valuable addition to the somewhat extensive collection now owned by the department of mechanical engineering.

The following note contributed by Dr. Beal will prove of interest to any one interested in agriculture:

A well known southern Texas stockman, J. T. Maltsberger, in an interview with the San Antonio Express, says: "Crops are needing rain worse than grass, and grass is needing it had enough. It will take an unusual amount of rain to restore the pastures in south Texas to the condition of eight or ten years ago. There has, in fact, been a disposition on the part of ranchmen to overstock the range ever since the passage of the lease law, and we are now brought face to face with the folly of our course. This tendency of a cattle man to get his money's worth from leased pastures or those owned in fee simple, has contributed largely to his undoing. If he doesn't quit his foolishness and give his range time to recuperate, now that it is lightly stocked, he is going to see more and worse trouble than he should fall to the lot of the cowman."

NOTICES.

All tennis players who are to stay at the college during the next month will please meet in the chapel tomorrow (Thursday) evening to arrange for a summer tournament. A tournament with Lansing is to be arranged in the near future.

This cut represents the IMPERIAL HAT, one of the best three-dollar hats made.

Lansing, Mich.

ALUMNI.

100. The marriage of Miss Bertha C. Collins of Dr. George D. Wells with whom, on June 4th at Mt. Pleasant, Michigan, has been announced.

101. Instructor Humphrey has given a summer vacation, which will be spent at his home, Adrian, Mich.

102. George D. White was married on June 8 at Milwaukee, Wis., to Miss Burdette M. Dorlandt. Mr. and Mrs. White are at home to their friends, 1292 Wells street.

BOARD MEETING.

At the meeting of the State Board last week there were a few changes in the faculty which were acted upon.

Miss Crowe and Miss Blunt handled for the last three years which were accepted, the same to take effect Sept. 1. Miss Blunt will be in Engineering next year and Miss Crowe has not decided where she will be next year.

In his own suggestion was made emeritus professor of chemistry with salary and residence. Prof. Frank Kendall was made emeritus professor of Chemistry as was Prof. Marshall of Bacteriology.

The following resolution was adopted: Referred the request of Dr. Robert C. Kelzle for pension which has been set up in the interest of Michigan Agriculture College and the State of the faculty, and the brilliant victories he has won over fraud, delusion and humbug by the method of giving his life to the causes of agriculture, the fruit of which is now on every hand; and appreciating that in his own line there should be a rest from the burden of toil and responsibility he has borne, to which he has given such untiring energy, therefore, be it

Resolved, by the Michigan State Board of Agriculture, That Dr. R. C. Kelzle has brought fame and distinction to the institution in which his life work has been done, and that to him in large measure is due the recognition which the College has received in every land where agriculture is respected.

Resolved, That as a fitting close to this long period of zealous labor, studies, the university, accomplishments and successes, and perpetuar in the line of long series of those who, in their varied capacities have gone in the kindliest manner, he is relieved of all exercising duties and made free from all responsibilities in connection with his profession.

Resolved, That while willingly responding to the request of Dr. Kelzle, we feel assured him that it is the desire of the Board that he continue his connection with the Department of Chemistry in any way and to any extent that he may desire, and that it is our earnest wish that he may be allotted many years of uncompleted and peaceful labor.

Resolved, That these resolutions be spread upon the records and a copy of them be transmitted to Dr. Kelzle.

After transacting some matters of lesser importance the Board adjourned.

MECHANICAL NOTES.

The majority of the graduates in the mechanical engineering course have already secured positions and expect to report for work this week.

Below are given the future addresses of some of the mechanical men:

Harry L. Brumley, Northern Engineering Works, Detroit, Mich.

R. Curli, Buckeye Engine Works, Salem, Ohio.

Frank A. Carpenter, Sterling Co., Barberton, Ohio.

Guy S. Covell, U. S. A., West Point, N. Y.

Fred C. Fox, Benjamin Midditch, Engineer & Mechanic, Detroit, Mich.

Clark W. Millsap, Mechanical Engineer, C. N. & W. R. R., Chicago, Ill.

Butt A. Peterson, American Tin Co., Elgin, Ill.

Ernest A. Richmond, Buffalo Forge Co., Buffalo, N. Y.

Dennis W. Smith, E. Bennett's Sons, Lansing, Michigan.

C. B. Strobel, Stirling Co., Barberton, Ohio.

According to the present outlook it is most probable that all the mechanical students of the present class will be employed by the end of the present week. The addresses of students whose names are not given may be obtained from the Mechanical Department.

FACULTY VACATIONS.

The following notes as to where some of the members of the faculty will spend their vacations will doubtless prove of interest:

Dr. Beal expects to remain at M. A. C., a large part of the summer. He will perhaps do some forestry work in the Michigan woods.

Prof. C. D. Smith will teach in the School of Agriculture to be held at the Ohio State University, a mention of the school being made last week.

Mr. King will go east for study; some of his time is to be spent at Harvard but the most at Columbia. Miss Welman will visit in Ypsilanti and other points in Michigan.

Mr. Holbrook will study in the University of Chicago for the work for his Master's degree.

Mr. Dennan will return to New York for the summer.

Prof. Kendall will visit Pittsburgh possibly and attend the sessions of the American Association for the Advancement of Science, American Chemical Society, and the American Association for the Promotion of Agricultural Chemistry.

Prof. Frank Kendall expects to take an outing at Harbor Beach, Dr. Edwards and family will spend part of the summer in Virginia.
