NEW MEMBERS OF THE TEACHING FORCE.

CHESTER L. BREWER.

Prof. Brewer comes here from Albion as Director of Physical Culture. His four years' work at Albion has been very successful. He has had winning teams, and has the power of making students enthusiastic.

Mr. Brewer is a graduate of the University of Wisconsin's class of '97. He is an athlete of much experience and with an excellent record. He was selected by Walter Camp for the All-Western baseball team in 1896-97. He knows the game at every point, having played on bases, in the field and pitched. He was one of the best football players in the west during the season of '96 and '97, was right end in Camp's All-Western eleven, and is very successful in his work.

R. TAYLOR.

Was born in Bowling some 24 years ago. He graduated from the high school there in 1895 and entered Harvard University and has spent three years at that institution doing special work in chemistry.

Geo. W. Hartwell.

Instructor in mathematics, was born in Hamborg, N. J. He graduated from the Hackensack high school in 1899 and entered Wesleyan University in the fall of the same year, graduating with the degree of B. S. in June, 1903. He made a specialty of mathematics at the University.

Roback W. Norton.

Instructor in animal husbandry is a resident of Livingston Co. He was graduated from the Howell high school in '99 and from the agricultural course in 1902.

O. O. Church.

Instructor in Agronomy and soil Physics was born near Capac, St. Clair Co. He attended the district school and was graduated from the Capac high school in 1890. In the fall of that year he entered M. A. C. and specialized in soils and crops. He graduated in June, 1903.

R. Hopkins.

Instructor in mathematics and civil engineering, graduated from the high school at Nevada, Iowa, in 1899, and from Ames in 1903, with the degree of B. C. E.

HELEN E. ST. JOHN.

Instructor in sec. 3. Comes here from Toledo. She has received her training at Pratt Institute.

W. J. Carrell.

Instructor in mathematics, is a graduate of the Cincinnati high school. He attended Alma College one year, served in the Spanish-American War and was graduated from M. A. C. last June in the civil engineering course.

With '95 A. A. Garner of White Lake, Oakland Co., visited college during vacations for the first time since he left in 1895. He was completely lost. Finally rest at College Hall were the only buildings. Now the 100-acre campus is dotted with laboratories, dormitories and residences. Mr. Garner brought a son for entrance and was more pleased with the modern M. A. C.

Dr. S. P. Tracy is trying to arouse interest in nature study in the public schools of Indiana. It seems that botany and related subjects have been taken from the high school courses in some localities.

With '98 Robert Warden visited the College recently with a view of instructing his son enter the freshman class.

J. D. Towar is president of the section of agriculture of the Australian Fellowship and returns to his Alma Mater as a student professor of farm economics.

W. R. Shedd.

Instructor in mathematics, is a graduate of the Wisconsin State Normal College at Ypsilanti.

Miss Eleta Olson of Fargo, N. D., on August 8. They will be at home after October 15. The M. A. C. Record wishes them much happiness.

Ray S. Baker has an article in the September McClure that is drawing considerable attention. It is based on his collection of newspaper clippings, daily papers and those interested in capital and labor.

Dr. A. F. Gordon has fine dental offices at 215 Washington Ave. S., Lansing. He has a large practice and is very successful in his work.

Prof. W. W. Peet of the State Normal College at Ypsilanti is the author of Laboratory exercises in chemistry. A copy has been placed in the Alumni Library.

A. H. Gillett, principal teacher in the Indian school at Shawnee, Oklahoma, called here during August. Judging from all appearances, the climate and food supply seem to be suitable to his needs.

Hon. L. Whitney Watkins has been obliged to leave for the west on account of his health. His many friends will be pleased to learn that he is doing splendidly. He is located at Gray's Harbor, Washington, and can be addressed at Casnopoly. Before returning to Michigan he expects to hunt bear, elk, and deer in the huge forest of birch, spruce, hemlock and fir.

He has already gained fifteen pounds in weight and by the time he bags his game he will perhaps be much heavier.
TUESDAY, SEPT. 24, 1903.

Does a college education pay? Yes, if it is of the right kind. The world needs men and women of cultivated brains, hands and hearts. If the college trains merely brains and hands, the education secured may be very valuable, but it lacks one vital thing—character building.

A college is the place to break old habits and form new ones. Be very careful. Remember the German adage—"New books are often bad, good books are often old."" Cheerfully answered.

To welcome you. Read in some of that river and south of the Dakotas, except Vermont, Wisconsin and Florida, and neatly every state west of the Mississippi and north of the Ohio. Jamestown Centre. He recently has been working in Arizona, looking for the State of Georgia. He will return to his work in Texas at as increase in salary next year.

Dr. John W. Rigterink is spending several months in Berlin and Vienna. He is specializing in surgery under the famous Dr. Loeser.

Mr. Parker is employed by the Experiment Station at Troup, Texas, with headquarters in the New York Life Building.

George A. Parker was married to Miss Carrie White Fish of Mt. Vernon, Ohio, on Sept. 1st. About 800 guests were present. Mr. and Mrs. Parker visited the College on their wedding trip. They will reside in Wilkinsburg, Pa., a suburb of Pittsburgh where Mr. Parker is employed by the Westinghouse Company.

With 1900 Dr. B. L. Lasting is enjoying a lucrative practice at Jamestown Centre. He recently induced his brother-in-law, Mr. Talman, to enter college.

With 1900 F. M. Owen is a star pitcher with the Chicago American League. He twirled for M. A. C. during his college days.

No charge will be made for it. The only way, however, to secure the paper regularly is to subscribe.

TUESDAY, SEPT. 24, 1903.

Does a college education pay? Yes, if it is of the right kind. The world needs men and women of cultivated brains, hands and hearts. If the college trains merely brains and hands, the education secured may be very valuable, but it lacks one vital thing—character building. A college is the place to break old habits and form new ones. Be very careful. Remember the German adage—"New books are often bad, good books are often old." Cheerfully answered.

To welcome you. Read in some good book every day. Besides the Bible you have brought along, you will have access to the library, where any inquiries about books will be cheerfully answered.

The amount of time wasted in nearly every college is about 50 per cent of the whole. Have a program of study. Place it on the wall above your table, stick to it. Concentrate when you study. If when you read, your mind runs to other things, stop and begin again. If not, read it over again. Outline your lessons. When you put your books aside, see whether you can follow the outline. Your success in college will depend on what you do with your time. Many men have so used the margins of their time as to become experts along certain lines. It is as easy to succeed as to fail.

ALUMNI.

D. D. MacArthur has been transferred from Oregon to Mohave, Arizona, as Supt. of Indian schools. The school needs a larger salary and increased responsibility, as well as a more agreeable climate.

Frank Pass of Casville, Missouri, is interested in the lumbering and lumbering in the south. He expects to move to Detroit in the near future.

W. C. York announces the arrival of a 900 Joseph, William, born August 9th, at Dillon, Montana. Dr. York is supervisor of public education and pedagogy at the state normal college of Montana.

A. C. Miller is manager of the Crosby stock farm near Greenville, Michigan.

O. J. Davis is with the Minneapolis Steel and Machinery Co. Clyde L. Davis is working for the same firm and both are enjoying their work.

L. G. Michael, assistant in the chemical laboratories last year, is at Columbia University, having secured a scholarship in Mineralogy.

E. S. Good is experimenting in live stock at the University of Nebraska.

W. P. Snyder is instructor in live stock at the University of Nebraska.

With 1906 Edward Finanze has been signed by the Philadelphia American League for next year. It will be remembered that he had the U. of M. team at his mercy for eight innings last April, allowing but one run during that time, and batting out the winning run for M. A. C.

With 1907 Jas. H. Schwalbirt has entered the engineering department of Purdue University, Indiana.

P. G. Towar is interested in a two-house beet harvester. The machine is said to be very practical as well as novel. It lifts the beets from the ground, cuts off the crown and deposits them in a row at one side.

Dr. Joseph Foster was married early in July to Miss Nora Baird of Lansing. They spent their honeymoon in Europe visiting different cities. In Vienna, Dr. Foster took special work in the hospitals. They will be at home Oct. 25.

C. B. Smith is the happy father of a "pair of twins" born the first week in August. Mr. Smith is employed in the Department of Agriculture, Washington, D. C.

L. L. Loper will be chemist in the St. Louis Beet Sugar Company the coming campaign.

Otto Schreiber has been in the chemical department, Washington, D. C., the past vacation assisting Mr. Munson.

J. L. Therese succeeds W. J. McGee, '96, in the Jewell Filtration Co., of Chicago. Mr. McGee is installing a plant for the same firm in Cleveland, Ohio.

Wilson's Sugar Bowl.
A new heating system has been installed at Prof. Weil's.
The Y. M. C. A. rooms have been considerably improved during vacation. A new floor has been put in.
Y. M. C. A. Handbook is ready for distribution. It is a very valuable little book and every student should have a copy.

The attendance at the College this year promises to be a record-breaker. Fuller information will be given in our next issue.
The cooperative book store has been moved from Williams Hall to the station house. Larger quarters have been secured and the vacated rooms can now be used for students.

Football practice began yesterday. The outlook is quite promising, some good material having joined the squad besides severe of last year's players. Coach Bower expects to put the boys through severe tests this week, so that the quality of the men can be determined.

Mrs. Jennie L. K. Hiner, who has had charge of Domestic Art for six years, has been granted a leave of absence. Many high school graduates, Entrance requirements not able to attend.

The chemical laboratory has been rearranged during vacation. The number of students taking chemistry is very large, and every square foot of space is occupied with something. The south end of the basement is used for laboratory work in organic chemistry. The rooms vacated by the experiment station chemist have been fitted up for storage of chemical's and apparatus.

F. W. Robison, chemist of the experiment station, now occupies the second and third floors of the veterinary laboratory. The work in this department has constantly increased of late years. Assistants have to be employed from time to time. The new quarters are more commodious than the old, and are much better arranged for experimental work.

The book elk became so vicious that it was dangerous to the public health to have him around with his equipment of antlers, Mr. Jennison could testify. Accordingly the entire horticultural department, armed with ropes and saws, and together with some ten or twelve other assistants, finally managed to secure Mr. Elk on the second day of their quest, and successfully performed the operation of "deantlering."

About 135 new students were classified yesterday. This does not include those who are to be examined for entrance. Many are high school graduates. Entrance requirements are the recognized standard.

Prof. Weil has been gradually improving in health. Prof. Weil was here working on the power plant. Prof. Bogue spent some time among the mountains in New York, studying forestry problems. Dr. Beal spent four days representing the College at the fiftieth anniversary of Hillslide college and the same amount of time visiting relatives in Lenawee county. The rest of the time was spent in studying thoroughly the Flora of Michigan and completing a work on "How Plants Protect Themselves." The doctor thinks that his recreation may be looked for in teaching large classes, teaching the higher life.

Dr. Marshall will return from Europe this week. Dr. Marshall has been studying at the Insititute, France, and also in Berlin along the line of research work in Bacteriology and laboratory equipment. Prof. Bugge spent some time among the mountains in New York, studying forestry problems. Dr. Beal spent four days representing the College at the fiftieth anniversary of Hillslide college and the same amount of time visiting relatives in Lenawee county. The rest of the time was spent in studying thoroughly the Flora of Michigan and completing a work on "How Plants Protect Themselves." The doctor thinks that his recreation may be looked for in teaching large classes, teaching the higher life.
