FOOTBALL

M. A. C. 11—Kalamazoo 0.

The second game for the inter-collegiate championship was won by M. A. C., after a very hard contest. Kalamazoo outweighed M. A. C. about 20 pounds to the man. But they were too slow in getting started and were thus prevented from using their weight to advantage. Line breaking was their style throughout while M. A. C. resorted to.

The game started by M. A. C.'s kicking off. Kalamazoo carried the ball back, but was forced for downs before they became dangerous. End runs by Miller, Hahn and McKenna brought the ball to Kalamazoo's six-yard line, and here Doty carried it over for a touchdown. On account of the strong wind the attempt for goal failed.

But they were too slow in getting down. On Kalamazoo's 12-yard line Small made a quarterback kick which McKenna caught for a touchdown. The second game for the inter-collegiate championship was won by M. A. C., after a very hard contest. Kalamazoo outweighed M. A. C. about 20 pounds to the man. But they were too slow in getting started and were thus prevented from using their weight to advantage. Line breaking was their style throughout while M. A. C. resorted to.

The ball changed hands frequently for the remainder of the half, and at its close was on Kalamazoo's 8-yard line. Twice saved Kalamazoo from being scored on.

In the second half, Miller caught the ball and returned it five yards. A large number of geological and mineralogical books have been added to the library since Sept. 25: Modern Geology, J. A. H. Weeks; Statics by algebraic and static methods, L. P. Johnson; Statics by algebraic and static methods, L. J. Johnson; Electricity and magnetism, Foster and Porter.

Principal species of wood, Chas. H. Snow; Physics of agriculture, F. H. King; Hydrostatics, J. H. Potter.

The meeting was well attended, and all report a pleasant time. Let us so fill the chapel room that the armory will have to be made use of for all public services. The Bible classes are now fairly well organized. All those desiring to take any Bible work see the general secretary, office in Y. M. C. A. room, Room 111.

We ought to have at least two hundred in Bible classes, while there are less than a hundred at present. How will you help the enrollment?

The following books have been added to the library since Sept. 25: Physical Chemistry, C. H. Van Deaver; Statics by algebraic and static methods, L. J. Johnson; Electricity and magnetism, Foster and Porter.

LOSS.

An Hesperian society pin was lost on the campus last between college hall and the botanical laboratory. Finder will confer a great favor by leaving it at the President's office.

Y. W. C. A.

The Thursday evening Y. W. C. A. prayer meeting was conducted by Miss Bessie Cordell. The Bible lesson was from Luke X, 23-38. The leader emphasized the need of loyalty to Christ in our lives by suggesting that a loss of faith in his work is a failure of the faith of the society. The meeting will be held at 7:30 p.m. on Saturday, October 17. They will be at home, Jamestown, Mich., on Oct. 14. The M. A. C. He is managing a Southern R. R., in the office at home.

WILLIS C. MARSHALL, SOIL LABORATORY MANAGER.

Mr. and Mrs. J. L. Wright of Exeter, Mich., have been visiting Mr. and Mrs. F. W. Robison.

Miss Elvine Armstrong is assisting in the library, taking the place made vacant by the resignation of Mr. Paulchuck.

R. C. Benner, instructor in chemistry at M. A. C. last year, is now in the chemical department of the University of Wisconsin.

Miss Gunnison, '05, has been home ill with appendicitis. Her college friends are glad to learn that she is gradually improving.

Mr. B. Wermuth, secretary of the Y. M. C. A., is getting out a college directory. It will be ready for distribution the latter part of the week.

Miss Maudie Gilchrist, dean of the women's department, has been appointed supervisor of the department of domestic science and art at the St. Louis exposition.

In the library can be found good paintings of Dr. R. C. Kedzie, Dr. Abbott, Judge Wals and Franklin Wells; also a bust of ex-president Willits presented by the Delta Tau Delta fraternity.

There is a decided improvement in the College water supply since the new pipes have been put in. The germ content has been reduced over 90 per cent. The water is at present comparatively pure. Some of the wells in Collingdale indicate surface contamination.

Prof. Holdsworth's class in descriptive geometry is constructing models representing the work in this subject. Some very fine ones are now on exhibition. Among these might be mentioned a plane tangent to a cone and a prism intersecting a sphere.

The Phi Delta society recently gave a party to its friends. There was a large attendance and all had a most enjoyable time. The rooms were elaborately decorated with palms and bowling. Mr. Perry of Lansing having furnished the music while Prof. and Miss Vedder acted as chauffeurs.

Judge M. Brown, of Big Rapids, was a caller at the College last Thursday. Judge Brown is one of the foremost attorneys of the state, and was in Lansing to examine candidates for admission to the bar.

The judge is most interested in agricultural lines, especially live stock.

A large number of called "Aqueous" separators have been sold throughout the state. They are cheap and are represented to be far superior to any substitutes. In dairying, has conducted extensive tests and has found that nearly one-third of the butter fat is lost by these separators.

Due to the crowded condition of the school room of the M. A. C. public school the board thought best to make a change. Grades seven and eight inclusive, attend school from 8:30 to 11:45 a.m.

The pupils in these grades study astronomy, botany, and languages.

The device is especially adapted to paraffin baths, but can be used in connection with incubators and ovens as modified. It does away with the necessity of danger of germ and shows considerable mechanical skill as well as a good understanding of electricity.

Director Brewer has posted the following schedule for class games.

Oct. 7—Seniors vs. Sophomores.
Oct. 15—Sub-Freshmen vs. Freshmen.
Oct. 24—Losers above two vs. winners of first game.
Nov. 7—Winners of second vs. winners of third game.
Nov. 14—Winners of fourth vs. winners of fifth.
