The M. A. C. RECORD

MECHANICAL ENGINEERING TRIP TO CHICAGO.

Prof. Weir and Messrs. Shell and Leonard accompanied by 25 engineers took the M. A. C. on a trip of inspection to the most important plants of Chicago. The party left on Thursday afternoon, Oct. 22. On Friday morning at 8 o'clock the work began. For the sake of thoroughness, the party was divided into three sections each taking a different route. This account will follow one section.

The first place visited was Ellis & Chudnow. This firm does special work along the lines of hydraulic machinery and mining equipment. They supplied the Kimberly mines of South Africa and are known all over the world.

On Friday afternoon the real object of the trip was accomplished, the visit to the Illinois Steel Co. This concern employs 4,000 men and is a great deal of business. Prof. Well and Mr. Post, of the engineering college, went through the plant. The processes of manufacturing steel were carefully studied. One thing very noticeable was the small amount of labor, and another the fact that everything was handled by machinery. The whole of Friday afternoon was profitably spent in this place.

On Saturday morning a hasty view was taken of Marshall, Field & Co.'s large store. The object was to get an idea of the amount of work and the size as well as the system used in handling 740,000 tons of merchandise.

The last place visited was the Chicago Edison Co. The electrical machinery was carefully examined. The method of handling the coal was quite interesting. The coal is carefully sampled in the boilers and from these the coal is supplied as needed. The ashes are removed automatically. The company has two 7000 h. p. engines and consequently the method of handling the coal by machinery saves a large amount of drudgery.

In the afternoon the boys went as they pleased. Some came home, others visited minor plants and still others saw the Chicago-Illinois game where the rooting was better than the playing.

All the juniors are enthusiastic over the trip and pronounce it a decided success. Ideas are enlarged concerning the advantages of securing their education in securing a practical education.

ZOOLOGICAL CLUB.

A zoological club has been formed this term which meets every Tuesday evening at 7:30 in the zoological laboratory. The object is to discuss some of the interesting problems of animal life and compare notes with the various animals to work at M. A. C.

A B O U T T H E C A M P U S.

The total enrollment at the Secretary's office is 790.
Several new electric lights have been put in the botanical laboratory.
Mr. G. A. Lamberth of Niles is spending the week at the College the guest of her son.
Members of the Shakespeare Club and those interested in this work, will meet at Dr. Edwards' house, Wednesday evening, Oct. 28, at 7:30.
The seniors in Zoology are studying the branch echinoderma. The starfish, the characteristic animal of this branch, is being dissected and drawn.
F. W. Robison is cooperating with the U. S. Dept. of Agriculture in trying to improve present methods for the analysis of potatoes and phosphorus in fertilizers.
R. H. Pettis, entomologist of the experiment station, has spent the past week in Ann Arbor receiving treatment at the University hospital for arthritis of the knee.
F. M. Shotwell recently visited the College and left some samples of cement. He is in the employ of the Portland Cement Co. of Fenton, Mich., in their Detroit office.
790 are enrolled in the mathematical department, and they average five hours per week. Many take two classes and several take three.
The total number of different students enrolled is 573.
The Pacific Starch Co. of Jackson, has sent samples of wheat starch crystals, number 2 starch ground and gluten flour to Prof. Jeffrey for use in his class studying farm crops and their products.
In a letter to Prof. Holdsworth, former Lieut. Simpson states that he is now captain and adjutant of the 6th U. S. Infantry stationed at Ft. Leavenworth, Kansas. Miss Bethel is now a sophomore in the high school.

When you buy a Sweater
Why not get the best? SPAULDING'S SWEATERS AND ATHLETIC GOODS are the recognized standard of this country. We have the different qualities at four, five and six dollars, in white, black, maroon, navy and grey. All the late things in Hats, Caps, Neckwear and Gloves in fact, everything in the way of Ladies' and Men's Furnishing Goods. Students' patronage solicited.

Elgin Mifflin.
Being sewage germs. As a rule of germs were found among them the pig. A large number of species to the action of germs directly on generated in the culture and not inside of ten, hours. This sudden to those who wish to use it and may be received until Nov. 2, after which date none can be admitted unless they have previously sung in The cret society, the program was enriched by several solos of Goethe's Lyrics, composed by Schubert and Beethoven.
