M. A. C. has reason to feel proud of her representative at Adrian. Miss Davis was third in composi- tion and the Adelic correspondent of the Sunday Tribune says that "Miss Davis received the most audible comment, and one might say was the star performer, though not the winner. Considering the fact that Miss Davis is 10 years younger than the winner and that all her competi- tors were pedagogues or would-be preachers, it is not surprising that she has had a classical training, her record is nothing short of wonderful." Miss Davis had just recovered from an attack of the measles and was as a result in poor condition to endure such a severe nervous strain. But we will not speculate on "ifs." We are told that with third place among the classical colleges, especially since we make science a specialty.

THE CURE-ALL.

The Owens Process Co. is still advertising their patent mixture, which is claimed to do such won- derful work for the cure of scabies and such like diseases and insects. In their advertise- ment the company says, "The Michigan Agricultural College has had work done for them at Lancing and also at South Haven." T. C. Mosley, manager of the company, has written to J. Pettigrew, of Boston, Mass., Mr. Pettigrew referred the matter to Dr. Britton, director of the New York Botanical Garden, and wrote a letter of inquiry to Dr. Balbach. The firm's agent while at M. A. C. asked permission to test the mixture. The above specimens was allowed to proceed. The whole process was a secret one. Nobody was allowed to see the operation. However, some of the powder was removed in the next day and anal- yzed with the following result: Starch, 11.5% per cent, colored with charcoal, and sodium sulphate of commercial purity. As will be seen most of the material is insoluble. Its value is very hypothetical. The College does not endorse this compound and advises all to steer clear of it.

Lansing, Mich.

ABOUT THE CAMPUS.

Mrs. French, mother of Mrs. H. M. Holbrook, is very seriously ill at the present writing.

Miss Lyford spoke on domestic science at the farmers' institute held at Dansville last Thursday.

About 30 photographs have been taken of the college herds for purposes of exhibition at the St. Louis Exposition.

The icy walks have caused many a fall the past week. Among the injured are a broken elbow and a broken knee cap.

Through the kindness of H. E. Weed the Horticultural Department has received some fine plans from W. E. Baudry, a landscape architect from Chicago.

Mrs. C. D. Smith is improving rapidly. She is able to be up and can walk a few steps with some assistance. While still weak the signs are very encouraging.

The Farm and Livestock Journal had a very interesting report of the Round-up. The press in general has been giving very extensive reports. The comments are very favorable.

The recital at the Women's Building last Friday night was a success and a broken knee cap.

The Phi Delta Society entertained their lady friends last Saturday evening at a ten o'clock. The literary program consisted of a clarinet solo by J. H. Proatt; "My first trip to the moon," D. S. Upde- 
graft; "Select Reading," G. V. Howard; Recitation, H. H. Pearse; music, B. B. Lundard; Original poem, "Some women I have known," R. E. Ferguson; music, N. C. Perry. After the program a marshmallow roast was indulged in. H. W. Geller prepared a few oriental drinks for those who wished them. Just before the party departed a flash light was taken of the merry group. And all departed thinking the time allotted was much too soon. The party was pleasantly chaperoned by Mr. Robinson and Miss Gilchrist.

The question, "Resolved, That the United States should adopt a Parcel Post System," was debated at the debating club March 31. The affirmative speakers were Messrs. Gunnison and Button; the negative, Dr. Edwards and Mr. Flint. The success of the parcel post system in Germany and the growing demand for it in the United States were cited by the affirmative as reasons for its adoption. The negative held that, if adopted, it would increase corruption in governmental affairs and would not be advantageous economically as our express companies today do the service of a parcel post system. The affirmative, in quotation, said, that there are just four things which would never permit of a parcel post system, viz., The American Express Co.; the National Express Co.; the United States Express Co.; and The Adams Express Co. The judges declared the affirmative as the winner in favor of the affirmative. At the next meeting, the question, "Resolved, That in the next presidential campaign the issue adopted by the Democratic party should be opposition to imperialism."
Mr. Close, of Lansing, is assisting Mr. Brewer in in-door work. Mr. Close is a great favorite with the boys, and is an excellent instructor in wrestling. He has been at A. C. for several seasons, and has met with good success.

The State Board of Agriculture held its regular meeting on Wednesday, March 2. The bids for the construction of a power house and for special iron work were opened. The matter was left to Mr. Graham and Pres. Snyder. The salary of Prof. Farrand of the South Haven Station was increased $2000.00 per annum. Instructor H. L. Read was given a leave of absence beginning March 26. C. A. McCie was elected Instructor in Horticulture. The salary of Pres. Snyder was made $5000.00 per year, beginning March 1, 1904.

The final in the debating series took place last Thursday evening. The question was the restriction of suffrage in Mississippi. The affirmative speakers were Mr. W. E. Anderson, Mr. W. K. Millar, and Mr. M. C. Close. The negative side was argued by Pres. Snyder and Prof. A. R. Sawyer. Mr. Farrand of the South Haven Station was invited to make a statement on the subject of Agriculture at a salary of $5000.00 per annum. Instructor H. L. Read was given a leave of absence beginning March 26. The salary of Prof. Snyder was made $5000.00 per year, beginning March 1, 1904.
