The high jump was won by Schneek, of Alma, Moon and Barrill, of M. A. C. and McCollum, of Alma. Highest height was four feet and ten inches. In the second place, the points were divided, Alma receiving 6 and M. A. C. 2. Height 5 ft. 1 in. In the third place, M. A. C. and Hyway of Alma tied for first in parallel bars and each was awarded 4 points. Prof. A. R. Sawyer comes to M. A. C. to take charge of physics and electrical engineering. Prof. Sawyer was graduated from Leland Stanford Jr. University, and from Wisconsin University where he received the degree of E. E. After graduation he worked for a time at electrical engineering in a practical way. He then held the position of instructor in electrical engineering in Wisconsin University for two years, after which he took charge of a similar department in the State College of Kentucky, from which institution he comes to M. A. C. The members of the faculty and the student body bid him heartily welcome and assure him loyal support.

BASKET BALL.

The Grand Rapids Y. M. C. A. will play in the College annuity next Saturday afternoon. This will be an interesting contest, both teams are strong. M. A. C. won the first game by the small margin of one point. Come out to cheer and to encourage. Give Grand Rapids a hearty welcome.

M. A. C. 50, ALMA 38.

Director Brewer and 10 athletes left for Alma Saturday morning to take part in a dual meet. The general interest was good and Alma was, as usual, very enthusiastic. All the Alma students attended the meet and cheered both sides liberally. The M. A. C. boys were well treated. Alma is always hospitable, genially and good to the end. The meet was for exhibition purposes, and to try out the different men.

The shot-put was the first event. McKenna of M. A. C. was first and Moon, M. A. C. second. Distance 33 ft. 7 in.

In the high dive Moon and Manning of M. A. C. tied for first. Since this gave M. A. C. first and second, the event was not decided between these men. Height, 5 ft. 6 in.

In club swinging, Swigert, last year's intercollegiate champion won first for Alma and Manning, M. A. C. second.

DETROIT BANQUET.

The second annual banquet of the Detroit M. A. C. Students' Association was held at Fellows Court Hall, 7 p.m., March 12. The banquet was quite largely attended although the reception to Col. Hecker of the Panama Commission drew away several who had political aspirations.

Attorney J. W. Beaumont, '82, president of the association, announced that the high jump was won by Clerk of M. A. C. and Hoog of Alma tied, neither securing a fall. In weight, Jennings of Alma won from Beikman of M. A. C. Beikman showed excellent form. This was his first contest but he gave Jennings, last year's champion, a tussle for his life. The feather weight champion was selected from among the members of M. A. C. Each event had only two contestants save the shot-put, high jump and diving. This made it difficult to secure accurate comparative scores since one or the other had to take second. Manning of M. A. C. secured the most points, He won 11 in all.

ALUMNI.

The Smithfield Institution has just published an advanced scientific monograph on Reas, by C. F. Hurd. It is called "A Revision of American Siphonaptera, or Fleas," and is a very wide ranging study of this comparatively little known group of insects, upon which he has done advanced work, in the field as well as in the laboratory, in both entomology and botany, his numbered collections being now known in most of the prominent universities, and museums of this country and Europe. He has collected in South and Central America and very widely throughout the deserts and mountains of our western counties. He now occupies the chair of biology at Pomona College in Southern California.

W. C. Stebbins, who teaches physics, chemistry and botany at Grand Forks, N. Dak., has learned the Russian language. It is not certain that he will join the Russian army, but he threatens to use the language in a vindictive way if some things happen again. "Steb" is doing real well and will get an increase in salary if he chooses to stay next year.

B. A. Bowditch, of Pittsford, Mich., is teaching a third year. He conducts a general mercantile business and manages a farm. He keeps his eyes on the cattle. Things are coming his way and he enjoys the work.

R. L. Cloete is living in the Philippines. He can be addressed at Manila, in charge of the Educational Department. He says that the prospects in the Philippines are very encouraging.

Mr. Irving G Altich, on his return from the annual meeting of the American Carna­tion Society in Detroit, stopped at the College one day last week. The meeting was a success in every way, and Mr. G Altich is a greater enthusiast in his chosen line than ever. The South Bend Floral Co., of which he is a member, cannot turn out stock fast enough to suit the customers and the demand for their product is increasing more rap­idly than can be met. Mr. G Altich is a skillful hybridist and has produced some seedlings which are doing exceedingly well as shown by photographs of both blooms and buds. The South Bend Floral Co. is located at 28 ball Ave., South Bend, Ind., and he is always glad to receive calls from M. A. C. men.

TUESDAY, MAR. 15, 1904.

Y. M. C. A.

Mrs. Lawson, missionary from northern India, attended the union meeting of the Y. W. and Y. M. C. A. Thursday evening in chapel. Mrs. Lawson spoke in the interest of an industrial missionary enterprise now being inaugurated in northern India. This enterprise aims to convert, who accepting the gospel of Jesus Christ and being baptized and living upright lives, by their own friends and relatives, and having their business practiced, can effectually propagate, and with the help of their own neighbors, all means of a livelihood denied to them. Besides securing this end it will stimulate and educate the people to an intelligent and more satisfactory practice of agriculture, horticulture and related occupations. There are many ways in which industrial missionary enterprise and medical missions, can be of great value to India. The meeting was very interesting.

Rev. R. C. Dobbs, of Lansing, conducted chapel exercises Sunday morning. Text John 1:23. Theme "The attractive power of Jesus Christ on the cross of calvary." The sermon was very interesting and replete with suggestions and thoughts.

Rev. Dr. Edwards addressed the union meeting of the Y. W. and Y. M. C. A. Sunday evening. Subject: "Consistent Men." The address dealt with the conscience, what it is, how it works, how it may be developed and cultivated, or how it may be developed and made more accurate and delightfully responsive. The theme and purpose of conscientiousness in life generally was discussed. Many valuable suggestions were made.

Horticultural Club.

Prof. J. A. Jeffery talked on Soils at the Horticultural Club last Wednesday. He referred to a bulletin published in 1890 in which it was claimed that there is a common fruit soil, which had been cropped 40 years without manure, sufficient potash and phosphorus, and $1000 per acre had been paid out for hundreds of years. The problem is how to secure these elements. The solution of this problem is not so much for the soil physicist, as for the bacteriologist. Wade of England says, "All transformation of all mineral matter into soluble condition must be brought about by biological processes." With agricultural plants, the elements for plant growth are scarce within the root zone while just without are abundant.

The Hitching's system of orcharding was discussed. Prof. Jeffery thinks as far as the fertilization of the soil is concerned it is a good method because the root system of the perennial grasses tunnel the soil deeper which permits a freer circulation of air, putting the soil in a better condition. With agricultural plants the only method of fertilization is by applying manure. Prof. Jeffery made some suggestions as to the best result of the orcharding system. The future of the orchards is dependent upon the variety of fruit. It is very desirable to have a variety in which the fruit is a good color, of good size, and of good keeping qualities.

Prof. Hedrick showed and commented on three varieties of apples. The Cracson, a new sort from New York, is a dark red apple with good flavor and a long keeper. The Western Baldwin, a seeding apple, is a fine, flavor apple with good keeping qualities, as old variety but not well known locally. The Cape Cod, a Carolina sort, color yellowish, the best long keeping ever tasted. At the next meeting of the club the president, Mr. Severance, will give his farewell address. Mr. Thomas Gausen will talk on markets. All are invited to be present.

F. L.

ALUMNI.

'97.

Prof. H. W. Mumford of the University of Illinois, addressed the Michigan Agricultural College Breeders' Association on Beef Cattle. His recent bulletin and the address received very favorable comment in a recent issue of the Drover's Journal. A copy of the bulletin has been placed in the library.

'99.

W. K. Brainerd has charge of the dairy farm and the poultry and swine department at the University of West Virginia. The Live Stock Breeders' Association recently visited the farm and Mr. Brainerd gave a lecture on dairy farming illustrating both lectures with maps and diagrams. Mr. Brainerd has resigned from the forestry department.

Prof. W. K. Brainerd has charge of the dairy farm and the poultry department at the University of West Virginia. The Live Stock Breeders' Association recently visited the farm and Mr. Brainerd gave a lecture on dairy farming, illustrating both lectures with maps and diagrams. Mr. Brainerd has resigned from the forestry department.

Mr. Phillips delivered a similar lecture to the junior agricultural students in Forestry on Wednesday, illustrating both lectures with maps and specimens previously sent to the Forestry Department.

Mr. Phillips has resigned from the Forestry Department to engage in business for himself. He has become interested in 50,000 acres of cedar at Bogas Del Toros, Panama. This will be gradually increased, the timber can withstand a much larger dose than would originally produce fatal results. The anti-toxic property of the serum will then be determined. The anti-toxic property of the serum will then be determined.

A greenhouse, 20 feet square, model in every way and donated to the Horticultural Department by Lord and Barnham, of New York City, is being constructed on the west slope of the university farm. It will be used for laboratory work. The firm constructs from plans and makes the building. The firm constructs from plans and makes the building.

The anti-toxic property of the serum will then be determined. The anti-toxic property of the serum will then be determined.

Mr. C. E. Suades is immunnizing a rabbit to Asiatic cholera. This is to study the production of a vaccine vaccine. The rabbit has been given a small dose of beef tea culture. This will be gradually increased, the animal can withstand a much larger dose than would originally produce fatal results. The anti-toxic property of the serum will then be determined.

The military hop of March 1 was a decided success. The attendance was the largest in the history of the university. Professors Major and Mrs. Vernou and Major and Mrs. Kellogg, led the grand march. Parson's preached an able sermon and introduced the music. Towards the middle of the evening the officers of the battalion lined up and Major Vernou was presented with a silver loving cup. Major Vernou has the respect and esteem of the entire student body and all wish him well. Prof. and Mrs. Weil and Prof. and Mrs. Brewer acted as chaperones.

M. J. & B. M. Buck.
Ye editor lectured at Stevensville last Friday evening and addressed the high school during the after­noon.

Aima will come to M. A. C. next term. J. M. Gilvert will also be here and either Albion or Michigan.

W. L. Wilkins, formerly stenographer in the Mechanical Department, was recently married to Mrs. E. Gilvert, of Lansing.

Edna Finney, the Indian ball wonder from Walpole Island in Canada, has signed with Connie Mack's Phil­adelphia American League team and left for Philadelphia on Tuesday, New Baltimore, March 7.

F. T. Thompson has left for his home in Detroit. He is under the care of Dr. Stephenson and Dr. A. C. Dodge and M. W. Taber who operate a dental clinic in Detroit. It is understood that Dr. Thompson is under the care of Dr. Stephenson and Dr. A. C. Dodge and M. W. Taber who operate a dental clinic in Detroit.

At the Freshmen the inter-class champ­ions into Sanitary Science will be introduced to Sanitary Science will be.

This is intended to bring the college to the home of the individual.

There is enough money absolutely necessary to keep the college going.

The Freshmen won from the New Baltimore last Saturday with a score of 21 to 2. This gives the Freshmen the inter-class champ­ionship of the Freshmen.

The amount of money necessary to keep the college going is more than that amount during their entire term for a dual meet. Olivet will.

Resolved, that there should be a limit on the amount of money which any individual may accumulate.

That there should be a limit on the amount of money which any individual may accumulate. It's Record shows it to be the sovereign fruit of America.

We shall make every effort to keep in touch with all those of our old advertisers, of are of re­liability who have patronized the store students will take pains to patronize those students.
