Wisconsin beat Michigan 3 to 0 and lost to 1 to 1. They beat Northwestern 3 to 0 and 14 to 2 and lost again to Minnesota 3 to 2. Wisconsin leads so far with Chicago second, Illinois third and Michigan fourth. This aggregation succeeded in locating M.A.C. after doing a little telegraphing. It is safe to assume that they have located this institution very definitely and will find no difficulty in the future, in fact the job becomes the easier with giving mathematical solution of Hyde's curves. Wisconsin has a well balanced team, their fielding was excellent and time and again saved a single and a two-bagger.

The game was full of excitement from start to finish. Several times things looked bad for M.A.C. but the team saved the game. Not a score was made after the third inning until Ellsworth scored in the fifteenth, a sacrifice hit by Burke sacrificed to second. Towner hit to short which reached third too late and a wild pitch. Towner stole second and Bowditch hit a fast one to third on which Ellsworth was caught. In the sixtieth Wisconsin had three on bases with one out. The next batter flew out to short and the third one hit a long fly which Bowditch caught. In the fourteenth, Wisconsin again filled the bases with one to third on which Ellsworth captured. In the fourteenth, Wisconsin again filled the bases with one to third on which Ellsworth captured. In the fourteenth, Wisconsin again filled the bases with one to third on which Ellsworth captured. In the fourteenth, Wisconsin again filled the bases with one to third on which Ellsworth captured. In the fourteenth, Wisconsin again filled the bases with one to third on which Ellsworth captured.

The features of the game were the batting of Canfield and the battery work of both teams. Hyde and Lewis pitched steady games, had only two men on bases in very opportunity. Lewis shut out Michigan in the first game and is one of the best pitchers in the university league. He is captain of the team.

**ALBION VS. M. A. C.**

Next Thursday Albion comes to M. A. C. for a championship game. The faculty at Albion has granted a half holiday and the entire college population will engage a special and come to M. A. C. They will have blood in their eyes and will do everything in their power to win the championship game. Albion will have to play Hillsdale in the finals and we will put all over the world in Albion. The figure game and the third one in which M.A.C. has the advantage in the long runs. Albion took first, Hart second, and Kimball third. The result of an error, an infield hit and a wild pitch. Everybody should be out and do some consistent "stomping" at the right time. Let us also give our visitors a royal welcome and a hearty farewell, win or lose.

**M. A. C. 14, OLIVET 6.**

M. A. C. left for Olivet Saturday morning for the third championship game and came home victors. Hoyt picked a steady game and received almost perfect support. In the sixth inning, a combination of 3 hits, a base on balls and an error gave Olivet 4 runs. A passed ball, 2 hits and one error were responsible for two runs in the eighth inning. Olivet gave the boys excellent treatment.

**M. A. C. 56 1-2, ALMA 28 1-2.**

In the dual meet at M. A. C. last Saturday the home team had no difficulty in defeating Alma. It demonstrated that M. A. C. has a strong well-balanced team. Alma has only two men, Schenck and Chapman, who will figure in the field day events. Schenck is a star runner and the one who beats him in the quarter and the half will win these two events.

**ALUMNI.**

G. W. Rose is now in charge of the Cymode plant at Oregon, Va.

Grant M. Morse, formerly state game and fish warden of Michigan, is now located at Des Moines, Iowa, as local manager for the 94. Paul commission house.

A. L. Waters has been appointed general manager of the Keystone Copper Smelting Co. of Philadelphila, with mines in Jalisco, Mexico.

Llewelyn Reynolds of Chicago is now superintendent of the Keystone Stone Copper Smelting Co. mines at Tapalpa, in Jalisco, Mexico.

Thornt Smith is still in Tennessee holding down the position of chemist for The Dukeshur Sulphur, Copper and Iron Co. He is engaged in preparatory work at present, the nature of which has not yet been divulged, but is full of promise. He occasionally gets outside of the lab, such as testing ore for copper. Mr. Smith is becoming well known as an expert analyst and a reliable assayer. His contributions to the alumni bulletins are timely and much appreciated.

Miss Hettie Wright, in charge of domestic science and art in the "Soo" schools, expects to be at the College during commencement week.

Rev. W. R. Kedzie, pastor of the Vicksburg Congregational church, was elected assistant scribe of the Michigan Association of Congregational churches.

Almus R. Speare, who holds a position in the water department of the District government, is engaged at the new Hemwell Station, which will operate the big filtration plant now under construction.

Sidney M. Rochester is baggage master for the American Locomotive Co. at Richmond, Va. In addition to numerous blue prints previously contributed to the Mechanical Department, he has lately designed a set of prints for a switching engine. Mr. Lickly has been very thoughtful in regard to the mechanical department and it is hoped that others among the old students will take note of this fact.

able to get as high as $60 for the labor and management, and the additional amount considering the value of labor in that country, which is only 14 cents per day. Their plows are the primitive wooden ones with steel points. Of their methods Mr. Monroe says, 'If they would take up our tools and learn to use them, they would soon revolutionize agriculture in that country.'

Applications are very scarce there, in fact most of them are imported. Mr. Monroe says he paid as high as fifteen cents for a single medium quality apple.

Mr. Monroe promised to give a more lengthy talk some time in the near future.

There was a good attendance at the meeting, and all enjoyed the address as well as the Japan Loquats served by younger club daughters.

The long table decorated in green served by Miss Louise Freyhofer was quite a home of President and Mrs. Snyder. M. A. C. Woman's Club was held Tuesday evening last week instead of all proceedings. The boys are required to keep an accurate account of their work, etc., and then receive the paper furnished to each, also a mule and a scribe.

WOMAN'S CLUB BANQUET.

The first annual banquet of the M. A. C. Woman's Club was held Thursday evening, May 13, at the home of President and Mrs. Snyder. The occasion was one of genuine pleasure to both guests and members.

About forty were seated at the long table decorated in green and white and extending through dining room and parlor. Never were hosts more charming, nor was house more attractive, table more artistic, nor were viands more delicious. The bountiful menu was served by younger club daughters and friends, Misses Krentel, Walker, Nora Vedder, Hazel Devine, Reed and Lawrence.

Toasts were responded to by Mrs. Rogers, Mr. Collingwood, Mrs. Myres, Mrs. Snyder, Mr. Holbrook, Mr. Van Alstyne, Misses Marshall and Glischk acted as toastmistress.

Miss Alice Mayfield responded very eloquently to an impromptu and Mr. Snyder surprised and pleased the ladies by his speech. "Women of the M. A. C. Club," which all drank standing. The toastees were filled with wisdom and sparkling with wit and proved in every case most effective as mirth producers. Long life to the College Woman's Club.

HORTICULTURAL CLUB.

The Horticultural Club met on Tuesday evening last week instead of Wednesday evening. The Honorary President, C. J. Monroe, who recently returned from a five-month's visit in the old world, gave a short talk. He visited Greece, Egypt, and many other countries. He visited the Agricultural College of Cairo. They own a large farm and very fine buildings. There are about forty students enrolled, and each one is given an acre or so of land to care for and use. The land, a plow and other instruments are furnished to each, also a mule and a cow or ox. They are required to pay for the land, feed, fertilizer, extra work, etc., and then receive the proceeds of the land. Each student is required to keep an accurate account of all proceedings. The boys are
Prof. W. Robinson lost his Tau Beta Pi watch charm last Saturday. Finder please return to owner.

Dr. Marshall has organized a class in advanced dietetics. It has been organized upon special request.

Mrs. L. S. Towne and son, L. C. Towne, are at the college for a few days visiting E. A. Towne and friends.

Mrs. C. D. Smith has been worse for several weeks indisposed for several weeks.

The all-freshman played a 4-inning game on Saturday. He has been some time away from practice.

The horticultural department has maintained and some new ones were renewed and many new ones were made and the club is indebted to Dr. Beal for this day with nature.

A Waterman fountain pen was lost between the Library and Williams Hall last week Tuesday. The letter H was cut on the holder with a knife. Finder will confer a great favor by returning it to Room 45.

The horticultural department has received bound volumes of the different state and United States bulletins from 1885 to the present time. There are 129 volumes in all, a very valuable collection. The bulletins were donated to the department by Prof. U. P. Hedrick.

A great many guests from outside have been entertained at the Woman's Building the past week.

The concert was the attraction. Mr. and Mrs. Jackson, Mrs. Bellaire, Miss Beal, President, Prof. U. P. Hedrick, Mrs. C. D. Smith have been entertained at the Woman's Building the past week.
PLOWING BY STEAM IN MICHIGAN.

Necessity is the mother of invention. A Michigan farmer had four hundred acres of land to plow and not enough teams to do the work. He undertook to make his dream a reality.

The engine was a M. A. Welch, his farm three and a half miles north of Ionia in Central Michigan, and when this necessity came upon him he undertook to make his dream a reality.

The engine had thirty-one acres in three days at a cost of $33, including the actual expense of the engine, the wages of the men, the cost of the fuel and oil and all other items involved in doing the work.

The engine seemed to do the work with strain and moved at an average rate of two miles an hour. A faster rate threw the furrows too far and was impractical. No trouble was experienced with soft spots because the engine would go over them without any trouble, any ground that was fit to plow. It was noted that some of the larger farmers living near Mr. Welch were adopting this plan, and were preparing their fields for the same, a large outfit being prepared within the next few days.

C. D. SMITH.

With 'ooh,' H. S. Crawford is drafting for the Cadillac Automobile Co., having recently left the Yale Co., of Toledo.
