FOUND.
A gentleman's watch fob has been found. It is in the library and the owner can receive it upon identification.

COMMENCEMENT PROGRAM.
Baccalaureate—Sunday, June 19, 3 p.m. Rev. R. G. Ferguson, D. D., Pres. of Westminster College, P. A.
Soil Reunion—Monday evening, June 20.
Class Day—Tuesday afternoon, June 21.
Commencement—Wednesday, June 22, 10 a.m. Address by Dr. L. C. White, president of the Agricultural and Mechanical College of Georgia.

TORONTO UNIVERSITY VS. M. A. C.
Next Monday will occur the last game of the season. Toronto will come to M. A. C. This university always has strong teams, has a large attendance and will prove a hard contestant. They play Cornell and other eastern teams and will give M. A. C. a chance of comparison with eastern institutions.

Y. M. C. A.
The prayer meeting Thursday evening was led by Mr. Locke. Theme: Every Day Wisdom. Mr. Barnett and Mr. Locke gave short talks on the subject, giving some good suggestions on this very important theme.

Sunday morning chapel service was conducted by Rev. Mr. French, of Lansing. He took for the subject of his sermon the story of the death and resurrection of Lazarus, and applied the thoughts suggested by this miracle to our own lives. The sermon was full of helpful suggestions and rich thoughts.

Mr. Masselink led the union meeting Sunday night. He did not take a subject, but took up the study of Proverbs 21st to 29th chapters. In his characteristic style of Bible study, he selected and commented on the strong points in the lesson taken, applying them all to our times and circumstances. The service was thoroughly enjoyed by those present, who received new encouragement to Bible study.

The present method of getting expenses incurred in traveling is nothing short of exasperating. It is not only cumbersome but insinuating as well. Swearing to and swearing at go together. Why not adopt the system of a certain per diem and go together. Why not adopt the system of a certain per diem and would also reduce the clerical work of the land office at Marquette.

C. C. Munday, chief of contracts for the Chicago & Northwestern R. R. Co. in the engineering corps. He has been at Huron since April, '01.

PROFESSIONALISM IN ATHLETICS.
We believe the time has come to do away with a well known farce in athletics. At present, a student is technically disqualified for any event if he has won a quarter in a sack race at the age of 12. Dartmouth has made the ruling that any boy or girl student of that institution up in his work can enter any event for which he is fitted. His previous record will not disqualify him.

The M. I. A. A. should adopt something similar. The Recros recommends the following changes: 1. Limit the time during which a man can compete in athletics to four years. 2. Require that all candidates should have been in regular attendance since the first of the College year and be doing college work. 3. Abolish the classes defining professionalism. These clauses are now a dead letter and this is well known to all. While specific proof might be difficult to secure, yet a glance at the M. I. A. A. is sufficient to convince the ordinary individual. It is true that the University League has adopted a rule which is supposed to prevent a student from doing athletic work during vacation. Why should a bona fide student be prohibited from earning money on which to go to college by pitching for some city team? We think the rule is not only wrong but unfair. The present method of getting expenses incurred in traveling is too much the same as in the bureau of chemistry. He expects to visit M. A. C. during the summer. An instructive experience. He is a very busy man since his return from Europe. His practice is increasing rapidly and he meets with unusual success.

10. The Belsfield Banner of June 2 contains cuts of the five candidates for queen of the K. of P. carnival. Mrs. E. W. Ranney is among the number.

11. Walter A. Flynn was at M. A. C. last Tuesday. Mr. Flynn is assistant superintendent of the Michigan Central shops at Jackson.

12. Geo. M. Odium is giving a series of lectures on Tobacco Culture in South Africa. The method employed is much the same as in Michigan's farmers' institutes.

FIELD DAY.

On Friday morning Director Brewer, some 30 athletes of base- ball team and about 200 rooters left for Albion. They came back Saturday evening, having played, won, loaded with trophies, pennants, medals, and as champions of the Michigan State College, because the course was short. Mak. McKenna led by four yards, but was weak­ ened on account of his training and therefore did not show much. The Normal team.

Mr. Hicks plays center field on the ports that athletics and the school at large are in fine condition. The Normal are in fine condition.

Struck out, by Hyde 8, by Striker 7. Left on bases, M. A. C, 1; Albion 2; Boyer, third quarter, held his place in the first and one in the sixth. M. A. C. hit the ball more frequently and beat the nearest competitor, Albion, by 40 yards. Kalamazoo won the 100 and broad jump. Swift of Albion did excellent work and with the exception of M. A. C. was the star runner. Schenck of Alma did excellent work. M. A. C. secured a clean sweep. M. A. C. secured a clean sweep. M. A. C. won 15 points, more than any of the other colleges, lowered the 100 yards to 10 seconds which beats the Chicago meet by 15; of a second and also thumped the 230 record. The latter did not stand because the course was short. Making liberal allowance for the error, he still beat the record by 2:5 of a second.

Club swimming—Sweigert, Alma, 1; Manning, M. A. C., 2; Whittaker, Oliver, 3.

Parallel bars—Kalbach, M. A. C., 1; Manning, M. A. C., 2.

Horizontal bar—Kathman, Albion, by Kalbach and Conville.
Jubilee exercises of Wisconsin University June 4. celebration.

Instructor Tower returned last Saturday much improved in health.

The mechanical department has made comparative tests of Pennsylvania and Michigan cements, and found the latter to be superior in all the standard tests.

Mrs. J. L. Snyder returned from Pennsylvania last Saturday.

Mrs. Gingles and Miss St. John invite the ladies of this vicinity to visit their millinery exhibit next Saturday afternoon, from 3 to 5 o'clock in the domestic art rooms.

Mrs. Ginson has suffered a good deal from rheumatism during the past two weeks. She is improving and seems much improved.

It is reported that the students and others upon returning from the Albion game were rather free and easy. Money seemed to be plenty.

The last regular meeting of the Try and Trick Circle of the King's Daughters will be held at the home of Mrs. Bagge on June 8. Members and guests are requested to be present at 7 p.m. Pound week.

The Thursday evening meeting of the Y. W. C. A. was led by Mary Pratt. Miss Johnson, state secretary of the Y. W. C. A., was present and gave an interesting talk concerning the coming convention at Geneva.

Miss Essie Cordley of the senior class was taken seriously ill last Wednesday. A constipation of physicians was held and for a time the worst was feared. We are glad to announce that at the present writing she is resting more easily and seems much improved.

The sophomores have succeeded in grafting a tomato scion on a potato stock. This has succeeded in several instances. It is rather a unique affair to see potatoes growing at one end of a plant and tomatoes at the other.

Prof. U. P. Hedrick addressed the Horticultural Club last Wednesday evening. He brought out the fact that M. A. C. was the first institution in the United States to erect a building for the sole purpose of making horticultural investigations.

The officers for the Ete Alpinian society for the full term are, Sadie Richardson, Pres.; Flora Campbell, Vice Pres.; Avilla Cooper, Sec.; Helen Rosell, Trea.; Berice Jackson, Marshall; Alta Gunnison, Record Reporter.

Confield wins the batting average with a percentage of .354; Burke has .349 and Chapman .313. The gold medal will be awarded to Mr. Confield. Chapman secured the only clean home run hit made by the M. A. C. team during the season.

Barium & Bailey's circus drew a large crowd last Monday. Students attended in large numbers, and even members of the faculty had to "carry water to the elephant." Several members of the faculty bought toy balloons and seemed to enjoy them very much.

The informal hop given by the Union Literary Society to their lady friends, on Friday evening May 27, was one of the most pleasant and enjoyable ever given by the "Lits." Messrs. Netting and Robinson rendered the music; Mr. and Mrs. Floyd Robison chaperoned the party.

The Olympics gave their second eleven-o'clock in their society rooms on Friday evening, and every one had an enjoyable time. Their programs were something entirely new and showed the origative genius of the committee. They were blue prints, and were designed and made by some of the members. The programs were called "Olympicfield Day," and the dances were listed as "Events," each one being designated by some baseball, tennis or field term. The officials were Mr. Brewer as referee, and Mrs. Brewer umpire, and their decisions were never questioned.

Prof. U. P. Hedrick gave six addresses in St. Clair county last week Thursday. A series of meetings of fruit growers had been arranged previously. These were held in orchards and began at different hours of the day. A demonstration lecture was given in each case. The trees were criticised as to pruning, general care and spraying. Suggestions were offered, weak places pointed out and strong ones commended. It seems to us that this is a unique way of doing things and is of more value than several hours of grandstand play in some opera house or, grange hall. The latter method frequently causes plenty of amusement, but when it comes to doing something, it is of but little value.
