DEBATING PRELIMINARIES.

At a recent meeting of the Debating Club, a committee was appointed to send delegates to select a team to compete with Ypsilanti. The matter will be conducted as it was last year, the committee is now preparing communications to the different societies. Meanwhile, all post-oks, members of societies or not, desiring to enter the preliminaries, are requested to send their names in to the professor of English on or before Oct. 31.

Signed Committee.

ALBION—M. A. C. 0.

In one of the best played and most exciting games ever played in Michigan and before the largest crowd ever gathered to witness an M. A. A. game, M. A. C. went down to defeat Saturday before Albion by the score of 4 to 0. M. A. C. went to Albion with John Ashley, strong, and came away feeling, while defeated fairly and squarely, it was only by the assistance of the weather man. Albion with her team of 200 pounds and the field a sea of mud, while unable to cross our goal line succeeded in getting near enough to score on a place kick from 3 yards out.

The ground gained by each team was at one equal, Albion having the advantage in the first half. The last half was mostly fought in Albion's territory. Albion was in scoring distance just twice, once, the first half reaching the 25 yard line, and again the second half when they scored their place kick from the 35 yard line. Three times M. A. C. was in striking distance. The first time the half was lost on downs on the 30 yard line, the next time on a quarter back kick, and the next time on a fumble.

M. A. C. won the toss, Albion kicking off. Small then returned the ball twenty yards, Hahn, Kratz and McKenna gained 15 yards in three down, when Convile secured the ball on a fumble. Hahn and Kratz and Hahn kicked off again, the ball was returned by Convile and the game started again. The first half M. A. C. made her first score after she had kicked to Convile and held her for downs on the 20 yard line, and Convile touched down was made this half. In the second half Olivet played a stronger game and held the ball for downs several times. The features of the game were the good gains by Bates, Borton, and Smith of the M. A. C. Bates was good for from 3 to 15 yards nearly every time he was given the ball. Once Smith fumbled the ball, and after running back after it, then made three yards around Olivet's left and Olivet was much lighter than M. A. C., but put up a plucky fight to the end.

THANKSGIVING MILITARY.

The Thanksgiving military will be held on Thanksgiving evening. Admission to students $1.00. No non-uniformed men will be admitted.

This does not include quarter students, sub-faculty, fire department and invited guests. These are also admitted for $1.00. In case the new uniforms do not arrive in time the new men will be allowed to play in uniform.

This rule concerning non-uniform men will hold throughout the year.

Officers Association.

Y. W. C. A.

The meeting Thursday evening was led by Helen Antdres, and a very interesting and helpful talk on the topic, "Praise." -

UNION LITERARY PARTY.

The Union Literary Society, to break the monotony of literary work, gave a party to their lady friends on last Friday evening, October 21st.

The rooms were pretty decorated with the golden leaves of the fall and maple. The sweet strains of music soon started everyone on the merry-whirl which continued for the hour of eleven, when all started, having pleasantly enjoyed the evening, and regretting much that it could not last a few minutes longer. Prof. and Mrs. Babcock and Dr. and Mrs. Gordon kindly chaperoned the party.

Y. M. C. A.

Chas. D. Hurry renewed his popularity with the M. A. C. men by giving a short talk in the mass meeting Thursday night. The emphasis was on a address following this meeting. After the mass meeting about 200 men gathered together in the circle to take part in a general discourse on "Men of Mettle" which produced an effect upon everyone present. Subscriptions for the International Work to the amount of $21 were then received.

OLIVET RESERVES VS. M. A. C. RESERVES.

In a game that was one way most of the time, the M. A. C. second team won from the Olivet reserves Monday night by a score of 15 to 0. In the first half M. A. C. made her first score after she had kicked to Small and McKenna soon returned the punt, gaining twenty yards on the exchange. McKenna then stopped at the College on the 18th and gave a very interesting and helpful talk on Christianity in Japan among the students.

In our issue of October 18 we stated that Geo. J. Jenks was at the Cramp Shipyards, Philadelphia. His work is the testing of motors on board the battleship before the above yards. There are 166 separate electric motors on each battleship, and after the design of the motors is completed Mr. Brooks makes the test and also any necessary criticisms.

The battleships of the U. S. and Pennsylvania have just been completed, the Tennessee will be ready in about a month, and work has been started on the Mississippi and Idaho.

C. J. Foreman is professor in charge of the Department of History and Economics at the Shattuck School, Faribault, Minn. Mr. Foreman was at one time assistant librarian at the College and wishes to be remembered to all of his friends at A. C. C.

In our last issue we stated that H. R. Smith had accepted a position on the Chicago Daily News, which would imply that he had resigned his former position. Mr. Smith, while editing the department of the above publication, retains his position as Professor of Animal Husbandry at Lincoln, Neb.

Llewelyn Reynolds, with 95, who for the past six years has been engaged in mining and metallurgical work is now interested in a new concern which is about to engage in the manufacture of stearic acid glycerine and the incidental by-products of the same. His address is 22 Webb St, Hammond, Ind. Mr. Reynolds states that his father, H. G. Reynolds, who for several years was secretary of the college, and his two sisters are in France where they expect to remain until next summer. He also states that his father's health has much improved during the past year.

R. L. Reynolds was at one time seriously threatened with tuberculosis, has regained his health and is now in business at Los Angeles, California.

Alice Hasley is teaching near Artesian, S. D.

ABOUT THE CAMPUS.

Several of our students will go home to vote.
Work on the new power house chimney has been resumed.
Mr. Hiram Cody, 5 yr. ag. spent Sunday at his home in Chicago.
Mr. H. K. Patriarche, '02, was a visitor at the College on Saturday.
Mr. Clifford Barlow, of Washington, visited his sister Miss Florence Barlow '07, the past week.
E. N. Parsons, one of the trustees of Albion College, was a visitor at the College on Thursday last.
Mr. Newman is doing considerable grading and otherwise improving the lots on his addition west of the Delta.
Over 500 tickets were sold for Albion last Saturday. Who wouldn't be willing to give such a crowd a 50c rate?
Miss Blanche Covell, '02, '03, was the guest of her sister, Miss Bess Covell, for a few days the past week.
Dr. H. W. Landon has purchased Norton's Hardware.
Mr. C. H. Goetz, from San Jose, California, has entered College with the privilege of riding on the cement walks about the Campus, it should be understood that those on foot have first right, and in no case are supposed to give the walk for those who are riding.
Judging from the noise it made at the Albion-M. A. C. game, Mr. Crawford's new crackerjack machine is certainly a success. A redeeming feature of said machine is that it can run for hours and not get hoarse.
Mr. C. H. Goetz, from San Jose, California, has entered College with the expectation of completing the forestry course. Mr. Goetz was in the Philippines three years. He will address the M. A. C. Foresters at their next meeting, Nov. 1st, on Philippine forests.
A wheel, belonging to Mr. Balbach, was taken from near the mechanical building on last Wednesday. While it is perfectly proper to borrow a machine, it is also very proper to return same within a reasonable length of time.
The sub-faculty football team have completed all necessary preparations and new issue an open challenge to any or all class teams for a game. For further particulars, see W. R. Shedd, manager.

THE M. A. C. RECORD.

Professor and Mrs. Bourge entertainers, and they returned home on the Friday evening, Oct. 21. About fifteen young men were present, with a delicious assortment of refreshments and the contest which consisted in writing the names of some of the entrants, as we have already mentioned. The first prize was a big pumpkin pie and the booby prize a tiny one. All present had a good time.

Two athletic meetings were held the past week, one on Tuesday and the other on Thursday evening. The results are contained over by A. J. Anderson. "Two sets played and by the crowd with a lively spirit. The object of the meeting was then stated, and Mr. Fryman acted as yeel master and several new wreaths were presented. It was noted that the College athletic team accompanied the teams to Albe, and Mr. Hurst and Mr. Hurry, and best methods of systems were put forward. A specimen consisting of the lower jaw of a mammoth was recently brought to the museum. It is a much rarer species than the mastodon. It was found in the bed of the Grand River not far from Eaton Rapids. The jaw was that of a ram, and it was female, and was not in a very good state of preservation. It contains two teeth on each side. The grind surface of each tooth was about five by two inches. The mammoth is a species of an extinct elephant closely related to the mastodon and about the same size, an average specimen being perhaps a little larger than the Indian elephant. It is a much rarer species in North America, than the mastodon, but the specimens are of this form are of one of the most interesting to the mastodon. We have numerous good specimens of mastodon teeth in the museum from Michigan, but no specimen of any part of the mammoth in this vicinity. But the mastodon and mammoth have been extinct for perhaps ten thousand years. It seems that the mastodon outlives the mammoth, at least in part of North America. Professor Burrows hopes to obtain these specimens eventually.

57. "I enclose herewith one dollar for which please credit me with two years' subscription. Having neglected to do so before, the news I will try and comply now late as it is. This summer while at St. Louis I was across C. G. Green '97, now of College Station, Texas. He was acting as joint in the horticultural department and taking some photographs of some of the striking features in the landscape gardening efforts around the grounds. E. Dwight Sanderson '97, has left his work in Texas to accept a similar position in Florida, and is now in New York State, as professor of entomology. J. B. McCallum with '98 was re-crossed by the horticultural department for the Register of Deeds in Oceana Co., Mich., a position which he has held the past year. I believe.

For myself I am Associate Professor of Dairying in Purdue University and always have an interest in the subject, (dairying); secretary of the State Dairy Association, and superintendent of Indiana exhibit at St. Louis. The latter has kept me particularly busy the past few months and the Dairy Association is planning for a larger and more useful work the coming year. In my department we are operating a regular dairy creamery, making from five to six hundred pounds, thousand pounds of butter a month this summer. While the make in winter is somewhat less, we shall have ample time for first class instruction which is of course our main consideration. Our product is nearly all made from hand separator cream shipped to us by interurban and steam railroads from a distance within 30 miles. Our creamery course will begin the last of this month and the dairy course after the holidays. Have done a good deal of institute work the last two years and it seems to be a growing interest in the dairy affairs in our state. This summer I have discussed before several county teachers' institutes the relation of the country school to country life. The manifest interest and the close attention given the subject has suggested to me the opportunity for those young men (and women) who are qualified by training, experience and taste for the teaching of the fundamental principles underlying agriculture in the rural schools. The rapidity with which this idea is gaining ground and the large schools must in some way contribute more to the young man's equipment for life's work is gaining ground, suggests an almost new field for the agricultural graduate students. One of our instructors spent a week at a teachers' institute, and so did we present the agricultural presentation, that at the time he was asked to name a man to teach agriculture in the high school of one of our large towns. Telegrams were exchanged and the position accepted by one of our Purdue graduates. Had a second man been wanted he would have been hard to find. Not every graduate, nor every farmer, nor every teacher can successfully handle this new problem; the way is not yet worked out, and much original work must be done before a system is perfected. I wish more of our young men on the farms, and particularly those who are leaving them for more remunerative positions in town might realize the opportunity that are open to them through the doors of the agricultural colleges, when by their early rather than their late days they add the trained head and hand that comes from the college course, but remembering that the course is a means to an end, not an end in itself.

But 'tis man that are wasting, not opportunity, from fat hands to bank presidents.

At our state fair I had charge of a working dairy, with four of our former students carrying on the work and the general operations of the dairy at the fair. I explained the work, answered questions and outlined the work of the agricultural courses. The agricultural course of the Board have provided ample room for the work, with an amphotrienter and several hundred people facing our space.

The curious, the bored, and those seeking information with particularity, have a few minutes to several hours watching the work, listening and asking questions.

With best wishes for the prosperity of M. A. C. and with esteem,
H. E. VAN NORMAN, '97.

IN 1756 POOR RICHARD SAID:

"Want of care does as much damage than want of knowledge."

Continue to pursue knowledge like a Tyg after a Russian, and to make assurance doubly sure, let the old MUTUAL BENEFIT take care of you and of you. It costs so little while you are young and strong; it means so much when you need it most.
