THE ANNUAL RE UNION OF
THE CHICAGO ASSOCIA-
TION OF M. A. C.

An elaborate banquet was served to the Alumni in the banquet dining room of the De Jonghe Restaurant, 45 Monroe St., Chicago, opposite the Palmer House, on Saturday evening, March 4. The attendance was not as large as at some of the former banquets. The members present were Hoyt, Eastman, Nies, Rummler, George Simmons, Bowerly, Llewellyn Reynolds, Havelly, Rider, Ranboll, George Williams, J. L. Simmons, Fraser, D. W. Smith, Clarence E. Smith, Sam Kennedy, O. H. Skinner, Chandler, J. J. Ferguson, Howard Weed, Frost, McGrath, C. J. Monroe, Paul Chamberlain, and J. W. Perrigo. Professor C. D. Smith represented the faculty and the President. The menu contained many unique features but was received with true Club appreciation. When good digestion began to wait on satisfied appetite Professor Smith reported that when ten men conformed in the alumni of this or any other institution. They were deeply interested in every detail of the life of the college.

The photographs of Wells Hall burning, aroused a host of pleasant and pathetic memories and brought burning, aroused a host of pleasant

THE CHURCH CONCERT TO BE GIVEN MAY 5th.

The M. A. C. church has decided on May 5th as the date for its remitting of Haydn's "Creation." The chorus is doing excellent work and expect to give a concert worth listening to.

Mr. T. C. Smith is one of the most important club in the city) and has many concert engagements, but he needs no further recommendation to those who had the pleasure of hearing him last year. Arrangements for the concert have been made and all will look forward to a musical treat on May 5th.

THE ANNUAL RE UNION OF THE CHICAGO ASSOCIATION OF M. A. C.

ALUMNI.

With 90.

Stanley L. Ots is in charge of a Bureau of Statistics on certain lines for certain Life Insurance Companies. He is a conspicuous building fronting New York Bay—the Whitehall Building (Mr. Sweeney is one of the best known and popular young attorneys of Newark, and his rise through his own determined efforts has been almost phenomenal. He served one term as school commissioner before his appointment as a city magistrate; has for several years been superintendent of a flourishing Sunday school and an important official of the leading Universalist church of the city, and he was recently elected president of the University Club (the most important club in the city) and has many concert engagements, but he needs no further recommendation to those who had the pleasure of hearing him last year. Arrangements for the concert have been made and all will look forward to a musical treat on May 5th.

necessitates a great increase in room, which could possibly be used for style college. This has compelled or literary courses in other colleges per week in the class room, including laboratory equipment for this many years and would not stand pressure sufficient to force water to top of buildings in case of fire. We had no electric lighting system, but were compelled to contract for lights with outside parties. These conditions made it necessary to build a central plant at considerable cost to take care of these pressing needs. While we have been making these general improvements, the number of students has doubled since we moved into the new buildings. Our laboratories and class rooms were all right for three hundred students, but are hopelessly overcrowded with one thousand.

Without making any effort toClass needs in this matter, I shall call your attention to a few of the more pressing. In the report of 1901, concerning the Mechanical Department I stated that we had the same shop room and drawing rooms as were absolutely necessary when we had about ninety students. We then had two hundred and twenty-two students now in this department three hundred and eighty. We have re-arranged every space and plan it is possible to accommodate these students, but in some instances have been compelled to shut down the work and at other times to give it under conditions which were far from satisfactory either to students or teachers. The Mechanical Department cannot be given more room, it will be absolutely necessary to refuse admission to a large number who will wish to enter.

The Military Department should have a large drill hall, the Armory at present will accommodate only one-fourth of the freshmen class. In addition to this room must be used for Music and Dramatics. The Department of Physical Culture should have a gymnasium.

The Agricultural Department must have a large drill hall. The Armory at present will accommodate only one-fourth of the freshmen class. In addition to this room must be used for Music and Dramatics. The Department of Physical Culture should have a gymnasium.

The Agricultural Department should receive considerable aid at once. The rapid development of agriculture throughout the country has made it incumbent on this department to do its part in the development of our neighboring states and the future of the farmers of the State almost untold. It needs more and better specimens of live stock; it is our appropriation during the past two years was cut down to $10,000. This building, almost from the first, was too small. The work on plant physiology has not been given for four years on account of lack of room in the building, and fresh air is most desirable.

The largest gain is in the agricultural department. It has been a matter of some disappointment to some students, but are hopelessly overcrowded with one thousand.

To indicate the overcrowded condition we quote from the president's report, made to the board a few weeks ago.

To the Honorable State Board of Agriculture.

At this, the regular biennial meeting for the reorganization of the Board of Agriculture, I beg leave to make a brief report of the progress of the College during the past two years, with a statement as to its immediate needs.

The continued growth of the institution has been quite rapid in recent years. The number of students in attendance this year will be a few over one thousand, a gain of two hundred over last year. The largest gain is in the agricultural department. It has been a matter of some disappointment to some students, but are hopelessly overcrowded with one thousand.

To indicate the overcrowded condition we quote from the president's report, made to the board a few weeks ago.

ANNUAL CONTEST OF THE MICHIGAN ORATORICAL LEAGUE.

The annual contest of the nine Michigan colleges in oratory was held this year at Albion, March 3. We were very pleasantly entertained by the local college, and the arrangements of the judges will be found tasteful below. Mr. Anderson, our contestant, was with difficulty able to speak; being unable to overcome the hoarseness that had been troubling him. The winning college was Olivet, with Albion a close second, and Michigan third. The names of the judges will be found tabulated from the local college, and the arrangements of the judges seemed to like them, too. We were somewhat pleased to note the decay of patriotism revealed in the neglect to bestow on Alexander Hamilton the usual chapter of glory; but this was more compensated for by the display of real virtues fixed upon Martin Luther a double portion of eulogistic terrors. Hero-worship is proverbially the prerogative of youth; and it is well to wonder if these young people really believe that the progress of great wonder was extinguished for the decision of one man. Would that these contests might develop a little more of vigorous thinking and seriousness of purpose, even if at the expense of a certain smoothness of phrase and of still greater bewildement to the judges.

We publish below the oration of Mr. Anderson, whose subject was the Volunteering Soldiers of America.

THE M. A. C. RECORD.
IAN PATRIOTISM.

Once more in war and in peace the American Volunteer had performed his two-fold task: to defend the land and to uphold the spirit of American patriotism as well as his restlessness might.

And now we turn our glance and a thousand dangers loom up before our view. Colonial wealth threatened to corrupt the very sources of legislation and administrative government and to establish a plutocracy far more dangerous to our Republic than the despotism of Europe. National vanity and ambition, rioting in the greatness and power the volunteer has won for us, are afflicting us to forsake the old paths he has blazed, and with a large standing army to reach out greatly behind the west, the south and the east. We tell us that the volunteer is antiquated, his valor impotent, his virtue ignorant and uncivil in the complex political maze of today. Shall we believe and accept these mad heresies? No! A thousand times No! That way destruction lies! That path leads to the despotism of the German world, to the charge and annihilation of Colorado, to yesterday's cowardly massacre in St. Petersburg. The same siren song was heard here. It told of the fickleness of the many-headed monster, the people, of the disciplined might of a hiring sedition; of our defenselessness before the solid phalanxes of Europe. The Volunteer listened not; but steadfastly and true, in his own message, he demonstrated once for all that a free people can govern themselves without the intervention of royalties, can attain place, dignity and power with this weapon. Shouldering a private sedition, can maintain and defend their liberties without growing under a huge and ever threatening military establishment.

The usual county fair attractions had been provided, the wheel of fortune, shooting gallery, the cane ring the cage that you get, contests of various descriptions, speeches and music. During the progress of the fair, residents could be had at the restaurant for popcorn and peanut.

And so the bell rang, and it was with much reluctance that we again boarded the train and held good bye to the fair, wishing that we met again visit some such attraction.

RESOLUTIONS.

As it has pleased our Heavenly Father to call home to Himself the beloved sister of our president and our first, we wish to join in extending their heart-felt sympathies to Mr. C. C. Ford in his deep bereavement. We extend to him our resemble sympathy.

THE M. A. C. RECORD.

ATHLETICS.

The Dual Indoor meet in the Armory on Saturday was one of the most interesting and successful held at M. A. C. in its history. The account of the lengthy program several events were omitted and the contest was cut down to its most interesting portion. The program was gone through very hurriedly in order to finish before six o'clock. Every one was interested and much enthusiasm shown. The good feeling which prevailed throughout was also worthy of mention. Our visitors were accorded the applause due them as well as the home team. Nothing happened to mar the smoothness of the whole affair.

The final score was: 25-yd. dash, — Hemmingway of Olivet and Verran of M. A. C., tied for 1st; Burrell, M. A. C., 2d.; High jump — Nicholson, M. A. C., 1st; Burrell, M. A. C., 2d.; High dive — Arnold of Olivet, 1st; Verran and Small, M. A. C., tied for 2d.; Shot put — Betts of Olivet, 1st; McDermid, M. A. C., 2d; Burrow, M. A. C., 3d; Distance 55 ft., 11 in.; High kick — Betts, Olivet, 1st; Bierk, M. A. C., 2d; Loomis, Olivet, and Reid, M. A. C., tied for 3d.; Parallel bars — Buss, M. A. C., 1st; Montgomery of Olivet, 2d.; Indian clubs — Clark of Olivet, 1st; Hack, M. A. C., 2d.; Tumbling — Points were divided, both teams doing excellent work. M. A. C. furnished four men and Olivet two.

Pole vault — Gilbert, M. A. C., 1st; Small, M. A. C., 2d; Verran, M. A. C., 3d; Two men, M. A. C., tied for 4d; High jump — Height 9 ft., 11 in.

Hurdling — Middle weight, Frazier, M. A. C., 1st; and Morrison, Olivet, draw; Wellertown, Bartlett, M. A. C., and Bierk, Olivet, draw. Special weight — Wright of M. A. C., won from Mackey, Olivet. Light middle weight — Points were divided, M. A. C., won from Martin, Olivet. Feather weight — L. B. Belknap, M. A. C., won from Mackey, Olivet.

Result of the meet was M. A. C., 66; Olivet 50.

M. A. C. 20—BAY CITY, 14.

Two basketball games were played on our part of our management, as D. A. C. claims the state championship and we are very sure that they have the best team, and are willing to keep up the record and keep the championship game. It is very certain that we could win from them on our own door by a much larger score than they won from us in Detroit. Our management has made every effort possible to keep them here for any date in either Feb. or March. In view of this fact, the statement concerning the cancellation of the home game, made in a recent Detroit paper, is utterly false and it looks very much as though D. A. C. has somewhat weakened since knowing the exact playing capabilities of the team.

The freshmen and sub-freshmen hold a dual meet in the armory on next Saturday.

Y. W. C. A.

Miss Purmort led an excellent meeting last week. The subject was "Helping One Another." The next meeting is to be held at the close of the devotional meeting. Committee reports for the year just closing were given. The following officers were elected for the coming year: President, Nena Davis; Vice President, Clara Brown; Secretary, Edna Canfield; Treasurer, Fannie Beal.

SOKORIAN SLEIGHRIDE.

Notwithstanding the disappointment the Sorrowers felt regarding their failure to have a sleighride, an event was held on Feb. 17, all seemed to enjoy the little ride to Lansing for supper and then back to the rooms until eleven. The party was very pleasantly chaperoned by Mrs. Pettit.

M. A. C. FORESTERS.

M. A. C. Foresters have elected officers for next term as follows: President, C. G. Mastic; Secretary, W. A. Hoopen; Assistant Chief Forester, W. A. Hoopen; Assistant Secretary of Records and Accounts, C. H. Goetz.

Forest Ranger, G. F. Talladay. The meeting will be held Tuesday evening, March 14, when Mr. Hoopen will have a paper on "Trees of Belle Isle."

Mr. Alvarez entertained the M. A. C. Foresters at their last meeting with a paper on Philippine Forestry. There are over 531 million acres of forests (about the area of two states like Ohio). About 90 per cent, of this area is covered with dense forest. The growth is estimated at over eight billion board feet nearly all of which is going to waste for want of proper management and machinery. In some of the most densely populated islands there is but little timber on others the forests have scarcely been touched. In Mindoro for example are about four million acres of land which remain untouched. Here grow the nipa wood or Philippine mahogany, the camibang, or nipa palm, the Philippine cedar, some of which reaches a diameer of 4 to 5 feet and a height of 100 feet. The wood of these large trees is valuable for many purposes, including paving, rough construction and furniture. The Pullman Palace Car Co. imported 43 logs and found them to be the cabinet woods that they were promised. One of the most desirable was the nipa palm, and one of the most promising was the bamboo. It is used for many purposes, such as raft, furniture, light bridges, water pipes, hats, etc. It is grown everywhere and cut for sale. The nut palm is used for something. From the sap is made many kinds of drinks.

The young fruit is most delicious to eat and the inside juice a very pleasant and refreshing drink. The limits that can be fed to oil trees, from which is made toilet soaps.

THE ROUND-UP.

The Round-Up Institute held at M. A. C. last week was very well attended, and the Daily Journal in speaking of numbers in its March 1 states that the opening session on Tuesday was the largest ever known in the city.

An institute meeting except on Thursday evening was held in the Auditorium. The first session Tuesday morning was in charge of Mr. Peter Voorhies, of Lansing, who read the paper on "The Importance of Good Roads and the Requisites for Their Improvement." He told of the work done at M. A. C. and Mr. Chas. L. W. Oviatt, of Auburn, on "The Old and New Methods of Cutting and Clearing." The next paper was given by Mr. D. W. King, of Maitland, Mo., on "The Development of the Sugar Beet Industry in California." He gave helpful suggestions to those engaged in such work. He said the yield can be increased by far the best remedy for the weak, half developed chicken is to be found in forests. The next paper was given by Mr. C. H. Goetz, of Battle Creek, on "Philippine Trees." He told of the work done with the Malacca palm and stated that the paper on "The importance of nitro-germs to be used by the farmers of the country and the land is not yet well understood. He stated that the forest is the best of farmers as it sheds its leaves year by year, they form a mat for the ground. The roots also grow through the soil. Forests lessen the effect of bad winds and ameliorate the climate.

Prof. Filibeth Roth of Ann Arbor gave an illustrated lecture on Forest Influences which was very much enjoyed. He stated during his lecture that the forest was the best of farmers as it sheds its leaves year by year, they form a mat for the ground. The roots also grow through the soil. Forests lessen the effect of bad winds and ameliorate the climate.

Prof. Bogue then spoke on the Farm Wood Lot. He stated that it does not pay to grow scrub trees and advised the cutting out of such and planting good trees. He referred to the work done in the way of planting at M. A. C. and spoke of the growth of various trees and the value of planting. Excellent music and recitations were interspersed throughout the sessions.

WEDNESDAY.

The morning session opened with Mr. C. O. Brown. Mr. Brown was followed by Mr. C. D. Smith, the first speaker, taking for his subject, "The History of the Nitrogen Gatherers." He referred to the germs found near the roots of Nitrogen Gatherers. He referred to the germs found near the roots of many flowers, which fed upon the nitrogen of the air and in turn nourished the plant. The inoculation of these germs is becoming quite common and promises to be in general use in the future. The Department of Agriculture is testing out on request small packages of nitrogen germs to be used by the farmers of the country, and the department publishes a bulletin giving full information upon the subject.

"The Present State of Alfalfa in Michigan," by Prof. J. A. Jeffery was next on the program. He referred to the varieties of clover used in the state, and stated that soil conditions must be favorable for the production of alfalfa. Many counties were doing a failure. Alfalfa seed cannot be produced in the state as it is not grown. Mr. Peter Voorhies, of Pontiac, then spoke on "Making the Most of Beans." He then took second place in the growing of this crop.
Mr. Voorties referred to the conditions necessary for the successful growth of the crop in the way of land, soil, weather, cultivation, and harvesting.

The afternoon session opened with a talk on "Wheat Corn," by Prof. Jefery as chairman.

The subject of "Indian Corn and Its Growing" was discussed by Prof. A. G. McColl, of Ohio State University. The soil should first be improved by manuring, the next in the priority of the same and also careful selection of the same and careful cultivation of the same. The subject of corn should be carried on, and the value of fertilizers and manures was also discussed. Proper cultivation is necessary in order to insure moisture at roots. Prof. H. Young of the secretary of seed corn, and in closing explained how to till the fertile soil, the work of various scientists in Michigan, and these especially were pledged by the Michigan Farmer andＬacter's table. After the U. of M. feeding states.

The second Women's Congress was held in the Baptist church with Mrs. Emma A. enrolled line, as chairman. After devotions and music, Miss Jennie Buell, of Ann Arbor, spoke on "Farming as a Business and Part-Time Farming as Daughter and Her Opportunities."

"Boys and Girls," the title of the subject, was mentioned corn smut, wheat and many others. The speaker stated that the blacksmith, from rest with the parents who do not evince any enthusiasm in their children. Farmers do not present, but rather in a feverish expectancy of the future and his family's security.

Miss Sarah B. A. Avery spoke on physical training for farm women. The main things that were pointed out were how to sit and stand in order to have proper breathing, and also mentioned proper methods of cultivation. Mr. T. A. Tyler advised the raising of potatoes as soon as they were dug, as not much was to be gained by storing them.

The officers of the County Inst. Farm Society for the following year were elected: Prof. J. A. Jeffery, president; N. P. Holl, Dandridge, vice-president; O. M. Young, secretary, treasurer; Directors: Colon C. Litle, Cooperville; W. F. Raven, Clarice; J. L. Floyd, Reynolds, Owoosa.

At the evening session, which was well attended, Pres. Snyder acted as chairman. Prof. R. H. Pettit gave an illustrated lecture on "Our Insect Friends and Foes."

The first annual corn exhibition and contest conducted by the Michigan Corn Improvement Association was held on this day. Any farmer in the state could enter the contest by becoming a member of the association. The typical Michigan corn lent ear was 6 inches in length and 5 inches in circumference; proportion of cob to ear 65 per cent. For flint corn 10 inches in length and 7 inches in circumference; proportion of corn to cob 56 per cent. Cash prizes were given for the raising of potatoes as soon as they were dug, as not much was to be gained by storing them.

At a business session the following officers were elected: Prof. J. A. Jeffery, president; N. P. Holl, Dandridge, vice-president; O. M. Young, secretary, treasurer. Directors: Colon C. Litle, Cooperville; W. F. Raven, Clarice; J. L. Floyd, Reynolds, Owoosa.

At the evening session, which was well attended, Pres. Snyder acted as chairman. Prof. R. H. Pettit gave an illustrated lecture on "Our Insect Friends and Foes."

The business meeting was in charge of Prof. C. D. Smith, Pres. R. J. Shaw spoke on the subject of "Wheat Corn Improvement." He advised growing small quantities and feeding in small quantities. Three main principles will grow enough for considerable stock. Kinds of soil best adapted for roots was taken up as also methods of planting and care of the crop. Roots as a succulent food are necessary and all kinds of animals and properly will save much veterinary help.

Prof. H. W. Mumford, of Urbana, Ill. next spoke on proper feeding for steers. Corn and clover hay will properly save much veterinary help.

D. S. COLE.

The meeting was well received and applauded.

Cash prizes were given for the raising of potatoes as soon as they were dug, as not much was to be gained by storing them.
F. H. Sinford, '09, visited College friends on Sunday. Instructor Norton entertained his sister few days the past week. Walter Stanton '05 received a visit from his father the past week. Mr. and Mrs. Mundon have moved back to their farm home north of the College. Mr. R. E. Haines is visiting College friends for a few days. He is looking well and hearty.

Mr. A. Low has moved into the house in Collegeville formerly occupied by Mr. Collins. Several inquiries have come in lately concerning the prospective summer course in drawing, shop work, etc.

An overcoat and pair of gloves have been left in the chemical laboratory. Owner may call same by calling.

Miss Blanche Lary left Monday of last week for Adrian where she has a position in the Industrial Home for Girls.

Miss Rubie Newman was at the College for the Junior hop, and spent the past week with her brother, Instructor Newman.

Mr. and Mrs. Clyde Fin, who have been visiting College friends for a few days, left yesterday for their home in Traverse City.

Mr. J. H. Tryon, '08, was quite badly injured in the forge shop on Friday. While working on a piece of steel it flew from his hands striking him just above the eye. It is not believed that the sight is in any way injured.

Mr. Seymour Fresliou, who some time ago purchased the property in Collegeville owned by Dr. Beal, has taken possession of the same.

A set of mechanical drawing instruments has been found and are in the possession of Mr. Newman. Owner may call at Drawing office for same.

A number of county drain commission inspectors visited the College on Wednesday of last week and spent a short time in looking over the ground.

Prof. H. W. Mumford, '91, of the Illinois agricultural college and formerly professor of agriculture at M. A. C., spent Friday of last week with College friends.

Capt. Wheeler of U. S. Army was the guest of Miss Carpenter over Sunday. Capt. Wheeler is on leave of absence from service in the Philippines and will report for duty again in June.

Born, to Mr. and Mrs. S. B. Hartman, of Athens, on Oct. 30, a daughter, four months old. The fact will no doubt be news to many of the friends of the parents.

A new bakery and restaurant has been installed in the building owned by Mr. Chaspe. All kinds of baked goods are to be had and meals will be served at all hours. Miss Ida Corwin is in charge of the establishment.

W. R. Brown '03, who has acted as college inspector on the tunnels, has just secured a position in the Master Mechanic's office of Swift & Co., Chicago. Mr. Brown left the first of the week for his new position.

The State Board of Agriculture held its regular meeting March 5th at Battle Creek. At this meeting it was decided to rebuild the dormitory from the foundation, not using any part of the old building.

The annual oratorical contest of the Eclectic Society was held in their rooms Saturday night, March 4th. The contest was one of the closest that the society has had. The honors, a society pin, were carried off by Mr. E. C. Buss, with Mr. Elmer Kork second place.

Among the M. A. C. boys to attend the Round-Up were the following: B. T. Hesse, '03; F. Sackrider, with '04; Fred Halbert, with '03; J. H. Skinner, '01; C. P. Reed, '01; S. B. Hartman, '03; Chas. Woodbury, '03; E. O. Elmer, '03; F. H. Elliot, with '94, and Alice Ciminer, '00.

Prof. A. G. McCall, of the Ohio state university, spent Thursday of last week at the College. He was for some time in the department of agriculture at Washington with L. B. Briggs, '93, who is soil physicist in the Bureau of Soils. Prof. McCall was at the Round Up-Institute where he spoke on "Indian Corn and Its Improvement."

The college grocery, formerly run by Messrs. Higgins and Burton, has changed management. The new manager, Mr. G. B. Whitney, has been acting as bookkeeper in the store for some months. The stock is owned by the Worden Grocery Co. of Grand Rapids. Mr. Burton is at present with Christopher & Loftus grocery in this city.

The senior agricultural line up against one lone pig near the barns the other day. The pig made his usual rush, and when time was called four seniors were down and the pig was also down the farm lane. One of the track men was called into play, and he did what the Irishman did wi as the four soldiers—"round d'en" and brought him back where he was captured and taken to the slaughter house.

The Hesperian Society has elected the following officers for the spring term: President, Mr. N. J. Smith; Vice President, Mr. R. C. Fowler; Secretary, Mr. J. L. Baker; Treasurer, Mr. R. S. Canfield; Registrar, Mr. H. C. Baker; Marshall, Mr. S. W. Horton. This society also held its Freshmen oratorical contest on Saturday, March 4th. Mr. H. H. Savage won first, and Mr. H. S. Cody second. Mr. W. A. Hopkins and Mr. H. E. Silcox tied for third.

PROHIBITION LEAGUE.

We held another very interesting meeting Sunday afternoon. R. A. Small read Mr. Hede's second speech of the triangular debate. A lively discussion ensued.

The league voted to send C. W. Stephenson, who has been preparing an oration on some prohibition subject, to Ann Arbor to the state contest, as our representative. The contest takes place some time in April.
