M. A. C. 20-KALAMAZOO 4.

All pitchers may look alike but in some cases their work differs. Kalamazoo started with Burroughs in the box and M. A. C. scored seven runs on four hits. In the third inning, the Kamermeier was then put in and checked the hitting for a little time but it did not last long and in the last three innings twelve runs were registered, eight of which in the ninth were scored on a base hit in succession.

The score tells the story of the game. Barry man on our team hit the ball hard and Nies pitched a splendid game. Shaffer, who went into the box the latter part of the game, also did good work.

Kalamazoo played a better game than the M. A. C. and got the better of their good fielding work in the face of the fierce hitting. M. A. C. also ran the bases well. Albion, M. A. C., 20; Kalamazoo, 0.

The third cup game for the team and insures them a chance at least on Field Day. It practically decides that the contest will be between three of the four colleges—Albion, M. A. C., Olivet and Hillsdale.

Following is the score by innings: 1 2 3 4 5 6 7 8 9 10 11
M. A. C. 4 3 0 0 0 0 0 0 0 0 0
Kalamazoo 0 0 2 1 0 0 0 0 0 1 0

Double plats—M. A. C., 3; Kalamazoo, 3; Canfield, Burke, and Nies; Shaffer, 1. Kalamazoo scored on a muffed drop and M. A. C. scored on two runs.

Seven runs in two innings. Kimmerle was then put in and checked the hitting for a little time but it did not last long and in the last three innings twelve runs were registered, eight of which in the ninth were scored on a base hit in succession.

The most important tree of GeyIon is the coconut which furnishes us with nuts, valuable timber, excellent cooking, wine, very intoxicating, vinegar, rope, etc. Among the numerous specimens brought were a war club, a pillow consisting of a bare piece of bamboo on short woollen legs, taff's cloth made from palm, a number of cases of ebony, palm, the oak, maccia and yucca, two toy elephants, one cut from ivory and one from palm wood, and numerous photographs.

Y. M. C. A.

Thursday evening's meeting was led by Mr. R. C. Fowler, and the subject for the evening was "Everyday Christianity." Mr. Fowler de- plored the fact that for such a term existed, and exhorted our Christian bodies to "every day" kind. Helpful re- marks were made by H. H. Crosby.

Rev. H. B. Bard, in his Sunday morning service in chapel, showed the comparison between gardening and character building—and how the soul is enriched or hindered in its development by the seeds sown. One of those sermons that, by its beauty and attractiveness com- bined with its practicality thrilled the congregation.

There was a good attendance at the musical program given in the union meeting Sunday. There were four numbers, two by mixed quartet, Misses Alden and Maynard and Messrs. Wilkinson and Adams, and a solo by Mr. Kindill, and a duet by the Misses Adams and Allen.

M. A. C. FORESTERS.

Prof. J. D. Towar gave the M. A. C. Foresters an interesting and instructive talk at their last meeting on "Trees of My Travels," illustrating it with numerous specimens from Australia and the orient.

He said that the tree aspect was one of the most interesting and comfortable in that country. This is particularly true when one sees the tropical forests growing for previously mentioned purposes. These forests of the Sandwich Islands are nearly all imported from the South Sea Islands and Long Island.

ALUMNI.

COLLEGE STATION, TEX.

E. E. Green '97 has been for three years connected with the "Texas A. and M. College of Agronomy" as an instructor in plant husbandry.

NEW BRUNSWICK, N. J.

Byron D. Halsted '72 has been for the past year assistant in botany in Rutgers College and botanist to the experiment station for the past sixteen years. Mr. Halsted is the only M. A. C. man connected with the New Jersey college at present.

Milton St. John, in charge of the New York City members of the State Horticultural Society, was recently sent to Prof. Kendall a sample of iron slab for analysis to determine its value as a fertilizer.

Mrs. E. D. Partridge (Lizzie M. Truman), who has been visiting her parents for the past several months, returned home in Provost, Utah. Her husband, E. D. Partridge, '96, met her at Grand Junction, Colo.

With '92.

Dana T. Jones, '85-'90, died at Traverse City, Mich., May 8, of locomotor ataxia with brain trouble complication. Mr. Jones was at one time a prominent newspaper man, having been connected with the Grand Rapids Democrat, Detroit Free Press and Cleveland Plain Dealer. He gave up newspaper work, however, and graduated from the law department of the U. of M., 1900. Mr. Jones was left in very poor health for several years. Deceased was a brother of R. G. Jones, of the State Republican, from whom his home the funeral was held Tuesday.

C. B. Smith, assistant horiculturist of the United States Department of Agriculture, has recently issued an excellent series of ten lectures on Fruit Growing for the Columbia Correspondence College of Washington, D. C.

Hugh P. Baker has justotten out a fine prospectus of a course in Forestry at the Agricultural College, Ames, Iowa.

In a recent civil service examination in the subject of agronomy Mr. Craigosby, '01, tied for first place in the examination held for the position of agricultural chemist and Lyman Carrier of the same college, assistant horiculturist, has been connected with the Free Press and Cleveland Plain Dealer. He gave up newspaper work, however, and graduated from the law department of the U. of M., 1900. Mr. Jones was left in very poor health for several years. Deceased was a brother of R. G. Jones, of the State Republican, from whom his home the funeral was held Tuesday.

soil and maintain a civilization; but build the tools which mould a civilization.

The necessity of self-confidence, a strong character and a high ideal in all things pertaining to their work have won for him the admiration and appreciation of the students. His first position. He emphasized working talk that he was equal to the task. He again brought out the importance of being willing to begin at the foundations and earn personal advancement step by step. The appropriateness of the speaker's appellation was shown by his fatherly interest in the welfare of the students. His closing advice overflowed the spacious auditorium and spilled into the halls, and all present stood as our ideals in our chosen work. This unorganized social event was begun with group prayer circles which were, indeed, evangelical, and the evangelistic, the church, the humanitarian, the educational. The morning sessions were held in the chapel of the American Committee of the Y. W. C. A., who gave an account of the message to the church of Philadelphia. The last hour of the morning was devoted to the church of Philadelphia. The last hour of the morning was devoted to the Tenth Biennial Convention of the American Committee of the Y. W. C. A. The next speaker was Prof. Shaw, who spoke of the relation of Chicago, who spoke on the trials and pleasures of the early days.

The Tenth Biennial Convention of the American Committee of the Y. W. C. A. was held at the Carleton College, Northfield, Minn., from April 30 to May 1. The delegates from the College Association were Mrs. Andrews and Miss McNab. Miss Gilchrist, as a member of the State Committee was also a delegate. While Misses Allen, Barnow, Inglis and Northrup were visitors at some of the sessions.

The social events of the convention were the pleasant reception held at the residence of Miss Louise A. Staley, to whom the school is indebted for class work use. This is the work of a master, shades of the Master. The last hour of the morning was devoted to the Y. W. C. A., who gave an account of the message to the church of Philadelphia. Smart Oxfords for
College Men.........
$3.50 a pair.

We should be pleased to show you this "new one." It has the style and wear of the $5.00 grade. Made of Oregon Patent Calf. Blucher style, the new "Jap" toe which is so popular. Just a look will convince you.

ELGIN MIFLIN.

New Spring Goods in Every Department.

Miss Yakeley was on the sick list a couple of days the past week.

The junior-senior game Saturday resulted in a victory for the juniors, 17 to 2.

The sub-freshmen won from the sub-faculty in a game of base ball on 220, 222, 224 Washington Ave. S. Lansing, Mich. a couple of days the past week.

Finder please return to room 43 in the Williams Hall, and receive reward.

Miss Yakeley was on the sick list this week for her home in Wyandotte, Michigan.

Just a look will convince you.

Miss Peters and Miss Case spent some time with rheumatism. He

The La Clede Clay Co., St. Louis, Mo., his work being that of design-

ation on the steamer Western States, passenger line, for the sum-

Wednesday and Thursday, making it impossible for M. A. C. to play the scheduled game with Wisconsin. Because of the excellent game with this team last year all were looking forward with interest to the contest this year.

The proof of the first 80 pages of the new catalog is being read, and attention is again called to the fact that copy for the last half will be sent to the printer as fast as it is re-

ceived from the department. A few have not as yet made all necessary corrections.

Mr. Freshour, who purchased Dr. Beal's property in Collegeville, has been confined to his home for some time with rheumatism. He began to feel better that improved.

Quite a number of ties have been distributed along the line of the new Pine Lake road, but none have as yet been laid, owing largely to the heavy rain during the past week.

The Officers Association will give the Spring Military on May 19. Every effort will be made to make this the best hop of the season.

Fisher's orchestra will furnish the music. Dancing from 8 to 12.

Prices: uniformed men, $1.00; all others, $1.50.

Supt. Clark of Holland and C. H. Daley of Hudson visited College friends while attending the superin-

dents' meeting at Lansing recently.

J. Chapman, '05, has accepted a position on the steamer Western States, passenger line, for the sum-

mer and leaves soon for Detroit to begin work.

Prof. Smith gave an address on "Illustrations of Nature's Methods" before the Calhoun Co. Teachers' Association, Saturday, May 13 at Battle Creek.

President Snyder attended the ceremonies in connection with the dedication of the Court House at Mason the past week, where he de-

livered an address.

Elizabeth, daughter of Harrie R. and May Whitney Parish, died at the Parish family homestead, in

Allen, Michigan, April 23d, 1905.

Mr. and Mrs. Parish have the sincerest sympathy of their many Col-

lege friends.

Mr. Parish was a graduate with the class of '95.

Everyone was much disappointed on account of the heavy rains Wed-

dnesday and Thursday, making it impossible for M. A. C. to play the scheduled game with Wisconsin. Because of the excellent game with this team last year all were looking forward with interest to the contest this year.

The proof of the first 80 pages of the new catalog is being read, and attention is again called to the fact that copy for the last half will be sent to the printer as fast as it is re-

ceived from the department. A few have not as yet made all necessary corrections.

Prof. Taft was in Ypsilanti and Monroe the past week. He states that very little damage has resulted to fruit throughout the state on account of frosts, and that every-

thing indicates a good crop of fruit this year, with possibly a shortage of peaches and cherries in low, un-

favorable localities, this being due more to the hard winter than to spring frosts.

While at Ann Arbor recently Mr. Craig had a pleasant visit with W. X. Wonders, '05, and states that he is the same happy boy as when he and Stevens (M. G.) lived in the cabin over the hill and worked on the hort. during the summer of 1900. He also met Phillips '05, and Mrs. Marshall (Maud Brayle, with '05), whose husband recently gradu-

ated from the medical course in the University.

The evening of May 7, the Sor-

orians held their literary meeting at the home of Miss Helen Canfield, in Lansing, where they were most royally entertained at a four course dinner, which was served by waiters imported for the occa-

sion. Each guest found her place at the table by descriptive place cards. The tables were prettily decorated with apple blossoms. It was with great reluctance that we left at 9:20, all declaring that Miss Canfield made a most charm-

ing hostess.

The M. A. C. Sunday School was given a treat Sunday afternoon in the way of a talk by Mr. Ray Stearns Baker, on the city of ancient Thessalonica (now Salon-

ica). The school has been studying the missionary journeys of Paul and last Sunday's lesson dealt with his work in the above city. Mr. Baker visited the city at the time of the liberation of Miss Stone, the mis-

sionary, a few years ago, and his talk was much enjoyed by all present. He spoke interestingly of the people, their customs, religion and peculiarities stating that many of the practices are carried on now just as they were in the time of Christ.

The population of Salonica at pres-

ent is about 50,000, made up largely of Jews, Greeks, Bulgarians and Armenians. Several photographs taken by Mr. Baker in and about the city were passed among those present and were greatly appreci-

ated.
At the meeting of the Hort. Club May 10, Prof. Hollick gave a talk on "The Future of Horticulture in Michigan." He showed that at the close of the war Michigan was a stock and grain raising state, and gave figures in which dollars were used instead of apples; but while the great fertile plains of the west were opened up we had successfully competed with them in raising grain and live stock and so have gradually drifted into the position of fruit and agricultural specialties. Our alliance in the future will tend more and more toward horticulture and truck gardening for which Michigan is well adapted. Because of the infrequency of late spring frosts we have a greater number of peach crops than any other state, and our peaches also come into the market when they are wanted for canning after the hot weather. There is a great future for the apple industry as our apples are well flavored and yield abundantly. Grape culture is promising because we have few pests. Michigan ranks second or third in small fruits, first or second in celery, and produces the best canned peas in the U. S., and has the largest pea canning factory at Harrison. This work will be enough to make Michigan a great industry as a result of the farrowing of 30 ewes from the first of May from 30 ewes has been set apart for the production of forage, soilings, and root crops. Devices of various kinds have been tried for the protection of these trees, but none have proven very satisfactory. It requires a very substantial space around the trunk to protect the smaller of these trees. It consists of three pieces of 4x4's, 7 feet long, to form a ground 2 1/2 feet in the form of an equilateral triangle around the tree, leaving sufficient room at the bottom for the cultivation of the ground around the tree and the guards are not unduly expensive, and it is believed that they will prevent the tree from injury as long as they require protection.

Field No. 16, lying between the south boundary of the farm and the Pere Marquette railways, has been converted into a permanent pasture, largely used by cattle, and the result is satisfactory results from cropping on account of its peculiar character. The cost of this field is $3.25 an acre, which has been freed of poison ivy by burning, leaving the next field to be subdivided later.

On June 7 and 8 occurs the Golden Jubilee and Old Home Coming of the city of Lansing in honor of the Vice President of the United States, and other distinguished guests of the people of Flint on the occasion of the dedication of the new Court House and Government Building. The principal address on the 7th will be given by Vice President Fairbanks.

Kenyon L. Butterfield is president of the Michigan Society of Agriculture and Mechanic Arts, which position he has held since April 1, 1903. Mr. Butterfield was college field agent in 1898-99, in which position he did much valuable work in the advertising of the agricultural experiment station.

The planting of the various forage trees was done about one week earlier than previous years and the top dressing of the College flock during the past three years.

Considerable difficulty has been experienced in protecting the young trees along the main running through the farm. During the pastening season large crowds drove cattle to pass to and fro each day in an effort to injure the trees. Devices of various kinds have been tried for the protection of these trees, but none have proven very satisfactory. It requires a very substantial space around the trunk to protect the smaller of these trees.
