FOOTBALL

Next Saturday will be the opening game with Flint School for the year. Good practice has been going on the past week. Very little scrimmage work has been done, but the time has been spent in getting a start and lining up the various candidates. In numbers and quality the outlook is the best ever shown, although not many heavy men are in evidence. The Flint game will be called by three o'clock, and it is expected to try out all of the best candidates at this time.

The new men who are showing up well are Kuritz, Morrison, Sterling, Tanner, Allen, who is showing up well as a kicker, Bourgeois, Bliss, Frazier, Reid, McKenna, the 2nd; Campbell, Mert and Shaud Burt, son of M. A. C.'s old center.

These are in addition to the second team of last year and others who have played on the regular. At the present time there are six or seven in daily use and the major use of the men are in use during practice hours.

For the week that has gone by, the week before was a bad week as far as practice goes, they didn't do anything. The game with Flint School for the best ever shown, although not very close. The game has been going on the past week.

The best results promises to be closer and better than ever on the playing field. The offensive and defensive lines have grown stronger and better than ever, and the guards have improved so that all may know the new arrangement of the team.

Y. W. C. A.

The men's meeting Thursday evening was the largest opportunity ever held in the Y. M. C. A. Nearly one hundred boys were present to hear the remarks of Mr. Locke, who had charge of the reception, and seemed to thoroughly enjoy their stay.

Y. M. C. A.

The men's meeting Thursday evening was the largest opportunity ever held in the Y. M. C. A. Nearly one hundred boys were present to hear the remarks of Mr. Locke, who had charge of the reception, and seemed to thoroughly enjoy their stay.

CLARKE EXCERPTS

The week of August 21-26 was given up to excursions as far away as one could go to be one of the most pleasant of the summer and a banner year as to sight seeing. The every day trip was the best ever shown, although not many heavy men are in evidence. The Flint game will be called by three o'clock, and it is expected to try out all of the best candidates at this time.

The new men who are showing up well are Kuritz, Morrison, Sterling, Tanner, Allen, who is showing up well as a kicker, Bourgeois, Bliss, Frazier, Reid, McKenna, the 2nd; Campbell, Mert and Shaud Burt, son of M. A. C.'s old center.

THE MEMORIAL BUILDING.

For many years the Young Men's Christian Association of the M. A. C. has occupied a room in Williams Hall, which has served in a small measure the purpose for which it was created. It was a social center for students and for the religious meetings of that association. It is evident from what has been said that the building was not sufficient to carry on the work of the college. It was necessary to have it which would accommodate a large number of persons. It was in accordance with the wishes of the alumni to make the Literary Club house into a Y. M. C. A. building.

The following are extracts from a letter written by D. J. Crosby, '93, a former editor of the Record, and now with the department of forestry at the University of Michigan.

The M. A. C. Women's club will hold a reception at the home of Miss Searing on Friday night. Miss Searing was on her way west. Miss Searing was on her way west. Miss Searing was on her way west. JEWETT & KNAPP

THE M. A. C. RECORD.

L. T. Clark, '04, was a college visitor a day or two the past week. Mr. Clark was making a trip in the interests of Parke, Davis & Co.

Prof. Bogus has moved into his new house east of the experimental plot, and C. A. Finger will occupy the Delta Residence for the coming year.

Mr. and Mrs. Farrell, of the Ferris Institute, have been employed as bulletin clerk in the Secretary's office. Mr. Farrell's home is Woodland, Mich.

The Rural Advocate (Sept.) presents on its cover page a cut of one of our campus scenes together with an article concerning the growth and work of the College.

Mr. Palmares has presented to the department of agronomy seven samples of soils, and also two varieties of tobacco which were grown in the Philippine Islands.

Mrs. Gilchrist’s, of Laurens, La., arrived at the College last week, and will remain with her daughters, Dean Gilchrist and Miss Norma Gilchrist, during the fall term.

Harry Oven, '98, presented at a stand of the State Fair, where he showed the method of soil inoculation. He was working in the interest of the Ray Chemical Co.

Mr. Glenn James, instructor in mathematics, is a graduate of the Vincennes University with the class of '03, taking his degree of A. B. at Bloomington, Ind., in 1905.

Miss Leah P. Avery has been employed as student assistant in music for the coming year. Miss Avery is a graduate of the Ionia high school and has studied music under private teachers for some time.

Mr. Jeffery has in his laboratory six splendid ears of Tennessee corn which were produced from three stalks. He has not planted and usually grows as many such stalks as may be found in a Tennessee corn field. Mr. McHatton was the donor.

Prof. and Mrs. Fletcher took a four-day trip through the fruit belt last week, visiting orchards near Benzie and Grand Rapids. Prof. Fletcher spoke at the Western Michigan Fair on Thursday.

Mr. John G. Baker, who was a student at M. A. C. several years ago, was married to Miss Henrietta L. Broom at the home of the bride's parents, 216 Main Street west, Lansing, Sept. 20. Rev. R. C. Dodds officiated. After a short visit with Mr. Baker's mother, in Fairmount, N. D., the young people will be at home to their friends at 219 Syracuse street, south.

The Women's Department is to be the recipient of a handsome silver medal from the St. Louis Exposition for its collection of Domestic-Science and Domestic Art. The diploma of award has been received and will no doubt be framed shortly.

Doril, the summer vacation considerable repair work has been done about the Women's Building, which brightens it up materially. Several rooms have been newly plastered, the halls and parlors tinted, the floors oiled, and the stairways and other woodwork varnished.

The horticultural department exhibited 75 varieties of apples, 25 varieties of pears and 25 varieties of grapes at the State fair the past week. The following exhibits were also made at Grand Rapids: 50 varieties of apples, 55 of pears and 20 of grapes.

The Board has approved the recommendation of Prof. Fletcher that Instructor Guison be made superintendent of grounds. Mr. Guison will have immediate supervision of the grounds under the general direction of the professor of horticulture. The future all inquiries and requests concerning the details of campus work should be addressed to Mr. Guison.

During the latter part of last week while looking up specimens for future use, Prof. Petitt ran across one of the larvae of a rare moth. The species is interesting because it is of a rare family and also because it is very seldom found itself. It is known as coccus melinchromis. Brails this being unusual in form, it has very interesting habits. Two leaves of the white oak are brought together, fastened with silk, and the insect lives in the cavity thus formed. When full grown he cuts out the little house thus built from the surrounding portion of the leaf and carries it around with him, protecting his head and front legs but keeping the rest of the body inside the sack-like covering. The sack is fastened to the twig and held securely over winter. During this time the change to the pupa is made and the adult moth cuts out the spring. Fortunately several of these creatures were found which will make it possible to get good photographs of the insect and still have some left to rear the adult.

A large lizard was presented to the Zoological Department during the latter part of July, by Mr. Ray Smith, of Leroy. The reptile was brought from the valley of the river Gila, Arizona, and is given the name of Gila Monster. It is found only in the desert regions of South-west United States and Northern Mexico. It is the only species of poisonous lizard in existence; so far as known one of these reptiles being perfectly harmless. The bite of this species is supposed to cause death, although this one is very sluggish and seldom bites at all. Its food consists mainly of raw eggs. This species is in considerable demand for zoological gardens and the supply has greatly lessened; but they are now very rare. This one has been given a place in one of the south windows of the laboratory where he can enjoy the sunshine.
