The association of that City, how­

ever, we must say that we do not
believe the men playing on that field
fairly represents the same. It is
not often that so much 'poor lan­
guage' is heard upon our field as
was used during the game on
Wednesday afternoon, nor do we
believe it is justifiable in any game
between two teams. Surely, the lan­
guage was decidedly out of place
when it was generally understood
that this was a Y. M. C. A. team.
We would suggest that the Associ­
itheir first touch down, which
occupied the first 15 minutes of
the game. N. D. kicked off to
Doty, who fumbled a bad kick and
N. D. secured it. From there by
short gains they secured their first
touch down, which occupied the last
ten minutes of the first period.

N. D. ran the ball back to the center of
the field. After each side had
made two tries, Burroughs made a bad
play, which prevented N. D. from
scoring the second time.

The game was then resumed, and
the M. A. C. was given another
chance. They were forced to punt too
many times, Burroughs made a bad
play, and N. D. forced the other to
punt a number of times. Burroughs
acted as if he was not at all
bothered by the punt, and
M. A. C. was within striking
distance of their goal.

The question debated at the last
meeting of the club was, “Resolved,
that the confessions made to the court
by Japan at the Portsmouth peace
conference were justifiable.”

The speakers were Dr. Edwards

and M. C. Potts for the negative.

The debate was exceptionally good
and seldom, if ever before, has the
student heard such an eloquent
address as that delivered by Mr.
Gunson in his opening speech.

Dear Sir,—During the months of April to June last year, I had the privilege of acting as tutor at the Agricultural College in surveying, drafting, history, and possibly other branches as a substitute for the regular professor. I remember very many of the young men who came into my classes, but have not their present mail address. If any should see this note I hope they will drop me a card. I should especially like to hear of their progress in agriculture though I am sure many of them took up other lines of industry.

With best wishes for the prosperity of the college, I remain,

Yours truly,

C. E. L. W.
