STEREOPTICON LECTURE

Mr. L. E. Buell, state secretary of the Y. M. C. A., will give a stereopticon lecture in the college chapel Sunday evening January 28. Mr. Buell has illustrated Y. M. C. A. work in all its departments, among which are several taken at Lakeside conference and the many summer camps around the state. This lecture will be entertaining and instructive to all who attend.

FARMERS' CLUB

The M. A. C. farmers have now issued their program for the winter term. The list of men on that program certainly offers a tempting menu to the eager eye. Every agricultural student, including the special, should carry a program in his pocket and every Tuesday evening be ready to know of the good-people who were so well and wisely used. Properly made, it has an experience that fails to the lot of few men and tells of it in a way that is of interest to all.

DEBATING CLUB

All those who attended the Debatable Club last Thursday night enjoyed a very interesting discussion of the Primary Reform Bill. The question was, 'Resolved, that the Michigan Primary Reform Bill is adequate to the needs of the state.' The affirmative was upheld by Prof. Gunson and the negative by Prof. Rider. Not as much antagonism was displayed by the opposing sides as was anticipated, but it resulted in a more thorough exposition of the merits and demerits of the bill.

After the close of the constructive arguments, the question was opened to the members of the Debating Club and others. The decision of the judges was unanimous in favor of the affirmative.

Next Thursday evening Pres. Roosevelt's policy regarding the Niagara Falls will be debated. It is not often we are able to secure debaters from among the co-eds, and the public is invited to watch the opposition. No doubt it will be interesting.

FOLLOWING THE IDEAL

A yearning for growth, a longing for expansion, is a sign manual of youthfulness. There are great opportunities for a young man or young woman who constantly reaches out for something larger, and aspire to something higher. Without a desire for something better, or reaching up to nobler ideals, there can be no growth. The person who feels that there is that within him which is larger than what he does, which longs for a higher and fuller expansion, and which is struggling for more light, is a man of superior stuff.

There is no failure for the one who persistently struggles upward as well as outward; for purpose and aspiration make success. A passion for perfection, for excellence, is an evidence of the immortal fire within, which cannot be extinguished by poverty or misfortune. - Success Magazine.

ATHLETICS

In the first home basket ball game of the season M. A. C. won from Adrian college Thursday evening with a good sized crowd at the score of 43 to 18. M. A. C. played exceptionally well, for the first four quarters, especially when taken into consideration that three of the players are first year men. The individual work of the visitors was as good or better than that of M. A. C., but the good team worked and fast passing of the home players was too much for them. Capt. Gray did the best work for the visitors.

Conversation those who played it well for M. A. C. would be to mention all, for the team as a whole played a steady game. The best of feeling prevailed throughout.

Following are the names of players:

M. A. C. Center Lawrence.
Cap. Koth.
Left W. H. T. A.

Westerners
Grads.
Freshmen.

Field baskets, Koth 9, Dickinson 4, Vondette 9, Haish 1, Gray 2, Britain 5, Langholl 2.
Free throws, Koth 3, Gray 4.

Flint was scheduled for a game here next Friday evening, but word was received that they would not come until later in the season. In place of this game one has been arranged with Albion so that we are certain of a good game on that date, January 26.

Calls were issued for the various athletic teams the past week, and large squads of men have reported for indoor, tumbling, track and cross country work.

In the cross country and track meets the prospects are very bright, eighty-five candidates having already shown up.

Y. M. C. A.

In one of the strongest meetings of the year Mr. Sackett, instructor in Bacteriology, gave a talk on the principles that are necessary to a successful life. The theme of Mr. Sackett's address was from the following lines by Tennyson—

"Four things a man must learn to do If he would make his life's career, To think without confusion, To live his fellows sincerely.

"To act from honest motives purely; To trust in God and heaven securely.

"These four great principles of life were dwelt upon by the speaker in a way both fascinating and inspiring.

"The students were fortunate in the privilege of hearing President Lancaster, of Olivet College, again Sunday evening. President Lancaster brought to the people of M. A. C. was "Putting First Things First," and the duty of the College man to society was emphasized in a most forceful way.

"Man owes more to society than he can pay. The man with the technical training must narrow himself down to his calling alone, neglecting all else. He owes it to society to feel a responsibility for the progress of the world, and the welfare of his fellow men." In President Lancaster's talk he made a lasting impression on the body of the young people who were so well and wisely used. Properly made, it has an experience that fails to the lot of few men and tells of it in a way that is of interest to all.

Y. W. C. A.

Miss Ella McNamara conducted the discussion of "The Duty of the College man to society" with the duty of the College man to society was emphasized in a most forceful way.

Miss McNamara then held a very interesting talk on Divine Happiness. A short business meeting followed.

The M. A. C. RECORD.

Vol. II, Lansing, Michigan, Tuesday, Jan. 23, 1906. No. 18

LANSING, MICHIGAN, TUESDAY, JAN. 23, 1906. No. 18

ALUMNI

There was an informal but very pleasant meeting of the boys at the residence of Prof. W. E. Hughes. The program included an informal dinner and dance, Thursday evening Dec. 18. There were present, and personally accounted for Prof. F. S. Kedzie '77, Frank F. Rogers '83, Arthur C. Bird '83, Archibl M. Emery '83, W. C. Deloss Tower '87, Clarence E. Smith '84, W. V. Sage '84, W. L. Kirk '84, Charles S. Collingwood '83, Philip L. Golden '83. An evening filled with much good talk, a fine supper, a hearty God speed and a desire to meet some more.

Announcements have been received of the marriage of Gordon Tower, of the above class, to Miss Bessey Geraldine Leuds, of Orono, Me. The ceremony was performed at Portland, after which the young couple returned to Orono, where Mr. Tower is associated with the Maine Agricultural College as professor of forestry.

Greetings have been received from Margaret Louise Shoemaker, daughter of Prof. and Mrs. Shoemaker, of Manhattan, Kansas, born Jan. 11.

At a recent meeting of the Capital City Dental Society, Lansing, both the president and vice-president elected for the ensuing year were M. A. C. men. Dr. A. E. Gordon, of the above class, also a graduate of dental surgery at Ass Art School, was elected president, and Dr. N. F. Moore, '93-'94, a graduate of a Chicago dental school, was chosen vice-president.

Miss Helen Baker, who has been for some time with Crotty Bros. in Lansing, is now the principal in the Holly public schools.

T. A. Farrand, formerly superintendent of the South Haven Experiment Station, and Mr. C. J. Monroe, of the State Board, will speak to the students in Horticulture on commercial orcharding early in February.

H. B. Barron, a special student in general agriculture, had the misfortune to break his ankle Friday while using the vaulting horse in the gymnasium. He was taken to the hospital where he will receive the best of attention.

A portion of the program of Capital Grange for last Saturday night consisted in a review by three of its members of Ray Street Baker's articles on the railroad, published in McClure's magazine.

The Sorority society gave an eighteen inch show Saturday evening, the 20th. The rooms were decorated with society banners, Parades of the Y. W. C. A. and T. W., and Prof. Snyder and Mrs. Snyder and Mr. and Mrs. Hall Reed acted as chaperones.
THE M. A. C. RECORD.

SUBSCRIPTION: 50 cents per year.

To be continued.

The College would hereby place on record its hearty appreciation of the courtesies and hospitality so generously offered, and return their heartfelt thanks therefor. The close and unqualified better understanding brought about by this meeting at the College will, we sincerely believe, do much to the live stock interests of the state, and a better appreciation of what the College can do for the agriculturalists and the good agriculture. We also believe that this Association so far as it can, in its present stage of development, the College, and aid in its growth, to the end that it may still farther foster the development of the agricultural culture of the state along its several lines. We recommend to the legislature, if it be such a point in the near future, to provide for the greater liberalization of the College in the future, believing that it will have a far-reaching influence upon the great producing interests of Michigan. We believe the College should have persisted so long upon the whole now shows a vital interest in debating among our students and promises well for the future of the club. B. Hartman in our issue of December, who entered M. A. C. with the same statement as that made by S. B. Hartman in our issue of December.

licht the oldest daughter, Annie, arrived the oldest daughter, Annie, arrived. Mr. Parlette did not pose as a present agitation against football is not a present naval policy is adequate. W. T. Hees, '85, was here for the experiment station presented an exhibit of different kinds of wheat which the College can and is doing for Michigan agriculture. We also believe that the results of experiments testing the influence of soil on the quality of the wheat are for the most part made of the weeds which most affect the quality of flour when their effects are known and controlled. The Association voted to meet here again next year and desired to hold their banquet at the College.

Mr. John Scott, junior at the library building, and family narrowly escaped asphyxiation at their home in Lansing last week. Escaping gas from a coal stove was the cause. Mr. Scott arose and made an attempt to attack, but was so overcome with the flames that he dropped back upon the bed. Just at the time the milkman arrived the oldest daughter, Annie, arrived. Mr. Ernest Pool, in a recent article in one of the December issues of the Independent, gives a picture exceptionally true in every particular to the present conditions of life in rural, and especially eastern rural, Russia. He quotes an old starving peasant.

"Now this place is ten times worse. Nobody (this they think) will sneak off again and find some place where land is rich and given away. Then they will send for me. And after that if I will eat all I want—soft food and soup, in my great big ship, stop bleeding. This is what I always think about!" Farther the author says, "I feel my old body, just a frame of bones. His faded eyes betrayed un­mistakably the intense pains from the stomach that "jump up and down," and there is not even a bit of exaggeration in the article referred to. It is not an exceptional case either. In this state of starvation actually live thousands and thousands of human beings. And those are the localities from which the papers report the piling up of the landowners by the peasantry.

Every time I read these reports I think, "Heavens, what would I, myself, with all my principles of honesty, do if forced to live under the conditions described." Perhaps I would jump into the river or (what would be worse, in my opinion) I would, when hundreds of thousands of men with their wives and children year after year five days out in the stombie that "jump up and down," when they can find relief only in dreaming about the time when they have soft food and soup and their guns will stop bleeding—then the only thing they can do is to rob and pil­lage, were not it for the fact that no government is severe enough for those who are responsible for the present conditions. We, the students, have some wind and therefore they must reap the whirlwind.

The Senior Engineering Society has been a little delayed this year in getting into operation, owing to the influenza just past and the death of a very brilliant and inno­cent, Mr. Kingscott. The first meeting of the year was held on Wednesday evening, at which time a program committee was appointed. Papers were read by Messrs. Ras­sier and Liversedge on Salt Pro­duction and Reduction of Zinc. Meetings will be held regularly on Wednesday evenings.

O. G. Simonds, the eminent landscape gardener of Chicago, has been engaged to submit plans for the improvement of the campus. It will make a two-days' visit during next month and will visit the campus again shortly. Some or nearly all suggestions will be incorporated in map which will be submitted to the Board for approval. Having been faithfully followed in the future work of the campus.
