The M. A. C. basketball team won another victory Saturday evening by defeating the strong Y. M. C. A., 18 to 10. The work of O'Gara was brilliant. All three goals were scored by the score.

LANSING H. S. TAKES FIRST GAME

In one of the finest and most excellent games of basketball ever played at M. A. C. the home team was defeated, last night for the first time this season, by one point.

In holding, pushing, and carrying the ball, the visitors certainly excelled any other team ever at M. A. C. They were all eastern players, and played the game as it is taught there, but were a long way from rules as known in Michigan. M. A. C. was in play every moment, and on several occasions recovered the ball which was dribbling with it. They were a much heavier team than our own, and their individual playing (and roughing) was strong, but in team work M. A. C. easily outclassed them. The following is the line-up and summary:

<table>

FARMERS' CLUB

The meeting of the Farmers' Club last Thursday evening was attended by the reading of a paper on "Farm Dairying," by F. O. Foster. Mr. Foster handled his subject from the standpoint of the disposal of the cream from a dairy farm. He is of the opinion that there is more profit, to the farmer, in carrying his milk to a creamery or even peddle it around town than to make butter of the cream. He quoted only the two classes where the conditions were such as to warrant the farmer in making butter. One was on the farm that was far too small from market and the other where the farmer expended his work and was prepared for it by putting up a dairy building large enough to handle his milk. The paper was well managed and an interesting discussion followed.

Y. M. C. A.

H. H. Pattengill was greeted by the largest audience that has attended a religious meeting at the college this year. The chapel was filled to the doors with those who wished to be in that country then. Mr. Pattengill has a daughter whom he desires to educate and inquires after the Women's Course.

ALUMNI

Mr. Judge Carpenter will be represented by a delegation of young men from the south and will visit Cuba before their return.

The M. A. C. Debating Club

The question discussed at the debate club Thursday evening was: "Resolved, That the present agitation against football is justifiable." Mr. H. C. Bucknell upheld the affirmative argument and L. R. DHaroff the negative. Some very interesting facts were mentioned by both speakers. The affirmative was well prepared and the negative was successful in their argumentative work.

M. A. C. DEBATING CLUB

The basis of the affirmative arguments seemed to rest mostly upon the character of the prevailing football spirit among the larger educational institutions of the country. The idea of scholarships is becoming obsolete. The mind is receiving a secondary consideration in college life. The social life in college life is becoming more and more dependent upon physical rather than mental acquirements. There would be too much logical to consider the mind in connection with the body. There must be an equilibrium established between the two in order to have the most perfect and the most desirable development of man.

The question for discussion next Thursday evening will be: "Resolved, That the Parliamentary System is Preferable to the Congressional System?"

This was to be a very interesting debate and every one is welcome to come.
THE M. A. C. RECORD.

PUBLISHED EVERY TUESDAY DURING THE ACADMIC YEAR BY THE MICHIGAN STATE AGRICULTURAL COLLEGE.

S. Hume, L. F. Ingersoll, Henry P. dall, Israel H. Harris, Chas. W. Hume.

shall publish each week a list of the received. This week we publish doubt some member of each class subjects will from time to time be concerning any will be gratefully ing information concerning these alog, which is to be ready for dis­

Place, Warren A. Wells.

Bassett, of Fennville, will act as

THE M. A. C. RECORD.

Hort. Club.

Dr. Marshall read a most inter esting paper to the Horticultural society on Wednesday evening last. The subject was "Science in Relation to Agriculture." This paper was written in connection with scientific research, and in such a manner that the hearers went away placing a higher value upon the work of scientific men in agriculture as well as in other professions.

A football game has just begun.

Mr. Madison Cooper who installed the cold storage building.

A Delta Zeta (A. Z.) Pin was given Wednesday evening at the L. B. U. on "Man." A party was given Wednesday evening for the short course students in creamery management and dairying.

A reception was given at the home of Mr. Cornell on Thursday morning. A fire had been burning in the tower, and on going to the basement it was discovered that the fire had spread near to a partition. It was extinguished in time to prevent serious damage.
I have never lost the opportunity to call upon you (Pres. Snyd...)

Henry N. Geller has finished his work at Champaign and is now engaged in fertilizer analysis with the Nelson Morris Packing Co. of Chicago.

The following is from C. M. Annis, Leslie, with '05: 'The number of our R. F. D. has been changed to No. 1. I received one of the number of the 1906 calendars and many thanks for it. The M. A. C. RECORD seems like a local newspaper to me more than ever, the longer I am out of college.'

We are indebted to Bruce McAlpine, of Jackson, for alumna news this week. Mr. McAlpine states that the RECORD is now to him a weekly message from all friends and associates, and is always heartily welcomed, and sends good wishes for its prosperity and to his alma mater.

With '06,

G. T. Pike with above class and Miss Edna Randall, a Clinton Co. teacher, were married December 11, '05. While this is a little betided it will no doubt benews to many of Mr. Pike's friends. The Republican states: 'Mr. and Mrs. Pike are highly esteemed by all who know them, and all their friends unite in wishing them a long and prosperous life.'

A letter from Homer Utterback states that he is now at the University. He says: 'I have just entered the engineering department. The last two days I have been chasing around for advanced credits and although I have not seen all professors, I am pretty sure I shall get enough advanced credit for my work at M. A. C.'

His address is 624 S. Ingalls St., Grand Rapids, Michigan.

Dr. Beal tells the following: "Ray Stannard Baker is absent from M. A. C. about half the time and has taken pride in erasing a portion of the address and inserting 4th Ave. and 3rd St. (McClerre's) N. Y. City. Recently one of these letters reached Elmers, N. Y., from which the post master returned the letter with this slip attached which is so perfectly, P. M., Lansing, Mich. Can you not furnish a better address for the attached letter as we are unable to decipher the present one? Seriously I can see nothing on the letter which resembles the name and address. Of course I could not meet Mr. Collingwood to keep this incident quiet.

A word of kindness now is better than any amount of writing. A trial will convince you that there's gold enough in the land to give the best insurance. Strongest agency in city."

THE THING I WANTED TO TELL YOU.

There's gold enough in the land to give the best insurance. Strongest agency in city.

THE AMERICAN LAUNDRY solicits a share of your patronage, for its prosperity and to his alma mater. Let us make the things that are not yet made, and standards which are not yet realized. Remember the number of your patronage. Remember the number of your patronage. Remember the number of your patronage.
