BASKET BALL.

Fifty-one to twenty-four favor of M. A. C. tells the story of the basketball game with Armour Institute on Saturday last. M. A. C. played an important game against a visiting team on Saturday, and it was decided that the home team should win. The game was played in an exciting manner, and the spectators were greatly pleased with the performance of the players.

The Jackson Y. M. C. A. team comes here on Saturday, Jan. 19, for a game. The team will be called early in the afternoon. Jackson furnishes a strong team this year and has already won from Ypsilanti.

The Arable public lands have almost disappeared. The forests are nearly gone, and the iron and coal will be nearly used up. We must depend on the soil. The causes of uneasiness are the area under cultivation is decreasing in both the north and south. This decreasing in New England also production is decreasing in United States. People should study the material outlook as well as the political and moral outlook. We call the stupid man the farmer, but the farmer is the only man, who is master of himself and his destiny. The farmer must restore and maintain the fertilization of the soil. The people must urge from the government to foster American Agriculture.

Earth offers work an abundant reward.

ROUND UP INSTITUTE.

The Round-Up Institute of the season will be held at Ionia Feb. 26—March 8. Among the topics to be present are Prof. P. G. Holden, of Iowa, who will be present on Feb. 26 and give his address on Improvement and the Culture of Corn. Prof. W. J. Fraser, professor of economic botany at the state university, will speak on Feb. 27 on "The San Jose Scale" and its treatment. Mrs. Caroline B. Crane, of Kalona, will give an address on "Handling the apple orchard" and "The San Jose Scale" and its treatment. Mrs. Caroline B. The corn exhibit will be shown in a large room on the second floor and there will be ample space for exhibiting the farm implements offered as prizes in a large room directly across the street.

The people of Ionia are arranging to provide for 500 visitors and hotels and restaurants can easily supply meals to 1000 persons. The hotels will offer reduced rates, and the railroads the usual convention rates.

Arrangements will be made for visiting the state institution in Ionia and opportunity will be offered to visit some of the large stock farms near the city.

"The Press-American (Owosso) is the only one which has its page calendar from the Michigan Agricultural College, which is in full color, being 50,000 in size, having 200,000,000 in 50 years. The great question is what to do with these people? Where will they live? What will they do?"

PENN.
Jones has again assumed charge of the basketball team the second College team won. The annual freshmen-sophomore indoor meet will be held on February 9.

The recent cold weather has again brought the skaters very much in evidence. Mr. H. N. Loud, a lumberman of Au Sable, called at the forestry department recently. The meeting of the Farmers' Club for this evening has been postponed from accounts of the Brederoe meeting being held here.

Dr. Waterman has been appointed secretary of the alumni association in place of Prof. Holdsworth who is in Florida for the winter. For junior hop flowers see W. W. Hitchcock and Brown, room 134, agents for the Freyling & Blish. The new calendars seem to meet with the approval of nearly all. Each student was given one and one also mailed to the parents. Several hundred were placed on sale at the book store and these are being sold out rapidly.

The Band has been working steadily. The work is under the direction of Mrs. Chase, and practice has continued for over two months. The sixteen annual meeting of the Michigan Beetles Breeder's Association is being held at M. A. C. today and tomorrow. Prof. H. M. Mundford, now of Ill., is among the speakers.

It is interesting to note the preparations for the singing forward to being back to commencement in the spring. As you know I am with the Helena Power Transmission Co. I worked for a month on construction work and am now operating in one of their substations. Hoping to see some items in the Record concerning the Old Boys.

The Chicago Review, Jan, 2, mentions the fact that Chicago packers have contributed much to educational funds as well as in a practical way. In speaking of the work of one of the men who is carrying this education to the farmers, the Journal says: "One of these is Prof. J. J. Ferguson, a man of finished education in animal husbandry as well as the sciences. During the last few years Professor Ferguson's time has been given up by his employers chiefly to the work of appearing before farmers' and breeders' meetings and at various colleges and universities upon invitation from these educational institutions, giving lectures and addresses on topics of special interest in his line of work."

He knows for some time connected with our agricultural dept.

R. A. Clark, '76, of Pittsburgh, visited M. A. C. one day the past week. Mr. Clark is president of the Alumni Association and while here he conferred with the president and alumni committee with reference to arrangements for the reunion to be held at the time of the semi-centennial in May.

The following new students have entered for work in the regular courses:

Walter Bernstein, '11 a, is from Philadelphia, and during the fall was a student at the Penn. State College; Harold T. Coughlan enters the class from the Detroit Eastern high school; Robert Gibson, enters for special work along agricultural lines from the Northville high school; Jacob L. Gray, of Palmyra, Pa., enters the four-year agricultural course, coming to us from Penn. state college where he attended during the fall term; Charles S. Harmon, special, is from Chicago and he was for a time a student in Cornell University; Ernest Yaugers enters from the Detroit University school and will take work in civil engineering.
