For several weeks committees have been busy preparing for the greatest event in the history of A. C. and, although it is as yet early to give in detail the program to the public, at that time, we feel sure that something concerning the order of events will be appreciated by the readers of the RECORD.

After deciding to come, the first question which is apt to arise is "how about rooms?" In order that our guests may be taken care of, a committee has been appointed whose business will be to secure a list of all available rooms and to make assignments for those who make application. Prof. Frank Kordie is chairman of the committee.

Ample provisions will be made for meals at different points on the campus.

A tent is to be erected with a seating capacity of 5000, in which will be held the meetings most largely attended, especially those on May 31.

One ticket for admission was enclosed with each invitation. This ticket will admit also the wife or the husband of the person receiving it, but under no other condition will it be good for two.

Commencement week will open on Sunday, May 26, with the baccalaureate service at 3:30 p.m. by Dr. M. H. Buchman, President of the University of Vermont. Classes will continue as usual on Monday and Tuesday, but will be dismissed for the remainder of that week. The meetings of the American Association of Agricultural Colleges and Experiment Stations will hold their sessions on Tuesday and Wednesday, May 28 and 29.

On Sunday, May 29, at 10 a.m., a congregational address will be given by representatives of the various farmer and farm organization, and the educational institutions of the state. As now arranged the order will be as follows:

At 8 o'clock Thursday morning the meeting will be under the auspices of the A. A. C. A. C. E. S. The addresses will be along the line of the Development of Agricultural and Engineering Education and Research Work. The following addresses will be given:

"Development of Agricultural Education," by Prof. E. E. Brown, Washington, D. C.

The meetings for the afternoon are arranged as follows:

1:00 o'clock, Alumni Banquet.
4:00 o'clock, Memorial Address.
6:00 o'clock, Students' Parade, and illuminating.
9:00 o'clock, Reception to delegates and visitors.

On Friday, May 31, at 9 a.m., Congregational addresses from institutions and learned societies will be received. This will be followed by short addresses given by representatives from different parts of the country and includes the following:

Department of Agriculture, Secretary James Wilson. Michigan and the University, President James A. Angell. For the East, President Rufus W. Stimson, of the Connecticut Agricultural College, Storrs. For the South, President H. C. White, of the Georgia State College of Agriculture and Mechanical Arts, Athens. For the Far West, President Benjamin Ide Wheeler, of the University of California, Berkeley. For the Central West, President Edmund James, of the University of Illinois, Urbana.

At 2 p.m. President Roosevelt will give an address, after which the graduation exercises and conferring of degrees will take place. On Friday evening will be held the society reunions and banquets.

Y. M. C. A.

The Thursday evening meeting was led by Pres. Barden. There was a good attendance and the meeting was a good one. The association has secured new song books and the evening was well spent in the enjoyment of the singing. These books will be used next Thursday evening for the first time. Come and learn some new songs.

Rev. L. S. Brooke, of Howell, Sunday morning in the Chapel, morning and evening. Mr. Brooke is an interesting speaker and his talks were especially adaptable to young people.

BASE BALL

On Thursday, Friday and Saturday the U. of M. baseball team played the U. of C. for the opening games of the season. The games on Thursday and Friday were played at 4 o'clock, on Saturday probably at 3:30. The management is looking forward to large crowds at these games. A great many will come from Lansing and nearby towns. Byron has been secured to supply all of these games.

A. M.'s line up is as yet a little uncertain. The weather has been so unfavorable for practice that it is hard to tell how the team stands. Crissy, however, will catch, Knutsen, Canfield and Mills or Stone short. Ellis will play left field, Thatcher center field, and Dickson or one of the pitching candidates will take care of right. The pitching squad will no doubt all be tried out during the three games, using on the first day the man in the best condition.

As stated last week grand stand seats will be free to ladies who attend these games, and perhaps throughout the season.

Michigan comes here on a percentage basis and single admission will be for thirty-five cents. A limited number of desirable seats will be reserved for admission at 75 cents. All games will be sold for admission at that price.

Our boys expect to at least furnish good practice work for the visitors. Its now up to the weather man.

RECEPTION.

The old and new cabinets of the Y. M. and Y. W. C. A. with their friends spent a very enjoyable evening. The old cabinets and members were laid aside that evening and everyone entered into the occasion with the determination of having the best time possible and appearances indicated that they were successful. The young ladies proved to be the most royal of entertainers and the young men responded with enthusiasm to their efforts.

The young ladies had a very unique way in combining business with pleasure, as the young men were compelled to assist their entertainers in finding and preparing the refreshments. All that was prepared was devoured, a most eloquent testimony to the proficiency of the cooking and the appetites of the company.

A social of this nature would not be complete without music, so the evening was closed by indulging in some of the delightful college songs that everyone about the campus is singing.

Miss Jones in her usual gracious manner introduces the boys to the young men and the young men are introduced to the girls. The program is now up to the weather man.

The Thursday evening meeting was led by Pres. Barden. There was a good attendance and the meeting was a good one. The association has secured new song books and the evening was well spent in the enjoyment of the singing. These books will be used next Thursday evening for the first time. Come and learn some new songs.

Rev. L. S. Brooke, of Howell, Sunday morning in the Chapel, morning and evening. Mr. Brooke is an interesting speaker and his talks were especially adaptable to young people.

CHICAGO ASSOCIATION.

The Eleventh Annual Dinner given by the Chicago M. A. C. Asso­ciation was held at 'The Union', 177 E. Randolph St., Sa­
turday evening, April 13, at 8:30 o'clock. There were over sixty present and an excellent time was re­ported.

Carleton R. Dart acted as toast­master and the following responses were made:

The Spirit of Our College by '88
George L. Teller, '88

The Engineering Student of Yes­
terday and Today, William P. Hayden, '84

Reminiscences, A. L. Pond, '97
Our College Days, E. G. Kenney, '97

President Snyder represented the
new members of the Y. M.

Club, while Solicitor, Mr. E. E. G. Kenny, '05

This paper is occasionally sent to non-subscrib­ers. Such persons need have no hesitation about taking the paper from the post-office, for no charge will be made for it. The only way, however, to secure the paper regularly Is to sub­scribe.

Subscription, 50 cents per year,

Remit by P. O. Money Order, Draft or Regis­tered Letter. Do not send stamps.

The new members of the Y. M.

C. A. and Y. W. C. A. At­

tended very pleasantly entertained
last Friday evening by the old

members in the basement of the

Women's Building. The first part

of the evening was spent in making

fudge, welsh rarebit and other
culinary delicacies, each one present

having some part of the work to

perform. The latter part of the evening was spent in games and

singing. A very pleasant time was

had by all.

JUBILEE PARADE.

One of the features of the big

Jubilee next month, especially from the student's standpoint, will be the parade. It is planned to make this an impressive affair, and one of the most attractive features of the whole week. While all the details have not as yet been worked out, the idea is to have the young men ride in fantastic uniforms in­cluding white mantles and leggings and carrying torches. After taking up a regular line of march, the col­umn will form several figures which are to be arranged, and a search light thrown on the line from the top of College Hall will give to it a very festive appearance. It is also planned to have a long bonfire on the parade ground around which a dance of some sort will be given, cele­brating songs and a few reci­ti­fying speeches made.

The young ladies also have a part in the festivities and will carry out their program of songs, etc., from the steps of the building as the torch light procession reaches that point.

In correction of a report which

was made, it is stated that it is not the annual "night shirt par­ade" nor the juniors have full charge of the arrangements.

The affair will be under the supervision of the jubilee committee and a com­mittee of the juniors as then repre­senting the senior class. It is not the thought to take away one bit of the honor due the above class who have so gallantly given a prominent place on this program; but it is hoped that each student will feel that he has a part in this affair and will help make this parade a suc­cess.

Classes are now being organized as to their relative places in this program and are taking hold of the project with enthusiasm. As the plans proceed, many details will be added and the event promises to be a wonder.

Y. W. C. A.

The Thursday evening meeting

was led by Miss Beal. Miss Bar­croft, who is an interesting talk on the missionary school work in China.

The new members of the Y. M.

C. A. and Y. W. C. A. At­
tended very pleasantly entertained

culinary delicacies, each one present

having some part of the work to

perform. The latter part of the evening was spent in games and

singing. A very pleasant time was

had by all.

FORESTRY CLUB.

The Forestry Club was ad­
dressed Tuesday evening by Pro­fessor Gunson. In his estima­tion the people must be taught to
respect the rights and property of others, and laws controlling loafers, campers, hunters, and timber thieves must be enforced before a practical system of fores­try can be developed in this country. Professor Gunson advises every forestry student to take a year in a forest tree nur­sery before taking up professional work.

TRACK.

Track work, except for long dis­tance men, has practically been at a standstill. Just as soon, however, as a warm day shows up the full squad will be started in their work. Candidates for the freshmen team

will be especially hurried as thier meet with the D. L. T. S. is only two weeks away. The Notre Dame meet also comes early in the season and it makes it necessary to get all the track men into shape at the earliest possible moment.

THESES.

SINIOR CIVIL ENGINEERS.

Allen, W. B. and Angell, I. D.

Brass, L. C. and Westerman, L. B.
Design of roads in the City of St. Johns Electric and the M. C. R. at Lansing.

Cade, C. and Johnson, W. E.
Design of a Four-Story Apart­ment House to be built of Rein­forced Concrete.

Canfield, R. S. and Hitchcock, L.

Ellis, G. H. and Verran, G.
Hydro­graphy of Survey for Pine Lakes, Mich.

Gansewer, W. W. and Hayden, L.
Street and Sidewalk Grades for College.

Glazier, H. L. and Johnson, M. F.
Analysis of Waste-Gate Section of River Dam, Wyoming, Mich.

Goold, F. A. and Kratz, O. A.
Investigation of the Sewer System of Owosso.

Heinrich, G. A. and Thatcher, F. E.
Drainage of Chandler's Mill.

Hitchcock, W. W. and Meyers, J. L.
Topographic Survey for Forest Development in S. Branch of Peninsular River.

Piper, W. E. and Rowe, C. L.
Grade Separation at Owosso, Mich. and the P. M. R. R. at Trourbridge.

WAITE WINS.

The cross-country run was held Saturday in spite of the unfavor­able weather and heavy roads, and resulted in a victory for Waite, Carr winning second, Oviatt third and Blodgett fourth.

The start was made from the Armory and the route taken was south across the farm bridge and east to the Haggard bridge.

From here the course went over the main road back to the college orchard and thence across the orchard and cam­pus to place of starting.

The race was an unusually good one and the men showed up a great deal better than was expected.

Captains Waite and Carr drew for teams by lot, Waite's team winning 177 to 123 points. Waite won in 15 minutes 30 seconds which establishes the first cross country record, and as track captain it is fitting that he should hold the first championship.

Carr finished an excellent second and will also receive a C. C. Sweater. Both Oviatt and Bignell made splendid runs and of the new men who showed up well are Bar­croft, VonDelt, DeCamp, Sargent, Bellamy, Lawrence and Campbell.

There were 25 of the 27 finished the race, and we give below the names in the order in which they crossed the line.

Waite, Carr, Oviatt, Bignell, Bar­croft, VonDelt, McKenna, Heinrich, De Camp, Sargent, Bellamy, Law­rence, Bignell, Frechette, Reiss, Wright, Hewson, Roberts, Tag­gett, Hopkins, Bushnell, Sprague, Knecht, Pickford, Allen.

C. D. WOODBURY'S SHOE STORE
HOLLISTER BLOCK

THE M. A. C. RECORD.

Eugene Gregory '78 made a brief visit here Friday of last week.

Instructor Watson of the drawing department left Saturday for a trip through the west.

Capt. and Mrs. Fuger were called to Detroit Saturday on account of the death of Mrs. Fuger's sister.

H. S. Putney with 103 of Sanilac county, made a hurried visit here one day the past week. Mr. Putney is selling corrugated steel road covering and contemplating locating in Lansing.

Mr. J. H. Weldon, of Coldwater, is visiting his sister, Mrs. B. A. Faunce. Mr. Weldon is at present in the employ of the Michigan Central Ry., at Lansing, as night operator and ticket agent.

Many of the students of '93-'97 will remember E. E. Hoyt, who was during these years foundry and wood shop foreman. Mr. Hoyt is at present foreman of the foundry department at Lewis Institute. He is also secretary and treasurer of the Associated Foundry Foremen in Chicago.

Mr. Marion A. Porter '76-'77 and wife of Northville visited the old college last week and saw so many changes that he did not feel at home, but soon found that he was remembered by Dr. Beal with whom he had a good visit. Mr. Porter is now interested in the Independent Long Distance Telephone Co., which will operate not only in this State but others as well.

The western part of the botanic garden has nearly all been raised to the high water mark.

Mr. Russell Vallee and F. B. McMullen, both of the "to class, have found it impossible to return this term.

At its meeting on April 10 the State Board authorized the college to make an exhibition from the several departments at the Jamestown Exposition.

John F. Nellist with '94 of Grand Rapids, spoke before the Hort. Club at its meeting last week. Mr. Nellist is a prominent greenhouse man of the above city.

A letter from G. A. Boyle, '08, asks that the address of Miss Nina Breustl's Record be changed to Mrs. G. A. Boyle, R. F. D. No. 2, Delton, Mich.

Miss Helen Rogers Smith, lecturer and so-prano, gave an entertainment in the chapel Friday evening. Miss Smith has spent two years in Paris and explained the habits and customs of the French, and also told of the arts, treasures and architecture of that republic. Miss Mabel Yokely is with Miss Smith as accompanist.

Mr. W. S. Sayer, of Chicago, has been elected to a position as assistant in the bacteriological department. His work will be purely experimental and comes under the Adams fund recently granted experiment stations. Mr. Sayer is a graduate of Beloit College and post graduate of Chicago University. His work begins May 1.

Instructor and Mrs. Myers will have the room in the Terrace formerly occupied by Prof. King.

Instructor A. R. Kohler will speak on horticulture in Iowa at the Hort. Club tomorrow evening.

Miss Glischrist last week Tuesday for Ann Arbor, where she will continue her work at the university.

Rev. F. G. Ward, of the Plymouth Congregational church, Lansing, will speak in chapel Sunday morning.

Prof. Barrows gave a stereopticon lecture on birds before the Women's Literary Club of Portland Friday evening of last week.

Mr. R. C. Bradley, assistant secretary of M. A. C., '93-'95, visited the College last week in company with the board of control of the Newberry Asylum. Mr. Bradley is steward in the hospital at that institution.

A suggestion has come to us which is worthy of notice and thus we pass it on. It is that sort of a bulletin card for cards only be placed in each ward of the dormitories. Upon this board the student places his cards when he enters the dormitory. As the card gives his room number as well as name it would thus be an easy matter for any one desiring to locate a certain student to find him after learning in which dormitory he room ed, which is usually a simple matter. Why not try it? You'll have lots of visitors this spring.

Prof. Taft has been reappointed Nursery Inspector for the succeeding term.

Each student in vegetable gardening will be expected to plant and care for a garden which will be 15 by 75 feet in size.

Mr. Alfred Marhoff, class of '93, an engineer of Battle Creek, was at M. A. C. Friday, and hopes to be back next month, 29-31.

The First District of the Michigan High School Orchestral Association held its contest at Charlotte Friday evening. President Snyder acted as one of the judges on delivery.

A baseball game of five innings was played Saturday, captured by Nies and Canfield, Canfield won 8 to 3. The game at Olivet was called off on account of the storm.

The mass meeting on Thursday evening was well attended and very enthusiastic. Instructor Clark presided and opened the meeting by telling a story which put every one in a happy frame of mind. With the band to help along every song reminded one of the coming jubilee.

A committee of five members of the Upper Peninsula Asylum Board, located at Newberry, visited upon the Governor Wednesday and also visited the college. They are in search of a man to take charge of their farm of 500 acres which they expect to run chiefly as a dairy farm.

One of our M. A. C. men has been recommended.
JUBILEE HYMN OF THE M. A. C.

O Alas, Maier, hail to thee!
Michigan, my Michigan.
Our hearts in joyous love agree.

O Michigan, my Michigan.
Thy songs in glad, tumultous throng,
With loyal zeal thy praise prolong.

And all our soul breaks forth in song,
Thy sons in glad, tumultous throng,
No traitor soul shall bring thee shame.

We learn to sing it.
And all our soul breaks forth in song,
No traitor soul shall bring thee shame.

And all our soul breaks forth in song,
Thy sons in glad, tumultous throng,
No traitor soul shall bring thee shame.

We learn to sing it.

The storms last week were hardly such as to remind one that thunder storms will soon have order of the day and yet they might be acceptable. It is interesting to know that during the past few years the campus has been visited by lightning but very few times and then no damage was done. Following are the places as noted by one who has lived at M. A. C. since 1875: 1. A elm tree which stood at the north side of the botanic garden. 2. An elm tree nearly south of the house occupied by Prof. Slay. 3. An elm tree nearly south of the house of Dr. Beal lives. 4. A large elm nearly south of the west end of the Terrace. 5. A tulip tree nearly south of Secretary Brown’s residence. 6. A little elm tree which at the time stood near the south side of the botanical laboratory. This was struck during the erection of the above laboratory. 7. A small Norway spruce which stood in the hedge beside the bacteriological laboratory. The eighth and last to be listed was the old sheep barn. This caused perhaps the most trouble, but in this case the damage was easily repaired. Eight visits in 1978 is not very bad.

We quote the following from a letter written by Ernest F. Smith: “The Pennsylvania R. R. Co. are about to construct a yard for the purpose of classifying the freight which is to be distributed in Cleveland. This yard is to be located about ten miles out of the city and will have a capacity of about 300 cars. Before the track can be laid, however, about 300,000 yards of grading will have to be done and I have been delegated to take a hand in the engineering part of the work. I am now living at a quiet country farm house near my work. Have bid adieu to the noisy and dirty city, and settled down to a pleasant summer life out of doors. My work will be that of chief instrument man, and so will demand my constant attention. On account of the location of help in our office at present I doubt very much whether I shall be able to get leave of absence long enough to attend the semi-centralized.” Mr. Smith states that the Penn is likely to take on several houses in the spring and thinks there are good chances for M. A. C. engineers with that road. He has told that his work is very much and at the same time securing valuable training. His address for the summer is Bedford Terrace. 15th St, Michigan, my Michigan.
