LECTURE

It was found impossible to arrange a date for Maud Ballington Booth as advertised on our entertainment course and the committee has secured in place of this number Dr. John Merritt Director of Chicago, who will lecture in the Armory Friday evening. He was formerly pastor of the People's church, Chicago and receives very flattering notices from press and prominent citizens and will without doubt be "A man with a message." Bring your regular course ticket.

COLUMBIAN.

The spring term eleven o'clock party given by the Columbian Society in their room Saturday evening was a most enjoyable affair and about twenty-five couples spent three pleasant hours dancing to music by Baker's orchestra. The rooms were very attractive with the decorations of ferns, plants and society colors.

The programs, representing small sunflowers, were original and押 pretty souveniers. Instructor and Mrs. Sackett added to the pleasure of the evening by chaperoning the party.

ECLECTIC PARTY.

The Eclectic Society gave its first party in its new house Saturday evening, April 20. Although a great many finishing troubles were lacking, the house was in excellent condition and the favorable comments were universal. It was especially satisfying to have so many of the alumni and faculty members, who acted as chaperones, present. Forty couples were present all of whom were too sorry when eleven o'clock put an end to the first of the many pleasant occasions anticipated in the new quarters.

WEDNESDAY MORNING, MAY TWENTY-LINE

10 o'clock Assembly Tent

THE COLLEGE AND THE STATE

ADRESSES

For the State - His Excellency, Governor Fred Malby Warner (with 84)

Mrs. Ryder is receiving a visit from her mother. H. K. Patriarche, '02, called on college friends Sunday. He is still in the employ of the P. M. Ry. at Detroit.

Sunday evening fourteen senior boys and girls had lunch in the Dean's rooms, Women's Building. Welsh rarebit, ice cream and cake were served.

Prof. Huston, formerly Director of the Experiment Station of Indiana, was a college visitor Friday of last week. Prof. Huston is now at the head of the Potash Syndicate, of Chicago.

Rev. W. V. Dickey of the class of '87 visited the campus one day the past week and noted with pleasure the many improvements since his last visit. Mr. Dickey is pastor of the M. E. church at Sterling, III.

Prof. Bogue became suddenly worse the early part of last week and an examination revealed the fact that an abscess had formed in his side. He was operated upon Wednesday and came through in good shape. He is doing nicely and it is hoped that no serious complications will set in.

Mr. L. F. Jenison has accepted the position of bookkeeper in the secretary's office which position was made vacant by the resignation of Mr. McWethy. Mr. Jenison has been spending several hours each day in the office, but his appointment to the permanent position dates from May 1.

The last of the old barns is now on the move and the improvement is certainly very marked.

"Tiny" Parker was confined to the hospital a few days past week with a slight attack of pneumonia.

There are about 150 species of trees on the campus and a larger number of shrubs which will be relabeled this spring.

The judges were Mr. Gunson and Instructors Stevens and McWethy.

The faculty, at its meeting on Saturday night, Mr. Dorman was given first place, Mr. Hodgemann second. The judges were Mr. Gunson and Instructors Stevens and McWethy.

The faculty, at its meeting on Saturday, finished their work on the courses for the coming year. As this matter is now out of the hands of the committee, it is hoped that each department will report the changes desired for next year at the earliest possible moment so that the catalogue may be rushed forward.

Mr. McWethy writes Mr. Kenney that though he feels somewhat improved in health, he is not satisfied with his progress and has decided to go to Phoenix, Ariz., where the climate is warmer and dryer. He mentions the beautiful flowers up in the mountains and states that roses are now in bloom everywhere.

Mr. and Mrs. Bassett, of Illinois, are spending a few weeks with their daughter Mrs. J. J. Myers.

Mrs. C. H. Rolston, of Chattanooga, Tenn., is the guest of her daughter Mrs. Fletcher, for a month.

The bill to incorporate the college community has passed both houses of the legislature. As yet we do not know just what our name is.

Tuesday afternoon of last week the wives of several of our senators visited the college and report a delightful half day. Tea was served in the Women's Building.

Those who had charge of the program of the sacred concert Sunday evening deserve great credit for the way in which said program was executed. The chapel was well filled and each number much enjoyed.

Director Smith has received a letter from Lodhi, Italy, written in French in which Dr. Franco Sammarin, Bacteriologist of the Experiment Station at that place, expresses his thanks for the last annual report of the Secretary. He remarks that the time has fully arrived when Europeans should follow immediately the methods of our Experiment Station and should profit by the example of our strenuous activity. He thinks that the work of Dr. Marshall and Mr. Sacket in bacteriology appeals to European scientists and he awaits with much pleasure the publication of their future bulletins. The letter, although written in the Italian was couched in the French language.
To the People of the State of Michigan,

Greeting:

It was a progressive and enlightened public sentiment that brought about the observance of Arbor Day.

Responsive to that sentiment I hereby designate Friday, May 3, 1907, as

ARBOR DAY.

in and for the state of Michigan.

The reasons why this day should be observed by planting trees, vines and shrubs appeal to every home-loving citizen of Michigan. It is not given to all to own a portion of the soil from which comes the sustenance for all and it is the duty of those who do to make more attractive and beautiful that heritage Michigan's pioneers redeemed from the wilderness. By planting trees about the homes and along the highways this can be done.

Not alone in the family or by the individual should Arbor Day be celebrated and observed. Those in charge of our public schools can and should arrange a program of exercises for this day that will impress upon the minds of our youth the duty we owe ourselves and posterity.

We should leave this earth more beautiful than we found it. By planting and caring for the trees we are making our homes more beautiful, our state more attractive and utilizing one of God's best gifts to His children.

Another mass meeting is to be held Wednesday evening at 6:15 and everybody must come. One of the songs to be rendered will be the chorus as sung at the recent Nuna-

such:

The Dean has her eyes on you and be careful what you do.

Don’t go walking off the campus with your lady love.

Don’t go fishing in the river like two doves.

The Dean has her eyes on you, she will see you and your girl too.

Be careful if you want to stay the whole term thro’.

For the Dean, she has her eyes on you.

Director Smith visited the Upper Peninsula April 15 to speak at the creation of a county school of agriculture at Menominee and to examine of the Upper Peninsula station.

He found the depth of snow in the middle of the Upper Peninsula to be about two feet, making travel impossible through the woods.

Post from as far away as Menominee line are planning to be at the college during the last week in May.

Prime Advice. — Drink less; breathe more; eat less, chew more; ride less, walk more; clothes less; eat more; worry less; work more; write less; give more; write more; read more; preach less, practice more:—Moderation-Tips.

DEPARTMENT STORE.

PROCLAMATION BY GOV. WARNER.

Hort. Club last Wednesday night.

The latitude of Iowa is about the same that of Michigan but it is situated away from the modifying influences of the Great Lakes and has a much more severe and variable climate, there often being a change of 50 degrees temperature within a few hours. The soil, largely of glacial origin, is in many places dark and very fertile, but is generally indurated giving way to stock and grain farming. There is, however, some lighter soil not conflict with the mass meeting.

There is, however, some lighter soil not conflict with the mass meeting.

There is a much lower than in Michigan due to the demand throughout the state from beginners in the poultry raising.

Mr. Parker's illness.

Mr. Kohler gave an interesting presentation of the subject in as

Alden, President.

Mr. Parker excited much interest among the students who were present.
