The M. A. C. RECORD

Michigan State Agricultural College.

VICTOR T. WILSON

Professor of Drawing and Design.

The position of Professor of Drawing and Design, formerly held by Professor W. S. Holdsworth, has been filled by the appointment there to Professor T. Wilson now occupying the position of Professor of Engineering Drawing at Pennsylvania State College.

Professor Wilson was educated in the public schools of Philadelphia and at the Pennsylvania Museum School of Industrial Arts and the Academy of Fine Arts in the same city. Later he graduated from Cornell University with the degree of M. E. He has had practical experience as draftsman from 1896 to 1893, and again in 1902 with the engineering firm of Westinghouse, Church, Kerr & Co. His teaching experience begins in 1893 at which time he was connected with the Central Manual Training School of Philadelphia. He then went to Cornell University and until 1903 instructor in drawing. During his connection with the Cornell University, he published a treatise on Free-hand Perspective and also on Free-hand Lettering, both of which have received favorable commendation.

THE M. I. A. A. MEET.

Judging from reports the annual M. I. A. A. meet at Alma June 4 and 5 was hardly up to the standard of previous years, most of the events being slow, and the weights, especially, below the average. Oliver won out with a total of 55 points, Alma was second with 49 points, Hillsdale third with 49, Kalamazoo fourth with 41 and Albion fifth with 39. Waggoner of Hillsdale made the only record by running the 220 dash in 22 flat, breaking Mont's record of 22.8 seconds. Hillsdale also won the relay by 6 yards over Alma. Time, 3:38:4.

In the ball game Anna won a decisive victory by a 3 to 1 score.

The Women's Society will meet with Mrs. Mitchell Wednesday at 2:30. Sewing.

THREE WEEKS FROM TODAY THE LAST COMMENCEMENT TIME IS NEAR.

COMES ONE DAY EARLIER THIS YEAR THAN FORMERLY.

Three weeks from today, the last day of the college year, will be given up to the graduating exercises in the morning and the society reunions in the evening. Formerly commencement has been held on Wednesday and the society reunions on Monday. The committee in seeking to remedy this moved commencement one day earlier in Wisconsin, and as no one would feel able to attend these exercises after an all-night party it was thought best to place these on Tuesday evening. In this way visiting alumni and others may attend both and spend only one day at the college.

The exercises of commencement week are as follows:

SUNDAY, JUNE 21, 8:00 P.M.: Baccalaureate sermon by Rev. Ernest Borrow Allen of Toledo.

SUNDAY, JUNE 21, 7:30 P.M.: M. E. and W. C. A. union meeting.

MONDAY, JUNE 22, 2:20 P.M.: Dedication of new Engineering building. Address by Dr. R. C. Carpenter of Cornell.

MONDAY, JUNE 22, 8:00 P.M.: President's reception.

TUESDAY, JUNE 23, 8:00 P.M.: Society reunions.

THE COMMENCEMENT LUNCHEON.

A committee consisting of the presidents of the various classes and a committee of the faculty have been busy the past week making arrangements for the Big Luncheon to be held on the lawn north of East College on Tuesday, June 19, between 12 and 1 o'clock. Then with the last exam. out of the way, faculty, students and alumni will sit down in one huge picnic. Each class will sit by itself, and it is hoped that the last exam. of the year will be by a blaring in signa.

At the luncheon there will be an opportunity for each class to have a photo taken. There will also be one taken of the entire crowd.

Music and dancing in good old picnic style will entertain the day, and after the feed a procession will be formed which will march to the athletic field where every one will pare the subfreshmen dinner, D for the freshmen, E for the sophomores, F for the juniors, B for the seniors, and A for the faculty.

CAPT. CARR

Winner of the Two-mile at the Conference Meet.

W. O. Carr won the two-mile run from the cream of the west, including Mauudrell, the California champion, in 9:56 1-5 sec., the fastest time ever made in the conference meet except in 1905 when Manuell, the California champion, won in 9:59.5.

The other teams in the race for more than three-fourths of a mile were the University of Wisconsin, with Waggoner in the lead and second place, and Manuell of Stanford third. Carr's time was 9:56 1-5.

CAPT. CARR WINS TWO-MILE BY SENSATIONAL FINISH.

Though making their first debut in big team athletics, M. A. C.'s athletes were the sensation of the conference meet at Chicago Sunday, and with 5 men raked in 8 points, tying with Purdue for sixth place, and taking third place in the relay. The result amply justifies the action of the association in balking away from the M. I. A. A. last fall to enter athletic relations with the larger institutions.

Bignell in the 500 won his trial heat in 1:22 3-5 sec. and ran fourth in the final in the time of 1:25 2-5 sec. Oviatt in the half, in a field of 14 premier half-milers of the west, won second, being beaten only by the California champion of Stanford University, in the room-breaking time of 1:58 2-5. Oviatt's time was 1:58 4-5.

THE BEATS DISTANCE STARS.

"In his nine years as Carm of Michigan agricultural, a thoroughbred "dark horn," won the two mile run from a class field of long distance starts with Waggoner of Ames second and Manuell of Stanford third. Carr's time was 9:36 3-4.

Waggoner was the foremost figure in the race for more than three-fourths of a mile. He led for seven laps with a fearless look at long distance running. The other team, being one-up, had the lead in the half and Waggoner took over on the last turn in the track and held the race won out by four yards. Smith of Wiscon­sin was second with 9:27, and with Manuell at the start of the lap.

But Carr went up the back stretch, with Bown of Indiana third and Carr in the rear. At the last turn Waggoner urged to the lead and seemed to have the race in his pocket, when Carr shot up from the bunch in a sensa­tional spurt of speed, passed Waggoner like a flash and won by four yards. Manuell coming third and the Wiscon­sin competitors out of it.

"Miller of Stanford ran according to form to the half, which he won in the fast time of 1:38 3-4, just a second slower than the record three years ago by Lightbody of Chicago. The race between the two better in the Michigan and Michigan Agricultural College, who took second, with Bown of Indiana and Manuell of Stanford proved a surprise at the start by leading the field at the half and weren't half the way. He had the pole at the start and blazed the way for the track and had the race won out by four yards. Bown of Indiana took the lead with Oviatt, Miller, Davis of Ames and Hardway of Illinois at his heels. Miller got in his good work in the last turn in the track and had the race won out by four yards from the tape. He finished four yards ahead of Oviatt with Davis third.

The M. A. C. CATTLE TOP DETROIT MARKET.

"Bishop Bullen and Holcomb topped the cattle market by selling Ted Bresnan at 20 extra good steers averaging 1027 lbs., at $6.85 per hundred. Those cattle were fed at the Michigan Agricultural College and were sold for Hammond and Foster of Hazel Park. This was the best finished load of hand fed cattle we have seen this market season. They will be slaughtered for the Detroit trade."

On June 5th, the other ten calves were taken from the Detroit Free Press, June 5th. These cattle were gentle Hereford bred at the college. They were fed experimentally from birth until sold, and complete feeding records kept. This is the second lot of cattle this season.

FACULTY LOSE TO SENIORS.

Before the game, Sec. Brown addressed the seniors and heads of departments as to the merits of the baseball team. "I think it will be a good show," he said, "but the score will be against us." However, both teams played very well. The seniors won, 3 to 0. The M. A. C. had the ball, but they were unable to hit it. The seniors scored one run in the first inning. In the second inning, the M. A. C. had two runners on base. They were unable to score because the centerfielder, who was the only good fielder for the M. A. C., dropped the ball. In the third inning, the seniors scored another run. In the fourth inning, the M. A. C. had two men on base. They were unable to score because the shortstop dropped the ball. In the fifth inning, the seniors scored another run. In the sixth inning, the M. A. C. had two men on base. They were unable to score because the centerfielder dropped the ball. In the seventh inning, the seniors scored another run. In the eighth inning, the M. A. C. had two men on base. They were unable to score because the centerfielder dropped the ball. In the ninth inning, the seniors scored another run. The M. A. C. had two men on base. They were unable to score because the centerfielder dropped the ball. The seniors won, 3 to 0.

A PLEA.

A definite knowledge of the fundamental principles of criminology is essential to a healthy view of society. The progress of society depends to a large extent upon its regulation and the exercise of its immorality, and this regulation in turn depends upon the ideas of the cause of crime held by educators. A well defined knowledge of crime, as will be shown more fully later on, determines the education of a people. Several years ago the writer was set thinking by the following sentence from the pen of Calvin Blanche which read: "One thing we are sure of to you that all the crimes which an individual can commit are in reality committed somewhere else."

This is a hint of what follows.

A strong support to this thesis may be found in the June number of The American Magazine in an article entitled "An Apology for Grifts," Mr. Steffens shows that Schmitz and the supervisors of San Francisco were literally forced by circumstances to strike the ship's social position, and hence their very livelihood, in the word misfortune. He shows that Buck was obliged to act as an agent of bribery in order to maintain his position, and that Harriman and Calhoun "had to" act crookedly in order to keep his position and salary, and that Harriman and Calhoun "had to" give bribes in order to do business. Although business could exist without bribery and bribery need not be introduced, it is plain that when a business man encounters a condition of bribery he believes him either to either the game or to revert to the honest. It is similar to an emulsion with a combing; one must either comb or throw up his hands. Crime thus becomes the crime.

Many will remember the short article given us two years ago in a lecture by Mr. Rils. He explained the forces of corruption. Boys are made by the systems and environment, and bad boys are made bad by their associates. The crime is a follows.

ABOUT THE CAMPUS

Board in the various clubs has been audited as follows: A, $2.80; B, $2.90; C, $2.24; D, $1.96; E, $2.05.

All students having keys to rooms in dormitories should return them to the secretary’s office, together with the deposit card, not later than July 1st, in order to receive their rebate of $1. A rebate of 25c only will be given when key is not accompanied by the card.

Oxford Patents, Gun Metals, Vici Kid, Russia Cali, Tan Vici Leathers
$2.50 to $4

Dr. Blaisdell is attending the 20th reunion of his class at Syracuse University.

Agricultural Drainage

The purpose of drainage is to take care of the excess of water, whether in the ground or on the surface. In agricultural work the tile drain and ditch drain are used extensively. In laying a tile drain always give the tile a good foundation and good covering at the joints.

Tuesday evening the Engineering Society enjoyed the most pleasant meeting of this term. The thorough manner in which Prof. Veddcr delivered his talk made it very interesting. "Agricultural Drainage" was the speaker’s subject for the evening. The historic facts pertaining to drainage show that the Romans were familiar with the principles and knew the values of drainage in agriculture. It was not until 1850 that any attempts were made in America toward the development of farm land by means of drainage.

From 1850 to the present time wonderful progress has taken place in the development of agricultural drainage. The purpose of drainage is to take care of the excess of water, whether in the ground or on the surface. In agricultural work the tile drain and ditch drain are used extensively.

From present indications there will be the last one of the year and all are urged to be present. The election of officers will be held and all members are requested to be present so as to have a good election.
AveraGe men are as colorless as average clothes. College men are outside the average—their togs have to be College Brand Clothes are. Just a bit more dash to 'em, a great sight more style and the precisely right amount of fit. Though exclusive their price isn't enough to exclude you from wearing 'em. For the young man and the "like-to-be-young." The young man and the "like-to-be-young."
