MANY CHANGES.

ENGINEERING ALUMNI WILL CE

SERVE THEM WHEN THEY RETURN FOR DEDIC-T

ATION OF NEW BUILDING.

Former students in the engineering courses who have not been on the campus in the past year or two and of which the school has been fitted up in the old engine shop equipment have made room.

The Engineering Hall has been extended to occupy the drafting room on the ground floor.

The wood-working department occupies the entire second floor. The east wing is now a single room devoted to the laboratories in general physics, other lecture rooms.

If the weather permits the exercises will be held in the grove in front of the Armory. If not they will be held in the Armory, the exercises Engineering Hall will be opened to visitors. Fischer's orchestra will furnish the music.

A LETTER FROM PORT ARTHUR.

Prof. Hedrick recently received a letter from Edna P. Rupert, '05, written from Port Arthur, Manitoba. Miss Rupert is traveling in the east with her father and mother being a traveling salesman there.

Speaking of Port Arthur she says: "Port Arthur is a most interesting place also the surrounding country. Coming up from Duluth we passed through the heart of the battle grounds. The hills were a perfect network of trenches, some wide and deep, some narrow and shallow. These trenches were occupied by the Japanese also. On our hill were two captured trenches as the Japanese had occupied them. Kuriopatn's fort was nothing but a huge pile of dirt. It originated on a hill that had tunnelled under it and blown it entirely to pieces.

"Two hundred three Metres Hill seems to be an ordinary hill, but is the highest and commands the western and eastern harbor. The possession of it meant a death blow to the enemy. However, the Japs won it with terrific loss of life and now shakers, houses, etc., can be seen lying around. There were so many men killed that they just covered the entire mass with dirt and walked over them. Now the thin dirt has washed away in places and exposed them. The Chinese also dig around to find money."

"In the harbor are sunken vessels. We went to the bay and walked over them. Now the thin dirt has washed away in places and exposed them. The Chinese also dig around to find money."

"Don't flinch. Don't foul, but hit the line hard." A GREAT ENTERPRISE.

Club Boarding Association Does Much Business

Few who eat regularly at the clubs ever stop to consider or have any idea of the immense amount of food, sugar, and other supplies that are bought every week to the amount of $2,200.00, and getting some of it burned and wasted. From what was learned from this and other sources the census of Michigan colleges was investigated. From this we may say that the spirit in which they have worked and the amount of business handled by the club are more than sufficient to keep one man busy during the winter season.

The following figures give some interesting data in regard to last year's business which is considerable more than that of the present year, the exact figures of which are not yet obtainable. There were bought last year bread and sweet goods to the amount of $2,200,000, meat under contract to the amount of $3,132,65, nearly 700 gallons of milk costing $4,000,000, 14,500 lbs. of flour in addition to the bread and sweet goods bought from the bakery, 130 lbs. crackers and 1,829 lbs. commercial cookies, ten tons of sugar and 425 lbs. baking powder. Breakfast foods are bought in five meat under contract to the amount of $2,200.00, and getting some of it burned and wasted. From what was learned from this and other sources the census of Michigan colleges was investigated. From this we may say that the spirit in which they have worked and the amount of business handled by the club are more than sufficient to keep one man busy during the winter season.

About the Campus

Dr. and Mrs. Beal entertained the senior girls at their home Friday evening.

Lost.—A rain coat marked “Roos Bros.,” San Francisco, Calif. Return to Miss Taylor. Reward.

A heavy storm of wind and rain struck the vicinity of the college about 3 p.m. Saturday afternoon, breaking down several trees, blowing a window out of the Engineering Building, etc.

Miss Dorothy Moxness, formerly assistant in the chemical division of the experiment station and who has been in Baltimore, Md., since September last, has returned to Lansing as assistant in the state analyst’s office.

The commencement invitations gotten out by this year’s class are in many respects the most elaborate of any ever sent out by a class at M. A. C. They are bound in brown leather tied with a leather thong and contain the invitation, program of the week, commencement day exercises, members of the faculty, class officers and the members of the class by departments.

The plant of the Prestolight Co., manufacturing acetelyn gas and compounds, has been published and is posted on the bulletin board. Examinations begin Monday morning.

Prof. Taft is attending commencement exercises at his alma mater, the Massachusetts Agricultural College, this week.

Dean Bissell and Prof. Veder are in Ithaca, N. Y., this week attending the reunions of their classes, ’88 and ’89 respectively, of Cornell University.

The farm department is getting on a bulletin covering the first year’s experiments in horse feeding and containing a treatise on the subject of feeding farm horses.

A recent count of the seedlings in the seed beds of the forest nursery reveals the fact that there are approximately 4,080,440 white pine seedlings which will be reforesting purposes.

Prof. L. R. Taft was at Milwau- kee last week where he attended the annual meeting of the American Nurseryman’s Association. Spraying of Nursery Stock was the sub- ject of his address there. He reports seeing G. A. Hawley, ’92, and H. A. Hamilton, special, while there.

The East Lansing Woman’s Club held a picnic dinner on the grounds by Pres. Snyder’s home Saturday.

Mr. Oliver Burke will address the Engineering Society this evening upon the subject “Concrete Construction.”

For several reasons it has been found necessary to recall the announcement of the college picnic for Friday. This will not be held.

A. L. Hurd, a sophomore forestry student will spend the summer in the lumber camp of Falling and Haney at Johnsbury, Mich.

Do something for somebody always—Whatever may be your creed—There’s nothing on earth that can help you so much as a kindly deed.

The society was honored by having as chaperones Mr. and Mrs. Wright.

Secretary Brown is on Ann Ar- bor this week attending the 27th reunion of his class at the U. of M.

The commencement of the American Society of Mechanical Engineers will meet at Detroit June 24—26. Dean Bissell and some other members of the faculty may attend.

The first commencement party of the year is past and has been pro- nounced a success. On Saturday evening, June 13, the Sorority Lit- erary Society held their second annual flower party in the college armory. The sides of the armory were decorated with green and hol- lyhocks, and in the corners were found cozy corners and comfortable seats around the sun dial in the rustic house and the rose garden. Refreshments were served on a lat- tice porch, covered with morning glory and mock orange branches. The orchestra played under a large canopy draped with morning glory, festoons of roses hung from the clusters of lights and butterflies hovered among the flowers. The grand march was led by the vice president, Lena Smith, and ended in the letter S after which the pro- grams were given out by Frank Essehyn and Gladys Williams from flower baskets, after which dancing was held until 11 o’clock.

A number of the old girls returned for commencement, among them were Harriet Angell, Matie Hen- ders, Inez Courtright, Ella Mac- Mann, Bess McCormick and Alice Pettit.

The M. A. C. RECORD.

The eleven o’clock party of the Eunomian Literary Society, which occurred Friday evening in their rooms, was a novel affair, being in the form of a canoe party.

The evening was made more enjoyable because of the fact that the gentlemen took their coats off, thus combining a canoe party and shirt waist party into one. The decoration and programs were simple but appropriate.

The society was honored by hav- ing as chaperones Mr. and Mrs. Wright.
BASEBALL AND TRACK SEASON CLOSED.

A Glance in Retrospect.

This spring's baseball team was one of the best that has represented the institution. Although five games were lost the schedule contained more strong teams than ever before. The five lost were to Syracuse, Notre Dame, Colver, Western A. A., and D. C. A., all strong western teams. In the state series M. A. C. had a clear record of victories and comparative scores and records, easily led all the state college teams. Alma, winner of the M. A. A. championship in Michigan last season and Alma and Albion were contenders, was defeated 4 to 0, while Yeisley, which team defeated both Alma and Albion, was badly beaten 10 to 2. The strong De Paul University team was beaten 6 to 5, while Lake Forest was defeated twice 6 to 5 and 4 to 1.

Peterson and Vaughn shared the pitching honors, and did the best work we have ever had, as is evidenced by but 23 runs scored by our opponents in 13 games. In 29 runs per game. The weakness of the team was hitting. Harrison led the regular hitting with the line average of .373; Baker, who shared with Peterson the title of freshman batting leader, second with .283, Belknap, who played in four games, had an average of .600. Capt. Mills scored the most runs, 12 in number and also led in stolen bases with nine. Capt. Mills with Harrison led in hitting, but one error apiece. Crissy's his fine work behind the bat showed himself off the class of the state in that department. The following regulars were granted monograms: Capt. Ellis, Capt.-elect Mills, Crissy, Vaughan, Harrison, Peterson, Baker, Vance; the other men on the squad who were used in games were Belknap, Nelson, White, Vondell, and Ohlin.

In track meets M. A. C. was even more successful than in baseball. The records exceeding our wildest expectations. Alma was overwhelmingly defeated. Notre Dame was defeated by M. A. C. in the last, was defeated by a narrow margin. We won second place in the Eastern Conference and won the All-American Championship at Chicago. The 10 point margin that the Alma team won over Michigan is the largest margin ever before in any institution.

ELECTRIC MANUFACTURERS.

Mr. Johnson, manager of the Lansing Pure Ice Co., addressed the Engineering Society at its last meeting upon the subject "Manu facture of Pure Ice." The manufacture of ice is easier than the distribution of it, because of the fact, the distribution must be satisfactory to all the customers. The people are gradually awakening to the fact, that pure ice is as essentials to good living as pure food. The process is quite simple. The water is vaporized, then condensed from the steam. Finally the water is boiled, and then all solid matter is taken out by filtering. The water is now absolutely pure. 300 pounds of water are placed in a can at one time, and put in a bath tank containing brine. The tank is surrounded by a coil of pipes containing ammonia. The action of the ammonia is to reduce the temperature of the brine to .1 F. It takes about 48 hours to freeze the water in the can.

About 25 tons of ice are turned out daily. The business of the Lansing Ice Co. has been very successful within the last year.

87 W. B. Allen, 157, of Jackson, spent Sunday at M. A. C.

AVERAGE men are as colorless as average clothes. College men are outside the average—their togs have to be College Brand Clothes are. Just a bit more dash to 'em, a great sight more style and the precisely right amount of fit. Though exclusive their price isn't enough to exclude you from wearing 'em. For the young man and the "like-to-be-young."
