NEW MEMBERS OF FACULTY.

C. M. Hargrave, instructor in chemistry, whose home is in Rockville, Indiana, graduated from Rockville High School in 1899 and from Wabash College, Crawfordsville, Indiana, in 1905.

M. L. Tower, instructor in chemistry, graduated from Charlotte high school in 1904, and from M. A. C. in 1909 in the agricultural course. Mr. Tower spent the summer in Benton, Earlham, St. Joseph, Holland and Morkegon as city milk inspector for the State Dairy and Food Department.

Mr. Anton S. Rosing, Assistant Professor of Civil Engineering, comes to us from the field of practical engineering. He was born in Denmark and came to this country sixteen years ago. He was graduated from the University of Michigan in 1900, since which time he has been continually engaged in practice. For the first five years after graduation Mr. Rosing served in the Chicago Northwestern Railway on location service, construction and track superintendence. In 1905 he was Resident Engineer in charge of construction for the Chicago South Side Railway. In this position he superintended the construction of track work, concrete structures, sewer and water lines, shops, buildings, etc. For the last year he has been in charge of the construction of an interurban railroad in Illinois. He is a member of the Wisconsin Society of Civil Engineers.

Mr. Rosing comes to us with the highest recommendations as an engineer. His work, as far as our knowledge goes, has been in every way above the average. In addition to his engineering work Mr. Rosing is a sáchistic in mathematics.

MEETING OF THE STATE BOARD OF AGRICULTURE.

The most notable feature of the meeting of the board of agriculture was the acceptance of a gift from the estate of Wm. Smith Sayer. The resolutions adopted with reference to the bequest are as follows:

RESOLVED, That the Board of Agriculture accept the sum of $400 from the estate of William Smith Sayer and agrees to invest it to the best of its power for the purpose of providing a permanent prize fund or income to be offered to the student, under-graduate or graduate, doing the most satisfactory and commendable work in bacteriology.

That a suitable announcement by the head of the department of bacteriology be made in the annual catalog of the college.

That the condition controlling the award of said prize be left with the head of the Bacteriological department and that these conditions be announced each year by said individual not later than the first of November.

That we express our appreciation of this gift from the parents and sister representing the estate of Wm. Smith Sayer, and tender them our most cordial thanks.

One other action of the meeting of the board is the approval of the lease and letting of the contract for an addition to the Botanical Building.

No one who is entering college this year doubts the feasibility of the steps. The college Spirit, advantages, attained and to be attained, are strikingly apparent in every circle of life. But there is no place where these advantages are more strikingly apparent than in the college education.

Those of us who are here for the first time have come from a more or less backward environment. But the radical change has taken place in our environment and we are plastic in every way and are beginning to recreate. A certain amount of freedom and restrictions are not always welcome at first; but as they increase so may our circle of friends.

The spirit and the height of education are highly exaggerated in our dreams. The results to be attained were too much of that which we have in store. Our shoulders are our family and classmates, and it is well not to be too serious about the things of the world.

In preparing for future exigencies we must forget that this is the twentieth century. The north pole has been discovered. Specialization is the motto of the colleges. It is a great stride toward the goal of a Maritian system of camel's milk and mineral water.
A CONSTANT STREAM OF NEW THINGS
CHARMING, EVERY ONE OF THEM

We started this fall with an even more extensive showing than ever before. At a glance over hundreds of styles you will quickly see that there is a decided tendency toward closer fitting garments and coat dress effects; also that the distinctive feature in everything is the Moyen—Age Effect—the newest, oddest, most attractive style introduced in years. Colors were never prettier, and there are enough fashionable shades for everyone to find a becoming one. There seems to be almost a passion for all tones of Violet, from the deepest purple to the softest shades of Lavender. Raisin is good; Catalina Blue, Black and Grey.

BEAUTIFUL NEW FURS
Our line of Women's and Misses' Furs were never more complete than now. All the latest and newest things in Muffs, Scarfs, Fancy Sets, Fur Coats, at a great saving in price.

ABOUT THE CAMPUS

One of the college papers was struck the other day with the need of getting up a snappy appeal to subscribers. The result was the following:

Once upon a time a man who was not economical to take a college paper, sent his little boy to borrow the copy taken by his neighbor. In his haste the boy ran over a $3 stand of boxes and in ten minutes looked like a watery summer squash.

His cries reached his father, who ran to his assistance, and failing to see a barbed wire fence, ran into it, breaking it down, cutting a handful of flesh from his anatomy and raising a $14 pair of pants.

The old cow took advantage of the gap in the fence, got into the corn field and killed herself eating green corn. Hearing the racket, his wife ran, upsetting a four-gallon churn full of rich cream into a basket of kittens, drowning the whole flock.

In her hurry she dropped a $7 set of teeth.

The baby, left alone, crawled through the spilled cream, then into the parlor, and ruined a $20 carpet.

During the excitement the oldest daughter ran away with the hired man, the calves got out and the dog broke up eleven setting hens.
