SUB-FACULTIES.

The State Board at its last meeting last week gave the following plan of organization for the instructional force of the college:

The responsibilities of the faculty may be shared to some extent by all members of the teaching force, the president of the college is authorized and directed to organize the instructional force of the college in the following four divisions:

1. The division of Agriculture.
2. The division of Engineering.
3. The division of Home Economics.
4. The division of Science and Letters.

The dean connected respectively with each of the first three divisions named shall be the executive and presiding officer of the division to which he belongs. The president of the college shall be the presiding officer of the division of Science and Letters.

At the beginning of each year the presiding officer shall appoint a secretary to serve for one year, whose duty it shall be to keep a careful minute of all meetings.

All inquiries for a division faculty must be approved by the faculty before it can become operative. These divisions shall have only advisory power except in such work and authority as may be assigned to them by the faculty. Meetings may be called by the dean, or the body may adjourn from time to time by vote of its members.

The division of Agriculture shall consist of the departments—Animal Husbandry, Botany, Chemistry and Forest Products, Farm Crops, Soils, Farm Mechanics and Agricultural Education, Farming and Animal Husbandry, and also drawing and designing.

The division of Engineering shall consist of departments of civil, electrical and mechanical engineering, and also drawing and designing.

The division of Home Economics shall consist of the departments of Domestic Art, Domestic Science, and all other departments that may be added from time to time by the Board.

The division of Science and Letters shall consist of the departments of Botany, Chemistry, Geology and the Modern Languages, Entomology, History, and Economics, Mathematics, Military Science, Physics, Physical Culture and Athletics, Zoology and Physiology, etc.

Any teacher whose name appears on the pay roll of the college is entitled to membership on one of the divisions. In case of doubt, the president shall make assignment.

The president shall have the power to appoint to membership on any division professors who may also hold membership in other subdivisions. All professors shall have the power to assign part of the teachers to a department to one faculty and part to another faculty, to whatever extent the faculty in order that each department may have representation in the division in which its work lies.

CAPT. E. P. ALLEN GONE.

The college lost a staunch friend in the death of Capt. Allen, which occurred near home in Ypsilanti on Thanksgiving morning. He died suddenly from a stroke of apoplexy. His death was a severe shock to his colleagues, and a severe blow to the union in his health on the preceding evening.

Capt. Allen was born in 1857 in Wisconsin. He entered the University and was graduated in 1880. He entered the service of the Federal army throughout the Civil War, reaching the rank of captain, and was honorably discharged in 1865. He then entered the Michigan State Normal School and, after graduation, opened a law office in Ypsilanti, where he has practiced ever since.

For over 30 years Mr. Allen was prominent in Michigan politics, having served as alderman and mayor of Ypsilanti, and as representative to the State legislatures from 1877 to 1890 as an Indian agent for Michigan from 1882 to 1885; as representative in congress from the second district from 1885 to 1901, and as delegate to the National Republican Convention at St. Louis in 1896.

Mr. Allen was a firm believer in the mission of Y. M. C. A., and gave all in his power to aid its progress. He was a member of the State Board of Agriculture from 1899 to 1903, relinquishing this position to accept a place on the board of the Soldiers' Home, an institution which always appealed to him with special force.

Capt. Allen was a man of strong religious convictions and was always on the right side of moral questions. He labored earnestly and efficiently and the world is certainly better because of the life of Edward Payson Allen.

A COURSE IN AERIAL ENGINEERING.

The Cornell Aero Club, which was organized by students a few years ago, will again see one of its triumphs accomplished next year, for Sibley College is going to give a course in aerodynamics this year. The course will be a technical elective, open to seniors, and will be in charge of Prof. McDermott, whose specialty is naval architecture. The sciences of air navigation and water navigation have some important principles in common.

Many students slept soundly during classes Monday.

PRACTICAL WORK FOR JUNIOR FORESTERS.

The junior foresters are selecting negatives and preparing prints to enter in the contest offered by F. N. Bovee, of Lansing.

The first part of the term work in this method was offered in the study and use of the camera as a field record maker, and in the making of negatives and prints.

Mr. Bovee became interested in the work which the men were doing and decided to offer four prizes for the best negatives and prints along the lines of general landscape, line detail work.

The prizes offered are, an Expo. Watch Camera and two rolls of film, $2 in trade from Mr. Bovee's stock; 1ber setter (Dutch), $2 in trade from Mr. Bovee's stock.

The negatives are to be placed with Mr. Bovee by Thursday evening.

The judges selected to award the prizes are two professionals and one of the best amateur photographers of Lansing.

Beginning Dec. 6th Chief Packer Daly, of the U. S. Army, will give one week instruction on packing and transportation.

Dean Shaw has kindly set aside a day to judge the prints. Mr. Bovee brings considerable experience and is widely known as a photographer.

The negatives are to be placed with Mr. Bovee by Thursday evening.

TUESDAY, NOV. 20, 1909.

PRACTICAL LUMBERING FOR THE SENIOR FORESTERS.

At the close of this fall term the senior foresters will have ten days of practical work in the lumber camps of the O. H. White Lumber Co., of Bovne City.

The company at present is operating six camps located in Charlevoix and Menominee counties, with over 200 men in each camp, not counting transportation crews. The W. H. White Lumber Co. has ten camps, not counting the outposts for their business methods, their well kept yards and camps, their fine horses and the quality of board they supply their men.

The timber cut in the different logging camps is at present mostly hard maple, beech, elm, oak and hemlock, with an occasional white pine.

The logs are shipped to Bovne City in the camps, and are located, three saws cutting an average of 1,200,000 b.d. ft. per day. These mills are equipped for the processing of hardwoods, and have a large value of hardwoods shipped to the local hardwood flooring mill, not counting the timber shipped to the flooring mill, the bale mill and supply slabs to the flooring mill, the bale mill and supply slabs to the flooring mill.

The company furnishes all their timber to the local hardwood flooring mill, the bale mill and supply slabs to the flooring mill, the bale mill and supply slabs to the flooring mill, the bale mill and supply slabs to the flooring mill.

Y. M. C. A. IN NEW FIELD.

“The rural group work will soon become the greatest feature of the county. Y. M. C. A. work,” says County Secretary O. O. Stanchfield in referring to the newly-organized group in the Hoxie school district in Wheeler township. The feature of this group is the study of agriculture and approved farming methods. The group is under the leadership of John Corbett, a prominent farmer, and a series of talks is being arranged to be given by local agriculturists and live stock men, and teachers of agricultural branches.

Although less than a year has elapsed since the organization of the Hillsdale County association, the membership numbers 251. Many rural groups will be organized as a result of the success with which the Hoxie organization is meeting and other counties will take up the agricultural feature.

A STORY OF POE.

A lady employing a colored man asked his name.

“Mah name is Poe, ma’am.”

“Poe? Perhaps some of your family worked for Edgar Allan Poe?”

The darky’s eyes opened wide with great surprise.

“Why...” he gasped, pointing a dusky forefinger to himself, “why, Ah am Edgar Allan Poe!”—Every- body’s.

Mr. Jones had recently become the father of twins. The minister stopped him on the street to congratulate him.

“Well, Jones,” he said, “I hear that the Lord has smiled on you.”

“Smiled on me!” repeated Jones. “He laughed out loud at me!”—Everybody’s.

ELGIN MIFFLIN

SHUBEL LANSING

A HINT TO FATHERS.

Should we send our girl to college? That is the question a great many fathers and mothers are now pondering over. Is it essential? Would it really benefit her? Father thinks she should be given the chance, but mother says she never had a college education, and she has made a good wife. She insists that she is not sent to a high school because of the routine work of the home, and resolves to leave the farm. Then it is that the lure of the city calls to her, she reads some story in some newspaper, and determines to occupy her thoughts. She has learned its value. She is tired of the routine work of the home, she is ready to bring her knowledge of mathematics, chemistry, physics, sociology and ethics gained at college, to bear on the household problems. She can reduce the work by systematizing it. She will reduce the amount of supplies by combining foods properly. She will be willing to take up the work of the home in a scientific and useful manner. She has a broader view of life, plenty of bright thoughts to occupy her leisure moments, and no longer considers the work a drudgery because her education. She will be able to exercise a healthy influence on her little home school and consider her a young lady, she soon grows tired of the routine work of the house. She has nothing in particular to occupy her thoughts. She has no training in any particular line, naturally, drudgery is all she sees ahead of her. The same old thing from morning until night. Then it is that the lure of the city calls to her, she reads some story in which the fair stenographer is the heroine in a thrilling episode, she becomes discontented with her lot and resolves to leave the farm.

If she is sent to a good school, a new world is opened unto her. When vacation days come she is glad to go away. She has learned its value. She is full of new ideas and theories and anxious to try them. When her college course is completed, if the proper conditions are met with at home, she is ready to bring to the home a knowledge of mathematics, chemistry, physics, sociology and ethics gained at college, to bear on the household problems. She can reduce the work by systematizing it. She will reduce the amount of supplies by combining foods properly. She will be willing to take up the work of the home in a scientific and useful manner. She has a broader view of life, plenty of bright thoughts to occupy her leisure moments, and no longer considers the work a drudgery because her education. She will be able to exercise a healthy influence on her little home school and consider her a young lady, she soon grows tired of the routine work of the home, she is ready to bring her knowledge of mathematics, chemistry, physics, sociology and ethics gained at college, to bear on the household problems. She can reduce the work by systematizing it. She will reduce the amount of supplies by combining foods properly. She will be willing to take up the work of the home in a scientific and useful manner. She has a broader view of life, plenty of bright thoughts to occupy her leisure moments, and no longer considers the work a drudgery because her educated nature is allowed exercise. Then there is the personal side of the question, the real gain to character. It is lifting your daughter into the position of a cultured and well educated woman. It gives her a polish and standing to enter any kind of society, and enables her to for herself, if the occasion should ever arise. It places her on an equal footing with the scientifically educated young farmer whom she may marry, or the well informed business man of the city. She graduates into a marriage a self-educated home maker and when her young husband is struggling with the financial world, she is able to sit at his elbow and plan with him, a true and practical helpmate.

A JOKE MADE IN HEAVEN.

Mr. Simon Hagadorn, of Fenton, Mich., Mr. J. B. Gilbert, of Webberville, and Mr. Claude Grove, of Litchfield, will act as instructors in the dairy department during the short course beginning in January.

The advanced geology class visited the brick yard Monday morning to study the making of tile and brick.

The Women’s Society of the People’s Church will hold a bazaar in the college chapel Friday afternoon and evening. Everybody cordially invited.

Dr. G. A. Waterman, who was professor of veterinary science here from 1897 to 1907, will have charge of the short course in that department this coming winter. Dr. and Mrs. Waterman will reside at Mrs. Ella Kidder’s until more commodious quarters can be found.

Prof. R. S. Shaw left the city Friday to attend the International Live Stock Exposition at Chicago. He has consented to judge certain classes of cattle. Next week he will visit Omaha for the purpose of installing the M. A. C. exhibit at the Third National Corn Exposition.

What those M. A. C. gladiators did not do was to take the D. A. C. grounds with them. They mopped up everything to the school and could very appropriately have gone home on the gravel train. Can they play football? In the language of the good old denouement who never swore: “Thunder and lightning, Man! Detroit Press.”

An iron spear head recently excavated in Egypt bears witness to a knowledge of iron and its uses at a period several centuries earlier than hitherto supposed. The discovery of it at Behen corroborates the view previously expressed by several archaeologists that iron working originated not in Asia, as some times conjectured, but in Central Africa.

LADIES' SEPARATE GARMENTS—50c. 75c. $1.00. $2.00.

MEN'S SHIRTS AND DRAWERS—35c, 55c, and $1.00 each.

J. W. KNAPP & COMPANY.

THE REAL TESTS

Of good underwear are warmth, wear, and washing. Warmth means wool and plenty of it, or a fine fabric closely woven. Wear is too often a matter of conjecture. The washing qualities can only be demonstrated in the tub. Good underwear is warm, soft, firm and non-shrinking. It is for these essential qualities we recommend our clothing underwear. It is thoroughly good, pleasant, fitting, all flat seams, which makes it comfortable, and its wearing qualities make it the most satisfactory underwear at popular prices that can be produced.

LADIES' UNION SUITS—$1.00, $1.50, $2.00, $2.50, $2.75 and $3.00.

MEN'S UNION SUITS—$1.00, $1.50, $2.50 and $3.00.
