American and Canadian Universities.

On Wednesday evening, October 19th, the first number of the college magazine was issued. The contributors to the magazine include members of the faculty, student authorities, and the members of the touring party.

Perhaps the most important event that ever happened on our field of study has been the establishment of the College of Agriculture at M. A. C. recently. Mr. and Mrs. Mary A. C. are now attending the University, and they are enjoying their stay there very much. When the contests first began it was not unusual for the Catholics to pile up a score of 95 or more points against us, but for the past three years we have been almost on a par. Last year N. D. were the undisputed champions of the western, winning every game on their schedule. They defeated M. A. C. 17 to 3 and Michigan 11 to 2. This basis of comparison makes this season's challenge seem even greater than that of last.

Word received from our friends in the south indicates that they expect large delegations from all parts of the state to attend this event. It is expected that there will be a large delegation from the south, and we are confident that their presence will give us an advantage.

For this game all seats will be reserved and sale of same will open ten days before the event. Mr. Faris' office will be open Tuesday at 12:30 for the sale of tickets. Extra bleachers and box seats are being erected for the game, and it is expected that the spectators will be able to see the game from all parts of the field. Prices of seats will begin at $1.00. Season tickets may be exchanged for reserved seats, and this must be done if seat is reserved.

The officials for this game are the best obtainable, Hoagland, of Princeton, referee; and Failer, of Ann Arbor, head linesman. The game will be played at twelve to one, and it is expected that the spectators will be able to see the game from all parts of the field.

On Wednesday evening, October 19th, the second number of the college magazine was issued. The contributors to the magazine include members of the faculty, student authorities, and the members of the touring party.

The unpacking and arranging of goods has gone far enough to find the roll-top pin, so the girl need not resort to the use of a whiskey (empty) bottle as a substitute—this habit is a very old one.

A few tame gray squirrels come about the place and "sang" as they used to long ago when I was a young tutor. They will climb a boy's shoulder for an old button.

Like them for a campus better than the red squirrels. The good people of East Lansing should be patient, they may in time have an abundance of wild carrots in the fields and along the roadside adding one more to the variety of plants to ornament the landscape. They cover most of the vacant lots here and are plenty almost everywhere. The distant views are fine—in one direction on clear days reaching into the edge of Vermont. To the northwest I can see twenty to thirty miles to the country where my grandfather Beal was born. Professor Brooks tells me that where rest so hale here that it could not have been successfully grown, even if farmers cared to grow it. The chief crops are gardening and fruit, harrowing and chickens and tobacco. I saw men digging with a fork, large potatoes that would yield 400 bushels to the acre and yet lost one part of the summer has been very dry. This crop was on the college farm. We like this town and the people very much.

An authorized person visits all schools occasionally and before every pupil, (here I am interrupted by the agricultural college bell) where the buildings are so remote from each other that ten minutes are allowed between classes) to see that their hands are clean and fingers nails perfectly free from dirt. Instead of drinking fountains in some schools, each pupil is required to keep in his desk a drinking vessel preferably one which has a cap or cover. Pupils are all furnished with books, pencils, pens, and other necessary goods has gone far enough to find the roll-top pin, so the girl need not resort to the use of a whiskey (empty) bottle as a substitute—this habit is a very old one.
