COMMUNITY SUPPER.

On Friday evening at 6:30 was held the big community supper in the new church building. About 200 persons gathered for a social hour and for supper, and to say that this first supper in the new building was a success would be putting it very mildly. The supper was in charge of the Women’s society, and in spite of the fact that there were twice as many present as expected, everything moved off without a hitch; all were heartily supplied and there were “hankies” left over.

Following the supper, Prof. Anderson, acting as toastmaster, called those assembled to order, and, after a series of good stories, announced the first number on the program, which was a vocal solo by Mr. Higgs.

Mr. Scharf, representing the trustees of the church, mentioned some of the important tasks in connection with the building of such a structure, the necessity of all of its completion, of its broad purpose, and something of the finances.

Mr. Wool, for the elders, spoke of the spiritual welfare of the church; Mrs. Allen told of the work of the Women’s Society during the past year and their pledges for the future, and Mr. Newman presented the question of Sunday school work. He gave a brief review of the evolution of the Sunday school at this place during the past ten years, and expressed his views on the question of what such a school should be able to accomplish. “A Word About the Children” was the title of an excellent paper by Mrs. Bogie; Dr. Williamson, of the Mayflower Congregational church in Lansing, gave a very helpful talk on “The Business of the Church,” and Mr. Goldsmith closed the program with a short talk on “The Work of the Preacher.” Dr. Williamson paid a splendid compliment to those who had labored to make this church possible, and stated that the work at this place would be watched with a great deal of interest. “The community church is what we need,” said he, “and I believe in the future we shall see more of them. The speaker gave as the business of the church—‘To make men and women conscious of the greatness and the infinite goodness of God.’

CADET BAND.

Under the present organization of the cadet band three of the senior players will receive their commissions. There will hereafter be appointed each year one first and two second lieutenants. For the present year the officers appointed are as follows:

First lieutenant, I. Westerveld; second lieutenant, E. C. Kiefer; third lieutenant, R. G. Mclnutt.

Drum major, appointment to be made.

The band now consists of 33 members, and Prof. Clark is much pleased with the progress. Several new instruments are soon to be purchased, and as soon as it is possible to do so a promenade will be given.

The college band is worthy of our support, and when these promenades are given they should be patronized.

The loyalty of the Ohio State band was shown recently when the young ladies of the institution held a “tag day” for the purpose of raising some $200 with which to send the band on a football trip to help the rooters cheer their team on.

MICHIGAN STATE AGRICULTURAL COLLEGE.

The M.A.C. banquet, in connection with the State Teachers’ Association at Detroit, will be held at the Hotel St. Claire, Friday, Nov. 5, at 5:30 p.m. W. V. Sage, of the class of ’83, will act as toastmaster, and the banquet will respond: Fannie Beal, class of 1898.

J. W. Chapin, class of 1910.

Florence L. Hall, class of 1909.

Judge W. L. Carpenter, class of 1893.

Dean R. S. Shaw, representing our agricultural department, and Dean G. W. Bissell, representing the engineering department.

Prof. F. S. Kidzie and E. C. Lindemann will act as reception committee at the hotel.

It is hoped and expected that all M. A. C. graduates, short course students and friends of the institution who are in Detroit, or who attend the Teachers’ Association will be present at the banquet. Everybody come and enjoy an M. A. C. reunion.

Tickets may be procured Friday afternoon at the Hotel St. Clair.

SOPHOMORE BARBECUE.

The fifth annual barbecue, in charge of the sophomores, Friday night was a success in every way, and the sophomores proved royal hosts. The usual large crowd was in evidence, but there was ox and elder for all, and the feed was greatly enjoyed.

The usual pile of boxes, barrels, etc., was prepared, and added warmth as well as cheerfulness.

D. M. Pierson was master of ceremonies, and introduced Prof. Macklin as first speaker. Self control was the key note of his speech, and he stated that in no place was this shown more than in football.

“The man who plays on a college team,” said Mr. Macklin, “is to be of the college itself, and must work with his team and to his college, must be a gentleman.” He urged also that each man in college “try out” for something in athletics for the benefit of his physical self.

Capi Stone spoke of the class rivalry which had existed, and hoped “Old Abbott Hall” might have peace. He urged that the student body give the team their support, as Olivet was going to make the home team work for victory.

“Bubbles” Hill made an excellent speech, in which he predicted that M. A. C. would have the greatest team in her history in 1912, and spoke of the pleasure with which he had worked under Mr. Macklin.

Lee Kennedy, president of the sophomore class, next made a neat speech, in which he presented the carring knife to the freshman president, Oscar Miller. Miller, with appropriate words, received it, in behalf of his class, promised the usual good time and barbecues in 1912.

H. L. Bancroft, the genial football manager, closed the program with his usual happy wit and a fund of stories.

SOPHOMORE FORESTERS IN CAMP IN NORTHERN MICHIGAN.

ALUMNI.

Prof. A. J. Cook, veteran head of the department of biology at Pomona College, Calif., has just been appointed by Gov. Johnson as agricultural commissioner of California.

W. C. Morriss, formerly with Adams & Etting Co., is now chemist with Process Engineering Co. at 1102 Rector Blvd. Chicago, Ill.

M. J. Dorsey, of the University of Minnesota, is taking the initiative in the founding of the M. A. C. Alumni Association in the Northwest.

He is devious of hearing from all the graduates of such a movement, and it is to be sincerely hoped that his mail box will be reasonably well filled. Write him at once, if you are within reach, and tell him what you think of such a project. Address, 21 Knapp St., St. Anthony Park, St. Paul, Minn. Portions of Minnesota, the Dakotas and Wisconsin would be reached, and the Raccoon will do all it can to aid Mr. Dorsey.

H. M. Conolly, field assistant in horticulture with the Alabama Polytechnic Institute, Auburn, writes he is much pleased with his work in the south. He travels nearly all the time, and is thus able to study the state and its resources. It is new as a horticulturalist, but Mr. C. discovers great possibilities, as it has the soil, climate and location to make it one of the best.

C. H. Edwins, of the above class, has been transferred from the Deerlodge to the Inyo Forest, as Forest Assistant, with headquarters at Bishop, Calif. Mr. Edwins states that he is kept pretty busy on planting, experiments, timber sales, etc., but likes the country very much. He extends, through the Raccoon, regards to all M. A. C. friends.

J. C. DeCamp is located near Priest River, Idaho, in the Kamishu Forest, where he is in charge of a party whose work it is to collect cones, dry them and extract the seeds. At the date of writing, Mr. DeCamp states that about 15,000 bunches of these cones had been gathered. The climate is much the same as that of Michigan.

E. W. Baldwin, better known at M. A. C. as “Baldy,” is engaged in some real engineering work at Portland, Oregon, and seems to be enjoying it. Baldwin was one of Brewer’s famous guards, and was picked by Eckenwal for a place on his second all-western team.

MINED BY THE M. A. C. RECORD, EAST LANSING, MICH., AND PUBLISHED DURING THE SEMESTER.

TUESDAY, OCTOBER 31, 1911.

TUE THE annual sophomore barbe- cue has come to stay. There is nothing to question about. Last Friday eve- ning, when the big carving knife was transferred to the freshmen, all the revels of a scrappy nature ceased. With the exception, perhaps, of cap night, no other stu- dent function is conducive to so much good feelings and fellowship reigns, and all classes unite in one great body to do honor to alma mater.

The man or woman who could not become enthused after watching the hundreds of students at their feast Friday night is to be pitied. It was a perfect day, a clear, cloudless blue sky, and the M. A. C. is better off each time a gathering of this kind takes place. May ox and oler be a part of the sophomore program for many years to come.

TUE Detroit Saturday Night is one of several numbers among a member of excellent pictures representing the game with Michigan at M. A. C. There is also something more than good pictures; there is a splendid write-up of the game. The last paragraph is so wholesome, and sums up the matter in such good form that we take the liberty to print it in full.

"In conclusion, the spirit of the crowd at Lansing Saturday should be commended. The cheering was fine and fair, and every member of the squad at Lansing was ably supported by a large and enthusiastic crowd. Many of the students made up a demand for more pictures, and in the result of the game, the M. A. C. is better off. The prospects of the class of 1912 are of considerable promise."

FOOTBALL

M. A. C. won from Olivet hand- in-hand in Saturday's contest on the gridiron. This game was played to a close finish, and both teams were out of condition and did not play their usual strong game. However, the weather was quite good, and with the exception of the first quarter, when the visitors maintained field goal, M. A. C.'s goal was not in danger.

The first touchdown came in the third quarter when Ribelet worked the ball around left end for 20 yards or so. Then followed Olivet's count of three points, and shortly after Julian, the big full-back, went through Oliver's line for second score, and the quarter ended 12 to 5.

Two more touchdowns by Ribe- let and Hill for the home team were made in the second half. No scores were made in the third though the ball traveled over considerable territory. Early in the latter quarter Ribelet was sent over for the last touchdown, Hill kicking goal. The last quarter of the game was played very good field work, and though what loosely played, was very interesting. The players, as well as others, how it is done through their famous cook book.

Sunday, the 5th children gathered for the promised picnic, the building proved a source of much satisfaction, as the large banquet is an excellent play room as well as dining room, and each boy and girl showed their thankfulness in happy faces, in outbursts of laughter and song, and in regrets that the exciting capacity was limited. At the close of the auto ride a number of the boys, catching the collegiate spirit, launched a boat and gave nine rads for the driver and then nine more for the church—another pretty good indication which promises much for the new church.

The many expressions of satis- faction leads one to believe that the People's church is meeting the hope of its founders, and the success of those who have worked for it, fully should certainly be a source of much satisfaction.

DEBATING CLUB

The prospects for a very success- ful year in debating were in evidence at the last two meetings of the Debating Club. The number of students who were present at those meetings is acknowledged to have been the largest in years. The club has already settled down to its activities, the first program being carried out at the last meeting. This question debated was: "Resolved, that every citizen of the United States over sixty years of age should be pensioned." Margulus and Bronson, who presented the negative argument, received the judges decision over Wendl and Lautner for the negative. Another debate has been arranged for the coming week.

Every student interested in de- bating is urged to be present at the regular meeting to be held in room 16, College Hall, Thursday even- ing at 7 o'clock.

The society for the Promotion of Islamic and Eastern education met this week. Dean Bissell, of our engineering department, at- tended the session on Thursday.

Hort. club

The Hort. Club was addressed on Wednesday evening by Hon. Robert D. Graham, president of the State Board of Agriculture. Mr. Graham emphasized the fact that horticulture is a highly special- ized business, and one that requires more brains to direct than is essen- tial in a merchant, a banker, or a manufacturer. Mr. Graham speaks with authority upon this subject, since he is both a successful horti- culturist and a leading banker of Grand Rapids.

He said that the average farmer often thinks that fruit growing at all, and might better leave it alone. The same might be said of the city farmer, or the man who has spent fifty or sixty years of his life at some other work. He believes that horticulture will make a success of horticulture. For success in this line a man must be not only practical, but also have a knowledge of the latest scientific developments in the field. He is the man who will grow up in the business. He emphasized all through the meeting the fact that fruit growing is a business and not merely an occupation. He con- vinced the training given by the Hort. department here at the col- lege, and said a graduate from here has a big advantage in having al- ready learned many of the things others have to get in the school of experience.

The Library of Congress has published a "Select List of Refer- ences on Boycotts and Injunctions in Labor Disputes." The subject has aroused the greatest interest and has been widely discussed in popu- lar magazines and publications of labor organizations. These two classes of farmers, on the one hand, who have furnished a large part of the references, and special papers have been sent to each farmer in his home as possible among the large number of those in which labor leaders have expressed their sentiments on the subject. The other main source of information has proved to be the legal literature of the past twenty years. This has been fully drawn upon, though without citation of particular cases, in the form in which such citations may be found. Indi- viduals desiring copies may pur- chase them from the Superintendent of Documents, Government Printing Office, Washington, D. C., at 10 cents each.

ELGIN MIFFLIN

ABOUT THE CAMPUS

Born, to Mr. and Mrs. O. K.
White, Wednesday, Oct. 25, a son.

Eli Bolorge, ’10, is now teaching
agriculture in the high school at
Red Creek, N. Y.

The all新鲜man football team
play the team at Culver Military
Academy next Saturday at Culver,
Ind.

H. Foley Tuttle, ’85, formerly of
Vancouver, B. C., has entered
college for advanced work in soils,
botany and chemistry.

Three men were initiated into
the mysteries of Alpha Zeta-ism yester-
day, the fortunate being R. E.
Loree and J. H. Carmody, bart.,
and E. C. Sanford, forestier.

The short course bulletin is now
well under way. This publication
announces the various short courses
offered beginning Jan. 2. Students
wishing to send these to their friends
should have names and addresses at
President’s office.

Mrs. W. E. Perry (Kate Clark),
who was formerly employed by a
large milling company at Wilbur,
Wash., is now at Winnipeg, Can-
da, and states that since her mar-
riage last spring she and her hus-
band have traveled most of the time.

The October number of the
Agricultural Student, published by
the students of Ohio State Uni-
versity, has come to our desk, and is a
most interesting and up-to-date pub-
lication. As indicated by its name,
the publication is purely agricul-
tural and the articles are all well
written and nicely illustrated.

A little daughter, Mildred Eliza-
beth, was born to Mr. and Mrs. E.
Sours, Park St., on Oct. 11.

O. H. Johnson, ’11, is now teaching
normal training and drawing in
the public schools of Cleonet,
Minn.

The Foresters will certainly not
be mistaken this time—so one
would know what those big Mack-
aws mean.

The Farm Crops Department
is in receipt of a shipment of vari-
tous grains, including corn, oats,
buckwheat, etc., from the Un-
iversity of Nebraska.

The boxes in Williams Hall, Col-
lege Hall and Library Building
marked “M. A. C. Record” are
for your convenience in furnishing
items. We shall appreciate any
help along this line.

The chorus are now working
hard every Monday night, and
much interest is manifested in this
important phase of college life.
Singers have responded to the num-
ber of 180, and prospects are bright
for some good music at the Mid-
winter and May Festivals.

In the cross-country run Sat-
day the record of Tillotson was
broken by Capt. Geib, who made
the distance in 15.50. Twenty-
seven men made the start, the first
five finishing in the following order:
Geib, Legman, Rosen, Mooney
and Baxter, and will enter the distance
contest with Oliver, Mooney
and Baxter were awarded the regulation
C. C. sweaters.

FOUNDRY—A gentleman’s gold
watch has been left at Sec. Brown’s
office and awaits a call from the
owner. Call and prove property.

Prof. Sawyer was in Ann Arbor
the past week, when he spoke be-
fore the Electrical Engineering
Society—a branch of the American
Society of Electrical Engineers.

On last Saturday morning in
football the seniors and juniors
played each other to a standstill,
neither side being able to score.
The sophomores won from the
freshmen, 11 to 0.

The portable cloister houses
have been brought in from the range,
and are being put into shape for the
winter. The poultry department
is offering a number of fine cockerels
for sale for breeding purposes.

The M. A. C. directory is now
on sale at the book store, and may
be had for the small sum of five
cents. This is as accurate a list as can
be compiled, and includes not only
students’ names and addresses, but
of faculty and instructors as well.

Arrangements have been made
through the library, with the McG-
Graw-Hill Publishing Co. whereby
all new books published by that
company will be placed in the of-
Fice of the Dean of Engineering
thirty days for inspection. The
first installment has arrived, and
consists of the following: Wood
Turning, by Diener; Framed
Structures, by Marberg; Electrical
Railway Engineering, by Harding;
Bearings, by Alvord, and the Gas
Engine Hand Book.

Mr. A. McVittie, ’11, who is
teaching agriculture in the St. Johns
high school, brought a class of his
students to the college on Thursday
afternoon, to inspect the college
barns and stock.

G. C. Sheflield, ’12, correspond-
ing secretary, Detroit, Mich., is running
a series of articles on the experi-
ment station work at M. A. C.

These articles appear in the Sunday
papers, and are fully illustrated.

The first meeting of the Glee
Club, under direction of Prof.
Kilton, was held Thursday evening.
There will be 20 voices and a quart-
tette. The music will consist of
college songs, humorous sketches,
etc. An entertainment will perhaps
be given in February.

A new Junke’s calorimeter has
been purchased by the engineering
department to be used in the labor-
atory. The apparatus is used for
determining the heat values of gas-
fuels, and was imported from
Germany. It will be installed as
soon as arrangements can be made
to do so.

Farmers’ Institutes are to be held
at the following places on Novem-
ber dates: Birch Creek, Nov. 4;
Carney, 6; Cooski, 7; Mantitique
Twp., 8; Doyle Twp., 9; White-
dale, 10; Oakley, 11; Germantalk,
11; Crystal Falls, 14; Iron River,
15; Bates Hall, 16. W. F. Raven
will have these institutes in charge,
and will be assisted in a portion of
these places by Mr. Geisman, of the
Upper Peninsula experiment sta-

M. J. & B. M. BUCK
Dear Mr. Fanning, I am enclosing the where-with-all to keep my name on your subscription list for another year. I still enjoy the University of California, though located at the Experiment Station at Davis. I find, after two years of experience, that the Golden West still has its charms, and can still amply provide for those who wish to enjoy them. And verify this state is improving, for the "suffragettes" have, during the last year, been handled the "big stick," and are proceeding to dominate more man. And with, I guess, the right by providing a California bungalow, and a native daughter to run it. Since August last—taking time by the fore-lock, as it were—I have been experimenting on the "suffrage rage." No, I have been wearing my forelocks short, but I still have big "a," for my own ambitions.

I took an M. S. from the University last May, and am now looking forward to a trip to Europe for a little belated polish. Especially do I want to get back to old M. A. C. next summer to attend the graduate show. I assure you, M. A. C. men, but occasionally run across one. D. J. Crosby was here last week, and a while ago I saw N. J. Snyder, '07, but they are about all. The weekly visits of the R. S. A. to morning and the only reminder of college days, and I extend best wishes for her continued efforts.

Sincerely,
B. S. Brown

17.

George P. Springer is instrument men with the Knapp Power Co., of New York, which company is at work upon the relocation of a railroad running along the valley of the Little Tennessee River, between Chilhowee and Bushnell, Tennessee. It was necessary to raise this railway to a higher elevation in order to avoid back water from a number of dams which are being constructed, and which are of considerable magnitude. Three of these dams total 750 ft. in height. Mr. Springer states that, although he is in the sunny south, they have had a maximum rainfall of 60.1 inches in that location.

Prof. Eustace will act as one of the judges at the Fourth Annual Apple Show held at the University, Washington, Nov. 29-30. This is one of the largest apple shows in the world, and exhibits offered will aggregate $25,000.

The preliminary program of the fifth annual convention of the Michigan Association for the Prevention and Relief of Tuberculosis, which is just published, promises a most interesting meeting. The convention is to be held in Memorial Hall, Ann Arbor, Michigan, on Friday, November 11, and these who are interested, over Michigan have been secured to take part in the program.

••••

Mr. Dwight Rainaii, formerly Bertha Peck, of Detroit, is visiting at the home of Prof. and Mrs. T. W. Wilson. Mr. Randall was a student at M. A. C., class of '97, and is at present employed with the Cadillac Works, in Detroit.

Prof. Kemper reports that his work at Missouri is starting off nicely. A crew of workers are putting up his buildings, and he has been busy arranging a course of study which, when completed, will be much the same as that offered at M. A. C. at the present time.

Prof. Anderson and Instructor Bowerwell are attending the National Dairy Show at Chicago this week. Prof. Anderson will give an address before the American Dairy Farmers' Association while at Chicago, and he and Mr. Newball will attend the meeting of the official dairy instructors.

Rev. J. A. Mumford, of Chicago, a former Lansing pastor, was a college visitor the past week. Rev. Mumford is interested in the "Rural Light Problem," and was greatly interested in the work M. A. C. is doing in the way of agriculture in the high schools, Y. M. C. A. camp contests, etc.

Thirteen men are doing advanced registry work throughout the state, under the direction of our department of Dairy Husbandry. The majority of these men are M. A. C. short course graduates, and the work of advanced registry Michigan is splendid, but only by the way in agriculture in the high schools, Y. M. C. A. camp contests, etc.

The poultry department today made a shipment of white leghorns to the Farm for Boys, near Kalamazoo. This is a home for orphan boys, and is maintained by private individuals. Arthur W. Anderson, of Kalamazoo, is in charge of the farm. The shipment, which consisted of a pen of 10 birds, is a donation to the boys.
