BISHOP WILLIAMS, OF DETROIT, TO DELIVER BACCALAUREATE SERMON SUNDAY, JUNE 22.

Bishop Charles D. Williams, of the Michigan Episcopal Diocese, Detroit, has been secured to deliver the baccalaureate sermon on Sunday, June 22. Bishop Williams is one of the best known clergymen in the state, and an eloquent speaker. He is a man of much learning and is a man of great energy and ability. He has been a preacher in the Episcopal Church for many years.

VETERINARY ASSOCIATION.

Last week's meeting of the M. A. C. Veterinary Science Association proved one of the most interesting yet held, and was well attended.

The program consisted of a talk on current events in veterinary science by T. W. Churchill, and an address by Dr. Hutton, on the department. The latter gave a detailed description of the development of the show horse and the value of the horse show. In his talk, Dr. Hutton referred to the breaking and training of the horse for show purposes, going into detail somewhat with the various methods of breaking a horse which are used by dealers and showmen to hide defects and display the horse in a favorable light. The talk was of special value to new students in veterinary science.

As informal period, during which refreshments were served, followed the address.

ARBOR AND BIRD DAY.

Tenth Annual May Festival.

FRIDAY, MAY 23, 1913.

Now is the time to talk May Festival. The date is May 23, and we all know the germ of things is going forward. This is the big event. It is planned to hold the concerts in the pavilion, as is the custom, and the advancement committee are sending out announcements of the event to the music lovers of Lansing and other nearby towns. Arrangements will be made for special car service to and from St. Johns and Mason, provided a sufficient number of tickets can be sold in these towns to warrant such arrangement.

This year's concert is composed of 200 voices, and will be assisted by an orchestra of 50 pieces.

The program will be given, as usual, the afternoon program at 2:30, and evening at 8:00. The afternoon concert will consist of a miscellaneous program by the soloists. In the evening, selections will be given from Wagner and Verdi, and "Fair Ellen" by Bruch, sung by the chorus and soloists.

Admission to both concerts, $1.50; afternoon program, 75c; evening, $1.00. Special arrangements will be made for students, same as announced last year.

The soloists this year are: Mme. Nina Dimitrieff, the Russian prima donna, soprano; William Clare Hall, Chicago, tenor; Marion Green, Chicago, basso, and Otto Meyer, New York, violinist. Miss Minnie Davis Sherrill will be the accompanist.

MICRON NU INITIATION.

On Friday evening, May 22, Omicron Nu, the honorary home economics society, initiated Miss Zue Nortrup, of the bacteriology department, and Miss Susan Briggs, of the physics department. Ellen Thompson, Ruth Turner, Edna Watkins, and Zora Lennom, Miss Nortrup has made valuable contributions to the subject of home economics by her investigations along the line of food bacteriology. The juniors are honored by election to membership because of their high scholarship and the promise which they give of becoming efficient workers in home economics.

Following the initiation Miss Gilchrist gave a very interesting account of the installation of the Gamma chapter at the Iowa State College of Agriculture and Mechanic Arts. She congratulated the society on the splendid type of young women who make up this new chapter. With the enlarging of the society it is hoped to make the organization a potent factor in extending the usefulness of those trained along home economic lines, as well as to honor those who do succeed.

After adjournment the society members were the guests of Miss Smith and Miss Holt, who spent a social hour in their parlor.

PORTRAIT FUND.

Grateful acknowledgment is hereby made by the executive committee to the following contributors to the Beal and Cook Portrait Fund:

ALUMNI.

Concerning Col. Simpson, whose death was noted last week, Dr. N. S. Mayo, '88, of Beachburg, Va., writes that the colonel was an able and energetic man who, with his charming wife, took an active interest in all phases of college life, and was very popular with both students and faculty. He was an experienced army officer, who had served in the field, and for many years in the army service, say that he did not know an officer that he would rather go into a serious engagement under W. L. Simpson. The country and humanity have lost a broad, efficient and kindly officer, citizen and gentleman.

The obituary notice sent by Dr. Mayo states that Col. Simpson was 53 years of age, and that the incommunicable cause of death is heart disease. His home was at Garden City, L. I.

Prof. P. G. Hold.gwt, formerly of Iowa, and now in charge of the International Harvester Co., gave an address before the members of the Capital Grange, Saturday evening, on alfalfa growing.

Dr. Lyman J. Briggs visited campus friends Friday of last week. Dr. Briggs is in charge of physical and mechanical education at Washington, and has just recently returned from several months spent in the Pacific coast. Mrs. Briggs (Katherine Cook), also a graduate of '93, has been visiting at the home of her brother, A. B. Cook, '95, of Oxnard. Dr. Briggs received his doctor's degree from Johns Hopkins University in 1901.

W. P. Brown is now engaged in contracting and construction work. At present he is in charge of the construction work on the new block at the corner of Michigan and Pennsylvania Aves., Lansing.

B. C. Rogers, formerly teacher of manual training in the Saginaw public school, is now engineer for the Original Gas Engine Co., of Lansing.

Joseph A. Rosen has just sent to our library a copy of Agricultural Extension Work in the U. S., Mr. Rosen is a member of the American Agricultural Bureau of the Governmental Zemstvo of Ekaterinoslav, Russia. His headquarters are at Minneapolis.

A son, John Garrett Starr, was born to Mr. and Mrs. Raymond W. Starr on April 24. Mrs. Starr was formerly Minnie Johnson, '10, and Mr. Starr is a graduate of U. M., the same year.
The M. A. C. WINS TRACK MEET, 71 TO 46.

The Western Reserve track team was taken into camp Saturday afternoon on the home field, the final count being 71 to 46. Capt. Brown, Rosencrans, and Herr all did good work in the runs, while Alderman surprised everybody, himself included, in the dash. Following is a list of events, with the winners for M. A. C.:

1-200 yard Hurdle - Beatty 2, Baxter 3; 2-40 yard Hurdle - Herr 2, Roseno 3; 3-54.5 yard Dash - Alderman 1, Bishop 3; time, 10 to 11 sec.; 4-60 yard Run - Roseno 1, Herr 2, time, 4 min. 16 to 15 sec.; 5-100 yard Dash - Ehler 1, time, 54 to 55 sec.; 6-200 yard Hurdle - Baxter 1, Van denberg 2; time, 19 to 25 sec.; 7-800 yard Run - Roseno 1, Herr 2; time, 10 min. 32 sec.; 8-200 yard Dash - Alderman 1, Ser­ vaas 2, time, 25 to 26 sec.; 9-880 yard Run - Brown 1, Myers 2, time, 2 min. 10 to 15 sec.; 10-4 mile Run - M. A. C. winners. Team - Warner, Lewis, Bishop, Alderman; time, min. 13 3/5 sec.; 11-Shot Put - Henry 2, Bishop 3; 1230 yard Steeplechase - Herr 2, 135 4/5 sec.; 13-Pole Vault - Loveland 1, Van denberg 2; height, 10 ft.; 14-High Jump - Herr 1, Miller 2; Extended, 35 4/5 in.; 15-Low Jump - H. Miller 2, Gilde­ master 3; distance, 20 ft. 9 in.; 16-Discus - Brades 2; distance, 165 to 170 ft.; 17-High Jump - Loveland 1, Tripp 3; height, 5 to 6 ft.; 18-Hammer Throw - Kittle 1; distance, 93 ft. 11 in.; 19-Total points - M. A. C., 71; W. M., 61.

The count was 5 for first, 3 for second, and no count allowed for third.

SATURDAY'S MEET.

The U. of M. freshmen come for a dual meet track next Saturday, and it is to be hoped a good crowd will come out. The home team was de­ feated at Ann Arbor on March 15, but the contest on Saturday will be hotly contested. There are some excellent sprinters among the Univer­ sity men, and they will prove worthy foes. Our men are rounding into form, however, and will make it an exciting game.

There is one advantage on the home field, and a greater advantage if proper support is given. No base ball game on this date, so all can plan on the track meet. Watch for posters.

DEBATE - FRIDAY.

The annual debate will be held on Friday evening of this week, M. A. C.'s affirmative team meet­ ing Alna in the auditorium of the Hotel Home, and Herr all did good work while Alderman surprised everybody, himself included, in the dash. Following is a list of events, with the winners for M. A. C.:

The men to oppose Alna were Mr. John Snyder, Rahalboe, and March. The question, as stated before, is: Resolved, that the federal government should pass a policy of regulation, rather than dissolution of the trusts.

The Gamma chapter of Omicron Nu was installed at the Iowa State College of Agriculture and the Mechanic Arts on April 26. The charter members consist of eight teachers and twenty stu­ dents. More than this number of members contact the highest standard of admission, but only the highest in scholarship were chosen. A more unique, capable, splendid set of young women would be hard to find anywhere.

Omicron girls served a banquet to the members elect (a model both from the dietetic and esthetic stand­ points) in one of the dining rooms of the home economic hall. This is a new building, three stories in height, devoted exclusively to this subject. It contains three kitchen laborato­ ries, each with its adjacent dining room, beautifully decorated and for­ nished, two large sewing rooms, with fitting rooms and electric mo­ tors, an art room for color and de­ sign, a laundry, lecture room, offices, parlor, etc.

During the next triennial period the college will have over a million and a quarter dollars to expend. A two-year course in agriculture is already available, and it is hoped a similar course in home economics will be offered. Farm extension work in home economics is carrying on short courses through­ out the state.

The enrollment at Iowa State College is about 2,500, and of these nearly 400 are in the home economics course. Gamma chapter, with every opportunity, expects to ac­ complish good results.

M. A. C. WINS FROM KEN­ TUCKY.

La Ferer Pitchs Fine Game.

The home team won handily in the game with Old Kentuck, Saturday, the final count being 8 to 1. Not only did the team hit when it was counted, but the pitching was a great improvement over that of a week ago. Every member seemed to get into the game in earnest, and only one error was recorded.

Though every man was at his best, interest centered in the fresh­ man pitcher, La Fere, who allowed but five hits while pitching his first college game. Not a Kentucky man found him for a safe hit until the 5th, and he struck out eight men during the game. He was extremely cool for his first big game, and gives promise of great development. He has a variety of bases and drops which, when under complete control, will prove unsurmountable.

When the score was 5 to 0, two singles put two of the visitors on bases, and the next man up hit a slow rolling ball. M. LaFere failed to get it in time, then filling the bases. The next man up hit to Vata, who threw to first, allowing the man on 2 to score. This was the visitors' only opportunity.

LaFere scored in the first, in the second and two more in the third. Another was added in the fifth, with two men shouldering again in the eighth the final count made.

HORT. CLUB.

The Hort. Club met in the agricultural building last Wednesday evening for one of the most inter­ esting meetings of the year. The regular order was aban­ doned, and a general reception and good time enjoyed by all. After the reception and handshak­ ing, the chairs were drawn up and introduced to order. In a few words he explained the object of the meeting, and called on Mr. Gunson to talk. Mr. Gunson's remarks were inspiring and well chosen. He urged emphasizing the ability of doing something better than was necess­ ary, on being ready to do the proper thing when called upon. He said, "It is the wisdom that we hear of men going out into the world and acquiring themselves well." That is an inspiration to hear Mr. Gunson cannot be gainsaid. Mr. Shepards, cashier in the secretary's office, was called upon, and responded with an impressive talk in which he urged the members of the club to have the cour­ tesies before them, and work hard. Thorough preparation was found to be the best method, and Prof. Miners then called upon Secretary Brown to go into a fur­ ther explanation of the club's appro­ priations. Starting with the first appropriation made for this college, he gave a comprehensive history of succeeding legislation up to the present time. His remarks showed that the history of the college are quite complicated, but that a much better appropriation, although restricted, is needed for the future. Those who heard the talk will be able to talk intelligently on this subject when occa­ sion de &. The dinner was adjourned, and the apples were en­ joyed while Mr. Hitchens rendered several pleasing selections on the piano.

CLASS OF '85.

The following letter is sent to the members of the class of '85, and is self-explanatory. An attempt is being made to round up as many in each class as possible. Watch for announcements of some of the things to happen commencement season.

"Dear Classmate:

"The triennial meeting at the Michigan Agricultural College will occur Wednesday, June 3rd, and this year a special effort is being made to bring back as many of the old graduates and former students as possible. The class of '85 is represented locally by Harris E. Thomas of french, and who will be the chairman and the writer. We will constitute ourselves into a committee to do everything necessary to the estab­ lishment of any members of our class who may return for that occa­ sion. We will try to do the best good a time as we can possibly give.

"Can you not make plans now to be back in the old campus again at that time? The commencement occurs on Tuesday, the society ban­ quet on Wednesday evening, and the alumni meeting and alumni luncheon on Wednesday. Try and make it as much as possible, and in any event write me a letter, and I may use to tell the other boys some­ thing about you in case you cannot come.

"J. D. TOWN."
Mrs. Lewis Lobell, of Muir, Mich., was the guest of her daughter, Fay, Sunday last.

The spring enrollment at the present time is 1165. This is 15 more students than were classified last spring at this time.

Mrs. Jennie Woodard, 86, of Chicago, visited friends and relatives at M. A. C. The past week. Mrs. Woodard is a sister of J. D. Towar, '83, Abbott Ave.

Prof. F. H. Sanford spent several days in the northern part of the state last week, arranging the details for the summer forestry camp. The camp this year will be near Waverne, Cheesebyan Co.

Prof. Jeffery is planning a trip for his class in farm management (soils 3A) the latter part of May. The party will visit farms in the northern part of the state, and will also visit some of the farms formerly visited by other classes.

Dr. George Byouscuc, of the department of soils, has decided to spend a year or more in study abroad, and leaves M. A. C. at the end of May. He will go to London, England, but will also spend some time in Germany, France, and other countries.

R. G. Chamberlain, '13o, has accepted a position as instructor in mathematics in the public schools of Ironwood for the coming year. He will also coach the athletic teams of that school, and, from his work at M. A. C., will no doubt prove a success.

Mrs. J. O. Linton left Thursday for a month's visit with her parents at Chester, Penna.

Miss Bell Alger, '13b, has been spending the past week at Flint, where she acted as supply teacher in the high school.

A sprayography is being built for the department of farm mechanics. This is a device for testing the efficiency of nozzles for use in connection with spray units.

The Sesame literary society gave an eleven o'clock party in the assembly room of the Agricultural building Saturday evening. Prof. and Mrs. Ryder and Sergt. and Mrs. Cross were patrons.

A baby daughter, Elizabeth, was born to Mr. and Mrs. Harry E. Boway, of Ancon, on April 21. Mrs. Boway was formerly M. Addilicke Bentley, stenographer for Pres. Snyder, and Mr. Boway is a brother of A. G. Boway, '12f.

Instructor Musselman, with his class in farm machinery, visited some of the distributing houses and general agencies in Lansing Saturday. The object of their visit was to study the types of machines offered for sale by these concerns.

L. B. Hall, '92, has leased the house on Grand River Ave., owned by Mrs. Abbott, and will move here with his family during the summer, in order that his boys may have the benefit of training at M. A. C. Mr. Hall has been engaged in the production of certified milks near Grand Rapids for several years.

R. J. Tenkonohy, '12e, with the American Blower Co., of Detroit, was a college visitor Saturday.

E. P. Clark, '83, superintendent of schools at St. Joseph, Mich., was among those who attended the joint meeting recently held in Lansing.

When in Jackson last week, Prof. Pettit met Enoch Hancker, an attorney of that city, who was assistant in chemistry at M. A. C. in 1887 and '88, under Prof. Fiske.

Something over 600 little chicks have put in an appearance at the plant so far, and fairly good hatches have been secured. The senior class in poultry are just now busy watching the incubator cellar.

Prof. Pettit will speak before the men's class in applied Christianity, People's church, next Sunday at 11:40, on "What the Good Citizen can do in Preventing the Breeding of Our Summer Pests, Flies and Mosquitoes." All men are invited to attend this and subsequent meetings of the class.

There are 28 women taking the elective work in gardening under Mr. Hool. The plot for this work has been divided into 14 gardens, each of which is 22 x 100 feet in size. Two girls are thus assigned to each plot. The actual planting work which began last week was delayed to some extent on account of the cold, rainy weather. The practical work was preceded by a series of special exercises on the germination test of seeds, and the action of fertilizers on same.

Miss Davis, of Dallas, Texas, is the guest of her cousin, Prof. Jeffery, and family for a few weeks.

Prof. French was in Bad Axe Friday of last week, where the school board are contemplating inaugurating a course in agriculture.

The Howard Terrace juniors entertained Saturday in honor of the H. T. seniors. The members of the senior class in home economics and Mrs. Gilchrist were guests.

Remember the debate on Friday night. Alma comes here to defend the negative side of the question of trust regulation. Messrs. Snyder, Rabinowitz and March, for M. A. C., will uphold the affirmative.

The botanical department have started their Saturday field excursions for the spring. They leave the building at 8:30 sharp, returning in time for dinner. Any who desire to make the trips are welcome to join the party, whether taking botany this term or not.

The members of the senior class in home economics are getting some practical teaching in this science. The East Lansing high school girls come in two sections for work along this line, one section coming on Tuesday afternoon and another Saturday morning. The grades from the 8th up are also taking advantage of the opportunity to study domestic science, and are also coming for work during the same period. The teaching is done by the seniors, under the supervision of Prof. Hunt and Miss Yenawine.
Everybody reads THE STATE JOURNAL

BECAUSE
It completely covers the field of local news, politics, and the world of sports.
