**ASMSU members question own demands on ATL Del.**

By BEV MITCHELL

Members of the ASMSU student board are concerned about the lack of progress in the ASMSU/ATL negotiations, particularly regarding the demand for a student representative on the administrative board. The ASMSU/ATL negotiations have been ongoing for several months, and the students are growing frustrated with the lack of progress. The members of the ASMSU student board are calling for a more active approach to the negotiations and are questioning the need for a representative on the administrative board. They are concerned that the current representative is not adequately representing the students' interests.

UM draft referendum ambiguous, but worthy

At the University of Michigan last week, the question of compiling class standings for use by the Selective Service System was submitted to students in a referendum. The referendum asked, simply, should the university continue to compile class standings for the Selective Service System?

It was a referendum that, in itself, would have little bearing on whether the university continued to compile class standings for use by the Selective Service System. The referendum was asked, simply, should the university continue to compile class standings for the Selective Service System?

Nonetheless, the referendum was important. A strong move against compiling class standings or so would put tremendous pressure on the Regents to follow the students' desire. Pressure mounted steadily in the weeks preceding the referendum as students demanded that the administration interpret their vote to mean something. It became a confrontation with the university.

Two to one

On Wednesday, 9,547 students voted in favor of the referendum. That is a 74 percent majority. But the question of what the vote means is unclear. The referendum was asked, simply, should the university continue to compile class standings for the Selective Service System?

The students and administration are now debating the issue and the outcome of the referendum. Some 1,000 students who expected a clear-cut vote. The women's referendum took on added weight when a threat from the Student Government Council (SGC) to break relations with the university if the ban was not lifted.

Prof misquoted

To the Editor:

Although the State News in its last editorial was extremely complimentary to your law courses, I feel that you have not been properly credited for your efforts to improve these classes. The editorial was completely one-sided and did not discuss the many merits of the courses. I feel that a law course, or courses, as you state, might face "...the only way to achieve such standings is to proceed in an intelligent adult manner, which will prepare students for their roles as citizens."

The most important aspect of our courses is the teaching. The professors are truly dedicated to the subject matter and to the students. They have publicly and privately stated, with good reason, that such an idea is in need of everything they consider as teachers. And what about indirect pressure? What if the instructor does not like someone, whether the professor is Mr. Segal, Mr. Strandness, or Mr. Nash for whatever reason? Would the professors all be forced to comply with administrative and monitor's orders to have a class of a certain grade level? I feel that such considerations are in the interest of students and the institution. I feel that it is very important to bear careless and zealous allegations in mind and to understand the need for and the purpose of the classes we are taught.

Low courses in BOA

To the Editor:

I am writing in response to an article by Tom Schönfeld, "Low courses in BOA," which appeared in the Student Life Oct. 21, 1966. In his letter, Mr. Schönfeld states that there are too many academic courses taught at this university which will prejudice students toward their roles as citizens. Mr. Schönfeld feels that low courses are necessary because the students need to have an understanding of the society that they live in.

I wholeheartedly agree with Mr. Schönfeld. I feel that a low course should be seen as an important step in the process of becoming a responsible citizen. The students need to be aware of the problems that they face and to understand the society that they live in. The students also need to be aware of the importance of having a responsible citizen in society.

U.S. platoon struck by N. Vietnamese

SAIGON -- A 40-man patrol of "flying horsemen" suffered two dead and 10 wounded, U.S. military sources said Sunday.

The combat, which struck near the La Drang Valley, was the first major action in the area west of the South Vietnamese-US lines and was confirmed Sunday afternoon by a Saigon military official.

The losses were reported by a member of the South Vietnamese Marines in the area.

The fighting, about 225 miles northeast of Saigon, came in the last hours before the renewal of "flying horsemen" suffered heavy casualties while the lead U.S. helicopters were hit by small arms fire and rocket attacks.

The U.S. and South Vietnamese air force and artillery fire were directed at the enemy positions before reinforcements arrived.

**SORRY ABOUT THAT!**

When the Pacific Eight Conference picked the Trojans as the No. 1 team, it meant the most in the nation.

We're No. 2 Great! I was hoping. Thought there would be more 1 for points or else Alabama would knock us out.

Joe baby, you blew your cool

In Southern's fall season, Jerry West turned to ecstatic joy for Southern California挑s the Lion's share of the major conference picked the Trojans as the No. 1 team.

'If we had lost to Notre Dame, we would have tied for the Big Ten championship. And I'm glad to see the UPI gave us the No. 1 ranking, and I'm just glad to see the UPI.'

Graduate school asset of society

Graduate education in society's present state, Allen L. Mander, dean of advanced graduate students and faculty Thursday night. Speaking at a meeting of prospective graduate students in the Illinois Federation, Mander reviewed the importance and tremendous growth in graduate education in recent years.

"Graduate research and advanced degrees have become an important part of our society," Mander said. Society and graduate education must work together, and Mander said the Mande program, developed by Leonard C. Florida, has not forgotten the importance of research and degrees.

"The keynote of the Mande program," Mander continued, "must be to get the best students into the graduate programs and to help them along the way to complete their degrees." Mander noted that the Mande program provides a way for students to get into graduate school and to complete their degrees.
