Agricultural College Meetings in Chicago Draw Many of Alumni and College Staff.

Dr. Bouyoucos, Returned Red Cross Worker, Tells of Grecian Agricultural Conditions.

Alumni Committee Suggest Site for Union Memorial Building.

Notre Dame is Winner in Annual Contest, 13-0.

The Union Building As A Memorial.
A brief business session followed. On investigations that have had a profound the year in the Kedzie Chemical Lab­ many one interested in chemistry is This will be an open meeting and the Society on "A Survey of the Re­ Huston of the Chemistry department­lege section of the American Chemi­day evening, November 14. The pa­ November 18, at the Armory, by Dr. A. M. Rithbany of Boston, on the sub­ A. M. Rithbany of Detroit, associate­try." The first try out is set for De­contests receiving nineteen, and the­ try of only eleven.

THE HOLCAD STAFF held a business and social meeting at the College residence on the evening of November 11 at which time the Holcad pin was presented to four senior members of the staff; Marjorie Williams, co-editor; Barbara Lillie, co-ed business manager; M. B. Wofford, business manager, and E. L. Overboli, editor-in-chief. "Jimmy" Hasselman of the publicity department, presented the pins, and gave a very interesting talk in which he expressed the sentiment that the undergraduate paper, as offi­cial organ of the student body, should be absolutely free from outside restraint.

THE LIBERAL ARTS lecture course was opened on Tuesday evening, November 18, at the Armory, by Dr. A. M. Rithbany of Boston, on the subject, "Can Humanity Be Civilized?"

THE SOPHOMORE CLASS held its fall term party in the Armony last Fri­day evening, December 14. The ma­trons were Dean Savage, Coach Brew­er and "Jimmy" Hasselman.

THE MICHIGAN AGRICULTURAL Col­lege section of the American Chemi­cal Society held its first meeting of the year in the Kedzie Chemical Lab­oratory Nov. 19, at 7:30. Dr. R. C. Huston of the Chemistry department and recently of the Sanitary Corps, gave a talk on the "Newer Nutrition." A brief business session followed. On Friday evening, December 5, Prof. Hart of the University of Wisconsin will give an illustrated lecture before the Society on "A Survey of the Recent Progress in Animal Nutrition." This will be an open meeting and any one interested in chemistry is urged to attend. Prof. Hart has been intimately associated with recent in­vestigations that have had a profound influence and the talks given will permit no one is better qualified to present this matter from first-hand knowledge than Prof. Hart.

A NUMBER OF PAINTINGS of campus views by Samuel J. Kennedy, '01, are now on exhibition in the Blue Room of the Hotel Kerns in Lansing and the exhibition will be open to the public during the present week. On Friday evening, Mr. Kennedy will lecture on his work, in the Blue Room of the Hotel and promises to point out some of the features of the sce­nery in this section that from the artist's standpoint enable it to rank with some of the famous art grounds of Europe. One of Mr. Ken­dedy's pictures, a Cedar River scene worked out on the new school idea, was honored at the Salon of Paris and is on exhibition with the others. Another of his paintings made during the summer, he has given to the Federal Club of the College, an organ­ization of the federal aid students. The money from the sale of the pic­ture is to be used for the temporary assistance of soldiers sent here by the Federal government, who are await­ing long delayed compensation. The money will be loaned as it is needed, to be paid back as the men receive their government funds.

At a meeting of the Forestry Club last Tuesday night, three reels of moving pictures were given before an audience of one hundred forestry students. The movies were presented through the new moving picture ma­chine of the military department and were furnished to the club by the Bureau of Education. The pictures were of "Recreation in the National Forests," "Forest Planting" and "The Work of a Forest Ranger."

THE HORT CLUB is already making plans for the annual hort show, to be held this year, in connection with the Farmers' week program. Among the large exhibits will be those on botany, pathology, fruit market­ing, floriculture, and fertilization and spraying compounds. One very im­portant feature, the pie baking con­test by the co-eds, will not be omitted, and consequently apple pie a la mode in quantities may be expected.

At the first annual meeting of the American Farm Bureau Federa­tion held in Chicago last week, the Michigan Association, which had its origin at M. A. C. last spring, took a prominent place. C. A. Bingham of the Michigan Association, in a strong speech before the assembly, was instru­mental in having the representa­tion of each state in the hands of the director from each state and one for each 20,000 members. The Michigan Asso­ciation was organized during Farmers Week last year, and although the college takes no active part in its work, they have been behind it from the beginning, and have given assistance when asked.

THE DETROIT Club has its weekly luncheon for M. A. C. men at the Board of Committee at noon every Wednesday in Dining Room No. 4. M. A. C. men of Detroit and visitors are most welcome.

OBSTREPEROUS FRESHMEN probably have not noticed it, but those who enter the president's office with a free conscience are remarking on the pleas­ing effect of the newly decorated walls and refinishing wood work done this week.

With a total of three games played and none lost the Junior class has captured the inter-class football title. In this year's championship game, '21 topped the championship when the seniors were defeated last Satur­day morning, 6 to 0.

The Sem Bot, the honorary botany society at M. A. C., initiated seven men last Thursday evening, November 13. The new men are: L. E. Tis­dale, '19; H. B. Smith, '13; R. E. Trip­p, '19; H. Cudahack, '20; L. J. Klotz, '20; W. C. Earsman, '20, and W. Clench, '21. There are more than eighty students taking advanced courses in botany this term. Never before has there been such a large number of excellent students, it is said and the average, on a whole, is above that of former years. E. J. Kotila, '18, who has been conducting potato experiments in the Upper Pen­insula, and who is returning to take the work towards a Master's degree, will direct the work of the Sem Bot for this year.

At a meeting of the Executive Committee of the M. A. C. Association at the time of the Home Coming Game, the minutes of which are printed this week, associate membership in the Association was provided for. It will be remembered that at the changing of the organization from the Alumni Association to the M. A. C. Associa­tion, the membership was extended from alumni to include those who had completed one term's college work. In thus broadening the represent­ership to take in all those "whose hearts M. A. C. sang," it was found that a small but very enthusiastic group were being omitted. This group is made up of faculty members of the Staff and of the college who, through years of associa­tion, have grown to love M. A. C. almost as their own. The step taken by the Executive Committee will now permit them to become members on an associate basis, and allow their being counted among the Association and taking a part in Association af­fairs.
Entered as second-class matter October 30, 1916, at the post office at East Lansing, Michigan, under the Act of March 3, 1879.

THE M. A. C. RECORD
Published every Friday during the College Year by the Michigan Agricultural College Association.

May E. Foley, '18, Assistant Secretary

THE UNION BUILDING
For the benefit of the living, is the memorial which will be of use to future generations. What then is more fitting than a community house in which the ideals of democracy may be perpetuated? It has been the custom in the past to erect expensive monuments or statues to the memory of men and women who have served their country or humanity. These, have too often been so unattractive as to be blots on the landscape, and even at the best have been of no practical value. Is it not more in keeping with the spirit of the times to erect a memorial which will be of use to future generations?

At least eight colleges and numberless organizations, communities, and cities have caught the spirit, and have already started or are making plans for the erection of buildings which may serve as constant reminders of the sacrifices which our boys made over there, and also, help to keep alive the spirit of democracy and benefit humanity.

Franklin K. Lane, Secretary of the Interior, emphasized this trend of the times, when he said, "In expressing our gratitude for the patriotic service of the brave men, living and dead, who helped to win the war for democracy and human liberty, it is most fitting that we erect in every community, a living memorial rather than a mere shaft or monument. The erection of community houses will establish gathering places which will give the returning men opportunity to perpetuate the democracy of the camps."

President Kidgje summed up the situation here at the college in a way which cannot be improved upon, we believe. "The Memorial Building," he said, "has appealed to me very strongly as a memorial. What we need more and more is a place where students and faculty can mingle together in a social way. This applies to the younger as well as the older members of the staff, and to freshmen as well as seniors. The College has grown to such an extent that efforts must be made on the part of all those interested in the institution to secure personal contact between the various members of the college family.

In a business way, I think we all recognize that business can be rounded up better from a more or less friendly contact of the individuals concerned. The day is at hand when one business man says to another, 'Well, when can we lunch together and talk it all over again? Is it something about the excitement by the proper kind of food and the social atmosphere that mellows the brain sufficiently to do business on a friendly basis.'

"At present the new gymnasium offers a meeting place for students to a limited extent, but it is a gymnasium and lacks the social atmosphere which I believe is very desirable. A large number of our students, too large to suit me, pass through the college without having the privilege of belonging to any society. There is no way in which those belonging to various societies can exercise their talents as social workers in making the non-society student's lot more attractive, and so I feel that this memorial building devoted, not to a single purpose but to a great variety of purposes is a project which every friend of M. A. C. can well afford to boost. There are a large number of alumni and old students of the college who feel that a building in which they have had a hand in erecting will act to draw them back to the college at stated intervals if the building serves a proper purpose for the students in attendance at the college."

M. A. C. BANQUET AT AGRICULTURAL COLLEGE CONFERENCES, CHICAGO.

In connection with the annual meeting of the American Association for the Advancement of Agricultural Teaching and the Association of American Colleges and Experiment Stations held in Chicago November 11 to 14, the Chicago M. A. C. Association arranged for a banquet for M. A. C. people in attendance. The banquet, which is an annual feature of these conferences, was held at the Auditorium Hotel on the evening of November 12.

Detroit Alumni to Banquet Team.

Members of the M. A. C. football eleven are to be banqueted in Detroit November 12 by the Detroit M. A. C. Club. The invitation was formally extended to the team through President Gunnison, '00, in a talk given before the South Dakota game.

In behalf of the team, Coach Chester L. Brewer has accepted the invitation.

Banqueting of the team by the De-

EXECUTIVE COMMITTEE SUGGESTION FOR UNATION MEMORIAL BUILDING.

Also Provide Associate Membership in M. A. C. Association.

Minutes of the meeting:
The meeting of the Executive Committee of the M. A. C. Association was held in the Council Room of the Y. M. C. A. on the campus at 10:00 a. m. Saturday, November 8, 1919. Those present were: E. J. Frost, '90, Jackson Ass'n; Luther Baker, '93, Central Michigan Ass'n; Charles Richards, '16, Berrien County Ass'n; W. B. Williams, '17, Grand Rapids Ass'n; E. N. Pagelson, '89, Detroit Club; C. H. Parker, '00, Saginaw Ass'n; L. A. Copeman, '05, Flint Club; W. H. Parker, '06, Flint Club; W. O. Hedrick, '95, East Liverpool; E. W. Danner, '00, Green­ ville; Hugh Gunnison, '00, Detroit Club; W. K. Prudden, '78, Lansing; Alexander MacVittie, '11, Northeast Michigan Ass'n; A. C. McKinnon, '35, Bay City; J. D. Towner, '35, Central Michigan Ass'n, and C. W. McKibbin, '11, Secretary. Pres. Prudden, '78, called the meeting to order.

The Secretary presented the need of an addition to the by-laws which would permit of associate membership in the M. A. C. Association for members of the faculty and friends of the college who, under the present constitution, are not eligible to membership. It was moved by Prof. H. W. Parker and seconded by W. H. Parker that the by-laws of the M. A. C. Association be added to so as to provide that the faculty and friends of M. A. C. may be admitted to the M. A. C. Association as associate members upon the payment of the regular $2.00 dues.

Sketch plans for the Memorial Building prepared by Architect Bowd were presented for consideration and discussion.

A motion was made by Mr. Baker, seconded by Mr. Pagelson and carried that a committee of three be appointed to be known as a "plans and specification committee" who will represent the alumni in conferences with the College Architect on the draft of the plans and specifications of the Memorial Building. A resolution was then passed that this committee of three be also empowered to select a suitable site for the Memorial Building and to represent the alumni in conference with the State Board of Agriculture in arranging for the site.

A motion was made by Mr. Towar and seconded by Mr. Baker that the site of the building be on the campus near from the main street and preferably on the site of the old house known as Dr. Bell's residence, now occupied by Dr. Bessey.

Wells Hall and R. E. Olds Hall of Engineering.

H. Graves, Farm Management Specialist, and H. Tennant of the Markets Department were at the American Farm Economics Association meeting on the 11th and 12th. Prof. Cox attended the American Society of Agronomy conference, November 10 and 11, and Prof. A. J. Patten represented the college at the meeting of Officials in Charge of Feeding Stuff Regulations and Feed Manufacturers, on November 11.

Dr. Eben Mumford, State Leader of County Agents, was present at the meeting of the First American Farm Bureau Federation

M. A. C. PEOPLE AT CHICAGO MEETINGS.

M. A. C. was well represented at the various meetings and conferences held in Chicago last week.

At the National Rural Life Conference at the LaSalle Hotel November 8-10-11, Kenyon L. Butterfield, '31, president of the Massachusetts Agricultural College, was re-elected president of the National organization. Representatives were in attendance from 33 states and two foreign countries. Other M. A. C. delegates to the convention were Ray Turner, '09, State Leader of Boys and Girls' Clubs; H. T. French, '35, director of extension in Fort Collins, Colorado; Dr. W. W. Diehl, '37, Rural Field Agent for the Methodist Episcopal Church in Michigan; E. C. Lindsey, '11; Hazel Taft Lindsey, '10; J. W. Chapin, '10. Dr. Ward Gilmore and Prof. E. H. Ryder were faculty members present.

Prof. F. S. Kedzie, Dean R. S. Shaw, Director Robert Baldwin, '04, Profs. Cox, Megee and Millar attended the annual meeting of Association of American Agricultural Colleges and Experiment Stations, Nov. 12-14. Prof. Walter French, E. L. Grover, '07, and Elizabeth Frazer, '11, took part in the conference of the American Association for Advancement of Agricultural Teaching. Dean Mary Edmonds and Miss Frazer were present at the meeting of the A. of A. C. and E. S. C.
AGRICULTURAL CONDITIONS IN GREECE.

Told by Dr. Bouyoucos.

Dr. G. J. Bouyoucos who has just returned to the campus after a year spent in Greece as a member of a so-called agricultural commission appointed by President Wilson has prepared the following sketch of conditions and his work in Greece his native country. So grateful were the officers of the Greek government to Dr. Bouyoucos for his work that they conferred upon him three awards of honor—the highest in their power to bestow—the Order of Our Savior, the Cross of the Battalion of George Fourth, and the Military Medal.

Greece has been importing from other countries most of her wheat she uses for bread. Being unable to import all the wheat she needed during the Great War her bread situation became very acute and in her distress she called upon the United States for help. The American Red Cross responded by sending her an Agricultural Commission composed of Dr. Cyril G. Hopkins of the University of Illinois and Dr. George Bouyoucos of the Michigan Agricultural College and member of the Soils department. The object of this commission was to study the soils of the country and then to recommend methods by which they could be made to produce more food. The Commission made a general examination of most soils in Greece. It collected many samples which it analyzed for nitrogen, phosphorus, potash, magnesium and calcium, and conducted pot culture experiments and field experiments on some of the most important and extensive soil types in the country. The results obtained from these various investigations, the knowledge acquired from observations, together with advice from the farmers and recommendations to the Greek government, were published in a little book which was sent free to nearly all the farmers in Greece. It was a very practical tool to allow the farmers to use the modern agricultural machinery. Then, too, the present king of Greece is young, being less than 100 years old, and during this period of its existence, it has never been left in peace by her enemies to develop her agriculture.

The Greek people and the government were very appreciative of what the commission tried and did do. The government tried to retain the services of the commission for a period of five years at very high salaries. In recognition of the services the king conferred upon the commission two of the highest decorations in the kingdom.

The members of the commission were officers of the American Red Cross. Dr. Hopkins held the rank of Major and Dr. Bouyoucos the rank of captain. The commission was on its way to this country when Dr. Hopkins was suddenly taken ill on board the ship and upon arrival at Gibraltar he was removed to the British Military Hospital, where he passed away. Dr. Bouyoucos remained with him and after he died brought his body back to this country. In the death of Dr. Hopkins the agricultural world loses one of its greatest soil experts and scientists.

THE M. A. C. RECORD.

Never did a visiting eleven show more courage in the face of odds. Not all the fight and courage which the Michigan Aggies showed developed was not sufficient to stop the equally courageous and more powerful team which carried the colors of Notre Dame.

The East Lansing men were defeated cleanly and decisively. The score was 13 to 0.

But with all that the visitors exceeded expectations, for they held the Gold and Blue aggregation, heralded as the fastest in the west to two touchdowns.

Notre Dame opened the game with a complete second string line up. It was not long, however, until Coach Rockne saw the futility of trying to defeat the Aggies with this combination so he rushed his regular backfield and ends into the fray at the start of the second quarter.

In the turfwork of defeat, the East Lansing men found one bright beacon light—the brilliant stand of their eleven on its five-yard line in the second quarter. A series of long passes from the Aggies' eight-yard line where the locals hammered the line four times without making the required distance the ball going to the visitors on downs. From this point forward the battling over the line were responsible for the Notre Dame victory. Finding themselves unable to gain ground, either by end circling, their strongest attack or through the line, the invaders could develop was not long until the Catholic backfield w

V. C. closes the season Thanksgiving day with a home game with Wisconsin. The Varsity plays the All-Stars this week.

FIXING FOR BUMPER FARMERS' WEEK.

Plans for Farmers' Week, permanent dates for which were set February 2 to 6 by the State Board of Agriculture last spring, are well under way.

Dr. C. V. McCollum, of John Hopkins University, probably the best known authority on animal feeding and nutrition in the United States, and Cecil Roberts, English poet, who is making his first American lecture tour, will be only two of a number of famous men and women who will be on the program.

The mornings will be given over mostly to meetings of various state farmers' associations, of which ten are expected. Programs will also be conducted for the women in the morning. In the afternoon big general meetings for everybody will be held in the gymnasium, at which time problems of state-wide and national importance will be discussed by men and women who are authorities in their particular field.

The evening meetings will be joint affairs also, with one speaker following moving pictures and travelogues by Dean Vivian, of Ohio.

Every department of the college will put on an exhibit. The general object of these exhibits will be to emphasize agricultural efficiency and prevention of waste, and better marketing.

An alumni banquet will be held some evening during the week.

Alumni Notes

H. D. Luce is still living in Lansing at 711 S. Capitol Ave., and continues with the Hugh Lyons Co. in the manufacture of display fixtures and truck bodies.

Charles H. Redman, a civil engineer for the city of Saginaw, Michigan, is doing the regular grind that a municipal engineer is supposed to do, besides considerable extra work due to the land and building boom Saginaw has been having.

Lewis D. Remington (with) was in the service during the war and is now at 146 N. Primrose Ave., Monrovia, Calif.

NOTE—We want the public to understand that our plows are NOT the plows made by, or J. I. Case Plow Works.

To avoid confusion, the J. I. CASE THRESHING MACHINE COMPANY desires to have it known that it is not now and never has been interested in, or in any way connected or affiliated with the J. I. Case Plow Works, or the Wallis Tractor Company, or the J. I. Case Plow Works Company.

Remember This Trade Mark as Well as the Name of

The world-famous trade mark of the Eagle on the Globe identifies all machinery manufactured by the J. I. Case Threshing Machine Company.

Now, here's a straightforward, heart-to-heart statement of why you should know what this trade mark means to you—why you should give preference to farm machinery on which it appears.

You know the advantage and value of experienced, reliable farm help—theman you can depend on through "thick-and-thin"—the kind that "sticks!" the year round if you need it!

That's exactly what you get—in mechanical form—when you buy machinery built by this company and bearing the good old trade mark of the Eagle on the Globe.

This company has been building superior machines for farmers for 77 years—probably long before you were born! Often our machines have been a little higher in price than others; but you could bet your bottom dollar on their dependability in "a pinch!"—on better work and more of it and over a long period of years.

Look for the trade mark of the Eagle on the Globe on:

THE M. A. C. RECORD.

Daniel W. Bradford, formerly of Grand Rapids, has moved to 1003 Washington Ave., Lansing, where he is engaged as a consulting engineer.

F. B. Mumford, dean and director of the College of Agriculture, University of Missouri, has just returned from France, where he was a member of the "Mission Amerienne de Rapprochement." He says that H. L. Kempe, ’09, D. A. Spencer, ’12, V. R. Gardner, ’05, and R. M. Roland, ’16, are now doing good work as instructors and extension workers in the University of Missouri.

L. G. Barber (with) is designing engineer for the Kelly Press department of the American Type Founders Co. of Jersey City, and is living at 131 N. Euclid Ave., Westfield, N. J.

Walter Goodenough, formerly of Boston, Mass., is now living at 158 W. 81st St., New York City.

J. R. Petley is with the J. R. Petley Co., distributors, 655 Milwaukee St., Milwaukee, Wisconsin, representing the Diamond Rubber Co. of Akron, Ohio.

F. B. Ainger, Jr. (with) is manager of the Ainger Printing Co., 39-45 Congress St., Detroit. He is one of the organization committees of the American Officers of the Great War.

In a recent issue we stated that Philip S. Rose (with ’99) had been made associate editor of the Country Gentleman. He advises us that this is "old news." He also is ’99 and not with ’99. He says he rather liked the notice even if it did say (with) and was more than two years late as a news item, because it may result in some of the old boys who live in the east looking him up. "Several weeks ago," he adds, "I was prowling about in northern West Virginia and ran across Merritt W. Fulton, ’95. He took me all over his big peach orchard and showed me how a real live hill billy can change a howling wilderness into a big money making farm. He looks almost as young and seems just as spry as when we roomed together back in old Wells Hall twenty odd years ago. I missed seeing his brother Sanford by a few hours, who was on his way to the Pacific Coast by the overland route in an automobile. He has sold his West Virginia orchard and may locate somewhere in California."

William D. Hurd, formerly of Chicago, is now living at 622 Maple Ave., Wilmette, III. He is "glad to send subscription to the Record."

W. W. Wells is still at Clyde, Ohio, as engineer for the Clyde Cars Co., builders of the "Clyde-dale" motor trucks.

George D. Francisco, formerly of Columbus, Ohio, has been transferred to Philadelphia, Pa., his office address being 1126 Real Estate Trust Building. He is still with the Jeffrey Manufacturing Co., and has been promoted to district manager. He expects to make his home in Drexel Hill, Pa., soon.

Ernest A. Richmond is safely returned from overseas and nicely settled in a new position as special engineer for the Quaker Oats Co. For the present he will make his headquarters in Battle Creek, Mich., and may be addressed Box A, R. R. No. 2, Battle Creek.

The August Dairy Farmer has an article containing an account of some very excellent work done by D. S. Bullock, ’02, with the University of Wisconsin in the improvement of dairy stock in various counties in Wisconsin. This was accomplished through the trading of pure-bred sires for

J. W. Applin, for six years chassis engineer with the Cadillac Motor Company, Detroit, has recently been appointed chief engineer of the Lafayette Motors Company. Applin has been first assistant to Mr. D. McCall White, designer of the new Lafayette car, and has been with him since the designing was first started. The Sunday Detroit Free Press of November 16 has a picture of Mr. Applin, and speaks very highly of his work.

Elmer F. Hock and Mrs. Hock (Mabel Robison, '11) are living at 994 Philadelphia St., W., Detroit, where Hock is still with the Motor Transport Corps, at Washington, D. C, and is living at 2564 University Place. He has not yet

Edmund C. Sauve, formerly in charge of the agricultural engineering department of the University of Wisconsin, Madison, Wis., is now assistant professor in the farm mechanics department at M. A. C.
